Calcutta,

The 11th February 1908.

Irrigation Department, Bengal.

NOTICE

IS hereby given that the right of collection of tolls and fishery in the Gaighatta and Buxee Khal for the next two official years, commencing from 1st April 1908, will be farmed out by public auction at the Public Works (Irrigation Department) Bungalow at Seijberiah, near Ulubaria, on Monday, the 9th March, at 3-30 P.M. The above khal is 7½ miles in length, and is a connecting navigable channel between the Damooda and the Roupnarain rivers in the district of Howrah; the khal is under thorough silt clearance, which will be completed by the 31st March next. For further particulars and conditions of the lease enquire at the Executive Engineer's Office, Northern Drainage and Embankment Division, 13, Kyd Street, Calcutta.

C. ADDAMS-WILLIAMS,
Executive Engineer, Northern
Drainage and Embankment Division.

Calcutta, the 22nd February 1908.

Notification.

THE following Notification is issued as to the conditions under which correspondence and parcels may be sent between India and the Bazar Valley Field Force:—

FROM INDIA TO THE BAZAR VALLEY FIELD FORCE

Mode of addressing correspondence.

Correspondence posted in India for delivery in the field should be addressed as follows:—

A B,
Regiment, Battery, Staff appointment, or Department,
Brigade or Column,
Bazar Valley Field Force.

No post-town should be added to the address, and care should be taken to specify clearly in each case the Regiment, Battery, Staff appointment, or Department of the person addressed. It is of special importance that the Brigade or Column with which the addressee is serving should be entered in all cases. It should be noted that no parcels will be delivered through field post offices.

What may be sent.

Unregistered letters, postcards, newspapers and book-packets (private and service) may be posted in India for delivery in the field.

Prepayment of postage compulsory.

Full prepayment of postage on all articles is compulsory.

N.B.—*Officers Commanding Corps proceeding on Field Service, should warn the troops, followers, etc., to inform their correspondents of the necessity for fully prepaying the postage on all articles.*

Delivery

Articles of the letter mail will be delivered through orderlies.

No Registration, Insurance, Value-payable Post, or Money Orders.

Letters cannot be registered or insured for despatch from India to the field. No article can be accepted for despatch to the field by value-payable post. Money orders will not be issued in favour of payees in the field.

FROM THE FIELD TO INDIA.

What may be sent.

Unregistered letters, postcards, and book-packets may be posted to addressees in India or places abroad Prepayment of postage is optional, but if postage is not fully prepaid the articles will be charged on delivery with double the deficiency under the usual rules. No registered or insured letters, no parcels, and no value-payable articles can be posted.

Money Orders.

Money orders will be issued on India at inland rates of commission Remittances by telegraphic money orders can also be sent on the ordinary conditions.

Savings Bank Deposits.

Savings Bank deposits will be received from all British and Native soldiers and from public and private followers on field service at field post offices for credit, free of charge, to Post Office Savings Bank accounts in India. Soldiers who already have accounts with the Post Office Savings Bank will be required to produce their pass-books when making deposits at field post offices. Savings Bank deposits tendered at field post offices will be subject to the ordinary rules for depositors in Post Office Savings Banks

FROM ONE FIELD POST OFFICE TO ANOTHER.

What may be sent.

Only unregistered letters, postcards, newspapers, and book-packets may be posted at one field post office for delivery from another field post office. *Full prepayment of postage is compulsory.*

OFFICIAL CORRESPONDENCE.

Letters, postcards, and packets can be sent from India to the field at official rates of postage. The full postage must be prepaid in all cases.

Parcels cannot be sent from the field to India, or *vice versâ*, but other official articles can be sent without prepayment of postage. The charge on delivery in India will be made at the prepaid rates.

Service parcels cannot be sent between field offices. Other official articles can be sent between field offices free of all postage, if properly superscribed and franked.

POSTAGE STAMPS.

Postage stamps (including postcards and embossed envelopes) both ordinary and service, can be purchased at any field post office.

Officers Commanding British Regiments and Batteries are recommended to provide themselves with a sufficient stock of one anna soldiers' envelopes, which are not sold at post offices, and to replenish the stock from time to time through the Treasure Chest Officer.

C. STEWART-WILSON,
Director-General of the Post Office of India.

Calcutta, the 14th February 1908.

NOTICE is hereby given that Letters of Administration with copy will and codicil annexed to the property and credits of the deceased above named having, on the 14th day of February 1908, been granted to Charles Henry Kesteven, all creditors and other persons having any claim against the estate of the abovenamed deceased are hereby required to send in writing the particulars thereof to the undersigned on or before the 16th day of March 1908, after which date the assets of the estate of the said deceased will be distributed by the said Charles Henry Kesteven, the Administrator, amongst the parties entitled thereto, having regard to the claims of which he has then had notice. And notice is hereby further given that the said Charles Henry Kesteven will not be liable for the assets or any part thereof so distributed to any person of whose claim he shall not have had notice at the time of such distribution; such notice to be sent to the undersigned.

Dated this 15th day of February 1908.

S. S. HODSON,
Royal Insurance Buildings, Dalhousie Square, Calcutta,
Attorney for Charles Henry Kesteven, Administrator to the estate of the deceased. (173—3—106)

NOTICE.

THE next annual stock-taking of the Indian Law Reports kept at the Bengal Secretariat Book Depôt will commence on the 1st April, 1908. The public are hereby informed that all issues of the said Reports from the said Depôt to subscribers and officials will be suspended during that month.

F. G. WIGLEY,
Secy. to the Bengal Council, and Asst. Secy. to the Govt. of Bengal, Legislative Dept.

LEGISLATIVE DEPT.;
BOOK DEPÔT BRANCH,
The 18th December, 1907.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

PRICES.

THE terms of subscription, and the terms on which current issues and back numbers are sold, are as follows:—

	Without postage.	With Indian postage.	With Foreign postage.
COMPLETE SERIES—	Rs. A. P.	Rs. A. P.	Rs. A. P.

REPRINTS.

THE Complete Series for the years 1876 to 1878, 1882, 1883, 1889, 1892 to 1895 and 1901 to 1907 has been reprinted, and may be purchased at the Bengal Secretariat Book Depôt, Calcutta, either wholly or in part. All Parts required to complete the stock of the Reports for other years are now being reprinted.

Complete Reports from the beginning to date will therefore shortly be available at the Bengal Secretariat Book Depôt.

ADVERTISEMENTS FOR THE CALCUTTA SERIES.

ADVERTISEMENTS of law publications only are received. Rates can be ascertained on application to the Bengal Secretariat Book Depôt.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 26, 1908.

NOTICES TO MARINERS.

THE following Notices are published for general information.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

CALCUTTA, *the 22nd February 1908.*

AFRICA, NORTH-EAST—GULF OF ADEN.

Aden Harbour—Light-ship replaced by a red conical buoy.

No. 71 (first publication).—The Bombay Government has given notice (No. 10 of 1908) that on and after the 1st May 1908 the light-ship at Aden will be removed. It will be replaced by a red conical buoy carrying two red lights, moored in the position at present occupied by the light-ship.

CHINA, EAST COAST—RUGGED ISLANDS.

South-west Horn—Light established—Fog signal intended.

No. 72 (first publication).—With reference to Notice to Mariners No. 297, dated 22nd June 1907, issued by this office, the British Admiralty has given further notice (No. 121 of 1908) that on 8th December an *occulting* light *every twenty seconds*, thus:—light, *ten seconds*; eclipse, *ten seconds*, was established on South-west Horn, Rugged islands. The light, which is dioptric, of the 6th order, is elevated 95 feet above high water, shows *red* from the bearing of N. 67° W., through west, to S. 8° W., and *white* in other directions, except where obscured by the land between N. 31° W. and N. 34° W., the white and red lights being visible in clear weather from distances of 15 and 8 miles respectively; it is shown from a white lantern surmounting a white dwelling, 23 feet from vane to base, erected on the western summit of the island. A fog gun will be established at a later date.

Approximate position, lat. 30° 35¾′ N., long. 121° 58′ E.

(*Variation 2° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Vidoe to cape Yang tse, No. 1124; Kue shan islands to Yang tse kiang, No. 1199; Amoy to Nagasaki, No. 2412; Hong Kong to Liau tung gulf, No. 1262: Also, List of Lights, Part VI, 1907, page 149; and China Sea Directory, vol. III, 1904, page 370.

PACIFIC OCEAN—Philippine islands—Bohol.

Bohol island—Reef reported off north coast.

No. 73 (first publication).—The British Admiralty has given notice (No 122 of 1908) that a reef, which partially dries at low water, is reported to exist off the north coast of Bohol island, in a position from which Maumaun island bears East, distant 2 miles, and Sagasau island N. 19° W.

Approximate position, lat. 10° 10¾′ N., long. 124° 24¾′ E.

This reef, which is about half a mile long in a north-north-westerly and south-south-easterly direction, and a quarter of a mile broad, consists of coral with scattered boulders, with depths of 3 or 4 fathoms between them.

In the passage between this reef and the reef extending eastward from Jau island there are depths of from 5 to 6 fathoms.

(*Variation 1° Easterly in 1908.*)

This Notice affects the following Admiralty Chart :—Sulu or Mindoro sea, No. 2578 : Also, Eastern Archipelago, Part I, 1902, page 291 ; and Supplement, 1906.

PACIFIC OCEAN—The Philippine islands—Samar, south coast.

San Pedro bay—Shoal reported in—.

No. 74 (first publication).—The British Admiralty has given notice (No. 123 of 1908) that a shoal with a least depth of 2¾ fathoms over it, is reported to exist in San Pedro and San Pablo bay in a position from which Punubulu island bears N. 9° W., distant 2$\frac{1}{10}$ miles, and Dio island N. 59° W.

Approximate position, lat. 11° 10′ 35″ N., long. 125° 6′ 35″ E.

This shoal, which is about 60 yards long by 20 yards broad, consists of coral and rock ; there are depths of 10 fathoms around it.

(*Variation 1° Easterly in 1908*)

This Notice affects the following Admiralty Charts :—San Pedro bay to Libukan islands, No. 2987 ; Sulu or Mindoro sea, No. 2578 ; the Philippine islands, No. 2577 : Also, Eastern Archipelago, part I, 1902, page 363.

AFRICA, SOUTH—Cape Colony.

Mossel bay—Alteration in lights.

No. 75 (first publication).—The British Admiralty has given notice (No. 125 of 1908) that the *fixed* light on the jetty head at Aliwal shows *red* between the bearings of S. 22° W. and S. 37° W., and *green* when bearing to the westward of S. 37° W.

Approximate position, lat. 34° 11′ S, long. 22° 9′ E.

Also, that the red fixed light formerly exhibited in Erme bay, about one mile to the westward, has been discontinued.

(*Variation 29° Westerly in 1908.*)

This Notice affects the following Admiralty Chart :—Mossel bay, No. 639 : Also, List of Lights, part VI, 1907, No. 12, and Remarks ; and Africa Pilot, vol III, 1905, pages 105, 107.

CHINA—Yang tse Kiang, South channel.

Tungsha Light-vessel, Fairway Bell, and Tungsha Bank Buoys—Amended positions of—.

No. 76 (first publication).—With reference to Notice to Mariners No., 5 dated 4th January 1907, issued by this office, the British Admiralty has given further notice (No. 146

of 1908) that the undermentioned light-vessel and buoys in the entrance to the Yang tse Kiang are now situated in the following positions:—

(*a*) Tungsha light-vessel is situated in approximately lat. 31° 8′ 0″ N., long. 121° 59′ 50″ E., or about half a mile southward of its position on the chart.

(*b*) The fairway bell buoy is situated in approximately lat. 31° 1′ 35″ N., long. 121° 9′ 0″ E., or about half a mile to the south-westward of the position shown on the chart.

(*c*) The Tungsha banks buoy is situated in approximately lat. 31° 6′ 55″ N., long. 122° 9′ 25″ E., or about half a mile to the southward of the position shown on the chart.

This Notice affects the following Admiralty Charts:—Approaches to the Yang tse Kiang, No. 1602; Kueshan islands to Yang tse Kiang, No. 1199: Also, China Sea Directory, vol. III, 1904, pages 406, 407; and Supplement, 1907.

PACIFIC OCEAN—New Guinea, west coast.

Waigiu island—Bank south-westward of—.

No. 77 (first publication).—The British Admiralty has given notice (No. 147 of 1908) that a bank, with a depth of 6 fathoms over it, exists to the south-westward of Waigiu island, in a position from which Batang Pale island summit bears N. 34° E., distant 10 miles, and Great Fram island summit S. 46° E.

Approximate position, lat. 0° 25½′ S., long. 130° 6½′ E.

(*Variation 2° Easterly in 1908.*)

This Notice affects the following Admiralty Charts:—Australia, northern portion, No. 2759a; Eastern archipelago, No. 942b: Also, Eastern Archipelago, part I, 1902, page 499.

KOREA, SOUTH COAST—Fusan harbour.

Sorio—Lights established.

No. 78 (first publication).—The British Admiralty has given notice (No. 150 of 1908) that a *white fixed* light over a *red fixed* light, elevated respectively 21 and 18 feet above high water, and visible from a distance of 2 miles, has been established on the head of a pier constructed off the Japanese settlement at Sorio, and situated at a distance of 1½ cables N. 42° E. from Sorio green light.

Approximate position, lat. 35° 6′ N., long. 129° 2½′ E.

Also, that a *white fixed* electric light of 1,200 candle power, 30 feet above the ground, has been established at the root of the pier in a position situated at a distance of one cable N. 3° E. from Sorio green light.

(*Variation 4° Westerly in 1908.*)

This Notice affects the following Admiralty Chart:—Fusan harbour, No. 1859: Also List of Lights, part VI, 1907, page 177; and Sailing Directions for Japan, &c., 1904, page 119.

CHINA, NORTH—Yellow sea, Manchurian coast—Elliot (Li chang sau) islands.

Sau Chan Shan Tau—Pinnacle rock in west bay.

No. 79 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No 156 of 1908) is republished:—

Particulars.—A pinnacle rock exists in west bay, Sau chan shan tau.

Position.—From the rock Utini (Black) rock bears N. 24° W., distant 7 cables, and summit (412 feet) of Hill point S. 87° E.

Lat 39° 12½′ N., long. 122° 40′ E.

Depth.—1½ fathoms.

Remarks. There are depths of 7 fathoms around this rock

Variation.—4° W.

Charts affected.—No. 3388, Terminal head to Hai yung tau.

No. 1256, Pe chili and Liau tung gulfs.

Publications.—China Sea Directory, vol. III., 1904, page 582.

Authority.—Tokyo Notice, No. 1107 of 1907.

JAPAN—Naikai (Inland sea).

Hiroshima wan—Rock in—.

No 80 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 157 of 1908) is republished :—

Particulars.—A rock exists in the northern part of Hiroshima wan.
Position.—From the rock, the eastern point of Nino shima bears N. 7° E, distant $9\frac{1}{10}$ cables, and Yakata ishi light beacon S. 80° E.

Lat. 34° 18′ N., long. 132° 26½′ E.

Depth.—1½ fathoms.
Remarks.—There are depths of from 2½ to 3 fathoms at a distance of about half a cable around the rock.
Variation.—4° W.
Chart affected.—No. 3469, Hiroshima wan.
Publications.—Sailing Directions for Japan, &c., 1904, page 486; and Supplement, 1906.
Authority.—Tokyo Notice, No. 1110 of 1907.

KOREA, SOUTH-WEST COAST—Myangoru islands.

Chu do (Bamboo island)—Light and fog signal established.

No. 81 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 158 of 1908) is republished :—

Particulars.—On 25th December 1907, the provisional white fixed light on Chu do (Bamboo island), Myangoru islands, would be replaced by a permanent light and fog signal as given below :—

Position.—Lat. 34° 13½′ N., long. 125° 51′ E.
Character.—*White group flashing* showing groups of three flashes in succession *every forty seconds*, thus :—

Group of three flashes	...	*Fifteen seconds.*
Eclipse ...	...	*Twenty-five seconds.*

Elevation.—276 feet.
Visibility.—23 miles.
Remark.—The light is obscured from N. 5° W. to N. 33° W.
Variation.—4° W.
Description of Building.—Concrete cylindrical tower, painted white, the centre of the lantern being 20 feet above the ground.
Order or Power.—Third order.
Fog Signal.—Fog siren giving, by compressed air, *one blast every thirty-five seconds*, thus :—

Blast ...	...	*Five seconds.*
Silent interval	...	*Thirty seconds.*

Charts affected.—No. 3365, South-west coast of Korea.
„ 104, Korean archipelago.
„ 3480, Shantung to Nagasaki.
„ 1262, Hong Kong to Liau tung gulf.
„ 2347, Nipon Kiusiu, &c.

Publications.—List of Lights, part VI, 1907, No. 923.

Sailing Directions for Japan, &c, 1904, page 81; and Supplement, 1906.

Notice to Mariners No. 1204 of 1905 (*this office No. 487 of 12th December 1905*).

Authority.—Seoul Notice, No. 28 of 1907.

JAPAN—NIPON (HONSHU), SOUTH COAST.

Hamashima ko—Shoals in approach; also not-existence of shoal.

No. 82 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 159 of 1908) is republished :—

Particulars.—The undermentioned shoals exist in the approcah to Hamashima ko, as follows :—

a. Name.—Watari Kuromi.

Position.—From the shoal, Ko shima summit bears S. 25° W., distant $3\frac{6}{10}$ cables, and Mugi saki N. 82° E.

Koshima, lat. 34° 14′ N., long. 136° 49½′ E.

Depth.—1½ fathoms.

Remarks.—There is a depth of 1¾ fathoms at a distance of four-tenths of a cable N. 13° E. from this shoal.

b. Name.—Nishi Kuromi.

Position.—From the shoal Koshima summit bears S. 13° W., distant $3\frac{6}{10}$ cables, and Mugi saki N. 84° E.

Depth.—2¼ fathoms.

Remarks.—There is a depth of 2¾ fathoms at a distance of four-tenths of a cable N. 41° W. from this shoal.

c. Remarks.—The shoal reported by the Master of the S.S. *Yamoto Maru* to exist in the approach to Hamashima ko, situated at a distance of about 3 cables N. 43° E., from Koshima, has been searched for without finding any indication of danger. This shoal has therefore been erased from the charts.

Variation.—4° W.

Charts affected.—No. 994, Yeboshibana to Anori saki, 952. Owasi bay to Takamatsu no saki.

Publications.—Sailing Directions for Japan &c., 1904, page 341 ; and Supplement, 1906 Notice to Mariners No. 1354 of 1907 (*this office No. 486 of 2nd November 1907*).

Authority.—Tokyo Notice, No. 1109 of 1907.

BAY OF BENGAL—BURMA COAST.

Caution—The Terribles—Mud volcanic eruption.

No. 83 (first publication).—A telegraphic communication, dated 20th February 1908, has been received from the officer in charge Marine Survey of India, intimating that a mud volcano in active eruption, with 4½ fathoms over it at present, has been discovered in the vicinity of The Terribles.

Position.—Lat. 19° 25′ N.

Long. 93° 14′ E.

Bearing from South Terrible N. 58° W., true, distant 2 miles.

Masters of vessels are requested to avoid this locality.

AUSTRALIA—TORRES STRAIT.

Inner route to Torres strait—Pea (P) reef—Beacon down.

No. 84 (first publication).—The Port Master, Brisbane, has given notice (No. 2 of 1908) that the Beacon on the Eastern Extremity of Pea (P) Reef is down. The beacon will be re-erected as soon as practicable.

Chart affected, No. 2921; Australia Directory, vol. II.

AUSTRALIA—Torres strait.

Prince of Wales Channel—Ipili reef—Beacon down.

No. 85 (first publication).—The Port Master, Brisbane, has given notice (No. 1 of 1908) that the Red Triangular Beacon marking Ipili Reef is down. It will be re-erected as soon as practicable.

Charts affected, Nos. 447, 2354 and 2357; Australia Directory, vol. II.

INDIA, WEST—Bombay coast.

Bombay Harbour—Elephanta Spit buoy shifted northward.

No. 63 (second publication).—The Bombay Government has given notice (No. 8 of 1908) that the Elephanta Spit buoy in Bombay Harbour is shifted 2¾ cables north of its present position and now watches in 9 feet at low water ordinary spring tide.

This Notice affects the following Admiralty Charts:—Bombay Harbour, No. 2621: Arnlale Island to Kundari Island, No. 737: Also, West Coast of Hindoostan Pilot, 1898, pages 203 and 215.

JAPAN—Kiusiu, north-west coast.

Kure and Sasebo—Time Balls discontinued.

No. 64 (second publication).—The British Admiralty has given notice (No. 93 of 1908 that the Time balls at Kure and Sasebo have been discontinued.

Approximate position, Kure, lat. 34° 14′ N., long. 132° 33′ E.

Approximate position, Sasebo, lat. 33° 10′ N., long. 129° 43′ E.

This Notice affects the following Admiralty Chart:—Io jima to Madara jima, No. 2387: Also, List of Time Signals, 1904, Nos. 179 and 180; and Sailing Directions for Japan, Korea, 1904, pages 487 and 589.

KOREA EAST COAST—Korean gulf.

On shan tin (Gensan) light—Sectors altered.

No. 65 (second publication).—With reference to Notice to Mariners No. 184, dated 27th April 1907, issued by this office, the British Admiralty has given further Notice (No. 112 of 1908) that, on 25th November 1907, the sectors of Chotoku to light (*fixed*), in On shan tin, or Gensan bay, would be altered to show as follows:—*red* from the bearing of N. 49° W. to N. 33° W.; *white* from N. 33° W., through north and east, to S. 73 E.; *red* from S. 73° E. to S. 68° E., and *white* from S. 68° E, through south and west, to N. 49° W.

Approximate position, lat. 39° 10¾′ N., long. 127° 26½′ E.

(*Variation 6° Westerly in 1908.*)

This Notice affects the following Admiralty Chart:—Port Lazaref, No. 3037: Also, List of Lights, part VI, 1907, page 179; and Sailing Directions for Japan and Korea, &c., 1904, page 136.

JAPAN—Hokushu (yezo), south coast.

Goyomai saki—Rock south-west ward of—,

No. 66 (second publication).—The British Admiralty has given notice (No. 113 of 1908) that a rock, with a depth of about 2 fathoms over it at low water, is reported to exist south-westward of Goyomai saki, situated in a position from which the rock off Goyomai village (about 8 cables S. 69° W. from Goyomai jima) bears N. 25° W., distant 3$\frac{8}{10}$ cables, and Goyomai jima N. 14° E.

Approximate position, lat. 43° 20¾ N., long 145° 47½′ E.

(*Variation 5° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Plan of Goygomai channel on No. 1268: Goyomai channel to Yezo strait, No. 507: Also, Sailing Directions for Japan, &c., 1904, page 737.

JAPAN—KIUSIU, SOUTH COAST.

Kagoshima Harbour—Lights established.

No. 67 (second publication).—The British Admiralty has given notice (No. 114 of 1908) that on 15th December the undermentioned lights would be established in Kagoshima harbour:—

(*a*) A *red fixed* light, elevated 30 feet above high water, and visible from a distance of 4 miles, would be exhibited from a white wooden staff erected on the islet known as Bentendaiba.
Approximate position, lat. 31° 35′ 35″ N., long. 130° 33′ 30″ E.

(*b*) A *green fixed* light, elevated 30 feet above high water, and visible from a distance of 4 miles, would be exhibited from a white wooden staff erected on a wharf known as Shinhatoba.

Approximate position, lat. 31° 35′ 51″ N., long. 130° 33′ 40″ E.

This Notice affects the following Admiralty Chart:—Kagoshima harbour, No. 372; Also, List of Lights, part VI, 1907, page 185; Sailing Directions for Japan, &c., 1904, page 520; and Supplement, 1906.

PACIFIC OCEAN—NORTH-WEST.

Caution—Floating mine seen.

No. 68 (second publication).—The British Admiralty has given notice (No. 115 of 1908) that on 13th November 1907, a floating mine is reported to have been seen by a vessel on a voyage between Kobe, Japan, and San Francisco, United States, in approximately lat. 38° 16′ N., long. 170° 8′ E. Mariners are cautioned accordingly.

This Notice affects the following Admiralty Charts:—Kamchatka to Kadaik island, No. 2460; Pacific ocean, No. 2683: Also, Pacific Islands, vol. III, 1900, page 253.

JAPAN—NIPON (HONSHU), EAST COAST.

Todo Zaki lighthouse—Auxiliary light established.

No. 69 (second publication).—The British Admiralty has given notice (No. 116 of 1908) that on and after 15th December 1907, a *red fixed* light, elevated 109 feet above high water, and visible in clear weather from a distance of 15 miles from the bearing N. 12° W. to N. 1° W. over One Sho, would be established in a window below the main light on Todo Zaki.

Approximate position, lat. 39° 32¾′ N., long. 142° 5′ E.

(*Variation 5° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Yamada Ko, No. 210; Sendai bay to Miyako bay, No. 806; Sendai bay to Tsugaru strait, No. 3409: Also, List of Lights, part VI, 1907, No. 1082; and Sailing Directions for Japan, &c., 1904, page 403.

BAY OF BENGAL—BURMA COAST.

Caution—Foul island—Violent eruption in—.

No. 70 (second publication).—A telegraphic communication, dated 10th February 1908, has been received from the Principal Port Officer, Burma, stating that Foul island was in violent eruption on the 6th February 1908.

Mariners are hereby warned.

INDIA, WEST—BOMBAY COAST.

Jaigarh light—Character altered.

No. 51 (third publication).—With reference to Notice to Mariners No. 562, dated 20th December 1907, issued by this Office, the Bombay Government has given further notice

(No 6 of 1908) that the occulting gear of the Jaigarh outer light has been repaired and the normal character of the light restored (white occulting every twenty-five seconds) from the 9th January 1908.

This Notice affects the following Admiralty Charts:—Indian Ocean, No. 748(b); Arabian Sea, No. 1012; Karachi to Vengurla, No. 826; Gulf of Cutch to Viziadrug, No. 2736; Baria Pagoda to Achra River, No. 739; Jaigarh, No. 247: Also, List of Lights, Part VI, 1907, No. 250; and West Coast of Hindustan Pilot, 1898, page 181; and Supplement, 1903, page 15.

CEYLON—South coast.

Point de Galle harbour—Buoys established.

No. 54 (third publication).—With reference to Notices to Mariners Nos. 302, 324 and 364, dated respectively the 22nd June, 5th July and 3rd August 1907, issued by this Office, the British Admiralty has given further notice (No. 43 of 1908) that the Government of Ceylon has established the undermentioned buoys in Point de Galle harbour as follows:—

1. A green spherical buoy, marked "Wreck," has been moored to the southward of the wreck of the *Secundra*, situated in a position from which Watering point tower bears N. 72° E., distant $6\frac{7}{10}$ cables, and Galle lighthouse N. 36° W., in place of the two red buoys, which have been withdrawn.
2. A black spherical buoy has been moored near Sealark rocks (Inner Kadda), situated in a position from which Galle lighthouse bears N. 33° W., distant $5\frac{6}{10}$ cables, and Watering point tower N. 81° E.
3. A red spherical buoy has been moored about half a cable west north-westward of Bloomfield rock, situated in a position from which Galle lighthouse bears N. 49° W, distant $5\frac{7}{10}$ cables, and Watering point tower N. 88° E.

Approximate position, Galle lighthouse, lat. 6° 1½′ N., long. 80° 12½′ E.

(*Variation 1° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Point de Galle harbour, No. 820; approaches to point de Galle, No. 819: Also, Bay of Bengal Pilot, 1901, page 85; and West Coast of Hindustan Pilot, 1898, page 83.

EASTERN ARCHIPELAGO—Celebes, west coast.

Tambu bay—Reef in —.

No. 55 (third publication).—The British Admiralty has given notice (No. 44 of 1908) that a reef, with a depth of 2 fathoms over it, exists about 1½ miles to the south-westward of Sibaju, Tambu bay, in approximately lat. 0° 5½′ N., long. 119° 51½′ E.

This Notice affects the following Admiralty Chart:—Strait of Makassar, No. 2636: Also Eastern Archipelago, part II, 1904, page 323.

PACIFIC OCEAN—Philippine Islands—Mindanao, north-east coast, Guntuan passage.

Rasa—Light established.

No. 56 (third publication).—With reference to Notice to Mariners No. 550, dated the 14th December 1907, issued by this office, the British Admiralty has given further Notice (No. 55 of 1908) that a *red fixed* lantern light, elevated 10 feet above high water, and visible from a distance of 7 miles from the bearing of S. 54° W., through west and north, to S. 35° E., has been established on a concrete pedestal erected on the reef extended southward from an island named Rasa Guntuan passage, north-eastern coast of Mindanao.

Approximate position, lat. 9° 48′ N., long. 125° 34½′ E.

This Notice affects the following Admiralty Chart:—Sulu or Mindoro sea, No. 2578: Also, List of Lights, Part VI, 1907, page 113; and Eastern Archipelago, Part I, 1908, pages 305, 307.

PACIFIC OCEAN—PHILIPPINE ISLANDS—LUZON, EAST COAST.

San Miguel bay—Buoy established.

No. 57 (third publication).—The British Admiralty has given Notice (No. 56 of 1908) that a red spar buoy has been moored in a depth of 3 fathoms to mark the anchorage of Bicol river in San Miguel bay, in a position situated about 6 miles to the westward of Kahuit island, in approximately lat. 13° 49′ 30″ N., long 123° 7′ 30″ E.

Anchorage in from 3 to 4 fathoms is to the northward of this buoy.

This Notice affects the following Admiralty Chart:—St. Bernardino and Mindoro sea, No. 2577: Also, Eastern Archipelago, Part I, 1902, page 376.

JAPAN—ISLANDS OFF THE SOUTH COAST.

Nii sima—Rocks off.

No. 58 (third publication).—The British Admiralty has given Notice (No. 63 of 1908) of the existence of a reef named Asane, which dries 4 or 5 feet at low water, situated at a distance of about $2\frac{4}{10}$ miles S. 48° W. from the northern point of Nii sima. This shoal is about 80 yards long north-east and south-west and 30 yards broad.

Approximate position on chart No. 996, lat. 34° 23$\frac{1}{2}$′ N., long. 139° 15$\frac{3}{4}$′ E.

Also, of the existence of a rock, elevated about 5 feet above high water, situated at a distance of about $6\frac{3}{4}$ cables S. 42° E., from the northern point of Nii sima.

NOTE.—According to the latest Japanese chart, Dzunan or Southern islands (relatively to To sima, the northernmost island of the group) are shown on the Admiralty chart about one mile too far to the eastward of their correct positions.

(Variation 4° Westerly in 1908.)

This Notice affects the following Admiralty Charts:—Kii channel to Tokio, No. 996; Nipon and Kiusiu, &c., No. 2347: Also, Sailing Directions, Japan, 1904, page 382.

AUSTRALIA, SOUTH—GULF OF ST. VINCENT.

Port Adelaide, Semaphore Anchorage—Mooring buoy withdrawn.

No. 59 (third publication).—The British Admiralty has given notice (No. 76 of 1908) that on 15th December the "mooring buoy for large steamers" formerly situated with the red lights in line in Semaphore anchorage, Port Adelaide, would be withdrawn.

Approximate position, lat. 34° 50′ S., long. 138° 28′ E.

This Notice affects the following Admiralty Charts:—Port Adelaide, No. 1750; approaches to Port Adelaide, No. 1752: Also, Australia, vol. I, 1907, page 331.

JAPAN SEA, WESTERN SHORE—WEST COAST.

Caution—Korean and Manchurian Coasts—Floating mines.

No. 60 (third publication).—The British Admiralty has given notice (No. 79 of 1908), that floating mines have been seen and exploded by coasting vessels between Gensan and Vladivostock. Mariners are cautioned accordingly.

This Notice affects the following Admiralty Chart—Pacific, No. 2459: Also, Sailing Directions for Japan, &c., 1904: page 136, et seq.

BAY OF BENGAL.

Caution—S.S. "Tara"—Report of an abandoned cargo lighter.

No. 61 (third publication).—The Master of the S.S. *Tara* reports having passed the hull of a cargo lighter in the following position :—

Latitude 19° 32′ 0″ N.
Longitude 89° 54′ 30″ E.

Mariners are hereby warned.

BAY OF BENGAL—BURMA COAST.

Krishna shoal—Temporary light-vessel withdrawn.

No. 62 (third publication).—With reference to Notice to Mariners No. 545, dated 7th December 1907, issued by this Office, a further telegraphic communication has been received from the Principal Port Officer, Burma, intimating that the light vessel *Kalagouk* will resume her position at Krishna shoal on or about the 10th February 1908 when the temporary vessel will be withdrawn.

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1907-1908.

No. 836B., dated Calcutta, the 11th February 1908.

From—PANDIT RAMA BALLABHA MISRA, M.A., Secretary to the Board of Revenue, L. P., Mis. Revenue Dept,

To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to submit the following report on the state of the salt market for the third quarter of the year 1907-1908, comprising the months of October, November, and December 1907.

Member in charge:
THE HON'BLE MR. W. C. MACPHERSON, C.S.I.

2. The quantity of salt of every description cleared during the quarter amounted to 26,65,577 maunds, as compared with 21,48,940 maunds* in the previous quarter, and 28,33,025 maunds in the corresponding quarter of the previous year. The net amount of duty levied thereon was Rs. 24,38,337, as against Rs. 22,10,259* in the previous quarter, and Rs. 38,33,752 in the corresponding quarter of the previous year.

Revised figures.

3. The subjoined Table I shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, as compared with the figures of the corresponding quarters of the two previous years :—

TABLE I.

WHENCE IMPORTED.	1905-1906.		1906-1907.		1907-1908.	
	Third quarter.		Third quarter.		Third quarter.

Phœnix	.....	.....	.....	.....	.....	50,775
Total ...	24,18,489	26,50,549	29,91,105	28,05,586	31,87,315	26,34,957

Compared with the corresponding quarter of the previous year and the same quarter of 1905-1906, importations were greater by 6·6 per cent. and 31·8 per cent., respectively, but clearances were less by 6·08 and ·59 per cent.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter, as compared with the preceding four quarters :—

TABLE II.

WHERE STORED.	Third quarter of 1906-1907.	Fourth quarter of 1906-1907.	First quarter of 1907-1908.	Second quarter of 1907-1908.	Third quarter of 1907-1908.
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	Mds.
Sulkea Government Salt golas	13,60,223	7,13,961	6,01,707	17,86,041	19,00,880
Kidderpore Dock ditto	6,33,557	4,62,149	1,30,787	5,37,226	5,33,967
Chandbali (private bonded salt warehouses) ...	17,200	9,200	11,200	8,680	11,700
Total ...	20,29,979	11,85,310	9,43,704	23,53,947	24,46,317

The stocks remaining in the golas at the close of the quarter were greater than in any of the previous four quarters.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director-General of Commercial Intelligence when they are available.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar was *nil* as against 405 maunds, both in the previous quarter and in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter amounted to 1,863 maunds, as compared with 3,922 maunds in the previous quarter, and 2,144 maunds in the corresponding quarter of the previous year.

8. The shipments of Liverpool salt during the quarter for the port of Calcutta, according to the published market reports, amounted to 39,000 tons. It is reported that there is no direct steamer bringing salt from Hamburg at the present time, but that the S. S. *Trifels* left Antwerp on the 5th

December 1907 with 2,500 tons salt, some of which is now being discharged at Rangoon, and that it is not yet known what quantity will be discharged from this steamer at Calcutta.

9. Table III shows the average wholesale prices* per 100 maunds of Liverpool Salt and other descriptions of salt during each fortnight of the quarter : —

TABLE III.

DESCRIPTION OF SALT.	Fortnight ending 15th October 1907.	Fortnight ending 31st October 1907.	Fortnight ending 15th November 1907.	Fortnight ending 30th November 1907.	Fortnight ending 15th December 1907.	Fortnight ending 31st December 1907.

Bombay *ditto*	50 0 0	49 0 0	48 0 0	47 14 0	48 0 0	48 3 2
Rock *ditto*	.....	.....	.....	.....	56 0 0	.....
Aden crushed	44 0 0	43 11 2	43 12 0	43 3 3	41 12 0	40 0 0
Salif ditto	45 0 0	43 13 7	41 9 1	40 13 1	40 0 0	39 11 0

During the quarter the prices of all descriptions of salt fell as compared with those of the previous quarter. No imports of Madras salt were made into the port of Calcutta during the quarter.

10. The quantity of sea-imported salt admitted into, and cleared from, bond at the inland warehousing station of Chandbali in the district of Balasore, during the quarter and the corresponding quarter of the previous year, is given below :—

DESCRIPTION OF SALT.	ADMITTED INTO BOND.		CLEARED.	
	Third quarter of 1906-1907.	Third quarter of 1907-1908.	Third quarter of 1906-1907.	Third quarter of 1907-1908.
1	2	3	4	5
	Mds.	Mds.	Mds.	Mds.
English *panga*	36,200	34,200	37,439	30,620

As compared with the corresponding quarter of the previous year, there was an increase both in the quantity admitted into bond and in that cleared.

11. The quantity of Madras and Bombay salt imported inland and consumed in each of the districts of the Orissa Division, including the Tributary States, during the quarter and the previous two quarters, is shown below :—

NAME OF DISTRICT.	MADRAS SALT.			BOMBAY SALT.			REMARKS.
	First quarter of 1907-1908.	Second quarter of 1907-1908.	Third quarter of 1907-1908.	First quarter of 1907-1908.	Second quarter of 1907-1908.	Third quarter of 1907-1908.	
1	2	3	4	5	6	7	8

Cuttack	2,84,404	1,86,598	2,51,606	21,514	567	5,011	
Balasore	87,463	61,796	73,401	.....	.....	.....	
Puri				.....	.....	.....	
Total ...	3,71,867	2,18,394	3,25,007	21,514	567	5,011	

* These prices are exclusive of Port Commissioners' Special Toll of annas 4 per ton and Customs duty of Re. 1 per maund.

PRELIMINARY FORECAST OF THE OILSEED CROPS OF BENGAL, 1907-08.

THE following note is published for general information.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

The 19th February 1908.

DEPARTMENT OF AGRICULTURE, BENGAL.

PRELIMINARY FORECAST OF THE OILSEED CROPS OF BENGAL, 1907-08.

(On an average of the five years ending 1905-06, the areas under linseed, rape and mustard and *til* in the territory to which this forecast relates have represented some 22·8, 18·1 and 5·9 per cent., respectively, of the total area under these crops in British India.)

Explanatory.—This forecast deals with the preliminary estimates of the area and outturn of the various kinds of oilseeds, both *rabi* and *bhadoi*, grown in this Province. The chief crops are mustard, rape (*rai*), sesamum (*til*), linseed, castor and niger oilseed (*sirguja*). Mustard and rape occupy 38 per cent. of the total area under oilseeds and linseed 32 per cent. The greatest mustard and rape producing districts are the Sonthal Parganas, Purnea, Darbhanga, Khulna and Jessore. Linseed is grown chiefly in the Patna Division and in the district of Bhagalpur. Most of the *til* crop comes from Sambalpur, Hazaribagh, Midnapur and Jessore.

Character of the season.—Through the failure of the monsoon in September and the total want of rain in October and November much of the land normally under oilseeds could not be sown and the early growth of the seed which germinated was stunted. The rain in December and January improved prospects, but came too late to render further sowings possible. The season, therefore, has been a very bad one for the oilseed crops.

Area sown.—The normal estimated area under the different oilseed crops is 2,469,300 acres, but the area actually sown this year is only 1,611,700 acres, nearly 600,000 acres less than last year.

Outturn.—Of the 25 districts with a normal area of over 20,000 acres, Darbhanga estimates 85 per cent., Bhagalpur 74 per cent. and Cuttack 72 per cent. of a normal crop. Three districts report an estimate of over 60 per cent. (Midnapur, Purnea and Khulna). Ten districts estimate from 50 to 60 per cent. and 10 districts less than 50 per cent. The worst crops are in Nadia (33 per cent), Sambalpur (30 per cent.), Jessore (28 per cent.,) Hazaribagh and Ranchi (25 per cent.), and Palamau (13 per cent.). According to these district estimates the total outturn of the different kinds of oilseeds for the Province amounts to 57 per cent. of a normal crop.

W. R. GOURLAY,
Offg. Director of Agriculture Bengal.

CALCUTTA,
The 14th February 1908.

First Forecast of the Oilseed Crops of Bengal, 1907-08.

District.	Total area of the district.	Total area estimated to be under cultivation.	Name of oilseed.	Approximate normal area under oilseeds.	Approximate area sown last year (1906-07). Remarks by local officers.
A brief statement regarding the weather and general condition of the crops and whether the date of sowing was this year early, normal or late.
14
The condition of the crops is unsatisfactory owing to unfavourable weather. The date of sowing was normal.
The weather was not favourable. There was no rain at the time of sowing. Some of the oil-seed lands have been sown with other *rabi* crops. Hence the decrease in the area. The date of sowing was normal.
The weather was not favourable to the cultivation of oilseed crops. The date of sowing was normal this year. The decrease in the outturn of rape, mustard and *rabi-til* has been due to insufficient rain at the time of sowing. The figures in Column 6 have been revised.

Angul ...	1,075,140	252,400	Rape and mustard	7,200	8,000	1,500	80	50	The Sadar subdivision of Angul was cadastrally surveyed in 1898-99. The area under each crop was not separately shown.	...	...	...	End of October	The date of sowing was late. The weather was very unfavourable to all the crops.

SPECIAL ARRANGEMENTS FOR THE CARRIAGE OF FODDER BY RAILWAY TO TRACTS AFFECTED BY THE PRESENT SCARCITY

NOTICE.

AT pages 80-82 of the Supplement to the *Calcutta Gazette* of the 16th January 1908, was published a Circular of the Government of India in the Department of Revenue and Agriculture, No. 39—41-11, dated the 27th December 1907, with annexures, intimating that arrangements had been made for the transport of fodder by railway at reduced rates to certain tracts affected by the present scarcity, with the object of preventing serious mortality amongst cattle. At the instance of the Government of Bombay the concession has since been extended to the Ahmedabad, Kaira, Panch Mahals, and East and West Khandesh districts and the Baroda State in the Bombay Presidency, which border on Rajputana and Central India.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 24th February 1908.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee		Character of the weather and state and prospects of the crops, etc
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	Nil	7½	7¾	Pressing of sugarcane and gathering of potatoes continuing. Prices of food-grains almost stationary. Cattle-disease reported from Manteshwar thana. Fodder and water sufficient.
2	BIRBHUM ...	Nil	7½	7½	Food-grains sufficient at present. Apprehension of scarcity from March or April. Sugarcane-pressing continuing. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	7½	7½	Weather seasonable. Harvesting of *rabi* crops begun. Five test-works attended on last day ending 21st by 754 men, 425 women and 19 children (total 1,198) No cattle-disease. Fodder and water sufficient. Condition of agricultural stock fairly good. Common rice selling at 6 to 7 seers in the affected tracts.
4	MIDNAPORE ...	Nil	6	6	*Rabi* crops and sugarcane being sown. Prospects of *rabi* crops fair; generally good in Ghatal. Scarcity reported from thanas Egra and Ramnagar. Fodder and water sufficient.
5	HOOGHLY ...	Nil	7½	6¾	Weather seasonable. Stocks of food-grains sufficient till next harvest. Prices of food-grains stationary. No likelihood of scarcity. Sugarcane and *rabi* crops progressing favourably. Sugarcane-pressing continuing. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	Nil	8	8	Sky clear. Prospects of standing crops fair. Transplantation of *boro* paddy nearly over. Stocks of food-grains sufficient till next harvest. Prices generally stationary. Condition of agricultural stock good. Fodder and water sufficient. No apprehension of scarcity. Common rice selling on the average at 7 seers a rupee.
7	24-PARGANAS	Nil	7	7	Weather seasonable. Harvesting of *rabi* crops nearly over. Pressing of sugarcane continuing in Basirhat. Common rice selling at 7 seers at Barrackpore, 6¾ seers at Baraset, 7½ seers at Basirhat and 7⅛ seers at Diamond Harbour.
8	NADIA ...	Nil	6¾	6⅞	Prospects of standing *rabi* crops not favourable. Ploughing of lands going on. Prices of staple food-grains risen. Stocks of food-grains insufficient. Scarcity apprehended. Condition of agricultural stock good. Fodder and water barely sufficient.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
9	Murshidabad	Nil	7¼	6½	Prospects of *rabi* crops unfavourable in Lalbagh and Jangipur, but prospects of *rabi* crops, mulberry and oilseeds improved a little in Kandi subdivision. Lands being ploughed for the next paddy crop in Lalbagh and Kandi. Stocks of food-grains not likely to be sufficient till the next harvest. Condition of agricultural stock fair. Sugarcane cutting and pressing and *boro* planting in full swing in Kandi Scarcity apprehended in places in Kandi. No cattle-disease. Fodder sufficient except in places in the Sadar subdivision. Water insufficient.
10	Jessore ...	Nil	7⅞	7⅛	Weather seasonable. Condition of standing *rabi* crops not favourable. Rain wanted for cultivation. Stocks of food-grains sufficient at present. Scarcity apprehended by April next. Condition of agricultural stock good. High prices continuing. No cattle-disease. Fodder and water sufficient.
11	Khulna ...	Nil	9	9	Weather seasonable. Prices of staple food-grains stationary. Stocks of food-grains sufficient till the next harvest. No apprehension of famine or scarcity at present. Condition of agricultural stock good. No cattle-disease. Fodder and water sufficient.
12	Patna ...	Nil	{ 8 / 10½* }	{ 8 / 9½* }	Weather seasonable. *Rabi* crops ripening. Sugarcane being planted. Sowing of *china* continuing. Sugarcane-pressing going on. Prices almost stationary, and stocks likely to be sufficient if not largely exported. No cattle-disease. Fodder and water available.
13	Gaya ...	Nil	{ 7 5/16 / 8½* }	{ 6½ / 8* }	Weather seasonable. Prospects of standing *rabi* crops and oilseeds good. Pressing of sugarcane going on in places. Prices fallen at the Sadar and Nawadah subdivisions, stationary elsewhere. Cattle-disease reported from one village in Nawadah and three in Aurangabad subdivision. Fodder and water for cattle sufficient.
14	Shahabad ...	Nil	{ 8 / 8* }	{ 8 / 8½* }	Standing *rabi* crops doing well Peas and *masur* being harvested. Sugarcane-pressing going on. Sowing of sugarcane commenced. Prices of food-grains stationary. Stocks under normal, but sufficient if not exported. Condition of agricultural stock normal. Number of persons working on District Board test-works at Sabar fallen (on 21st instant) to 64. Number relieved at Chinari kitchen on last reported date 45. Cattle-disease reported from Rajpur thana. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

34	Cooch Behar	Nil	$8\frac{7}{10}$	$9\frac{13}{11}$	Weather hot during the day and cold at night. Prospects and condition of standing crops favourable. No apprehension of scarcity or famine. Fodder and water sufficient.
35	Feudatory States, Orissa.*	...	...	...	Rainfall *nil*. Pressing of sugarcane going on in Bonai, Ranpur, Nayagarh, Boad, Patna and Kalahandi. Harvesting of gram taken in hand in Boad Reaping of *kulthi* and *rasi* nearly completed in Ranpur. *Mung*, mustard and gram growing in Nayagarh. Castor and *mung* doing well in Ranpur. Agricultural stock sufficient. Fodder and water sufficient. Price of rice ranging from 8 seers in Bonai and 9 seers in Bamra to 13 seers in Patna and 16 seers in Pal Lahera.

* The report is for the week ending the 15th February 1908.

General Summary.—There was no rain in the Province during the week. Harvesting of pulses and of mustard is going on. Sugarcane-pressing still continues. Cultivation of lands for the *bhadoi* crops is in progress, but rain is yet wanted in Jessore, Cuttack and Singhbhum. In the last two districts ploughing is being impeded for want of moisture in the soil. Planting of sugarcane is going on in Bihar. Transplantation of *boro* rice is nearly finished. The present condition and prospects of the *rabi* crops are generally good in Bihar and fair in the rest of the Province, Nadia, Murshidabad, Jessore and parts of Balasore excepted. The price of common rice has fallen in Hooghly, Murshidabad, Jessore, Gaya, Saran, Champaran, Muzaffarpur, Bhagalpur, Cuttack and Puri, has risen in Nadia, Darjeeling, the Sonthal Parganas, Singhbhum and Cooch Behar and has been stationary in the remaining districts. Stocks of food-grains are insufficient in Nadia, Murshidabad, Palamau and in the Deoghur subdivision of the Sonthal Parganas Scarcity is apprehended in the Egra and Ramnagar thanas of Midnapore, in Nadia, in the Kandi subdivision of Murshidabad and in Palamau and later on in Birbhum, Jessore and in parts of Manbhum Cattle-disease Prevails in Burdwan, Gaya, Shahabad, Cuttack, Puri, Sambalpur, Ranchi, Palamau and Manbhum. The fodder and water supply is scarce in parts of Murshidabad and Balasore only. The test-works in Bankura, Shahabad, Cuttack, Balasore, Puri and Ranchi were attended by 3,219 persons. Gratuitous relief was given to 16,540 persons in Shahabad, Cuttack, Balasore and Puri.

Dept. of Agriculture, Bengal,
Calcutta, the 25th February 1908.

(f) Indeterminate.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND IN EASTERN BENGAL AND ASSAM FOR THE MONTH OF DECEMBER 1907.

At the end of the preceding month an area of low pressure formed in the Central Provinces, and moving eastwards across the head of the Bay into Burmah disappeared on the 5th of the month under report. Under the influence of this depression a few falls of rain occurred on the 2nd and 3rd and cloud developed over the whole reporting area. During the remainder of the week ending on the 5th no rain fell and skies were clear or only lightly clouded. Temperature was normal or in excess up to the 2nd, the excess being shown chiefly at night in Orissa and Chota Nagpur, but on the 3rd the cold wave advancing across India in the rear of the depression, together with the disappearance of cloud, caused a rapid fall of temperature, which for the rest of the week was normal or in defect. During the week ending on the 12th weather in the Bay was affected by a cyclonic storm, which formed in the south of the Bay on the 3rd moving slowly towards the north of the Madras Coast and disappearing without passing inland on the 9th. Weather was unsettled over North-East India, and there was nearly general rain in Bengal and Chota Nagpur and local rain in Orissa on the 12th. The cloud that was fairly general towards the end of the week was the cause of unusually high night temperatures During the week ending on the 19th nearly general rain fell on the 13th except in the north-western districts. Skies cleared over the greater part of the division on the same day and were free from cloud for the rest of the week, except on the 17th when light cloud was reported. The rainfall caused a rapid fall of temperature and in Chota Nagpur temperature continued low up to the 19th, but in other parts of North-East India it was nearly normal after the 14th. During the week ending on the 26th a few light falls of rain occurred on the 21st in the northern districts and on the 22nd on the eastern border of the division. Skies were clear except on the days of rainfall and temperature was approximately normal. During the last week of the month no rain was reported and skies were clear except for light cloud at a few stations in Assam on the 31st. Minimum temperature was low in parts of the western districts, but apart from this temperature conditions were fairly normal.

Summary of Temperature.—Temperature was in slight defect in Orissa and Chota Nagpur, but elsewhere conditions were fairly normal. The highest temperature recorded during the month was 88° 3 at Midnapore and the lowest 39°·8 at Motihari.

The following table gives the summary of the temperature of each of the seven meteorological divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of December 1907:—

Meteorological Division.	Temperature.					
	Highest observed during month.	Lowest observed during month.	*Average for month.*			Average mean of month above or below normal mean of month.
			Of highest of each day.	Of lowest of each day.	Of mean for each day.	
Bengal	88·3	46·0	77·9	54·9	66·4	— 0·1
Eastern Bengal, North	84·1	42·5	77·0	52·2	64·6	+ 0·1
Eastern Bengal, South	87·3	46 9	78·7	55·5	67 1	+ 0·6
Bihar	84·5	39·8	76·6	49 1	62 9	— 0 3
Orissa	86·6	46·6	78·3	56·8	67·5	— 1·3
Chota Nagpur*	86·3	37·0	73·9	48 7	61 3	— 1·4
Assam	86·5	44·2	75·1	51·7	63·4	— 0·2

* Purulia not included.

Summary of Rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture and the usual data regarding the actual and normal rainfall during the month are published by that officer. A short table, however, is attached to this report, giving the rainfall recorded during the month at the head-quarters of the various districts of the Province. Rainfall was in defect in Bihar, but was in moderate to large excess over the rest of the Provinces.

Actual and average rainfall and departure from normal for the month of December 1907.

	Inches.
The mean pressure of the seven days	29·882
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·948
	Hours
The total number of hours of bright sunshine	60·5
The maximum possible number of hours of sunshine	80·1
	°
The mean temperature of the seven days	73·8
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	74·0
The extreme variation of temperature	35·7
The maximum temperature	91·7
	Miles.
The highest velocity of the wind in one hour	14
	%
The mean relative humidity	59
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	66
	Inches.
The total fall of rain from 16th to 22nd February 1908	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·25
The total fall from 1st January to 22nd February 1908	0·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·29

The mean pressure, temperature, etc., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

⌓, dew; ≡, fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
ALIPORE (CALCUTTA), *the 24th February 1908.*

C. W. PEAKE,
for *Director-General of Observatories.*

BENGAL AND NORTH-WESTERN RAILWAY.

Statement of goods traffic for the month of November 1907, compared with the corresponding period in 1906.

Description of Goods.	1906.		1907.		Increase.		Decrease.		Explanation of fluctuations by the Traffic Manager.
	Tons.	Rs.	Tons.	Rs.	Tons.	Rs.	Tons.	Rs.

Puri.

No. 1266L.R.—The 27th February 1908.—Under section 3 of the Bengal Survey Act 1875 (Bengal Act V of 1875), the Lieutenant-Governor is pleased to order that a survey shall be made of all lands of Estate Mahal Bharatpur, tauzi No. 2083, and of Estate Kismat Nowapara, tauzi No. 2103 of the Murshidabad Collectorate, comprised within the boundaries of villages Bharatpur, Sijgram, Gunduria and Talibpur, and that the boundaries of estates, tenures, mauzas and fields be demarcated on the lands so to be surveyed.

Murshidabad.

No. 1267L.R.—The 27th February 1908.—In exercise of the powers conferred upon him by section 101 (2) (*a*) of the Bengal Tenancy Act, 1885 (VIII of 1885), as amended by Bengal Act III of 1898 and Bengal Act I of 1907, the Lieutenant-Governor of Bengal is pleased to order that a survey shall be made and a record-of-rights prepared in respect of all lands of Estate Mahal Bharatpur, tauzi No. 2083, and of Estate Kismat Nowapara tauzi, No. 2103 of the Murshidabad Collectorate, comprised within the boundaries of villages Bharatpur, Sijgram, Gunduria and Talibpur.

Murshidabad.

The particulars to be recorded in the survey and record-of-rights shall be the following:—

(*a*) the name of each tenant or occupant;

(*b*) the class to which each tenant belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non-occupancy raiyat or under-raiyat, and, if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure;

(*c*) the situation and quantity and one or more of the boundaries of the land held by each tenant or occupier;

(*d*) the name of each tenant's landlord;

(*e*) the rent payable at the time the record-of-rights is being prepared;

(*f*) the mode in which that rent has been fixed, whether by contract, by order of a Court or otherwise;

(*g*) if the rent is a gradually increasing rent, the time at which, and the steps by which, it increases;

(*h*) the rights and obligations of each tenant and landlord in respect of—

(*i*) the use by tenants of water for agricultural purposes, whether obtained from a river, *jhil*, tank or well or any other source of supply, and

(*ii*) the repair and maintenance of appliances for securing a supply of water for the cultivation of the land held by each tenant, whether or not such appliances be situated within the boundaries of such land;

(*i*) the special conditions and incidents, if any, of the tenancy;

(*j*) any right of way or other easement attaching to the land for which a record-of-rights is being prepared;

(*k*) if the land is claimed to be held rent-free, whether or not rent is actually paid, and, if not paid, whether or not the occupant is entitled to hold the land without payment of rent, and, if so entitled, under what authority,

(*l*) the name of each proprietor, with the character and extent of his interest, and the situation, quantity, and one or more of the boundaries of each proprietor's private lands as defined in Chapter XI of the Act.

No. 1285L.R.—The 28th February 1908.—In exercise of the power conferred by section 10 of the Land Improvement Loans Act, 1883, the Lieutenant-Governor is pleased to make the following rules as to the grant of loans under that Act, in supersession of all previous rules on the subject, published with notifications No. 931 (L.R.), dated the 19th February 1901 ; No. 3398, dated the 24th August 1901 ; No. 684 (L.R), dated the 30th January 1902 ; No. 469 (L R.), dated the 22nd January 1904 ; No. 493 (T.R.), dated the 2nd May 1904 ; No. 2544 (L.R.), dated the 6th July 1904 ; No. 3284 (L R.), dated the 6th August 1904 ; and No. 3509 (L.R.), dated the 16th August 1904.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

RULES UNDER THE LAND IMPROVEMENT LOANS ACT, XIX OF 1883.

1. (1) Subject to the provisions of these rules, and provided that the district allotment is not exceeded without the sanction of the Commissioner of the Division, Subdivisional Officers, and also Deputy Collectors specially empowered by the Collector with the approval of the Commissioner, may sanction loans of sums not exceeding Rs. 500 in each case, and the Collector may sanction loans up to Rs. 1,000 in each case, for purposes specified in the Act.

Powers of sanction.

(2) Any loan exceeding Rs. 1,000 shall require the sanction of the Commissioner, and exceeding Rs. 5,000 the sanction of the Board ; and the Commissioner or the Board, as the case may be, may call for such detailed plans and estimates, or for such professional opinion, as may seem necessary, before sanctioning any such loan.

2. Applications for loans may be presented to the Collector, or to any other Revenue Officer, not below the rank of a Kanungo, authorised in this behalf by the Collector.

Application to whom to be made.

3. (1) Application may be made orally or in writing.

(2) The officers authorised by rule 2 to receive applications shall keep with them, for free distribution, copies of the annexed Form A, and shall do their best to secure the presentation of all written applications as nearly as possible in that form, but shall not reject any such application that may be presented in any other form.

Form of application.

(3) If applications are received orally, they shall at once be reduced to writing by the officers authorised to receive them.

4. (1) A Revenue Officer receiving an application under rule 2 shall either make a local enquiry himself, or cause one to be made by another Revenue Officer not below the rank of a Kanungo, or by some reliable non-official agency if available, for the purpose of ascertaining the particulars mentioned on the reverse of Form A.

Local enquiry.

(2) A Kanungo shall be so employed only when a gazetted officer is not available.

(3) In addition to the procedure prescribed in this rule, a Revenue Officer receiving the application under rule 2 may, if he thinks fit, publish a notice under section 5 of the Act calling upon persons objecting to the loan to appear before the officer deputed to hold the local enquiry, at a time and place to be fixed in the notice, and to submit their objections.

(4) Such notice shall be published by being affixed to a prominent place in the village in which the land, to the improvement of which the loan is to be applied, is situated.

5. If the Revenue Officer is not empowered by rule 1 to sanction the loan, he shall transmit the application with his report to the Collector or to the officer who ordered the enquiry, as the case may be, provided that, if the receiving or enquiring officer is subordinate to a Subdivisional Officer, he shall submit it to the Subdivisional Officer.

Submission of application with report of local enquiry.

6. The Local Government may, by general or special order, empower any person to perform all or any of the functions of a Collector or of a Revenue Officer referred to in rules 2, 4 and 5.

Delegation of functions.

7. In deciding whether the security offered is sufficient, the officer dealing with the application shall be guided by the following principles:—

Security.

(i) Where the amount of the loan does not exceed three-fourths of the value of the applicant's transferable interest in the land after the improvement has been made, no collateral security need be required.

(ii) Where the applicant's interest in the loan is not sufficient of itself to guarantee the repayment of the loan, further security shall be required, which may consist of transferable interests in other lands belonging to the applicant or to other persons willing to become his sureties. or of personal security; and such officer may, if empowered by rule 1, at his discretion advance on such security an amount not exceeding five times the annual assessment of the land held by the applicant.

(iii) Where a body of five or more co-villagers bind themselves jointly and severally as contemplated in section 9 of the Act, their personal security will generally be sufficient.

8. If the proposed improvement falls within section 4, sub-section (2), of the Act, and if the security offered is good and sufficient, the Officer dealing with the application, or the Collector, when the application and report have been transmitted to him under rule 5, may, on completion of the local enquiry, sanction the loan himself, if he has power by rule 1 to do so; otherwise the Collector shall forward the application, with his report thereon, to the Commissioner for disposal.

Procedure.

9. Where the Revenue Officer, other than the Collector, has power under rule 1 to sanction the loan applied for, he may, as soon as the local enquiry is completed, and the particulars mentioned on the reverse of Form A are filled in, take the security required by rule 11, sanction the loan, and, if so desired by the applicant, disburse it on the spot. Loans, or instalments of loans, sanctioned by the Collector or any higher authority may be disbursed in the village by Subdivisional Officers and Deputy Collectors empowered under rule 1, and by any reliable non-official agency where available.

Disbursement of loans on the spot.

Provided that disbursement on the spot may not in any case exceed Rs. 500 for a single item:

Provided also that, when any loan is payable in more than one instalment the second or any subsequent instalment shall not be passed for payment by the sanctioning officer until he has had an enquiry made locally and satisfied himself that satisfactory progress is being made with the work for which the loan was sanctioned

10. For the purposes of rule 9 the Revenue Officer may draw a lump sum at a time on an abstract bill, subject to the following restrictions:—

Drawing of money on abstract bills.

(*a*) No officer disbursing loans under the said rule shall be allowed to draw a second abstract bill without producing a detailed bill to account for the amounts already disbursed from the last advance taken, any balance left being at the same time refunded into the Government Treasury.

(*b*) In no case shall the submission of the detailed bill be delayed beyond the end of the month following that in which the advance was drawn from the Treasury.

(*c*) The disbursing officer shall take the receipts of the payees on the spot as soon as advances have been made, and shall certify at the foot of the detailed bill that the advances were duly sanctioned by him and paid in his presence.

(*d*) The Collector shall prescribe a money-limit for the amount which may be drawn on an abstract bill by each officer with due regard to the circumstances of each case.

Explanation to clause (a).—It is not intended that the money should actually be returned to the Treasury on each occasion. When preparing the detailed bill, the disbursing officer should show in it the unexpended balance of the advance as refunded. This balance will be deducted at the Treasury from the amount of the abstract bill submitted for a further advance.

11. (1) If the loan is sanctioned, the applicant must sign a certificate in the annexed Form B; and when the value of his interest in the land to be improved, or in the said land, together with any other land belonging to him which he may have hypothecated, is not sufficient to cover the loan, he must execute, or cause to be executed, a bond in the annexed Form C or D, as the case may be.

Certificate for grant of loan, and security bond.

(2) If the loan is granted to a body of villagers who make themselves jointly and severally liable, they shall, in addition to signing the certificate in Form B, sign a bond in the annexed Form E

12. A copy of the certificate shall be given to the applicant, and, on presentation thereof payment of the loan or of any instalment of the loan may be made to him either at the district or the subdivisional treasury, or on the spot under rule 9.

Payment where to be made.

13. (1) In the case of a loan granted by instalments, if the applicant, after taking one or more instalments, fails to take any other instalment within six weeks from the date on which he is entitled to it, the Collector may declare the loan closed.

Closure of loan, on failure to take instalment due.

(2) The total of the instalments taken by the applicant shall then constitute the loan, which shall be treated as having been fully paid on the date on which the last instalment was actually taken; and a fresh arrangement for repayment shall be made by the Collector, consistent with rules 17 and 18, in modification of the certificate in Form B granted to the applicant when the loan was sanctioned.

ILLUSTRATION.—*A* applies for and obtains sanction to a loan of Rs. 1,000, payable to him in four instalments of Rs. 250 on the 1st January, the 1st April, the 1st July, and the 1st October 1903. In the certificate granted to him, the loan is declared to be repayable in half-yearly instalments beginning from the 1st October 1903. He takes only the first two instalments. The Collector may treat the loan as one of Rs. 500 completely paid on the 1st April 1903, and if he does so, he must draw up a revised certificate in Form B in which all the conditions of the repayment of the loan actually taken are to be recorded.

14. (1) The ordinary rate of interest on loans shall be one anna in the rupee, or 6¼ per cent. per annum.

Interest on loans.

(2) The Local Government may, for special reasons, and on special application through the Board of Revenue, sanction a loan at a lower rate of interest, or without interest.

(3) If any instalment of principal or of interest, or of consolidated principal and interest, is not paid when it falls due, the Collector shall charge interest on it at 6¼ per cent. per annum, from the date of its falling due to the date of payment:

Provided that, whenever the Collector is satisfied that the default is due to inability to pay, and that the levy of such interest would be productive of hardship, he may, with the sanction of the Commissioner, reduce or remit it.

(4) In charging penal interest on overdue instalments not suspended under rule 20, the same period of 15 days' grace shall be allowed as in the case of payments of cesses, and thereafter interest shall be charged on the total of the overdue instalment at the same rate as the interest on the loan.

Interest for intervening period.

15. (1) Interest shall be levied for the period intervening between the date of the completion of the loan (in cases in which loans are granted in one payment), or between the dates of the payment of the instalments (in cases in which loans are granted in instalments), and the date from which the first instalment of interest, consolidated with the first instalment of the principal, becomes payable.

(2) The interest leviable in such cases shall be demanded in a lump sum six months before the date on which the first consolidated instalment of principal and interest is made payable.

Table of repayment.

16. The repayment of the loan shall be made in accordance with the table in the annexed Form F, which shows the amount of equal yearly and half-yearly payments necessary to repay a loan advanced with interest at 6¼ per cent. per annum for any number of years from one to twenty.

Repayment by instalments: date of first instalment.

17. (1) Repayment shall be by yearly or half-yearly instalments.

(2) The date of the first instalment shall be the time when profit begins to accrue, but shall in no case be later than two and-a-half years from the date of the actual advance of the loan, or, when the loan is advanced in instalments, from the date of the advance of the last instalment actually paid.

Date of last instalment, and principle on which instalments should be fixed.

18. The date of the last instalment shall not ordinarily be later than twenty years from the date of the actual advance of the loan, or, when the loan is advanced in instalments, from the date of the advance of the last instalment actually paid, the amount of the instalments being fixed, in cases in which such a principle is applicable, with reference to the annual profit expected to accrue from the improvement: Provided that the whole amount of the loan shall in all cases be repaid before expiry of the period for which the improvement is likely to be effective.

Date of repayment of instalments or of interest.

19. The dates for repayment of instalments (annual or half-yearly) shall be fixed by the Collector, with the sanction of the Commissioner, for each thana of his district, with reference to the season when repayment can most easily be made.

EXPLANATION.—The season at which repayment can most easily be made will ordinarily be the time when crops grown for sale are taken to market. In jute districts, for instance, it would probably be best to provide for repayment by one annual instalment in September, when the jute crop is sold, except in cases where the borrower himself prefers to pay in two yearly instalments.

Suspension of instalments.

20. (1) The realisation of instalments or of interest may be suspended by the Collector on proof of failure of crops from causes beyond the borrower's control, or of other exceptional calamity rendering the payment of instalments unduly burdensome to him.

(2) The Collector shall report every such suspension to the Commissioner, who shall pass such orders on the case as may seem proper.

(3) No interest shall be charged for the period of suspension. The total amount to be repaid shall remain the same as before.

(4) The power of suspension of payments of instalments or of interest on loans which is conferred on the Collector by clause (1) of this rule may be exercised to the extent of Rs. 1,000 in any one case.

(5) Notwithstanding anything contained in clause (4) of this rule, in all cases where suspension of revenue or rent has been granted on a large scale over a wide area, a suspension of payment of instalments due during the period for which suspension of revenue or rent has been granted shall be made by the Collector without reference to any higher authority, and the effect of such suspension shall be to postpone for one instalment period at a time the payment of all remaining instalments due on the loan.

Remission of loan.

21. (1) The Collector shall, in no case without reference to the Commissioner, remit repayment of a loan; and he may recommend remission only in cases where a work fails from causes beyond the borrower's control and where recovery of the loan in full would occasion serious hardship.

(2) Remission may be sanctioned by the Commissioner up to the amount of loan a Collector may sanction, and by the Board up to the amount a Commissioner may sanction. Larger remissions require the sanction of the Local Government.

Inspection of work

22. The Collector shall make provision for the inspection, from time to time, of all works undertaken under the Act. In all cases the works shall, if possible, be inspected within one month from the expiration of the time within which completion is directed in the certificate Form B.

Misapplication of loan.

23. (1) If at any time it is proved to the satisfaction of the Collector that any part of a loan has been misapplied, he may, after recording in writing the grounds of his decision, and subject to the control of the superior Revenue Authorities, proceed to recover the whole amount of the loan with such interest as may have become due thereon.

(2) Before determining to take action under clause (1) of this rule, the Collector shall take into consideration the expense of supervision, even when that may have been supplied by the debtor himself.

Loans combined with free grants.

24. (1) With a view to encouraging irrigation in precarious tracts, which have suffered severely in recent famines and which have not since obtained, by irrigation or otherwise, protection sufficient to guarantee them against the recurrence of similar calamities, loans may be granted to landowners under the foregoing rules, sufficient to pay for a portion of the cost of the contemplated improvements, a free grant being made of the remainder of the cost, the proportion of the free grant to the total cost depending on the property of the applicant and the marginal profit from irrigation :

Provided that, without the sanction of the Board of Revenue, which shall only be accorded in special cases, the maximum amount of the free grant shall not exceed half the said total cost or Rs. 500, whichever may be less :

Provided also that the work be carried out to the satisfaction of the Collector.

(2) Should the money advanced under clause (1), or any part of it, be misapplied or spent otherwise than in accordance with the conditions of the gift, the whole amount shall be recoverable as arrears of land revenue under section 7 of the Act. For this purpose the grant shall, in the first instance, be treated as part of the loan and may be remitted only if and when the work is found to have been duly completed.

(3) The foregoing provision of this rule shall apply also in the case of irrigation or protective works which it is beyond the capacity of the people concerned to construct without assistance and which are likely to lead ultimately to an increase in the land-revenue or to secure the land-revenue already assessed.

(4) In making loans under this rule, the procedure prescribed in the foregoing rules shall, *mutatis mutandis*, be followed.

Returns, registers and accounts.

25. The Board of Revenue shall regulate the forms of all returns, registers, and accounts relating to loans under the Act.

Supplementary Rules having effect only in temporarily-settled Estates.

Reclamation of waste land.

26. When land is reclaimed from waste and brought under cultivation by means of a loan granted under the Act, the increase in value derived from the improvement shall not be taken into account in revising the assessment of land-revenue on the land until after the expiration of a period of three years, reckoned from the beginning of the harvest first reaped after such reclamation was effected.

Improvement by irrigation.

27. When land assessed at unirrigated rates is improved by irrigation by means of a loan granted under the Act, the increase in value derived from the improvement shall not be taken into account in revising the assessment of land-revenue on the land—

(*a*) if the irrigation is provided by the construction of a new masonry well, until after the expiration of twenty years, reckoned from the beginning of the harvest first reaped after such improvement was effected ;

(*b*) if the irrigation is provided by the construction of a distributary from a canal, until after the expiration of a period of five years, reckoned as in clause (*a*) of this rule directed ; or

(*c*) if the irrigation is provided by any means other than those hereinbefore in clauses (*a*) and (*b*) specified, until after the expiration of a period of ten years, reckoned as in clause (*a*) of this rule directed.

Saving.

Loans in special cases.

28 Nothing in these rules shall be deemed to affect any power of the Board of Revenue or the Local Government to grant, in special cases, loans under the Act on terms other than those hereinbefore prescribed, or to affect the terms of any special agreement under which any loan under the Act has been, or may hereafter be, granted, or the terms of any unexpired settlement.

FORM A.

(SEE RULES 3, 4 and 9.)

Form of Application.

Name, father's name, residence, etc., of applicant.	Amount of loan required	Nature of security, whether personal or otherwise, and whether, if it consists of immoveable property, such property is free from encumbrances, and, if not, the nature and extent of the encumbrances, and, if registered, the number and date of the registered deed and the name of the registry office.	Nature of proposed improvement.	Situation of the land to be improved. Reference to the Khatian number in the record-of-rights (if any) in which the lands are contained shall be given.	Applicant's rights in the land.	Proposed dates of repayment.
1	2	3	4	5	6	7

Applicant's signature.

I declare that the statements made by me in the above application are true to my knowledge, except as to matters stated on information and belief, and as to these I believe the same to be true.

Signature of applicant.

NOTE.—*Column 3.*—The Enquiring Officer should, so far as may be possible, enquire into the statements mad as incumbrances, and record the result of his enquiries on the reverse of this Form.

[REVERSE OF FORM A.]

Particulars to be filled in by the Enquiring Officer.

I.—Mahal, field number, area of land to be improved ...

II.—Status of applicant, *i.e.*, proprietor or tenant. If a tenant, and the landlord's consent is required, whether the landlord objects.

III.—Security—

(i) If the land itself, the nature and value of the applicant's interest in it, and the nature and extent of encumbrances, if any.

(ii) If personal, the names and status of the co-sureties ...

(iii) If property other than the land itself, its nature, value, and nature and extent of pre-existing encumbrances, if any.

IV.—The improvement—

(i) Its estimated utility and value ... ...

(ii) Objections, if any, of third parties ... ...

(iii) Probable date on which it will begin to yield profit ...

V.—Repayment—

(i) Suitable date for first instalment, with reference to clause IV (iii) ... ...

(ii) Proposed instalments and period of repayment ...

VI.—Date on which the loan or any instalment thereof should be received by the applicant.

Recommendations of the Enquiring Officer.

N.B.—Where a record-of-rights has been prepared, a reference should be made to that record in order to ascertain the interest of the applicant, or that of his collateral surety, in the land which it is proposed to pledge.

FORM B.

(SEE RULES 11, 13 AND 22.)

Certificate granted under the Land Improvement Loans Act, 1883, and the rules made thereunder.

To , son of , of .

ON production of this certificate the aforesaid is entitled to receive from Government, in the district of , the following sums, on the dates noted against each, as a loan to be expended on (here describe clearly the nature of the improvement) the land specified in the margin.

Date.	Amount.
"	"

2. The conditions relating to the making and repayment of this loan are as follow :—

(*a*) That it, with the interest thereon, shall be payable on the dates and by the amount specified below :—

Date.	*Amount (Principal and interest).*
"	"

(*b*) That, in the case of a loan granted by instalments, if the applicant, after taking one or more instalments, fails to take any other instalment within six weeks from the date on which he is entitled to it, the Collector may declare the loan closed. The total of the instalments taken by the applicant shall then constitute the loan, which shall be treated as having been fully paid on the date on which the last instalment was actually taken; and a fresh arrangement for repayment shall be made by the Collector, consistent with rules 17 and 18, in modification of this certificate.

(*c*) That interest shall be levied for the period intervening between the date of the completion of the loan (in cases in which loans are granted in one payment), or between the dates of the payment of the instalments (in cases in which loans are granted in instalments), and the date from which the first instalment of interest, consolidated with the first instalment of the principal, becomes payable. The interest leviable in such cases shall be demanded in a lump sum six months before the date on which the first consolidated instalment of principal and interest is made payable.

(*d*) That the loan shall be applied solely to the purpose specified above; and that, if at any time it is proved to the satisfaction of the Collector that any part of the loan has been misapplied, he may proceed to recover the whole amount of the loan with such interest as may have become due thereon.

These clauses to be used only when needed.

(*e*) That, unless (here enter any conditions as to the period or periods appointed for completing the work) the work has been completed by (date) or any extension of the said date granted by the Collector, the loan shall be held to have been misapplied.

(*f*) That, for the repayment of the loan with any interest due on the same, the immoveable property specified in the margin is hypothecated to Government.

(*g*) That, if any instalment is not paid on the due date, the whole amount of the loan shall be deemed to have become due.

(*h*) That, if the work be a work having for its object the improvement of irrigation in a precarious tract, and be carried out to the satisfaction of the Collector, a portion of the loan will be remitted as a free-grant and as a matter of grace, subject to the conditions laid down in rule 24.

(*i*) That, if it be proved to the satisfaction of the Collector that the statements made by the aforesaid in his application for this loan, as to the nature and extent of encumbrances, are in any particular untrue, the Collector may so declare in writing, and thereupon the whole of such loan, with such interest as may become due thereon, shall forthwith become due and payable.

Signature of Collector, Subdivisional Officer, or Deputy Collector.

I understand and agree to the aforesaid terms and conditions.

Signature of Certificate-holder.

Received contents.

Signature of the payee (the payee should affix a one-anna stamp if the loan exceeds Rs. 20.)

N. B.— 1) Both the land to be improved and all the immoveable property hypothecated as collateral security, whether by the borrower himself or by a surety or sureties, should be described in the marginal specification as nearly as possible in the manner prescribed in section 21 of the Indian Registration Act, 1877.

(2) In the description of the immoveable property to be given in the margin of clause (*f*), paragraph 2 above, it shall be stated if the property is free from encumbrances, and, if not, what are the nature and extent of the encumbrances.

FORM C.

(SEE RULE 11.)

Security Bond to be used when Applicant gives Personal Security.

WHEREAS has on received from the Collector of a certificate under the Land Improvement Loans Act, 1883, and the rules made thereunder, in virtue of which he is entitled to receive the aggregate sum of Rs as a loan from Government: We hereby agree that if the said shall fail to comply with the terms on which the loan has been granted, either by misapplying the same, or by failing to pay any instalment on the date fixed for its payment or any interest that may be due, we will be jointly and severally liable to Government for such sum, not exceeding as may be necessary to make good the amount which, in consequence of his default, he may have become liable to pay.

FORM D.

(SEE RULE 11.)

Hypothecation Bond to be used when immoveable property is proffered by Collateral Surety.

WHEREAS has on received from the Collector of a certificate under the Land Improvement Loans Act, 1883, and the rules made thereunder, in virtue of which he is entitled to receive the aggregate sum of Rs. as a loan from Government; and whereas security for the due application of the loan, and for the punctual repayment of the same, according to the terms of the certificate, is demanded from him; I, (or we), hereby mortgage to Government the immoveable property mentioned in the schedule below, as a collateral security, and agree that if he fails to comply with the terms on which the loan has been granted, either by misapplying the same or by failing to pay any instalment on the date fixed for its payment, or any interest that may be due, it shall be lawful for the Collector to recover from the said property such sum as may be necessary to make good the amount which, in consequence of 's failure to comply with the conditions of the certificate, may be due to Government.

SCHEDULE.

$\frac{I}{We}$ declare that the statements made by $\frac{me}{us}$ in the above schedule as regards the nature and extent of the encumbrances on the immoveable property mortgaged by $\frac{me}{us}$ as security for the repayment of the loan granted to are true to $\frac{my}{our}$ knowledge, save as to matters stated oninformation and belief, and as to these $\frac{I}{We}$ believe the same to be true.

N.B.—In describing the immoveable property to be mentioned in the schedule above, it shall be stated whether the property is free from encumbrances, and, if not, what are the nature and extent of the encumbrances.

FORM E.

(SEE RULE 11.)

Bond to be executed by villagers as security for a loan granted to them.

WE, the undersigned persons as set forth in the schedule below, do hereby execute this joint and several bond, and do agree and will be firmly bound by the terms and conditions hereinafter mentioned.

Whereas we have on received from the Collector of a certificate dated the under the Land Improvement Loans Act, 1883, and the rules made thereunder, in virtue of which we are entitled to receive the sum of Rs. as a loan from Government: We do hereby agree (1) that all and every one of us and our heirs and representatives and the heirs and representatives of each of us shall be jointly and severally bound to the Government for the payment of the whole amount payable in respect thereof; (2) that the conditions set forth in the above-mentioned certificate will be binding on us and on our heirs and representatives and on the heirs and representatives of each one of us jointly and severally; and (3) that in case of default in repaying the said loan or any portion thereof the Government will have the right and power to realise the whole and every part of the money payable, from the person and property, whether moveable or immoveable, and whether mentioned in the said certificate or not, of all and of every one of us and of all and each of our heirs and representatives and the heirs and representatives of each one of us jointly and severally in accordance with the said Act and rules and in conformity with the terms and conditions of the said certificate.

Signed—

By caste , son of , resident of
2, etc.
3. etc.
4, etc.

Witnesses.

No. 1286L.R.—The 28th February 1908.—In exercise of the power conferred by section 10 of the Land Improvement Loans Act, 1883, the Lieutenant-Governor is pleased to make the following rules, in supersession of those in section 152, pages 45-48, of the Bengal Famine Code (Revised Edition of 1905), as to the grant of loans under that Act to proprietors and occupants of land, in tracts which may, from time to time, be affected by distress, for the purpose of constructing tanks and executing other works in their own villages and giving employment to labourers thereon.

E. A. GAIT,

Chief Secy. to the Govt. of Bengal.

SPECIAL RULES UNDER THE LAND IMPROVEMENT LOANS ACT, XIX OF 1883, FOR TRACTS AFFECTED BY DISTRESS.

Application of rules.

1. These rules shall have effect in such tracts as may, from time to time, be declared by the Local Government to be affected by distress.

Allotment of funds.

2. (1) On the first warnings of distress, the Local Government will call upon the Board of Revenue to submit estimates of sums required for advances under the Land Improvement Loans Act, 1883, and will allot to each Division such amount as may, with reference to local conditions and the district programmes of village relief works, seem to be necessary.

(2) Commissioners may divide the sums so allotted among the districts of their Divisions at their discretion, and may transfer assignments from one district to another; but the total expenditure within the Division must be kept within the amount assigned.

(3) If a Collector considers the allotment assigned to his district to be insufficient, he shall report the fact and his requirements to the Commissioner, who shall, if possible, arrange for a transfer from another district, or report the matter, through the Board of Revenue, to the Local Government for orders.

Loans combined with free grants.

3. (1) In distressed areas loans may be made for land improvements which will afford employment to the poor, with the assistance of free grants-in-aid from famine funds.

(2) The general proportion of the free grant-in-aid to the total expenditure will be fixed for each Division by the Local Government.

(3) The proportion in individual cases, or classes of cases, shall be fixed by the Collector, but the previous sanction of the Commissioner must be obtained if that proportion varies by more than 25 per cent. from the average proportion fixed for the Division.

(4) Should the money thus advanced, or any part of it, be misapplied or spent otherwise than in accordance with the conditions of the gift, the whole amount shall be recoverable as arrears of land revenue under section 7 of the Act. For this purpose the grant shall, in the first instance, be treated as part of the loan and may be remitted only if and when the work is found to have been duly completed.

Powers of sanction.

4. (1) Subject to the provisions of these rules, and provided that the district allotment is not exceeded, Subdivisional Officers and Famine Relief Charge Superintendents, and also Deputy Collectors specially empowered by the Collector with the approval of the Commissioner of the Division, may sanction loans (including free grants-in-aid at the proportion fixed under rule 3) not exceeding Rs. 1,000 in each case, and the Collector may sanction such loans up to Rs. 5,000 in each case.

(2) Loans exceeding Rs. 5,000 shall require the sanction of the Commissioner, and loans exceeding Rs. 10,000 the sanction of the Board; and the Commissioner or the Board, as the case may be, may call for such detailed plans and estimates or for such professional opinion on the project proposed as may seem necessary before sanctioning any such loans.

Applications for loans.

5. (1) Applications for loans may be made orally or in writing to the Famine Relief Circle Officer or Charge Superintendent, or to any Revenue Officer not below the rank of a Kanungo.

(2) The officers authorised by clause (1) of this rule to receive applications shall keep with them, for free distribution, copies of the annexed Forms D—1, and shall do their best to secure the presentation of all written applications as nearly as possible in that Form, but shall not reject any such application that may be presented in any other Forms.

(3) If applications are received orally, they shall at once be reduced to writing by the officer authorised to receive them.

Local enquiry.

6. (1) An officer receiving an application under rule 5 shall either make a local enquiry himself, or cause one to be made by a Famine Relief Officer not below the rank of a Circle Officer, or by a Revenue Officer not below the rank of a Kanungo, or by some reliable non-official agency if available, for the purpose of ascertaining the particulars mentioned on the reverse of Form D—I.

(2) A Kanungo or a circle officer shall be so employed only when a gazetted officer is not available.

(3) In addition to the procedure prescribed in this rule, an officer receiving application under rule 5 may, if he thinks fit, publish a notice under section 5 of the Act calling upon persons objecting to the loan to appear before the officer deputed to hold the local enquiry at a time and place to be fixed in the notice, and to submit their objections.

(4) Such notice shall be published by being affixed to a prominent place in the village in which the land, to the improvement of which the loan is to be applied, is situated.

Submission of application with report of local enquiry.

7. If the Famine Relief Officer or the Revenue Officer is not empowered by rule 4 to sanction the loan, he shall transmit the application with his report to the Collector or the officer who ordered the enquiry, as the case may be, provided that, if the receiving or enquiring officer is subordinate to a Famine Relief Charge Superintendent or to a Subdivisional Officer, he shall submit the application to his immediate superior.

Security.

8. In deciding whether the security offered is sufficient, the officer dealing with the application shall be guided by the following principles :

(i) Where the amount of the loan does not exceed three-fourths of the value of the applicant's transferable interest in the land after the improvement has been made, no collateral security need be required.

(ii) Where the applicant's interest in the land is not sufficient of itself to guarantee the repayment of the loan, further security shall be required, which may consist of transferable interests in other lands belonging to the applicant or to other persons willing to become his sureties, or of personal security ; and such officer may, if empowered by Rule 4, at his discretion advance on such security an amount not exceeding five times the annual assessment of the land held by the applicant.

(iii) Where a body of five or more co-villagers bind themselves jointly and severally as contemplated in section 9 of the Act, their personal security will generally be sufficient.

Principles to be observed in determining the amount to be advanced.

9. (1) Where any application submitted refers to a project already entered in the district programme of village relief-works, the information given in the programme and in any plans that may have been prepared for the work may be referred to in dealing with such application.

(2) In determining the amount of the loan in such cases, the officer dealing with the application shall follow the estimates of cost of the works as given in the said programme. For other works the rate shall not exceed the ordinary local rate by more than 25 per cent.

Procedure.

10. If the proposed work be approved by the enquiring officer, and if the security offered be good and sufficient, he may, on completion of the local enquiry, sanction the loan himself if empowered by rule 4 to do so ; otherwise he shall forward the application with his report for orders under rule 7.

Disbursement of loans on the spot.

11. If the loan is sanctioned in the village by an officer other than the Collector, the sanctioning officer, after filling in the particulars mentioned on the reverse of Form D—I, and taking the security required by Rule 13, may, if so desired by the applicant, disburse the loan on the spot. Loans or instalments of loans sanctioned by the Collector or any higher authority may also be disbursed in the village by Subdivisional Officers and Famine Relief Charge Superintendents and by Deputy Collectors empowered under Rule 4, and by any reliable non-official agency, where available

Provided that, when any loan is payable in more than one instalment, the second or any subsequent instalment shall not be paid by the disbursing officer, except as provided in rule 16.

Drawing of money on abstract bills.

12. For the purpose of rule 11, the officer concerned may draw a lump sum at a time on an abstract bill, subject to the following restrictions :—

(*a*) No officer disbursing loans under the said rule shall be allowed to draw a second abstract bill without producing a detailed bill to account for the amounts already disbursed from the last advance taken, any balance left being at the same time refunded into the Government Treasury.

(*b*) In no case shall the submission of the detailed bill be delayed beyond the end of the month following that in which the advance was drawn from the Treasury.

(*c*) The disbursing officer shall take the receipts of the payees on the spot as soon as advances have been made, and shall certify at the foot of the detailed bill that the advances were duly sanctioned by him and paid in his presence.

(*d*) The Collector shall prescribe a money-limit for the amount which may be drawn on an abstract bill by each officer with due regard to the circumstances of each case.

Explanation to clause (*a*).—It is not intended that the money should actually be returned to the Treasury on each occasion. When preparing the detailed bill, the disbursing officer should only show in it the unexpended balance of the advance as refunded. This balance will be deducted at the Treasury from the amount of the abstract bill submitted for a further advance.

Certificate for grant of loan and security bond.

13. If the loan is sanctioned, the applicant must sign a certificate in the annexed Form D—II(*a*) ; and, when the value of his interest in the land on which the work is to be executed, or in the said land, together with any other land belonging to him which he

may have hypothecated, is not sufficient to cover the loan he must execute, or cause to be executed, a bond in the annexed Form D—II (*b*) or Form D—II (*c*), as the case may be.

Where payment will be made.

14. On the certificate under Rule 13 being signed, a copy of it shall be given to the applicant, with an order for payment which may be made at the District or Subdivisional Treasury, or at the office of the Famine Relief Charge Superintendent, or at the applicant's village under rule 11, or by any officer specially deputed for the purpose by the Collector, as may be convenient.

Interest.

15. Interest shall be charged at one anna per rupee, or 6¼ per cent. per annum, except in the case of a misapplication of the loan, when interest shall be charged at double the above rate, as provided for in rules 22 and 23.

Payment of loans by instalments.

16. Loans shall ordinarily be given in three instalments, viz, two-fifths before the work has been commenced, two-fifths when it is approximately half finished, and one-fifth when it has been passed as completed after due inspection.

Repayment by instalments; date of first instalment.

17. (1) Repayment shall be made by yearly or half-yearly instalments.

(2) The date of the first instalment shall be the time when profit begins to accrue, but shall in no case be later than two and-a-half years from the date of the actual advance of the loan, or, when the loan is advanced in instalments, from the date of the advance of the first instalment actually taken.

Date of last instalment, and principle on which instalments should be fixed.

18. The late of the payment of the last instalment shall not ordinarily be later than twenty years from the date of the actual advance of the loan or, when the loan is advanced in instalments, from the date of the advance of the last instalment actually taken, the amount of the instalments being fixed, in cases in which such a principle is applicable, with reference to the annual profit expected to accrue from the improvement :

Provided that the whole amount of the loan or such portion of it as will be recovered shall in all cases be repaid before the expiry of the period for which the improvement is likely to be effective.

Closure of loan, on failure to take instalment due.

19. (1) In the case of a loan granted by instalments, if the applicant, after taking one or more instalments, fails to take any other instalment within six weeks from the date on which he is entitled to it, the Collector may declare the loan closed.

(2) The total of the instalments taken by the applicant shall then constitute the loan, which shall be treated as having been fully paid on the date on which the last instalment was actually taken; and a fresh arrangement for repayment shall be made by the Collector, consistent with Rules 17 and 18, in modification of the certificate in Form D—II (*a*) granted to the applicant when the loan was sanctioned.

ILLUSTRATION.—*A* applies for and obtains sanction to a loan of Rs. 1,000 payable to him in three instalments, two of Rs. 400 each (⅖ths of the total amount) and one of Rs. 200, payable, respectively, on 1st January, 1st May and 1st September 1904. In the certificate granted to him, the loan is declared to be repayable in half-yearly instalments, beginning from the 1st October 1909. He takes only the first two instalments. The Collector may treat the loan as one of Rs. 800 completely paid on the 1st May 1908, and, if he does so, he must draw up a revised certificate in Form D—II (*a*) in which all the conditions of the repayment of the loan actually taken are to be recorded.

Suspension of instalments or of interest.

20. (1) The realisation of instalments or of interest may be suspended, by the order, and at the discretion, of the Collector on proof of failure of crops from causes beyond the borrower's control or of other exceptional calamity rendering the payment of instalments unduly burdensome to him.

(2) The Collector shall report every such suspension to the Commissioner, who shall pass such orders on the case as may seem proper.

(3) No interest shall be charged for the period of suspension. The total amount to be repaid shall remain the same as before.

(4) The power of suspension of payments of instalments which is conferred on the Collector by clause (1) of this rule may be exercised to the extent of Rs. 5,000 in any one case

(5) Notwithstanding anything contained in clause (4) of this rule in all cases where suspension of revenue or rent has been granted on a large scale over a wide area, a suspension of payment of instalments due during the period for which suspension of revenue or rent has been granted shall be made by the Collector without reference to any higher authority, and the effect of such suspension shall be to postpone for one instalment period at a time the payment of all remaining instalments due on the loan.

Inspection and measurement

21. (1) It shall ordinarily be sufficient, if a work has been properly located and measured out beforehand, to make a detailed measurement after it has been completed, a careful inspection being made only when the work is about half done, with the object of ascertaining whether the second instalment of the loan should be paid.

(2) If the final measurements agree substantially with those specified in the original estimate, the account shall be closed, any difference being adjusted by the Collector

Interest to be levied in the case of misapplication of loan, or of discovery of untruth of statements made by applicant or his sureties.

22. (1) If at any time it is proved to the satisfaction of the Collector that any part of a loan has been misapplied, or that it is not being spent on the work for which it was intended, or that the statements made by the applicant in his application for the loan (Form D—I), or by his sureties in their bond proffering

collateral security, as to the nature and extent of the encumbrances on the immoveable property pledged as security for the repayment of the loan, are in any particular untrue, the Collector may, after recording in writing the grounds of his decision, and subject to the control of the superior Revenue Authorities, proceed to recover the whole amount of the loan with such interest as may have become due thereon at the rate of 12½ per cent. per annum from the date on which the loan was made to the date of recovery.

(2) Before determining to take action under clause (1) of this rule, the Collector shall take into consideration the expense of supervision, even when that may have been supplied by the debtor himself.

Interest for intervening period.

23. (1) In the circumstances described in rule 22, interest shall also be levied at 12½ per cent. per annum for the period intervening between the date of the completion of the loan (in cases in which loans are granted in one payment), or between the dates of the payment of the instalments (in cases in which loans are granted in instalments), and the date from which the first instalment of interest, consolidated with the first instalment of the principal, becomes payable.

(2) The interest leviable in such cases shall be demanded in a lump sum, six months before the date on which the first consolidated instalment of principal and interest is made payable.

Form of remission of part of loan.

24. If the work for which a loan is made is carried out to the satisfaction of the Collector, and in accordance with the conditions imposed by these rules, and if it is necessary to grant some remission, it shall take the form of a remission of land revenue. The loan with interest shall ordinarily be recovered.

Irrecoverable loans.

25. When any portion of a loan or any interest leviable under rule 15 or rule 22 or rule 23, is found to be irrecoverable, a special report shall be made to the Board.

Returns, registers and accounts.

26. The Board shall regulate the forms of all returns, registers and accounts relating to loans advanced under these rules.

FORM D—I.

(SEE RULES 5, 6, 11 AND 22.)

Form of Application for Loan.

Name, father's name, residence, etc., of applicant.	Amount of loan required.	Nature of security, whether personal or otherwise, and whether, if it consists of immoveable property, such property is free from encumbrances, and, if not, the nature and extent of the encumbrances, and, if registered, the number and date of the registered deed and the name of the registry office.	Nature of proposed work.	Situation of land on which work is to be executed. Reference to the Khatian number in the record-of-rights (if any) in which the lands are contained should be given.	Applicant's rights in the land.	Proposed dates of repayment (to be filled up by the sanctioning officer).	REMARKS.
1	2	3	4	5	6	7	8

Applicant's signature.

I/We declare that the statements made by me/us in the above application are true to my/our knowledge, except to matters stated on information and belief, and as to these I/we believe the same to be true.

Signature of applicant.

N.B.—Column 3.—The Enquiring Officer should, so far as may be possible, enquire into the statements made as to encumbrances, and record the result of his enquiries on the reverse of this form.

[REVERSE OF FORM D—I.]

The following particulars should be ascertained by the Enquiring Officer:—

I.—Mahal, field number, area of land on which work is to be executed.

II.—Status of applicant, *i.e.*, whether proprietor or tenant. If a tenant, and the landholder's consent is required, whether the landlord objects.

III.—Security—

(1) If the land itself or the land itself together with any other land belonging to the applicant,—the value of the applicant's interest in such land or lands, and the nature and extent of encumbrances, if any.

(2) If personal,—the names and status of the co-sureties.

(3) If land hypothecated by collateral surety,—its nature and value, and the nature and extent of pre-existing encumbrances, if any.

IV.—The work—

(1) Its estimated utility and value.

(2) Objections, if any, of third parties.

V.—Dates on which the instalments of the loan should be received by the applicant.

Recommendations of the Enquiring Officer.

NOTE.—Where a record-of-rights has been prepared, a reference should be made to that record, in order to ascertain the interest of the applicant, or that of his collateral surety, in the land which it is proposed to pledge.

FORM D—II (*a*).

(SEE RULES, 13 AND 19.)

Certificate granted under the Land Improvement Loans Act, 1883.

To , son of , of .

1. On production of this certificate, the aforesaid is entitled to receive from Government, in the district of , the following sums, on the dates noted against them, as a loan to be expended on (here describe clearly the nature of the work):—

Date.	Amount.
,,	,,
,,	,,

2. The conditions relating to the making and repayment of this loan are as follow:—

(*a*) That it shall be repayable on the dates and by the amounts specified below:—

Date.	*Amount (Principal and interest).*
,,	
,,	

(*b*) That it shall be applied solely to the carrying out of the work specified above, in such manner as may be approved by the Collector, and that, if it be proved to the satisfaction of the Collector that any part of the loan has been misapplied, or is not being spent on the work in question, the whole amount of the loan shall be deemed to become forthwith due, with interest at the rate of 12½ per cent. per annum, from the date on which the loan was made to the date of recovery.

(*c*) That, in the event of misapplication of the loan, interest shall also be levied at 12½ per cent. per annum for the period intervening between the date of the completion of the loan (in cases in which loans are granted in one payment), or between the dates of the payment of the instalments (in cases in which loans are granted in instalments), and the date from which the first instalment of interest, consolidated with the first instalment of the principal, becomes payable. The interest leviable in such cases shall be demanded in a lump sum six months before the date on which the first consolidated instalment of principal and interest is made payable.

(*d*) That, for the repayment of the loan, the immoveable property specified in the margin is hypothecated to Government.

N.B.—(1) Both the land to be improved, and any other land belonging to the applicant, which he may have hypothecated, as also any immoveable property hypothecated by others, as collateral security, should be described in the marginal specification, as nearly as possible in the manner prescribed in section 21 of the Indian Registration Act, 1877.

N.B.—(2) In the description of immoveable property to be given in the margin, it shall be stated if the property is free from encumbrances, or, if not, what are the nature and extent of the encumbrances.

(*e*) That, if any instalment be not paid on the due date, the whole amount of the loan shall be deemed to have become due forthwith.

(*f*) That, if it be proved to the satisfaction of the Collector that the statements made by the aforesaid in his application for this loan, as to the nature and extent of encumbrances, are in any particular untrue, the Collector may so declare in writing

and proceed to recover the whole amount of the loan with interest at the rate of 12½ per cent. per annum from the date on which the loan was made to the date of recovery.

(*g*) That, if the work be carried out to the satisfaction of the Collector, the sum of Rs. will be remitted as a free grant-in-aid.

(*h*) That the person to whom the loan is made shall carry out all directions which the Collector of the district, or any other person duly authorised in this behalf, may give with respect to (*i*) the manner in which the work will be executed, and (*ii*) the periodical returns to be furnished.

Signature of Collector or other officer sanctioning the loan.

I HAVE understood and agreed to the aforesaid terms and conditions.

Signature of applicant.

Received contents.

Signature of payee (the payee should affix a one-anna stamp, if the loan exceeds Rs. 20.)

FORM D—II (*b*).

(SEE RULE 13.)

Security Bond to be used when the Applicant gives Personal Security.

WHEREAS has on received from the Collector of a certificate under the Land Improvement Loans Act, 1883, and the rules made thereunder, in virtue of which he is entitled to receive an aggregate sum of Rs. as a loan from Government; We hereby agree that if the said shall fail to comply with the terms on which the loan has been granted, either by misapplying the same or by failing to pay any instalment on the date fixed for its payment, we will be jointly and severally liable to Government for such sum, not exceeding , as may be necessary to make good the amount which in consequence of his default he may have become liable to pay.

FORM D—II (*c*).

(SEE RULE 13.)

Hypothecation Bond to be used when immoveable property is preferred by Collateral Surety.

WHEREAS has on received from the Collector of a certificate under the Land Improvement Loans Act, 1883, and the rules made thereunder, in virtue of which he is entitled to receive the aggregate sum of Rs. as a loan from Government; and whereas security for the due application of the loan, and for the punctual repayment of the same, according to the terms of the certificate, is demanded from him; I (or we) hereby mortgage to Government the immoveable property mentioned in the schedule below, as collateral security, and agree that, if he fails to comply with the terms on which the loan has been granted, either by misapplying the same or by failing to pay any instalment on the date fixed for its payment, it shall be lawful for the Collector to recover from the said property such sum as may be necessary to make good the amount which, in consequence of 's failure to comply with the conditions of this certificate, may be due to Government.

SCHEDULE.

I declare that the statements made by in the above schedule as regards the nature and extent of the encumbrances on the immoveable property mortgaged by as security for the repayment of the loan granted to are true to knowledge, save as to matters stated on information and belief, and as to these, believe the same to be true.

N.B.—In describing the immoveable property to be mentioned in the schedule above it shall be stated whether the property is free from encumbrances, or, if not, what are the nature and extent of the encumbrances.

No. 1287 L.R.—The 28th February 1908.—In exercise of the power conferred by section 4 of the Agriculturists' Loans Act, 1884, the Lieutenant-Governor is pleased to make the following rules, in supersession of all previous rules published with the notifications noted on the margin, as to loans to be made to owners and occupiers of arable land for the relief of distress, the purchase of seed or cattle and other purposes not specified in the Land Improvement Loans Act, 1883, but connected with agricultural objects.

Notification No. 930 (L.R.), dated the 19th February 1901; No. 3397 (L.R.), dated the 24th August 1901; No. 766 (L.R.), dated the 1st February 1902; No. 469 (L.R.), dated the 22nd January 1904, and No. 498 (T.R.), dated the 2nd May 1904.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

RULES UNDER THE AGRICULTURISTS' LOANS ACT, XII OF 1884.

Power to sanction loans.

1. The Collector may sanction loans of sums not exceeding Rs. 700 in each case Subdivisional Officers and any Deputy Collector who may be specially empowered in this behalf by the Collector with the approval of the Commissioner may sanction loans not exceeding Rs 250. Loans exceeding Rs. 700 shall require the sanction of the Commissioner, and loans exceeding Rs. 5,000 the sanction of the Board. The district allotment may not be exceeded without the sanction of the Commissioner.

Application to whom to be made.

2. Applications for loans may be presented to the Collector or to any other Revenue Officer not below the rank of a Kanungo authorised in this behalf by the Collector.

Form of Application.

3. (i) Applications may be made orally or in writing.

(ii) The officers authorised by rule 2 to receive application shall keep with them for free distribution copies of the annexed Form A, and shall do their best to secure the presentation of all written applications as nearly as possible in that form, but shall not reject any such application that may be presented in any other form.

(iii) If applications are received orally, they shall at once be reduced to writing by the officer authorised to receive them.

Local enquiry.

4 (i) A Revenue Officer receiving an application under rule 2 shall either make a local enquiry himself or cause one to be made by another Revenue Officer not below the rank of a Kanungo or by some reliable non-official agency, if available, for the purpose of ascertaining the particulars mentioned on the reverse of Form A.

(ii) A Kanungo shall be so employed only when a gazetted officer is not available.

Submission of application with report of local enquiry.

5. If any Revenue Officer is not empowered by rule 1 to sanction the loan, he shall transmit the application with his report to the Collector, or to the officer who ordered the enquiry, as the case may be, provided that, if the receiving or enquiring officer is subordinate to a Subdivisional Officer, he shall submit it to the Subdivisional Officer.

Delegation of functions.

6. The Local Government may, by general or special order, empower any person to perform all or any of the functions of a Collector or of a Revenue Officer referred to in rules 2, 4 and 5.

Security.

7. (i) When the applicant possesses an interest in immoveable property of value sufficient to secure the whole amount that may become payable in respect of the loan, he shall mortgage that interest, or a sufficient portion thereof, to the Government as security for the payment of that amount, and no further security need be required from him.

(ii) When the applicant does not possess an interest in immoveable property of such value as aforesaid, he shall procure some person or persons to become his surety or sureties for the payment of the said amount.

(iii) When the sureties are a body of village residents who bind themselves jointly and severally to the Government for the payment of the said amount, their personal security may be accepted, provided that the sureties have executed a bond in the annexed Form C. In other cases, the security given by the surety or sureties shall consist of the mortgage of immoveable property.

(iv) The Collector must in every case satisfy himself that the security offered, in whatever form it is given, is sufficient to guarantee the repayment of the loan; and when he is of opinion that security other than land is sufficient, such security may be accepted.

Procedure.

8. If the loan applied for is one that can be granted under the provisions of section 4, sub-section (1), of the Act, and if the security offered is good and sufficient, the officer dealing with the application or the Collector, when the application and report have been transmitted to him under rule 5, may, on completion of the local enquiry, sanction the loan himself, if empowered by rule 1 to do so; otherwise the Collector shall forward the application, with his report thereon, to the Commissioner for disposal.

Disbursement of loans on the spot.

9. Where the Revenue Officer, other than the Collector, has power under Rule 1 to sanction the loan applied for, he may, as soon as the local enquiry is completed and the particulars mentioned on the reverse of Form A are filled in, take the security required by Rule 11, sanction the loan, and, if so desired by the applicant, disburse it on the spot. Loans or instalments of loans sanctioned by the Collector or any higher authority may be disbursed in the village by Subdivisional Officers and Deputy Collectors empowered under Rule 1, and by any reliable non-official agency, where available :

Provided that disbursement on the spot may not in any case exceed Rs. 500 for a single item :

Provided also that, when any loan is payable in more than one instalment, the second or any subsequent instalment shall not be passed for payment by the sanctioning officer until he has had an enquiry made locally and satisfied himself that satisfactory progress is being made with the work for which the loan was sanctioned.

Drawing of money on abstract bills.

10. For the purposes of rule 9, the Revenue Officer may draw a lump sum at a time on an abstract bill, subject to the following restrictions :—

(*a*) No officer disbursing loans under the said rule shall be allowed to draw a second abstract bill without producing a detailed bill to account for the amounts already disbursed from the last advance taken, any balance left being at the same time refunded into Government Treasury.

(*b*) In no case shall the submission of the detailed bill be delayed beyond the end of the month following that in which the advance was drawn from the Treasury.

(*c*) The disbursing officer shall take the receipts of the payees on the spot as soon as advances have been made, and shall certify at the foot of the detailed bill that the advances were duly sanctioned by him and paid in his presence.

(*d*) The Collector shall prescribe a money-limit for the amount which may be drawn on an abstract bill by each officer with due regard to the circumstances of each case.

Explanation to clause (*a*).—It is not intended that the money should actually be returned to the Treasury on each occasion. When preparing the detailed bill, the disbursing officer should only show in it the unexpended balance of the advance as refunded. This balance will be deducted at the Treasury from the amount of the abstract bill submitted for a further advance.

Order granting loan, and security bonds.

11. (i) If the loan is sanctioned, the applicant must sign the order granting the loan, which shall be in the annexed Form B, as nearly as may be.

(ii) If the security for the repayment of the loan consists of the mortgage of an interest of the applicant, such as is referred to in clause (i) of rule 7, the mortgage may be effected by clause (*f*) of Form B being inserted in the order granting the loan, and by the order being attested by at least two witnesses, and by a copy thereof being sent to the registering officer under section 89 of the Indian Registration Act, 1877, as amended by section 3, Act VII of 1886.

(iii) If the security is furnished by a surety or sureties, it shall be taken, where the sureties give only personal security, in the annexed Form C, and where the surety or sureties mortgages or mortgage immoveable property, in the annexed Form D.

(iv) Every bond executed in Form D must be attested by at least two witnesses, and a copy of it must be sent to the registering officer under the said section 89 of the Indian Registration Act, 1877.

(v) If the loan is granted to a body of villagers who make themselves jointly and severally liable, they shall, in addition to signing the order in Form B, sign a bond in the annexed Form E.

Payment where to be made.

12. A copy of the order granting the loan shall be given to the applicant, and, on presentation thereof, payment of the loan or of any instalment of the loan may be made to him either at the district or the subdivisional Treasury, or on the spot under rule 9.

Closure of loan on failure to take instalment due.

13. (i) In the case of a loan granted by instalments, if the applicant, after taking one or more instalments, fails to take any other instalment within six weeks from the date on which he is entitled to it, the Collector may declare the loan closed.

(ii) The total of the instalments taken by the applicant shall then constitute the loan, which shall be treated as having been fully paid on the date on which the last instalment was actually taken ; and a fresh arrangement for repayment shall be made by the Collector, consistent with rules 17 and 18 in modification of the order in Form B granted to the applicant when the loan was sanctioned.

ILLUSTRATION.—*A* applies for and obtains sanction to a loan of Rs 100 payable to him in four instalments of Rs. 25 on the 1st January, the 1st April, the 1st July, and the 1st October 1908. In the order granted to him, the loan is declared to be repayable in half-yearly instalments, beginning from 1st October 1909. He takes only the first two instalments. The Collector may treat the loan as one of Rs. 50, completely paid on the 1st April 1908, and if he does so, he must draw up a revised order in Form B, in which all the conditions of the repayment of the loan actually taken are to be recorded.

Interest on loans.

14. (i) The ordinary rate of interest on loans shall be one anna in the rupee, or 6¼ per cent. per annum.

(ii) The Local Government may, for special reasons and on special application through the Board of Revenue, sanction a loan at a lower rate of interest or without interest.

(iii) If any instalment of principal or of interest, or of consolidated principal and interest, is not paid when it falls due, the Collector shall charge interest on it at 6¼ per cent. per annum from the date of its falling due to the date of payment:

Provided that, whenever the Collector is satisfied that the default is due to inability to pay, and that the levy of such interest would be productive of hardship, he may, with the sanction of the Commissioner, reduce or remit it.

(iv) In charging penal interest on overdue instalments not suspended under rule 20, the same period of 15 days' grace shall be allowed as in the case of payments of cesses, and thereafter interest shall be charged on the total of the overdue instalment at the same rate as the interest on the loan.

Interest for intervening period.

15. (i) Interest shall be levied for the period intervening between the date of the completion of the loan (in cases in which loans are granted in one payment), or between the dates of the payment of the instalments (in cases in which loans are granted in instalments), and the date from which the first instalment of interest, consolidated with the first instalment of the principal, becomes payable.

(ii) The interest leviable in such cases shall be demanded in a lump sum six months before the date on which the first consolidated instalment of principal and interest is made payable.

Table of repayment.

16. The repayment of the loan shall be made in accordance with the table in the annexed Form F, which shows the amounts of equal yearly and half-yearly payments necessary to repay a loan advanced with interest at 6¼ per cent. per annum for any number of years from one to twenty.

Repayment by instalments; date of first instalment.

17. Repayment shall be by equated yearly or half-yearly instalments, the date of the first instalment not being later than one year from the date of the actual advance of the loan, or, when the loan is advanced in instalments, from the date of the advance of the last instalment actually paid.

Date of last instalment.

18. The date of the last instalment shall not be later than five years from the date of the actual advance of the loan, or, when the loan is advanced in instalments, ten years from the date of the advance of the last instalment actually paid.

Date of repayments of loans.

19. The dates for payment of instalments (annual or half-yearly) shall be fixed by the Collector, with the sanction of the Commissioner, for each thana of his district, with reference to the season when repayment can most easily be made.

Explanation.—The season at which repayment can most easily be made will ordinarily be the time when crops grown for sale are taken to market. In jute districts, for instance, it would probably be best to provide for repayment by one annual instalment in September, when the jute crop is sold, except in cases where the borrower himself prefers to pay in two yearly instalments.

Suspension of instalments or of interest.

20. (i) The realisation of instalments or of interest may be suspended by the Collector on proof of failure of crops from causes beyond the borrower's control, or of other exceptional calamity rendering the payment of the instalments unduly burdensome to him.

(ii) The Collector shall report every such suspension to the Commissioner, who shall pass such orders on the case as may seem proper.

(iii) No interest shall be charged for the period of suspension; the total amount to be repaid shall remain the same as before.

(iv) The power of suspension of payments of instalments or of interest on loans which is conferred on the Collector by clause (i) of this rule may be exercised to the extent of Rs. 700 in any one case.

(v) Notwithstanding anything contained in clause (iv) of this rule in all cases where suspension of revenue or rent has been granted on a large scale over a wide area, a suspension of payment of instalments due during the period for which suspension of revenue or rent has been granted shall be made by the Collector without reference to any higher authority, and the effect of such suspension shall be to postpone for one instalment period at a time the payment of all remaining instalments due on the loan.

Remission of loan.

21. (i) The Collector shall in no case, without reference to the Commissioner, remit repayment of a loan; and he may recommend remission only in cases where the recovery of the loan in full would occasion serious hardship.

(ii) Remission may be sanctioned by the Commissioner up to the amount of loan a Collector may sanction, and by the Board up to the amount a Commissioner may sanction. Larger remissions shall in all cases require the sanction of the Local Government.

Misapplication of loan.

22. (i) If at any time it is proved to the satisfaction of the Collector that any part of a loan has been misapplied, he may, after recording in writing the grounds of his decision, and subject to the control of the superior Revenue authorities, proceed to recover the whole amount of the loan, with such interest and costs (if any) as may be payable in respect thereof.

(ii) Before determining to take action under clause (i) of this rule, the Collector shall take into consideration the expense of supervision, even when that may have been supplied by the debtor himself.

Returns, registers and accounts.

23. The Board shall regulate the forms of all returns, registers, and accounts relating to loans under the Act.

FORM A.

(See Rules 3, 4, and 9.)

FORM OF APPLICATION.

Name, father's name, residence, etc., of applicant.	Amount of loan required.	Nature of security, whether personal or otherwise, and whether, if it consists of immoveable property, such property is free from encumbrances, and if not, the nature and extent of the encumbrances and, if registered, the number and date of the registered deed and the name of the registry office.	Object of the loan.	Situation of the land owned or occupied by applicant. Reference to the Khatian number in the record-of-rights, (if any), in which the lands are contained shall be given.	Applicant's rights in the land.	Proposed date of repayment.
1	2	3	4	5	6	7

I/We declare that the statements made by me/us in the above application are true to my/our knowledge, except as to matters stated on information and belief, and as to these I/we believe the same to be true.

Signature of Applicant.

N.B.—Column 3.—The enquiring Officer should, as far as may be possible, enquire into the statements made as to encumbrances, and record the result of his enquiries on the reverse of this form.

[REVERSE OF FORM A.]

Particulars to be filled in by the Enquiring Officer.

I.—Field number, and area of land owned or occupied by applicant, and Mahal in which it is situated.

II.—Status of applicant, that is, whether proprietor or tenant.

III.—Security—

(i) If an interest of the applicant in immoveable property, the nature and value of that interest and the nature and extent of pre-existing encumbrances thereon, if any.

(ii) Where sureties offer personal security, their number, names, residence, status and means.

(iii) If property other than the land itself, its nature and value, and nature and extent of encumbrances if any.

IV.—Repayment—

(i) Suitable date for first instalment, with reference to the circumstances under which the loan is applied for.

(ii) Proposed instalments and period of repayment.

V.—Date on which the loan or any instalment thereof should be received by the applicant.

Recommendations of the Enquiring Officer.

NOTE.—Where a record-of-rights has been prepared, a reference should be made to that record in order to ascertain the interest of the applicant, or that of his collateral surety, in the land which it is proposed to pledge.

FORM B.

(SEE RULES 11 AND 13.)

Order granting loan under the Agriculturists' Loans Act, 1884, and the rules made thereunder , to , son of of .

1. On production of this order the aforesaid is entitled to receive from Government, in the district of , the following sums, on the dates noted against each, as a loan to be expended on (here describe clearly the object of the loan)—

Date.	Amount.
"	"

2. The conditions relating to the making and repayment of this loan are as follows:—

(*a*) That it, with the interest and costs (if any) due in respect thereof, shall be repayable on the dates and by the amounts specified below:—

Date.	Amount (principal and interest).	Costs.	Total.
,,	,,	,,	,,
,,	,,	,,	,,

(*b*) That in the case of a loan granted by instalments, if the applicant, after taking one or more instalments, fails to take any other instalment within six weeks from the date on which he is entitled to it, the Collector may declare the loan closed. The total of the instalments taken by the applicant shall then constitute the loan, which shall be treated as having been fully paid on the date on which the last instalment was actually taken; and a fresh arrangement for repayment shall be made by the Collector, consistent with rules 17 and 18, in modification of this order.

(*c*) That interest shall be levied for the period intervening between the date of the completion of the loan (in cases in which loans are granted in one payment), or between the dates of the payment of the instalments (in cases in which loans are granted in instalments), and the date from which the first instalment of interest, consolidated with the first instalment of the principal, becomes payable. The interest leviable in such cases shall be demanded in a lump sum six months before the date on which the first consolidated instalment of principal and interest is made payable.

(*d*) That the loan be applied solely to the purpose specified above, and that, if at any time it is proved to the satisfaction of the Collector that any part of the loan has been misapplied, he may proceed to recover the whole amount of the loan with such interest and costs (if any) as may be payable in respect thereof.

(*e*) That, if any instalment is not repaid on the due date, the whole amount payable in respect of the loan shall be deemed to have become due.

(*f*) That, as security for the repayment of the loan, with any interest and costs that may become payable in respect of the same, the immoveable property specified in the margin is hereby mortgaged to Government.

This clause is to be inserted when the security for the repayment of the loan consists of the mortgage of an interest of the applicant in immoveable property.

(*g*) That, if it be proved to the satisfaction of the Collector that the statement, made by the aforesaid in his application for this loan, as to the nature and extent of encumbrances, are in any particular untrue, the Collector may so declare in writing, and thereupon the whole of such loan, with such interest as may become due thereon, shall forthwith become due and payable.

Signature of Collector, Subdivisional Officer, or Deputy Collector.

I understand and agree to the aforesaid terms and conditions.

Signature of person to whom the loan is made.

Received Contents.

Signature of the payee (the payee should affix a one-anna stamp, if the loan exceeds Rs. 20.)

FORM C.

(SEE RULES 7 AND 11.)

Security bond to be used when sureties give personal security only.

WHEREAS has on received from the Collector of an order under the Agriculturists' Loans Act, 1884, and the rules made thereunder, in virtue of which he is entitled to receive the sum of Rs. as a loan from Government for the purpose of (here state the purpose for which the loan is given). We hereby agree that if the said shall fail to comply with the terms on which the loan has been sanctioned, either by misapplying the same, or by failing to repay any instalment of the same or any interest or costs payable in respect thereof on the date on which it may become due, we will be jointly and severally liable to Government for such sum, not exceeding , as may be necessary to make good the amount which, in consequence of his default, he may have become liable to pay.

FORM D.

(SEE RULE 11.)

Security bond to be used when the security given by a surety or sureties consists of a mortgage of immoveable property.

WHEREAS has on received from the Collector of an order under the Agriculturists' Loans Act, 1884, and the rules made thereunder, in virtue of which he is entitled to receive the sum of Rs. as a loan from Government for the purpose of (here state the purpose for which the loan is given), and whereas security for the due application of the loan and for the punctual repayment of the same according to the terms of the order is demanded from the said ; I (or we) mortgage to Government the immoveable property mentioned in the schedule below, as security for the purposes aforesaid, and agree that if the said fails to comply with the term on which the loan has been sanctioned, either by misapplying the said loan or by failing to repay any instalment of the same or any interest or costs payable in respect thereof on the date on which it may become due, it shall be lawful for the Collector to recover from $\frac{me}{us}$ personally or from the said property or from both such sum as may be necessary to make good the amount which, in consequence of the said 's default, may have become due to Government.

SCHEDULE.

$\frac{I}{we}$ declare that the statements made by $\frac{me}{us}$ in the above schedule as regards the nature and extent of the encumbrances on the immoveable property mortgaged by $\frac{me}{us}$ as security for the repayment of the loan granted to are true to $\frac{my}{our}$ knowledge, save as to matters stated on information and belief, and as to these $\frac{I}{we}$ believe the same to be true.

Signature.

FORM E.

(SEE RULE 11)

Bond to be executed by villagers as security for a loan granted to them.

WE, the undersigned persons as set forth in the schedule below, do hereby execute this joint and several bond, and do agree and will be firmly bound by the terms and conditions hereinafter mentioned.

Whereas we have on received from the Collector of an order dated the under the Agriculturists' Loans Act, 1884, and the rules made thereunder, in virtue of which we are entitled to receive the sum of Rs. as a loan from Government: We do hereby agree (1) that all and every one of us and our heirs and representatives and the heirs and representatives of each of us shall be jointly and severally bound to the Government for the payment of the whole amount payable in respect thereof; (2) that the conditions set forth in the above-mentioned order will be binding on us and on our heirs and representatives and on the heirs and representatives of each one of us jointly and severally; and (3) that in case of default in repaying the said loan or any portion thereof the Government will have the right and power to realise the whole and every part of the money payable, from the person and property, whether moveable or immoveable, and whether mentioned in the said order or not, of all and of every one of us and of all and each of our heirs and representatives and the heirs and representatives of each one of us jointly and severally in accordance with the said Act and rules and in conformity with the terms and conditions of the said order.

No. 1337L.R.—The 3rd March 1908.—With reference to Notification No. 1738A., dated 2nd March 1908, appointing Mr R. T. Greer, C.S.I., to act as a Member of the Board of Revenue, Lower Provinces, during the absence, on leave, of the Hon'ble Mr. F. A. Slacke, C.S.I., or until further orders, the Lieutenant-Governor of Bengal is pleased, under section 5, Regulation III of 1822, as amended by section 2 (2) and Schedule II of the Obsolete Enactments Act, XII of 1891, to authorise Mr. R. T. Greer, C.S.I., from the date of taking over charge from the Hon'ble Mr. F. A. Slacke, C.S.I., to exercise generally throughout the territories subject to the control of the Board of Revenue, Lower Provinces, all the duties, powers and authority which are vested in the Board collectively in respect of the Department of Land Revenue. This includes Land Revenue, Survey and Settlement, Land Registration, Land Improvements, the sale or lease of waste lands and Government estates, the management of wards' and attached estates, the collection of cesses, the realization of arrears of revenue and the recovery of public demands, rent suits, embankments, pensions, the examination, enrolment, etc., of Revenue Agents, patni sales and the supply of provisions for troops.

2. In the absence of one Member of the Board hereafter, the other Member is authorised to exercise, in the Departments specially allotted to the absent Member, any of the powers vested in the Board collectively.

No. 1338L.R.—The 3rd February 1908.—Under section 3 (17) of the Bengal Tenancy Act, 1885 (VIII of 1885), as amended by Bengal Act III of 1898 and Bengal Act I of 1907, Babu Braja Nath Ray, Sub-Deputy Collector, is authorised to discharge the functions of a Revenue Officer, under the provisions of that Act, so far as they relate to Revenue Officers, for the purposes of a survey and the preparation of a record-of-rights in the district of Midnapore.

Midnapore.

He is also vested with the powers of an Assistant Settlement Officer under Rule 40, (Chapter VI) of the Rules under the Bengal Tenancy Act.

No. 1339L.R.—The 3rd March 1908.—In supersession of Notifications Nos 4048L.R., dated the 12th December 1907 and 665L.R., dated the 31st January 1908, Babu Satish Chandra Basu, No. II, Munsif, now on deputation as an Assistant Settlement Officer, is allowed leave for one month and seven days with effect from the 26th October 1907, viz., eighteen days on full pay under articles 260 and 274 of the Civil Service Regulations and the remaining period under article 271 of the Regulations.

No. 1330Agri.—The 26th February 1908.—The following is published for general information.

E. A. GAIT,
Chief Secy. to the Govt of Bengal.

Order of the Department of Agriculture and Technical Instruction for Ireland, No. 75, dated 28th January 1907.

Importation of Horses, Asses and Mules (Ireland) Order of 1907.

THE Department of Agriculture and Technical Instruction for Ireland, by virtue and in exercise of the powers in them vested under the Agriculture and Technical Instruction (Ireland) Act, 1899, the Diseases of Animals Acts, 1894 to 1903, and of every other power enabling them in this behalf, do order, and it is hereby ordered as follows:—

Interpretation.

1.—(1) In this order—

"The Department" means the Department of Agriculture and Technical Instruction for Ireland

"Article" means Article of this Order.

"The Act of 1894" means the Diseases of Animals Act, 1894.

Other terms have the same meaning as in the Act of 1894, and the Acts amending the same

(2) Horses, asses and mules shall be animals for the purposes of the following Sections of the Act of 1894 (namely):—

Sections 22 and 65;
Sections 43 and 74;
Section 44;

and of all other sections of that Act containing provisions relative to or consequent on those sections, including such sections as provide for offences and legal proceedings; and also of this Order.

Restriction on Importation of Horses, Asses and Mules.

2. Unless and until the Department otherwise order, it shall not be lawful to import into, or land in Ireland, any horse, ass or mule from the Great Britain from the Isle of Man or from the Channel Islands, except under the authority of a permit in that behalf previously obtained from the Department, and subject to such conditions as may be prescribed in such permit.

Applications for permits.

3. Each application for a permit under this order should be addressed to

The Secretary,
Department of Agriculture and Technical Instruction
for Ireland (Veterinary Branch),
Dublin,

and should be made at an adequate interval prior to the proposed date of importation of the animal or animals to which the application relates, so as to afford time for such enquiries as the Department may deem necessary before coming to their decision as to whether the permit applied for may be granted.

Notice of Detention in case of Illegal Landing.

4.—(1) If, in any instance, a horse, ass or mule is landed in contravention of this Order the Department, or an Inspector of the Department, may give notice to the owner or person in charge of such horse, ass or mule requiring the detention and isolation of the horse, ass or mule in accordance with the provisions of such notice.

(2) If the owner or person in charge of the horse, ass or mule, after receipt of such notice, fails to comply with any of the provisions therein contained, he shall be deemed guilty of an offence against the Act of 1894.

(3) A notice applying under this Article shall continue in force until it is withdrawn by a further notice given by the Department, or an Inspector of the Department.

Exemption.

5. Nothing in this Order applies to horses, asses or mules under the care and supervision of the Army Veterinary Service.

Offences.

6. If a horse, ass or mule is landed in contravention of this Order, the owner and the Charterer and the master of the vessel from which it is landed, and the owner of the horse, ass or mule, and the person for the time being in charge thereof, and the person causing, directing, or permitting the landing, and the person landing the same, and the consignee or other person receiving or keeping the horse, ass or mule knowing it to have been landed in contravention as aforesaid, shall, each according to, and in respect of, his own acts and defaults, be deemed guilty of an offence against the Act of 1894.

Revocation of Previous Order.

7. The Order described in the Schedule to this Order is hereby, from and after the commencement of this order, revoked.

Commencement.

8. This Order shall come into operation on the 21st day of February 1907.

Short Title.

9. This Order may be cited as the "Importation of Horses, Asses and Mules (Ireland) Order of 1907."

In witness whereof the Department of Agriculture and Technical Instruction for Ireland have hereunto set their official seal this 28th day of January 1907.

L. S.

T. P. GILL,

Secretary.

SCHEDULE.

Order Revoked.

Date.	Title.
1906.	
29th May	Importation of Horses, Asses and Mules (Ireland) Order of 1906.

Order of the Department of Agriculture and Technical Instruction for Ireland, No. 88, dated 17th December 1907.

Importation of Horses, Asses or Mules (Ireland) Order of 1907, No. II.

THE Department of Agriculture and Technical Instruction for Ireland, by virtue and in exercise of the powers in them vested under the Agriculture and Technical Instruction (Ireland) Act 1899, the Diseases of Animals Acts, 1894 to 1903, and of every other power enabling them in this behalf, do order, and it is hereby ordered as follows :—

Restriction on Importation of Horses Asses and Mules from Foreign Countries.

1. From and after the 31st day of December 1907, the Importation of Horses, Asse and Mules (Ireland) Order of 1907 shall be read and have effect as if Article 2 thereo included the following additional clause: -

Unless and until the Department otherwise order, it shall not be lawful to import into, or land in Ireland, any horse, ass or mule from any country outside Great Britain, the Isle of Man, and the Channel Islands, except under the authority of a permit in that behalf previously obtained from the Department, and subject to such conditions as may be prescribed in such permit.

Short Title and Construction.

2. This Order may be cited as the "Importation of Horses, Asses and Mules (Ireland) Order of 1907, No. II," and shall be read as one with the Importation of Horses, Asses and Mules (Ireland) Order of 1907.

In witness whereof the Department of Agriculture and Technical Instruction for Ireland have hereunto set their official seal this 17th day of December 1907.

T. P. GILL,

Secretary.

DECLARATION.

No. 12, S.L.A.— The 27th February 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for raising Sagoon-old embankment in 41st, 42nd and 3rd mile, Saran embankment, in the villages of Bhogwanpur, Rampur Rudar, Rajwara Mokim and Rajwara, pargana Bal, zilla Saran, it is hereby declared that for the above purpose a strip of land measuring, more or less, 23 bighas 10 cottahs 2 chitaks of standard measurement, is required in the aforesaid villages.

Saran.

This declaration is made, under the provisions of section 6, Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector, Saran

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

DECLARATION

No. 1245L.A.—The 27th February 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government, at the expense of the District Fund of Muzaffarpur, for a public purpose, viz., for extending the compound of the District Board's bungalow in the village of Mohamadpurkazi, pargana Besara, zilla Muzaffarpur, it is hereby declared that, for the above purpose, a piece of land, measuring, more or less, 1 bigha 8 cottahs 4 chitaks of standard measurement, bounded on the north and east by the compound of the District Engineer's bungalow, on the south by the garden of Baldeo Sahu, and on the west by the garden of Muni Sahu, is required within the aforesaid village of Mohamadpurkazi.

Muzaffarpur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the District Engineer, Muzaffarpur.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

GENERAL DEPARTMENT.

NOTIFICATION.

No. 1513.—The 3rd March 1908.—The following resolution issued by the Government of India in the Department and Commerce and Industry is republished for general information.

H. C. SIRRATFEILD,
Offg. Secy to the Govt. of Bengal.

No. 1578—1598—11, dated Calcutta, the 14th February 1908.

RESOLUTION—By the Government of India, Department of Commerce and Industry.

THE following paper relative to the Franco-British Exhibition, London, 1908, is published for general information in continuation of the Resolution No. 10201-10221-11, dated the 6th December 1907, published in the Supplement to the *Gazette of India*, dated the 7th December 1907:—

THE INDIAN SECTION OF THE FRANCO-BRITISH EXHIBITION, 1908.

In order to obtain some part of the funds needed for their undertaking the Executive authorities of the Franco-British Exhibition found it necessary to make a charge for all space occupied in the grounds by Colonial and other buildings. The Indian Executive Committee have secured an area of 20,000 square feet of space, at a cost of £2,000, in close proximity to the French and British Colonial Sections. On this site a special pavilion for the Indian Exhibits in being erected.

In deciding on the general style of the Indian Pavilion the following conditions had to be carefully considered, viz.:—

(*a*) The smallness of the funds at disposal, and the extremely limited time available for its erection.

(*b*) The provision of the largest amount of well-lighted exhibition space, in a building adapted to the climatic needs of this country.

(*c*) Compliance with the stringent and necessary regulations of the London County Council and Local Authorities.

The pavilion consists of a large central hall with bays or courts running along the sides and has a floor area of about 12,000 square feet. It is intended to allot those courts to various groups of Indian raw products, industries and manufactures, as well as to illustrations of the administrative machinery of the Government of India

The central hall will be largely devoted to the more artistic exhibits received from India.

The total space at the disposal of the Committee is limited, and intending exhibitors are therefore advised to make as early appliction as possible.

In order to partially defray the heavy cost incurred in the purchase of the site, the erection of the pavilion, and the maintenance of its passages and approaches, the Indian Executive Committee have to make a charge for space, which has been fixed at a minimum of ten shillings for superficial foot of floor area.

Forms of application for space, and all other information regarding the Indian Section of the Franco-British Exhibition, can be obtained *in India* from the Official Agents to the Indian Committee:—

MESSRS. KING, KING & Co. ... ... BOMBAY;
MESSRS. KING, HAMILTON & Co. ... ... CALCUTTA;
and their Correspondents—
MESSRS. GORDON, WOODROFFE & Co. ... ... MADRAS; and
MESSRS. A. SCOTT & Co. ... ... RANGOON.

All applications for space in the Indian Section must be addressed to

MR. B. J. ROSE,
Secretary, Indian Executive Sub-Committee,
Franco-British Exhibition,
India Office,
London, S.W.

REGISTRATION.

No. 1134.—The 19th February 1908.—Babu Kiran Chandra Banarji, Sub-Registrar, Calcutta, is appointed temporarily to act as Sub-Registrar, Santipur, in the district of Nadia.

Nadia.

No. 1469.—The 2nd March 1908.—Under the provisions of section 5 of the Indian Registration Act, III of 1877, the Lieutenant-Governor sanctions the establishment of a new registration sub-district as an experimental measure for six months, with head-quarters at Banki, having jurisdiction over thana Banki, in the Sadar subdivision of the district of Cuttack. The registration sub district of Cuttack will henceforth be restricted to thana Cuttack only. This notification will take effect on and from the 15th March 1908.

Cuttack.

No. 1503.—The 3rd March 1908.—Babu Ashutosh Mukharji, Sub-Registrar, Shambazar, in the district of Hooghly, is transferred to Garbetta, in the district of Midnapore.

Hooghly.

No. 1505.—The 3rd March 1908.—Babu Somnath Ray, Sub-Registrar, Jagatballavpur, in the district of Howrah, is transferred to Shambazar, in the district of Hooghly.

Howrah.

No. 1507.—The 3rd March 1908.—Babu Phakir Chand Ray, Sub-Registrar, Kajlagarh, Midnapore. in the district of Midnapore, is transferred to Jagatballavpur, in the district of Howrah.

No. 1509.—The 3rd March 1908.—Babu Nalini Kanta Singha, Sub-Registrar, Khajri Midnapore. in the district of Midnapore, is transferred to Kajlagarh, in the same district.

H. C. STREATFEILD,
Offg. Secy. to the Govt. of Bengal.

FINANCIAL DEPARTMENT.

NOTIFICATIONS

No. 228S.R.—The 3rd March 1908.—In exercise of the powers conferred by section 155 of the Sea Customs Act, 1878 (VI I of 1878), the Lieutenant-Governor is pleased to make the following rules. Notification No. 56T.F., dated the 12th May 1897, and the Notice, dated the 29th September 1897, published at pages 642 and 1254, respectively, of Part I of the *Calcutta Gazette* of 19th May and 6th October 1897, are hereby cancelled:—

Part I.—Rules for rendering imported spirit effectually and permanently unfit for human consumption.

1. Imported spirit may be rendered effectually and permanently unfit for human consumption, so as to bear the reduced rate of duty under Article 1 of Schedule III of the Indian Tariff Act, VIII of 1894, by the admixture either of caoutchoucine or of wood naphtha and mineral naphtha.

2. The ingredient or ingredients shall be procured by the importer or his agent at his own expense, and the admixture shall be made only at such time and place and in the presence of such officer or officers as the Collector of Customs may direct. Before admixture the ingredient or ingredients shall be lodged at the Custom House or at any other suitable place to be approved by the Collector of Customs, who shall cause them to be tested by the Chemical Examiner to Government. Without the certificate of the Chemical Examiner that an ingredient is of the proper strength, and fitted if used in the proportion mentioned in rules 3 and 4 to effectually and permanently render unpalatable and unfit for human consumption the spirit with which it is mixed no ingredient shall be approved for admixture, and if admixed without approval, the liquor shall not be admitted at the reduced rate or duty.

3. When the ingredient is caoutchoucine, it shall be mixed in the proportion of one part by volume of the caoutchoucine to 99 parts by volume of the spirit, and the spirit shall not be of less strength than 30 per cent. over-proof. When the admixture is completed, the liquor shall be tested by drawing a sample of about half an ounce from each cask or drum, and adding to each sample separately three or four times that quantity of water. If the mixture becomes turbid and milky, the liquor shall be admitted at the reduced rate of duty. In case of dispute as to whether the liquid has become turbid and milky, the decision of the Collector shall be final.

4. When the ingredients are wood naphtha and mineral naphtha, the wood naphtha shall be mixed with the spirit in the proportion of one part by volume of the naphtha to nine parts by volume of the spirit, and to this mixture shall be added three-eighths per cent. of mineral naphtha of specific gravity not less than ·800

5. When the spirit is alleged to have been rendered effectually and permanently unfit for human consumption by the admixture of wood naphtha and mineral naphtha, such number of samples as the Collector may direct shall be sent to the Chemical Examiner to Government for examination and report at the expense of the importer: Provided that—

(*a*) if the consignment contains casks of not less than 50 gallons each, the importer may demand that not less than one sample shall be sent from each such cask;

(*b*) if the consignment contains casks or drums of less than 50 gallons each, the importer may and shall, if so ordered by the Collector, before admixture of the denaturalising ingredients, pour the contents of two or more such casks at the Custom House into one or more casks of not less than 50 gallons capacity, and when this is done, the spirit shall be treated for the purpose of testing and for the levy of expenses under rules 7 and 8, as if originally imported in such larger casks.

6. After considering the Chemical Examiner's report and other circumstances, if any bearing upon the case, the Collector will decide whether the said spirit shall be allowed importation or not at the reduced rate of duty prescribed in Article 1 of Schedule III of the Indian Tariff Act, VIII of 1894. Should any of the samples examined by the Chemical Examiner be reported by him as not rendered effectually and permanently unfit for human consumption, the claim in respect of the whole of the spirit represented by the sample shall be rejected, and the spirit shall either be dealt with in all respects as spirits chargeable with the ordinary rate of duty, or, if the importer so desire, be further treated under rule 4 for the purpose of rendering it effectually and permanently unfit for human consumption.

7. The following fees shall be paid for chemical analysis:—

A fee shall be paid at the rate of Rs. 2 for each sample sent for analysis.

An additional fee of Re. 1 for each set of samples sent shall be paid to cover the cost of taking and sending samples from the Custom House to the Chemical Examiner.

8 Any expense which may be incurred by the Collector in rendering spirit unfit for human consumption, or in ascertaining that it has been so rendered, shall be paid by the importer before the import of the spirit is allowed.

9. The Collector may also admit specially, at the reduced rate of duty, spirit in small quantities which has been methylated with wood naphtha only of the quality approved by the Chemical Examiner, if he be satisfied that it is required for a purpose for which the mineralised denaturalised spirit is not suited, and that it will be used after admission in such a way that there will be no danger of its passing into consumption as potable spirit.

Part II.—Rules for admitting imported spirit said to have been rendered effectually and permanently unfit for human consumption.

1. Whenever spirit is declared to have been rendered, prior to importation, effectually and permanently unfit for human consumption, so as to bear the reduced rate of duty under Article 1 of Schedule III of the Indian Tariff Act, VIII of 1894, the Collector of Customs shall send such number of samples of such spirit as he may deem necessary to the Chemical Examiner to Government for examination and report at the expense of the importer.

2. After considering the Chemical Examiner's report and the circumstances, if any, bearing upon the case, the Collector shall decide whether the claim is to be admitted or not. Should any of the samples examined by the Chemical Examiner be reported by him as not rendered effectually and permanently unfit for human consumption, the claim in respect of the whole of the spirit represented by the sample shall be rejected, and the spirit shall either be dealt with in all respects as spirits chargeable with the ordinary rate of duty, or, if the importer so desire, be rendered effectually and permanently unfit for human consumption under Part I of these rules.

3. The Collector shall ordinarily admit at the reduced rate of duty prescribed in Article 1 of Schedule III of the Indian Tariff Act, VIII of 1894, such spirit only as may have been reported by the Chemical Examiner to be effectually and permanently rendered unfit for human consumption by the admixture of either caoutchoucine or wood and mineral naphtha. The Chemical Examiner's report shall state the nature of the ingredient used for denaturalisation, and shall include a note intimating whether, in his opinion, the spirit has or has not been rendered effectually and permanently unfit for human consumption.

4. The conditions contained in Part I, rule 5 (*a*) and (*b*), as to the taking of samples, and also those contained in Part I, rule 7, as to the payment of fees, shall apply to the testing of spirit under this Part, and, in addition to the fees above-mentioned, the importer shall also pay all expenses (if any) incurred by the Collector in or about the testing of spirit under this Part.

5. The Collector may also admit specially at the reduced rate of duty, spirit in small quantities which has been methylated with wood naphtha only of the quality approved by the Chemical Examiner, if he be satisfied that it is required for a purpose for which the mineralised denaturalised spirit is not suited, and that it will be used after admission in such a way that there will be no danger of its passing into consumption as potable spirit. In all other cases the Collector shall refuse to pass the spirit at the reduced rate of duty.

No. 229S.R.—The 2nd March 1908.—Mr. C. H. Crosse, Deputy Collector, is appointed Deputy Collector of Income-tax in the district of Manbhum, *vice* Babu Arun Kumar Bose, and under section 40 of Act II of 1886 is vested with the powers of a Collector under the Act.

Manbhum.

No. 231S.R.—The 2nd March 1908.—In exercise of the power conferred by section 18 of the Bengal Excise and Licensing Act, 1878 (Bengal Act VII of 1878), as amended by the Excise and Sea Customs Law Amendment Act, 1885 (IX of 1885), and in supersession of so much of the Notification, dated the 29th March 1892 (published at page 316 of Part I of the *Calcutta Gazette* of the 30th idem), as relates to the districts of Patna, Gaya, Muzaffarpur, Darbhanga, Saran and Champaran, the Lieutenant-Governor is pleased to fix the following rates of duty to be paid, on and from the 1st April 1908, on country spirit manufactured in distilleries in any of those districts and removed therefrom or from any warehouse connected therewith for consumption in that district —

Patna.
Gaya.
Muzaffarpur.
Darbhanga.
Saran.
Champaran.

DECLARATION.

No. 1074J.—The 26th February 1908.—Whereas certain land was acquired by the Bengal Government under the provisions of Act 1 of 1894, and Act XVIII of 1885 for a public purpose, viz, for such portion of the Damuda branch of the East Indian Railway as lies between mile 177-1-516 and mile 177-3-394, and whereas coal mines are situate under the said land, and whereas Messrs. Hoare Miller and Company have given notice to the Government of Bengal, in accordance with the provisions of Act XVIII of 1885, that the said Company intend to work the seam No. 14, and whereas the mines have been inspected by the officer appointed by the Bengal Government for the purpose under section 5 (1) of Act XVIII of 1885, and whereas it appears to the Bengal Government that the working out of the coal of the mines underlying the said land is likely to cause damage to the surface of the said land and to the works constructed thereon, and whereas the said Messrs. Hoare Miller and Company have agreed not to work and get minerals underlying the land acquired for their siding, or underlying the land acquired for the branch or other lines with which the siding is connected or underlying the land of the branch or branches connecting the said siding with the main line, in such a manner as to injure or to endanger the safety of the undertaking or any part thereof, nor to claim any compensation for any restricted working:

Manbhum.

Now, therefore, the Lieutenant-Governor of Bengal is pleased to declare, under section 5, sub-section (2), clause (*b*) of the abovementioned Act, XVIII of 1885, that the working shall be carried on by the said Messrs. Hoare Miller and Company in the manner and subject to the restrictions below specified, viz.—

(*a*) The main No. 5 gallery may be enlarged to a height of seven feet and a width of nine feet, and the ventilation gallery may be enlarged to a height of six feet and a width of six feet, and both galleries may be driven at these dimensions through the land acquired, in the direction of the main No. 5 gallery, and approximately parallel to it, provided that whenever practicable the enlargment as to height shall be made by taking coal from the floor and not from the roof.

(*b*) Manholes not exceeding the minimum sizes prescribed by Rule 8 of the Indian Mines Act may be made where required by that or any other rule made under the Act.

(*c*) These restrictions apply to No. 14 seam only, and to the area edged with pink on the plan L. A. M. A. No. 78 and the owner or his assigns shall give notice, under section 4 of the Land Acquisition Act, of his intention to work any other seam under such area, or to work coal under any other area of acquired land and that in all the above cases no further excavation shall be made in any of the galleries which already have been driven, the actual heights and widths of which have been carefully recorded on the plan marked L. A M. A No. 78 signed by the Chief Inspector of Mines.

The plan referred to may be seen in the office of the Chief Inspector of Mines in India by the parties concerned.

Offg. Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

[Third publication]

The 18th February 1908.

No. 3.—Notification.—In exercise of the powers conferred upon him by sections 78 and 99 of Act III (B. C.) of 1876, His Honour the Lieutenant-Governor of Bengal proposes to pass the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These rules and rates will supersede those now in force.

R. E. CARTER,
Offg. Secretary to the Govt. of Bengal.

Leases for a term of years.

1. The country served by the canals shall be mapped out into blocks of convenient size in accordance with the features of the ground, natural or artificial So far as may be practicable, the blocks shall be separated by drainage lines. This shall be done by the Subdivisional Canal Officers under the guidance and control of the Divisional Canal Officer.

2. Each block determined as above shall be numbered and recorded with its gross and irrigable areas in registers to be maintained by the Subdivisional Canal Officers. The blocks shall also be marked on maps to be maintained by the same officers.

3. Leases for not more than seven years may be granted for the whole irrigable area of a block or for definite parts of a block under the following conditions:—

I.—Ordinarily the whole irrigable area of any village so far as situated within the block must be included in the lease. If the lands of a village within the block are divisible into two or more distinct parts which can be irrigated independently, a separate lease may be granted for each part.

II.—All leases within one block shall be so granted that they may expire on the same date.

III.—No lease shall be granted when the supply of water must of necessity be delivered across an unleased area, unless a channel exists, which, in the opinion of the Subdivisional Canal Officer, will deliver water without waste across the unleased area.

4 The Superintending Engineer shall fix from time to time the gross area for which and the limits of the canal within which, leases for a term of years may be granted.

5. Maps of all villages in which lands have been brought under lease for a term of years, or in which there is any probability of such leases being taken, shall be kept in the subdivisional canal offices. These maps to be at scale 32″ = 1 mile when such are available, and elsewhere at scale 16″ = 1 mile.

6. The preliminary application for a lease for a term of years, either new or renewal, may be of an informal nature, but it must be in writing. It may be presented and shall be received either at the Subdivisional or Sectional Canal Office; in the latter case the Sectional Officer shall forward it immediately to the Subdivisional Canal Officer. The Subdivisional Canal Officer as soon as he has, by personal enquiry or by an enquiry made by the Sectional Officer, satisfied himself that the land in question constitutes a definite block or a definite part of a block, and that it can be irrigated, shall at once inform the Divisional Canal Officer giving such particulars as that officer may direct, and shall ask his formal approval to the lease being proceeded with. On receipt of such approval the Subdivisional Canal Officer shall forward the preliminary application to the Zilladar, in order that the detailed assessment may be taken in hand. The lands to be brought under lease shall be indicated on a copy of the map alluded to in rule 5.

7. The Zilladar on receipt of the application shall depute an amin to prepare the *khasra* or detailed assessment paper. This shall be done on the ground with the aid of the revenue survey map and *khasra*. Should the survey map and *khasra* not be available, the amin shall make a sketch map, and shall measure the areas of the holdings with a chain or measuring-rod.

8. When the amin has completed the *khasra*, the Zilladar shall forward it to the Subdivisional Canal Officer for approval.

9. As soon as the *khasra* has been approved by the Subdivisional Canal Officer, he shall return it to the Zilladar endorsed with his signature in token of approval.

The Zilladar shall then prepare a *khatian* or abstract of the *khasra*, and shall have the form of application, given as Appendix No 1 to these rules, filled up and signed or marked by each of the applicants, in the presence of two witnesses.

When the application has been completely signed, the Zilladar shall send it to the Divisional Canal Officer, by whom the permit or formal approval of the lease shall be signed and issued in the form given as Appendix No. III to these rules. The permit shall be made over to the representative of the cultivators by the Subdivisional Canal Officer by means of his Sectional Officers. The Divisional Canal Officer shall return the application to the Deputy Collector, Revenue Division, with a copy of the permit for record.

10. Should it happen that the cultivators of the block proposed for lease are not unanimous, and that certain of them decline to sign the application, the Zilladar shall report the matter to the Subdivisional Canal Officer. This officer shall hold a local enquiry, recording the statements of the persons who decline to sign and recording his personal opinion on the reasons given. He shall then send a report to the Divisional Canal Officer, who shall decide whether the lease may be accepted excluding the fields in the occupation of the persons who decline to sign, or whether the lease shall be declined. The Divisional Canal Officer is authorised to grant a lease when not less than 95 per cent. of the net irrigable area of the block has been signed for. In particular cases should it be desirable to grant a lease even though an area larger than 5 per cent. of the block has not been signed for, this may be done on the written order of the Superintending Engineer. The reasons for granting the lease shall be fully recorded.

Covering Leases.

11. Applicants for a lease for a term of years who may require water before the lease has been concluded can obtain a supply on tendering an application for a covering lease in the form given as Appendix No. II to these rules. This application must be signed in the presence of the Zilladar or of some other responsible officer nominated for the purpose by the Subdivisional Canal Officer. The signatures should be those of the leading cultivators in the block in question, and they should represent holders of not less than 75 per cent. of the irrigable land within the block.

As soon as the Subdivisional Canal Officer receives the application duly signed, he shall issue a permit in the form given as Appendix No. IV to these rules, and shall at once supply water.

Single Waterings.

12. Applications for a single watering during the *kharif* season, may be entertained if water is available, after meeting the demand for the areas leased for a term of years. The applications may be presented at the Subdivisional Canal Office or to the Sectional Officer. They must be in the form given as Appendix No. V to these rules.

The application must be for a definite block and the signatures of the applicants must cover areas aggregating not less than four-fifths of the lands in the block.

If the Subdivisional Officer is able to supply water and accepts the application he will require the applicants to pay in advance one-half of the amount due on the areas entered in the application at the rate specified in the schedule of rates, and on this sum being paid he will at once issue a permit in the form given as Appendix No. VI to these rules and will supply water. When the watering has been concluded the area actually irrigated shall be determined and the assessment shall be made on the areas actually watered within the limits of the block specified in the application and permit.

Season Leases.

13. Applications for water to irrigate spring rice or other crops between December and April may be presented at the Subdivisional Canal office or to the Sectional Officer. They must be in the form given as Appendix No. VII to these rules.

In the applications the areas for which water is required must be specified but the rate will be charged on those areas for which water is actually used as determined by measurement.

The permit in the form given as Appendix VIII to these rules will be granted by the Subdivisional Canal Officer if he is able to supply the water.

Supply of water.

14. The Divisional Canal Officer shall control the supply of water throughout the Division in his charge.

15. No water shall be supplied to any lands except such as have been brought under a lease for a term of years or for the season, or to such as are provided for by a covering lease or by a lease for a single watering.

16. Under the forms of irrigation lease in use, no specific supply of water is promised: but the undertaking is to give such a supply to each lessee as may be necessary for the lands leased. The supply shall be given, as may be required for the proper cultivation of the crops under irrigation, according to the exigencies of the season.

17. The Divisional Canal Officer is empowered to give the required supply by rotation, should this be advisable for the efficient working of the canals in his charge. In such a case, he is required to give the lessees written notice informing them of the periods when they will be supplied with water.

Collection of water-rates.

18. The rates due for water supplied shall be collected by the Deputy Collector or other officer in charge of the Revenue Division through his staff of Zilladars, Tahsildars and peons. All *khatians* or demand statements shall be signed by the Deputy Collector or other officer in charge of the Revenue Division after scrutiny in his office

19. At the time of preparation of the *khatian* in the Zilladar's office, each person assessed shall be furnished with an extract from the assessment paper, showing the particulars of the charge against him. This extract shall be furnished in such form as may from time to time be approved for the purpose.

20. Each person on paying the sum due from him shall be given a receipt in the form prescribed for the purpose.

21. For the purposes of account, of control over establishment, and of general administration, the Deputy Collector or other officer in charge of the Revenue Division is in the position of an Executive Engineer in charge of a division, and is directly subordinate to the Superintending Engineer. In regard to any proceedings taken under the Public Demands Recovery Act the Deputy Collector is subject to the control of the Collector of the district.

Unauthorised use of water and waste of water.

22. Should it be necessary to take action under the provisions of sections 79 and 80 of the Act, proceedings shall be instituted only under the direct and special order of the Divisional Canal Officer. The primary record of the facts regarding the unauthorised use or the waste of water shall be made by the Subdivisional Canal Officer and his subordinates. The parties whom it is proposed to assess shall be informed in writing, and shall be called on to show cause why they should not be assessed. The record of their statements shall be made by the Divisional or by the Subdivisional Canal Officer. The Divisional Canal Officer shall consider the facts and statements recorded, and shall, in deciding the case, give his reasons for or against assessment, both as regards the facts and as regards the law; and he shall determine the rate to be charged subject to the provision in the schedule of rates attached to these rules.

23. Should the Divisional Canal Officer decide on making an assessment, he shall have the assessment paper prepared by the Subdivisional Canal Officer and his staff. Each person assessed shall be furnished with a statement of the charge against him, and an abstract of the demand or *khatian* shall be sent to the officer in charge of the Revenue Division, who shall proceed to recover the sums assessed. The period of one month within which an appeal may be presented to the Collector under section 91 of the Act shall count from the date on which the statement of the charge may be furnished to the person assessed, which date shall be endorsed on it.

24. No proceedings shall be instituted if the unauthorised use or the waste of water have occurred through the act or neglect of a Canal Officer or subordinate employed on the Canal. During the irrigation of autumn rice, the passing on of surplus water from leased to unleased fields is not an unauthorised use of water.

Complaints and Applications.

25. All complaints or applications with respect to the supply of water, to defective drainage, and generally with respect to the administration of the canals, shall be received on presentation at either divisional or subdivisional canal offices.

Complaints and applications received by a Divisional Canal Officer may be transferred to his Subdivisional Canal Officers for disposal at his discretion.

Any such complaints or applications, if presented to the Deputy Collector or to his staff, shall be returned endorsed with instructions as to the proper office at which to present them If received by post, they shall be at once forwarded to the Divisional or Subdivisional Canal Officer.

26. Complaints or applications with respect to corrections of the assessment with respect to the actions of the amins in assessing and with respect to the actions of the tahsildars and other staff employed in collections, shall be received at the office of the Deputy Collector or other officer in charge of the Revenue Division, or at the zilladars' offices.

27. Receipts in the prescribed form shall be given at all offices for complaints or applications presented. The receipt of all complaints and applications shall be recorded in registers to be kept for that purpose.

28. The Officer receiving the complaint or application shall either make a personal enquiry into the matter or he shall nominate in writing some responsible person to hold the enquiry.

29. The orders passed on all complaints or applications shall be in writing, and a copy of every order shall be furnished to the complainant or applicant.

The copy of order may be sent by post (registered), if this is convenient.

The period within which an appeal may be presented under section 91 of the Act shall be reckoned from the date on which the copy of the order is received by the person.

30. When an appeal to the Collector is from the order of a Subdivisional Canal Officer, the proceedings shall be called for through the Divisional Canal Officer, who may record on them such remarks as he may think desirable, provided that he does not thereby detain the proceedings.

In all cases in which an appeal against an assessment is preferred to the Collector, that officer may, if he thinks fit, direct that the collection of water-rates be suspended till the appeal is heard.

31. The Divisional Canal Officer is empowered to revise the proceedings of his Subdivisional Canal Officers, and the Superintending Engineer is empowered to call for and to revise the proceedings of all officers under his control.

Remissions and Alterations of Demand.

32. Whenever the crop on land entitled to a supply of water suffers material injury from an insufficient supply of water, or from any interruption in the supply of water, remission of the rate due on such crop shall be given by the Divisional Canal Officer, provided that the person claiming remission shall have applied for such not less than 15 days before the reaping of the crop.

33. On the occasion of lands being brought under a lease for a term of years, the Divisional Canal Officer is empowered to remit the rates for the first season on those fields which from the nature of the cultivation then obtaining, or from other causes, have not, in that season, derived any benefit from the supply of canal water.

34. Should the crop on lands under lease for a term of years suffer material injury from excess of water due to deficient drainage, the Divisional Canal Officer may grant remission of the rates due on such lands in whole or in part, provided that the person asking for remission shall have applied at least 15 days before the reaping of the crop.

35. Revisions of the assessment required in consequence of land under lease being left uncultivated or of land being appropriated for purposes other than cultivation shall be made under the orders of the Divisional Canal Officer.

36. Revisions of the assessment required in consequence of incorrect entries of the names of occupants of lands under lease or of incorrect entries of areas or amounts in the assessment papers, or required by changes in the occupation of lands shall be made under the orders of the Deputy Collector or other officer in charge of the Revenue Division, provided that no change involving any increase or decrease in the total area under lease for a term of years shall be made without the concurrence of the Divisional Canal Officer.

37. Remissions of water-rates on account of injury to the crops caused by inundation, by blight, by storms or by any extraordinary cause will only be allowed under the special orders of the Local Government.

Irrecoverable Demands.

38. The Superintending Engineer is empowered to sanction the write-off of those demands which are reported, after due enquiry by the Deputy Collector or other officer in charge of the Revenue Division, as irrecoverable owing to the poverty of the defaulter or of his successors in case of his death, or owing to the defaulter having absconded.

Cultivators' Representatives.

39. Whenever the preliminary application for a lease for a term of years has been approved by the Divisional Canal Officer, the officer in charge of the Revenue Division shall, with the concurrence of the Subdivisional Canal Officer, select as representative of the cultivators a suitable person or persons who shall generally be acceptable to the cultivators and who shall each have a direct interest in the land for which the lease is executed.

40. The person or persons so selected shall be required to give assistance to the Canal Officers in respect of the following matters:—

(*i*) In the preparation of applications for leases.
(*ii*) In the measurement of irrigated lands.
(*iii*) In recording the names of the occupiers of the holdings.
(*iv*) In receiving demand statements and distributing to the cultivators the individual notices of assessment.
(*v*) In attending, when required, at enquiries into complaints.
(*vi*) In reporting to the zilladars any changes in the occupancy of lands under lease.
(*vii*) In assisting the tahsildar in collecting rates.

41. For such assistance the cultivators' representative or representatives shall be entitled to free irrigation of the lands in his or in their own occupation, which may lie within the boundaries of the leased area subject to a total limit of 3 per cent. of the area assessed. The Deputy Collector or other officer in charge of the Revenue Division may disallow in whole or in part this free irrigation, and may recover the rates which would otherwise have been payable in whole or in part if the assistance specified in Rule 40 has not been efficiently rendered. The reasons for such disallowance shall be recorded in writing.

42. The Deputy Collector shall maintain in his office a register containing a record of the names of all representatives and of the areas of free irrigation allowed to each.

43. Applicants for single waterings or for season leases shall be required to nominate one of their number who must have a substantial interest in the land to be irrigated as their representative. The representative so nominated shall perform the same duties as stated in Rule 40 and shall receive remuneration on the same scale as in Rule 41.

Power to decline or cancel leases.

44. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Engineer to direct that the lease shall be cancelled with effect from the 1st of June next following. The order to cancel a lease shall be passed before the 1st of April of the year in which it is to take effect.

45. The Superintending Engineer may give directions to the Divisional Canal Officer to decline applications for irrigation leases of lands in villages where there has been persistent difficulty in realizing the water-rates, until all arrears have been paid.

He may further suspend, or altogether cancel, any lease for a term of years, if on the 1st June of any year water-rates to the extent of half the demand for one year are in arrears. Previous notice of intention to put this rule in force shall be given not later than the 15th April preceding.

Miscellaneous

46. Tanks may be supplied with canal-water without charge, when water can be made available without injury to the cultivation dependent on a canal, under the following conditions:—

(*i*) That the water is to be exclusively used for domestic purposes, or for watering cattle.

(*ii*) That a channel exists through which water can pass without waste.

(*iii*) That the water shall only be supplied on the written order of the Subdivisional Canal Officer.

(*iv*) That any new outlet or sluice which may be required to allow of the supply being given shall be provided at the cost of the persons who ask for the water.

(*v*) That the supply of water may be stopped at any time if it is found that it is being misused.

47. Except when a public right-of-way exists, no person shall, without the permission expressed in writing of the Divisional or Subdivisional Canal Officer, pass himself, or cause any animal or vehicle to pass, on or across any of the works, banks or channels of a canal, or drainage work which is part of the canal system except by means of such bridges, fords and ferries as may have been provided for the purpose

Any person who, after due warning, commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act

48. The use of any part of the banks or berms of any canal, drainage work which is part of the canal system, or flood embankment which is subject to the provisions of the Irrigation Act, as a place for relieving the calls of nature, is prohibited. Any person who after due warning commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

49 Should water be required for purposes other than irrigation, it may be supplied, when available, at a rate of one rupee per 10,000 cubic feet of water.

50. No officer employed on the canals, unless especially exempted by the Lieutenant-Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals or purchase or bid for any Government property sold thereon either in his own name or in the name of another, or jointly, or in shares with others.

Schedule of rates for water supplied from the Midnapore Canal

	Rs.	A.	
For water supplied on a lease for a term of years—supply given from 16th June to 30th November of each year	2	0	per acre per season.
The rate is due in two equal instalments on the 1st of January and the 1st February of each year. Provided that when the sum payable by any lessee is less than Rs 10, the whole amount shall be due on the 1st of January in each year.			
For water supplied on a covering lease to irrigate lands for which a preliminary application for a lease for a term of years has been received and failing the completion of the same	3	0	per acre.
Supply given from date of covering lease to 30th November of that year. The rate is due as in case of lease for a term of years.			
For water supplied as a single watering the rate is payable half in advance at time of supply and half on completion of the watering	1	0	„ „
For water supplied on a season lease for the irrigation of any crops between 1st December and 15th June ...	2	8	„ „
The rate is payable on 1st June following.			
For the unauthorised use of water or for the waste of water such rate may be charged as determined by the Divisional Canal Officer under rule 22 subject to a maximum of Rs. 5 per acre. Such rate shall be due on presentation of the notice of assessment to the person assessed.			

APPENDIX I.

(Referred to in rule 9.)

APPLICATION FOR A LEASE FOR A TERM OF YEARS.

(Yearly rate, per acre: water to be supplied each year from the 16th June to 30th November only.)

We, the undersigned, of mauza, , pargana , thana , apply for water to be supplied from Distributary of the Midnapore Canal for a term of years, commencing on the 16th June and ending 30th November. The supply of water is required for the irrigation of the block of land formed by our holdings as specified below.

2. We agree that the amounts due shall be payable to the Deputy Collector or other officer in charge of the Revenue Division, Midnapore Canal, or to such person as he may appoint on the 1st January and 1st February, or if Rs. 10 or under on 1st of January of each year, and shall be payable independently of our requiring water in any particular year or not.

3. We also agree to be bound by the rules published in the *Calcutta Gazette* for pages , Notification No.

4. We agree that this application shall not be deemed to have been completed until all the irrigable fields within the block have been signed for, and that failing such completion any covering lease which may have been granted shall be enforced.

5. We agree that the areas* and amounts as given in the statement below are correct at the commencement of the lease, and in token of agreement we attach our individual signature or mark.

6. Our heirs and representatives shall be bound by the terms of this agreement in case of our decease.

SCHEDULE No. 1.

Boundary ... { *North*— *South*— *East*— *West*—

Serial number.	Name of the party by whom kabuliat is executed.	Residence of lessee.		Land.*	Rate.	Demand.	Signature of lessee.	Date of signature.
		Mauza.	Pargana.					
1	2	3	4	5	6	7	8	9

* Areas to be given in acres with a note to show the equivalent in the local measure of an acre.

APPENDIX II.

(Referred to in rule 11.)

APPLICATION FOR A COVERING LEASE.

WE, being the principal cultivators of mauza , pargana , thana , on our own behalf and on behalf of the other cultivators of the mauza, hereby certify that we have presented an application for grant of a long lease to cover all the irrigable land in the block situated in mauza , the area of which is approximately acres* the boundaries of the block being specified below.

2. Now in order that we may obtain a supply of water at once and before the long lease can be completed, we, whose signatures or marks are annexed below, severally and jointly bind ourselves to pay the water-rate on the whole area within the limits of the block as specified, which may be determined by the Canal Officer to be irrigable.

3. In the event of a long lease not being completed through the default or non-consent of any of the cultivators of irrigable lands within the block, a rate of Rs. 3 per acre on the area determined for in the present season will be charged to us and will be payable by us on or before the 1st January and 1st February next, or if Rs. 10 and under on or before the 1st January ; water to be supplied up to the 30th November only.

4. In token of our obligation in this agreement we annex our signatures or marks below :—

Boundary ... { *North*— *East*— *South*— *West*—

Signature of applicant.	Date.	Signature of applicant.	Date

* A note should be given to show the equivalent in the local measure of an acre.

APPENDIX III.

(Referred to in rule 9.)

PERMIT FOR A LEASE FOR A TERM OF YEARS.

Number of application and date ...		
Block number		
Village		
Pargana		
Thana		
Distributary		
Area* to be irrigated		
Date of supply	16th June to 30th November.	
Water-rates due		
Date of payment	1st January and 1st February.	
Name of lambardar		
Duration of permit		

This permit is issued under section 75 of Act III (B.C.) of 1876 for the irrigation of the area mentioned above. It is subject to the provisions of all rules passed under the Act, and is liable to be cancelled *if after the lapse of one month from the latest date of payment* the

water-rates due under it are in arrears, or if water, which it is expressly agreed, is supplied for the sole purpose of irrigating the land mentioned therein, is habitually misused or wasted. Water-rates on the area mentioned will be charged whether in any particular year water is or is not actually required.

Area of land in acre.	Boundary.	Name of crop.	Term of kabuliat and block number.	REMARKS.

APPENDIX IV.

(Referred to in rule 11.)

PERMIT FOR A COVERING LEASE.

of village pargana thana , whereas you have applied for a supply of water which is required at once and before the long lease for which you have applied can be completed, and whereas you have agreed on condition of obtaining a supply of water that you whose names are recorded above will be severally and jointly responsible for the water-rates which may be due on the full irrigable area of the block, the area of which is approximately acres* and the boundaries of which are specified below.

2. This is to inform you that water will now be supplied to the mauza from distributary of the Midnapore Canal and the supply continued as required up to 30th November next. Your responsibility under the terms of your application will remain until the long lease has been completed when it will cease.

3. In the event of the long lease not being completed through default or non-consent of any of the cultivators of irrigable lands within the block, you will under the terms of your application be liable severally and jointly for a rate of Rs. 3 per acre on the full irrigable area of the block, and on the 1st January next or on any subsequent date you may severally or jointly be called on by the Deputy Collector or other Officer in charge of the Revenue Division to pay the full amount.

Zilladar.

Boundary ... { *North*— *South*— *East*— *West*—

* A note should be given to show the equivalent in the local measure of an acre.

APPENDIX V.

[Referred to in rule 12.]

Form of application for a single watering during the kharif season between 26th June and 30th November if water should be available.

Mauza , Pargana , Distributary

1. We, whose names are attached, apply for water to be supplied from the above-mentioned distributary for the irrigation of the areas mentioned below.

2. The approximate area to be irrigated by each applicant is stated below, but each of us agrees to pay water-rates at per acre for the watering received on the actual area in our occupation as found by measurement, with the proviso that only areas actually irrigated will be assessed.

3 We agree to prevent, as far as possible, water supplied being wasted or used in an unauthorized manner.

4. This application is made under and subject to the rules passed under Act III (B.C.) of 1876, and we agree to abide by, and to be subject to, these rules.

5 We agree to pay now in advance a rate of annas per acre and to pay a further rate of annas per acre on the completion of the watering.

Name of cultivator.	Description of crop.	Area more or less to be irrigated in acres. *	Signature or mark of cultivator.	Remarks.
1	2	3	4	5

* A note should be given to show the equivalent in the local measure of an acre

I HEREBY certify that the signatures or marks above are genuine, and that the areas mentioned are approximately correct.

Signature of Lambardar.

APPENDIX VI.

[Referred to in rule 12.]

Permit for a single watering during the kharif season between 26th June and 30th November.

Number of application and date—
Name of village—
Name of pargana—
Name of distributary—
Area* to be irrigated, more or less—
Date of supply—
Water-rates due—
Date of payment—
Name of *lambardar*—

This permit is issued, under section 75 of Act III (B.C.) of 1876 for the irrigation of the areas mentioned above. It is subject to the provisions of all rules passed under the Act. It is expressly agreed that water is supplied for the sole purpose of irrigating the land mentioned in the application. The area actually irrigated will be measured and charged, and the applicants undertake, as far as is in their power, to prevent water being wasted or applied to the irrigation of land not included in the application.

Subdivisional Canal Officer.

* Area to be given in acres with a note to show the equivalent in the local measure of an acre.

APPENDIX VII.

[Referred to in rule 13.]

Application for a season lease for Irrigation of Crops between December and April.

WE, whose names are attached, cultivators of mauza , pargana , apply for water to be supplied from the Distributary of the Canal.

2. The approximate area to be irrigated by each cultivator is stated in the schedule following, but each of us agrees to pay water-rates at the schedule rate on the area found to be in his occupation by measurement, with the proviso that only areas actually irrigated will be charged, fractions of an acre exceeding one-half being charged as one acre.

3. We agree to prevent water being wasted or used in an unauthorized manner, and to abide by all the rules passed by the Lieutenant-Governor of Bengal under the Irrigation Act.

4. We agree to pay the water-rates due on this application on the of

Name of cultivator.	Description of crop.	Area more or less to be irrigated in acres. *	Signature of cultivator.	Area* found on measurement.	REMARKS

To *Permit for a season lease.*

being the representive of the cultivators in village , pargana

THIS is to inform you that on the application submitted by you and other cultivators of village , pargana , water will be supplied for the irrigation of the crop from distributary, canal

The fields actually irrigated will be recorded, and the areas so irrigated as ascertained by measurement or as recorded in the settlement khasras will be assessed at Rs. per acre *

Those persons who may irrigate their fields without having applied for the water will be liable to be charged a higher rate for the unauthorized use of water.

Signature of Subdivisional Canal Officer.

* A note should be given to show the equivalent in the local measure of an acre.

IRRIGATION DEPARTMENT.

[Sixth Publication.]

The 28th January 1908.

No. 2.—Notification.—In exercise of the powers conferred on him by sections 78 and 99 of Act III (B.C.) of 1876, His Honour the Lieutenant Governor of Bengal proposes to make the following revised water-rate rules for the Dhaka Canal in supersession of those passed in Notification No. 11, dated the 27th March 1905, and modified in Notification No. 3, dated the 16th March 1907 and in lieu of those proposed in Bengal Government Notification No. 1, dated the 21st January 1908.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

AS EXISTING.

GENERAL CONDITIONS.

1. The revenue administration of the Dhaka Canal is vested in the Superintending Engineer of the Gandak Circle The Divisional Canal Officer is responsible for maintaining the canal in an efficient condition, for the distribution of water to the lessees, and for the closing of the outlets in rotation when required; he is further responsible for the assessment of water-rates.

2. The Collector of the district is responsible for the collection of water-rates.

3. Except as provided in the Act and in these rules, no appeal shall lie from any order passed by a Canal Officer, but the Subdivisional Canal Officer shall modify any order passed by him in accordance with the order of the Divisional Canal Officer, and the Subdivisional Canal Officer or Divisional Canal Officer shall modify any order passed by him in accordance with the orders of the Superintending Canal Officer, who shall exercise a general control over the proceedings of all Canal Officers.

4. In appeals to the Collector under section 91 of the Act other than those especially provided for in rule 16, the Collector may require the Superintending Engineer to state his opinion in writing, which opinion shall form part of the record of the proceedings of the case.

ON BLOCKS.

5. The Divisional Canal Officer shall map out the irrigable area into blocks demarcated by suitable boundaries, and in order to equalise the area to be dealt with each year, shall determine the date of expiry of the leases in each block, so that as far as practicable one-fifth of the total area usually irrigated may fall out of lease every year.

6. Each block, determined as above, shall be numbered and marked on the maps to be maintained by the Divisional Canal Officer, and shall also be recorded with its irrigable area in the registers to be kept by him.

ON APPLICATIONS.

7. Any person who requires a lease for water must apply to—

(*a*) the Sectional Officer, or
(*b*) the Subdivisional Canal Officer.

These applications must be made in writing and may be on plain paper.

The person receiving them shall enter on the back any further data required.

AS PROPOSED.

GENERAL CONDITIONS.

1. The revenue administration of the Dhaka Canal is vested in the Superintending Engineer of the Gandak Circle. The Divisional Canal Officer is responsible for maintaining the Canal in an efficient condition, for the distribution of water to the lessees, and for the closing of the outlets in rotation when required; he is further responsible for the assessment of water-rates.

2. The Collector of the district is responsible for the collection of water-rates.

3. Except as provided in the Act and in these rules, no appeal shall lie from an order passed by a Canal Officer, but the Subdivisional Canal Officer shall modify any order passed by him in accordance with the order of the Divisional Canal Officer, and the Subdivisional Canal Officer or Divisional Canal Officer shall modify any order passed by him in accordance with the orders of the Superintending Canal Officer, who shall exercise a general control over the proceedings of all Canal Officers.

4. In appeals to the Collector under section 91 of the Act other than those especially provided for in rule 16, the Collector may require the Superintending Engineer to state his opinion in writing, which opinion shall form part of the record of the proceedings of the case.

ON APPLICATIONS.

5. Any person who requires a lease for water may apply to—

(*a*) the Sectional Officer, or
(*b*) the Subdivisional Canal Officer.

These preliminary applications must be made in writing and may be on plain paper.

The person receiving them shall enter on the back any further data required.

ON LEASES AND PERMITS.

8. Ordinarily 5-year leases may be granted for the whole irrigable area of a block or a definite part of a block under the following conditions:—

(*i*) No lease for less than 10 acres shall be granted.

(*ii*) No lease shall be granted when the water must cross unleased lands, unless a suitable village channel exists.

9. Villages which apply for a lease at a period less than five years in advance of the date of expiry fixed under rule 5 will only be granted leases for the remaining years of the term fixed for the block in which they are situated so that all the leases within the same block may expire on the same date. These leases will be granted under the same conditions as 5-year leases.

10. The Divisional Canal Officer shall issue permits for long leases to the lessees through the Subdivisional Canal Officer.

11. When water is required, pending the completion of a lease for a term of years, the Subdivisional Canal Officer may, on application, grant a season lease which will be cancelled if the long lease is subsequently concluded.

12 Season leases for the supply of water at any season may be granted on application by the Subdivisional Canal Officer.

13. When a lease is granted, an agreement shall be taken in forms given in Appendices I, III, IVA and IVB, and a "permit" shall be given to the lessee or lessees in forms given in Appendices II, IV and IVC.

14. Water for filling tanks may be supplied when available for cash paid in advance; the water taken into the tanks may be used for irrigation or any other purpose (forms of application and permit are given in Appendices V and VI).

ON WATER-RATES.

15. The following rates will be charged for water supplied, whether taken by lift or flow:—

	Rs.	A.	
I.—Leases for a term of years, 16th June to 15th November.	1	0	per acre.
II.—Season leases, 16th June to 15th November.	1	8	„ „
III.—Season leases, 1st November to 28th February.	0	8	„ „
IV.—Season leases, 1st March to 15th June.	2	0	„ „
V.—Water supplied to tanks.	1	0	„ 10,000 c. ft.

ON LEASES AND PERMITS.

6. Leases for a term of 3years may be granted under the following conditions:—

(i) The lands to be irrigated must constitute a block with defined boundaries and be so situated that adjoining lands will not ordinarily or probably be irrigated with water supplied.

(ii) All the irrigable lands within the limits of the block must be included.

(iii) Sufficient distributing channels must be provided to enable the irrigation to be carried on without waste of water.

(iv) No lease will be granted when the water must cross unleased lands unless there is a channel which will, in the opinion of the Subdivisional Canal Officer, convey the water across the intervening land without waste.

Applications for leases for a term of years will be received up to 1st May in each year. It shall be within the discretion of the Divisional Canal Officer to accept or decline applications for such leases if presented at a later date.

7. The Divisional Canal Officer shall issue permits for leases for a term of years to the lessee through the Subdivisional Canal Officer.

8. When water is required, pending the completion of a lease for a term of years, the Subdivisional Canal Officer may, on application, grant a season lease which will be cancelled if the lease for a term of years is subsequently concluded.

9. Season leases for the supply of water for any crop may be granted, on application, by the Subdivisional Canal Officer.

10. When a lease is granted, an agreement shall be taken in forms given in Appendices I, III, IVA, IVB, VII and IX and a "permit" shall be given to the lessee or lessees in forms given in Appendices II, IV, IVC, X and XI.

11. Water for filling tanks may be supplied when available for cash paid in advance; the water taken into the tanks may be used for irrigation or any other purpose (forms of application and permit are given in Appendices V and VI).

ON WATER-RATES.

12. The following rates will be charged for water supplied, whether taken by lift or flow:—

	Rs.	A.	
I.—Leases for a term of 3 years, 16th June to end of February in each year.	1	0	per acre.
II.—Season leases, 16th June to 31st October.	2	0	„ „
III.—Season leases, 1st November to end of February.	1	0	„ „

ON DEMAND STATEMENTS.

16. The statement of the amounts due for the water-rates leviable under these rules shall be prepared under the supervision and signature of the Divisional Canal Officer in such form as shall, from time to time, be sanctioned by the Lieutenant-Governor. A *parcha* showing the area and amount assessed against each cultivator shall be sent to him through the cultivator's representative when or before the demand statement is sent to the Collector for realization. Persons charged under rule 26 shall be served as soon as the charge is made, by post or otherwise, with a statement showing the amounts charged to enable them to lodge an appeal to the Collector under section 91 of the Act if they desire to do so.

17. The rates for water supplied between 16th June and 15th November, whether on leases for a term of years or on season leases, shall be payable in two equal instalments, falling due respectively on the 1st January and 1st February following, but all sums of Rs. 10 and under shall become due on the 1st January and be payable in one instalment.

The rates for water supplied between 1st November and 28th February shall fall due on the 1st April following.

The rates for water supplied between 1st March and 15th June shall fall due on the 1st July following.

The rates for water to be supplied to tanks shall be payable before water is supplied.

18. Water-rates imposed under rule 26 shall fall due as soon as the assessment is made and shall be realised at once.

ON REMISSIONS.

19. Remission of water-rates, either in whole or in part, shall be granted as follows:—

(*i*) By the Divisional Canal Officer for errors in assessment or rates.

(*ii*) By the Divisional Canal Officer for injury to a crop on a leased area caused by a deficiency in the supply of water.

In the latter case a written application must be made at least 20 days before the crop is cut.

20. Remissions on other grounds than the above require the sanction of Government.

21. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is not realisable

	Rs.	A.	
IV.—Season leases, 1st March to 15th June.	2	0	per acre.
V.—For one or more waterings supplied between 1st March and 15th June.	0	12	for each watering.
VI.—Water supplied to tanks.	1	0	per 10,000 c. ft

ON DEMAND STATEMENTS.

13. The statement of the amounts due for the water-rates leviable under these rules shall be prepared under the supervision and signature of the Divisional Canal Officer in such form as shall, from time to time, be sanctioned by the Lieutenant-Governor. A *parcha* showing the area and amount assessed against each cultivator shall be sent to him through the cultivator's representative when or before the demand statement is sent to the Collector for realization. Persons charged under rule 33 shall be served as soon as the charge is made, by post or otherwise, with a statement showing the amounts charged.

14. The rates for water supplied on a lease for a term of years between the 16th June and the end of February shall be payable in two equal instalments, falling due respectively on the 1st January and 1st February following, but all sums of Rs. 10 and under shall become due on the 1st January and be payable in one instalment.

The rates of water supplied on season leases between the 1st June and 31st October shall be payable in two equal instalments falling due respectively on the 1st January and 1st February following, but all sums of Rs. 10 and under shall become due on the 1st January and be payable in one instalment.

The rates for water supplied on season leases between 1st November to end of February shall fall due on the 1st April following.

The rates for water supplied on season leases between 1st March and 15th June shall fall due on the 1st July following.

The rates for water to be supplied to tanks shall be payable before water is supplied.

15. Water-rates imposed under rule 33 shall fall due as soon as the assessment is made and shall be realised at once.

ON REMISSIONS.

16. Remission of water-rates, either in whole or in part, shall be granted as follows:—

(*i*) By the Divisional Canal Officer for errors in assessment or rates.

(*ii*) By the Divisional Canal Officer for injury to a crop on a leased area caused by a deficiency in the supply of water.

In the latter case a written application must be made at least 20 days before the crop is cut.

17. Remissions on other grounds than the above require the sanction of Government.

18. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is not realisable may be written off as irrecoverable on the authority of the Superintending Canal Officer.

may be written off as irrecoverable on the authority of the Superintending Canal Officer.

22. Before awarding compensation under section 16 of the Act or making reference under section 17 of the Act, the Collector shall obtain the written opinion of the Superintending Canal Officer, and his written opinion shall form part of the record of the proceedings.

ON CULTIVATORS' REPRESENTATIVES.

23. Before a lease is entered into, the Subdivisional Canal Officer shall select as representative of the cultivators a suitable person or persons who shall be generally acceptable to the cultivators, and shall each have a direct interest in the land covered by the lease. *Jait raiyats* or *gumashtas* shall usually be selected, or if it is undesirable in any particular case to appoint the *Jait raiyats* or *gumashtas*, the reasons for passing them over and selecting others in preference are to be noted by the Subdivisional Canal Officer in the list of cultivators' representatives to be maintained by him.

24. The person or persons so selected shall be required to give assistance to the Canal Officers in respect of the following matters:—

I.—In the preparation of applications for leases.

II.—In the measurement of irrigated lands.

III.—In giving the names of the occupiers of the various fields.

IV.—In receiving demand statements and informing the cultivators of the demands against them.

V.—In receiving *parchas* and distributing them.

VI.—In attending, when required, at enquiries and complaints.

VII.—In reporting to the zilladars any mutations of holdings of persons who have signed a long lease.

VIII.—In assisting the tahsildar in collecting rates.

ON CULTIVATORS' REPRESENTATIVES.

19. In all applications and permits other than those relating to sale of water by volume, the names of one or more persons shall be entered as *lambardar* who will be responsible for discharging the duties mentioned below:—

I.—Obtaining signatures to applications and certifying to the correctness of the same.

II.—Attending and giving assistance in measuring land irrigated, or proposed to be irrigated.

III.—Giving timely information to the Canal Officer or subordinate of any insufficiency in the supply of water and promptly reporting when the irrigation of the leased area, on any channel, is complete.

IV.—Supervising the distribution of the water supplied through an outlet amongst the persons entitled thereto and reporting any misuse of the same.

V.—Being present when complaints are investigated by a Canal Officer, or subordinate, and giving information required in connection with the same.

VI.—Receiving *parchas* from the Canal Officer and distributing the same amongst the persons named therein.

VII.—Reporting before the 15th of October all cases in which crops have been injured by deficiency or irregularity of supply in the *kharif* season so that these cases may be investigated before water-rates are demanded.

VIII.—Reporting to the Collector or to such officer as he may appoint mutations in holdings in the case of leases for a term of years.

IX.—Assisting the Collector by pointing out the residences of the persons assessed and identifying them.

20. In the case of season leases the remuneration for performing the duties mentioned in the rule immediately preceding shall be two per cent. on the assessment (excluding fractions of a rupee) which shall be paid by the Canal Officer. The amount paid shall be calculated in rupees and annas only, pies being omitted.

25. For such assistance the cultivators' representative or representatives shall be entitled to free irrigation of the lands in his or their own occupation, which may lie within the boundaries of the long lease, subject to a total limit of 3 per cent. of the area assessed. The Divisional Canal Officer may disallow this free irrigation and recover the rates, in whole or in part, from the *Jat raiyats* or *gumashtas* or other representative, if the assistance specified in rule 24 has not been efficiently rendered to the satisfaction of the local officers. The reasons for such disallowance are to be recorded in the list of cultivators' representatives maintained by the Subdivisional Canal Officer.

ON UNAUTHORISED IRRIGATION.

26. For the unauthorised use of canal water a rate of Rs. 5 per acre shall be charged; this rate may, however, be reduced at the discretion of the Divisional Canal Officer.

27. When it comes to the knowledge of the Subdivisional Canal Officer that canal water has been taken in an unauthorised manner, he shall hold a local investigation, and, if he considers that the land deriving benefit is liable to assessment, he shall serve a notice on the persons concerned, fixing a date for hearing objections. Any objections made shall be taken down and the whole record forwarded to the Divisional Canal Officer for disposal

28. The Divisional Canal Officer after hearing any objection that may be raised shall, if he is of opinion that the land should be assessed, fix the rates allowed under rule 26 and dispose of the case within one month of the receipt of the record from the Subdivisional Canal Officer. Water-rates shall not be charged where the unauthorised irrigation has occurred through the act, neglect or default of a Canal Officer or subordinate.

29. Applications for leases may be subsequently received from villages in which unauthorised irrigation has been detected, and these villages may be granted leases; in such cases the persons assessed under rule 26 shall also pay the water-rates due in respect of the lease subsequently granted, provided that the total of these two rates shall not exceed the maximum rate chargeable under rule 26. In such cases of double assessment the Divisional Canal Officer may remit, in whole or in part, the rates assessed under rule 26.

21. In the case of leases for a term of years other than those entered into jointly with contractors the remuneration to be paid to the *lambardar* for performing the duties mentioned in rule 19 shall be three per cent. yearly on the assessment of the year (excluding fractions of a rupee) which shall be paid by the Canal Officer. The amount paid shall be calculated in rupees and annas only, pies being excluded.

22 The *lambardar* will be appointed by the Subdivisional Officer in consultation with the applicants for the lease and must be a substantial person having a beneficial interest in part of the land to be irrigated. There is no objection to different *lambardars* being appointed to represent sections of the applicants or to two or more persons being jointly appointed as *lambardars* on behalf of the whole of the applicants. In case the Subdivisional Canal Officer cannot agree with the applicants in the appointment of *lambardar*, he shall nominate a *lambardar* for approval by the Divisional Canal Officer.

In those cases where an application is made by a contractor and cultivators jointly for a lease for a term of years the *lambardar* shall be nominated by the contractor.

23. The Divisional Canal Officer may, for reasons which appear to him to be sufficient and which must be recorded, remove a *lambardar* from his appointment, and in that case a new *lambardar* shall be appointed in the manner prescribed in the rule immediately preceding.

24. The fees to be paid to *lambardars* will only be disbursed if the duties specified have been satisfactorily performed. The Divisional Canal Officer may retrench the whole or any part of the fees payable for reasons to be recorded in writing In calculating the fees payable, fractions of one anna will be excluded.

Intermediary agency.

25. Leases for a term of years will be entered into with associations of cultivators as specified in these rules; and also on the joint application of the cultivators and of some person hereinafter called the contractor who shall collect and pay to Government all sums due under the agreement on account of water-rates. The joint agreement shall be in the form given in Appendix VII to these rules The contractor must have a beneficial interest in some part of the land included in the application extending for the full term of the lease.

ON PENALTIES AND CANCELLING OF LEASES.

30. Should it be proved, after due enquiry, that the supply of water given to any area leased for a term of years is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer to direct that the lease shall be cancelled with effect from the 1st June next following.

31. The Superintending Canal Officer may, with the concurrence of the Collector, direct the Divisional Canal Officer to—

(I) Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realising water-rates until all the arrears of water-rates due are paid up; and also, if especially so ordered, until half the amount due under new applications is paid in advance An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

(II) Cancel any lease for a term of years, if on the 1st June water-rates to the extent of half the demand for one year are in arrears.

(III) Cancel any lease the lands covered by which cannot be irrigated from the canal except by passing water over an unleased area.

MISCELLANEOUS.

32. No person shall, without the written permission of the Divisional or Subdivisional Canal Officer, pass or cause any animal or vehicle to pass along or across any of the works, channels, or banks of a canal or drainage work after he has been desired to desist therefrom, except by means of such bridges, fords, and ferries and their approaches as have been provided for the purpose.

33. Unless specially exempted by the Lieutenant-Governor from the operations of these rules, no officer employed on the canal shall have any interest in the distribution of water from it, or purchase or bid for any Government property sold thereon, either in his own name or in the name of another, or jointly or in shares with others

26. Contractors are authorised to collect water-rates from the cultivators who have signed the application and from their successors in interest in the land included in the block at the rates fixed by the Lieutenant-Governor.

27. A contractor (or in case there be more than one, each contractor severally) shall use due diligence in the collection of the water-rates specified in the agreement from the cultivators who have applied for the water-supply. In the case of his failure after due diligence to collect, he shall within thirty days of the rates becoming due submit to the Collector a list showing the names of the defaulters with the sums due from each and the Collector shall thereupon proceed to realise the amount due from the said defaulters according to law.

28. A contractor (or in case there be more than one, each contractor severally) shall be responsible for all sums payable on the agreement except such sums as he may satisfy the Collector that he has been unable to collect after using due diligence and shall be entitled to a commission of 5 per cent. on all sums collected by himself.

29. In the case of a lease entered into under an application in the form given as Appendix I, a contractor may subsequently be appointed by the Collector with the written approval of the Divisional Canal Officer. Such contractor must for the whole term of the lease have a beneficial interest in some part of the land included in the application and must sign an application in the form given as Appendix VIII. The appointment shall not be made unless the lambardars and leading cultivators give their assent in writing thereto and the Collector is satisfied that the appointment of a contractor is acceptable to the signatories to the lease.

30. The contractor appointed under rules 25 and 29 may, but shall not necessarily be, lambardar. The lambardar will in all cases be appointed by the Canal Officer under the provision of rule 22 and shall be remunerated at the rate specified in rule 21 subject to the conditions mentioned in rule 24.

31. No steps shall be taken to prepare a joint application by cultivators and a contractor until the written assent of the Collector to the proposed contractor has been received,

nor shall the Collector take any steps towards the appointment of a contractor under rule 29 until the written assent of the Divisional Canal Officer has been received. The Collector may, before approving of a contractor under this rule, require him to give security for the due performance of the contract.

32. A contractor may resign his interest in the lease by giving notice to the Divisional Canal Officer three months at least before the 16th June next following, in which case his connection with the lease shall cease from that date and the Subdivisional Canal Officer shall proceed to appoint a lambardar under rule 22 and the Collector to realise water-rate due directly from the lessees.

The Divisional Canal Officer may, at the instance of the Collector, remove any contractor who fails to use due diligence in making collections. In such cases three months' notice at the least before the 16th June next following shall be given and the removal shall take effect from that date. The Collector may, under the conditions and procedure specified in rule 29, appoint a new contractor in place of a contractor who has resigned or who has been removed.

On unauthorised irrigation.

33. For the unauthorised use of canal water a rate of Rs. 5 per acre shall be charged; this rate may, however, be reduced at the discretion of the Divisional Canal Officer.

34. When it comes to the knowledge of the Subdivisional Canal Officer that canal water has been taken in an unauthorised manner, he shall hold a local investigation, and, if he considers that the land deriving benefit is liable to assessment, he shall serve a notice on the persons concerned, fixing a date for hearing objections. Any objections made shall be taken down and the whole record forwarded to the Divisional Canal Officer for disposal

35. The Divisional Canal Officer after hearing any objection that may be raised shall if he is of opinion that the land should be assessed, fix the rates allowed under rule 33 and return the record to the Subdivisional Canal Officer who shall then complete the assessment.. Water-rates shall not be charged where the unauthorised irrigation has occurred through the act, neglect or default of a Canal Officer or subordinate. It is not an unauthorised use of water during the *kharif* season to receive or to lead water on to unleased lands which may have been supplied to lands under lease in excess of requirements.

36. Applications for leases may be subsequently received from villages in which unauthorised irrigation has occurred, and these villages may be granted leases; in such cases the persons assessed under rule 33 shall also pay the water-rates due in respect of the lease subsequently granted, provided that the total of these two rates shall not exceed the maximum rate chargeable under rule 33. In such cases of double assessment the Divisional Canal Officer may remit, in whole or in part, the rates assessed under rule 33.

ON PENALTIES AND CANCELLING OF LEASES.

37. Should it be proved, after due enquiry, that the supply of water given to any area leased for a term of years is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer to direct that the lease shall be cancelled with effect from the 1st June next following.

38. The Superintending Canal Officer may, with the concurrence of the Collector, direct the Divisional Canal Officer to—

(I) Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realising water-rates until all the arrears of water-rates due are paid up; and also, if specially so ordered, until half the amount due under new applications is paid in advance. An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

(II) Cancel any lease for a term of years, if on the 1st June water-rates to the extent of half the demand for one year are in arrears.

(III) Cancel any lease the lands covered by which cannot be irrigated from the canal except by passing water over an unleased area.

MISCELLANEOUS.

39. No person shall, without the written permission of the Divisional or Subdivisional Canal Officer, pass or cause any animal or vehicle to pass along or across any of the works, channels, or banks of a canal or drainage work after he has been desired to desist therefrom, except by means of such bridges, fords, and ferries and their approaches as have been provided for the purpose. Any person who after due warning breaks this rule may be proceeded against under section 93, clause (9) of the Bengal Irrigation Act, III of 1876.

40. Unless specially exempted by the Lieutenant-Governor from the operations of these rules, no officer employed on the canal shall have any interest in the distribution of water from it, or purchase or bid for any Government property sold thereon, either in his own name or in the name of another, or jointly or in shares with others.

APPENDICES TO EXISTING RULES.

APPENDIX I.

APPLICATION FOR A LONG LEASE.

We, the undersigned, of mauza , pargana , thana , apply for water to be supplied from distributary of the Dhaka Canal, for a term of , years, commencing on the 16th June and ending 15th November . The supply of water is required for the irrigation of the block of land formed by our holdings as specified below.

(2) We agree that the amounts due shall be payable to the Collector of Champaran or to such person as he may appoint on the 1st January and 1st February, or if the charge is Rs. 10, or under, on 1st January of each year, and shall be payable independently of our requiring water in any particular year or not.

(3) We also agree to be bound by the rules published in the *Calcutta Gazette* for , pages , Notification No. .

(4) We agree that this application shall not be deemed to have been completed until all the irrigable fields within the block have been signed for, and that failing such completion any season lease which may have been granted shall be enforced.

(5) We agree that the areas and amounts as given in the statement below are correct at the commencement of the lease, and in token of agreement we attach our individual signature or mark.

(6) Our heirs and representatives shall be bound by the terms of this agreement in case of our decease.

Depth of water to be supplied —

Average superficial area—

cubic feet of water to be supplied -

Date of supply—

Amount paid for water—

Date

Subdivisional Canal Officer.

APPENDIX VII.

FORM OF APPLICATION FOR A LEASE FOR A TERM OF YEARS JOINTLY WITH A CONTRACTOR.

Mauza , *Pargana* , *Distributary* .

1. We, whose names are attached, apply for water to be supplied from the above-mentioned distributary from 16th June to the end of February of each year for years for the irrigation of the block formed of our holdings as specified below.

2. The area to be irrigated by each applicant is stated in the schedule following and each applicant agrees to pay water-rates on the area recorded against his name at the rate of Rs. per acre*. This sum will be payable independently of our requiring water in any particular year or not.

3. The application is made under section 74 of Act III (B.C.) of 1876, and the rules issued under it.

4. We agree to pay the water-rate due on this application in one *kist* on or before the 1st February.

5. The permit granted may be cancelled by the Divisional Canal Officer under the sanction required by rule 38.

(I) If after the lapse of one month from the latest date of payment the water-rates due on this application (except such as are irrecoverable under rule 18) are in arrears.

(II) If water supplied for irrigating the land mentioned in the application is habitually wasted or misused, it being expressly agreed that water is supplied for the sole purpose of irrigating the land mentioned in the application.

6. We desire under rule 25 that shall be appointed as contractor to whom we agree to pay water-rate as they become due so long as he is authorised by proper authority to receive the same. Should the contractor resign or be removed, we engage to pay water-rates to the Collector or to some person authorised by him to receive the same.

SCHEDULE.

Name of cultivator.	Area to be irrigated in acres*	Signature or mark of cultivator.	Signature of witness to cultivator's signature.
1	2	3	4

7. I agree to become contractor under rules 25 to 32 for the collection of all sums payable under this application and to be bound by all rules passed under Act III (B.C.) of 1876. I will abide by the rules mentioned and all others passed under the Act, and give every assistance in my power to the Collector in any legal proceedings that may be instituted for the recovery of water-rates under this application.

* A note should be given to show the equivalent in the local measure of an acre.

APPENDIX VIII.

(REFERRED TO IN RULE 29.)

FORM OF APPLICATION FOR APPOINTMENT AS A CONTRACTOR.

1. I apply to be appointed a contractor under rules 25 to 32 for the collection of all sums payable on applications of

Mauza , *Pargana* , &c.

2. I will abide by the rules mentioned above and by all others passed under the Act, and give every assistance in my power to the Collector in any legal proceedings that may be instituted for the recovery of water-rates under this application.

APPENDIX IX.

Form of application for one or more waterings during the hot weather season when the supply is intermittent.

Mauza , *Pargana* , *Distributary*

1. We, whose names are attached, apply for water to be supplied from the above-mentioned distributary for the irrigation of the areas mentioned below.

2. The approximate area to be irrigated by each applicant is stated below, but each of us agrees to pay water-rates at 12 annas per acre for each watering received between 1st March and 15th of June, on the actual area in our occupation, as found by measurement with the proviso that only areas actually irrigated will be assessed.

3. We agree to prevent, as far as possible, water supplied being wasted or used in an unauthorized manner.

4. This application is made under and subject to the rules passed under Act III (B.C.) of 1876 and we agree to abide by, and to be subject to, these rules.

5. We agree to pay the water-rates due on this application on or before the 1st of July next.

Name of cultivators.	Description of crop.	Area more or less to be irrigated in acres*	Signature or marks of cultivator.	REMARKS.
1	2	3	4	5

* A note should be given to show the equivalent in the local measure of an acre.

I hereby certify that the signature or marks above are genuine and that the areas mentioned are approximately correct.

Signature of Lambardar.

APPENDIX X.

PERMIT FOR A LEASE FOR A TERM OF YEARS JOINTLY WITH A CONTRACTOR.

Number of application and date—
Block number —
Village—
Pargana—
Thana—
Name of distributary—
Area to be irrigated—
Date of supply—16th June to end of February in each year.
Water-rates due—
Duration of permit—
Name of contractor—

This permit is issued under section 75 of Act III (B.C.) of 1876 for the irrigation of the area mentioned above. It is subject to the provisions of all rules passed under the Act and is liable to be cancelled, if on the 1st of March in any year water-rates are in arrears, or if water, which it is expressly agreed is supplied for the sole purpose of irrigating the land mentioned there, is habitually misused or wasted. Water-rates will be charged whether in any particular year water is or is not actually required.

Area of land in acres.*	Boundary.	Name of crop.	Term of kabuliat and block number.	REMARKS.

* A note should be given to show the equivalent in the local measure of an acre.

Canal Officer.

APPENDIX XI.

(HOT-WEATHER SEASON.)

PERMIT FOR ONE OR MORE WATERINGS WHEN THE SUPPLY IS INTERMITTENT.

Number of application and date—

BOARD OF REVENUE, L. P., CALCUTTA, *the 28th February 1908.*

CUSTOM HOUSE NOTICES.

NOTICE.

Sale and importation of Novocaine.

THE following Government notifications, by which novocaine is declared to be an "intoxicating drug" within the meaning of section 4, Act VII (B.C.) of 1878, and by which its importation into British India is restricted to persons specially permitted to import the drug by a Local Government or Administration, are published for the information of all whom they may concern. The sale and possession of novocaine will henceforth be regulated by a license, and dealers are warned that an unlicensed sale will be an offence punishable under the provisions of the Bengal Excise Act, VII (B.C.) of 1878. The importation of the

drug will also be limited to the persons or firms specially authorised to import it, and in case of unauthorised importation the article will be dealt with as provided for in the Government orders.

J. T. BABONEAU.
Supdt. of Excise Revenue, Calcutta.

CALCUTTA COLLECTORATE, *the 17th February 1908.*

FINANCIAL DEPARTMENT.

NOTIFICATION.

No. 7378.R.—The 17th December 1907.—It is hereby notified for general information that, under the authority vested in him by section 4 of the Bengal Excise Act, VII of 1878, the Lieutenant-Governor is pleased to direct that novocaine shall be included in the definition of "Intoxicating drug" given in that section.

C. E. A. W. OLDHAM,
Offg. Secy. to the Govt. of Bengal.

CUSTOMS.

No. 7079—91.—The 23rd August 1907.—In exercise of the power conferred by section 19 of the Sea Customs Act, 1878 (VIII of 1878), the Governor-General in Council is pleased to prohibit the bringing by sea or by land into British India of novocaine by means of the post; and to restrict its importation by any other means to cases in which it is imported by persons, or by their authorised agents, who have been specially permitted to import the drug by a Local Government or Administration.

CALCUTTA COLLECTORATE.

The 20th February 1908.

EXCISE NOTIFICATION.

HOLDERS of licenses for—

(1) The wholesale vend of imported spirituous and fermented liquors,

(2) The retail vend of imported spirituous and fermented liquors by the bottle only, not to be drunk on the premises,

(3) Both wholesale and retail vend of the above liquors combined in a single license,

(4) Hotels, Restaurants and their subsidiary bars and late closing licenses,

(5) The retail vend of imported spirituous and fermented liquors on board steamers, dining cars, dâk bungalows and railway refreshment rooms,

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

Monghyr.

No. 433L.S.-G.- The 2nd March 1908.—In exercise of the power conferred on him by section 138 of the Bengal Local Self-Government Act, 1885 (Bengal Act III of 1885), the Lieutenant-Governor is pleased to make the following modification in Schedule A, referred to in rule 1 of the rules made under clauses (*g*), (*l*) and (*m*) of that section, and published under Government Notification No. 3334L.S.-G., dated 20th December 1901, as amended by Notification No. 2258L.S.-G., dated 8th November 1905 :—

The district of Monghyr is transferred from class I, grade 2, to class I, grade 1.

No. 440M.—The 2nd March 1908.—In exercise of the powers conferred upon him by sub-section (*1*) of section 567 of the Calcutta Municipal Act, 1899 (Bengal Act III of 1899), the Lieutenant-Governor is pleased to direct that the following revised rules for the preparation and publication of the Municipal Election roll and for the conduct of elections shall be substituted for the like rules contained in Schedules IV and V, respectively, of the said Act :—

SCHEDULE IV.

RULES FOR PREPARATION AND PUBLICATION OF THE MUNICIPAL ELECTION ROLL.

Definition.

1. In these rules, unless repugnant to the context, the word "person" shall include a company, body corporate, firm, Hindu joint-family and other association of individuals :—

Preparation of list of voters

2. On or before the first day of December 1908, and thereafter on or before the first day of December immediately preceding each general election, the Chairman shall prepare from the registers in his office a list of persons appearing to be entitled to be enrolled in the Municipal election roll as voters of wards. The list shall contain the names of all persons qualified under any clause or clauses of section 37, and the number of votes to which they are respectively entitled.

Payment of municipal taxes a condition precedent to entry in list of voters.

3. No person shall be entitled to be enrolled in the Municipal election roll as qualified to vote under any sub-clause or clauses of section 37, unless he has before the first of December immediately preceding the election paid all instalments of the consolidated rate and other Municipal taxes due from him for each of the first two quarters of the official year commencing on the first day of April in which the elections are held :

Provided that when the Chairman has, under section 178, levied the entire consolidated rate from the owner of any building, any occupier of the building who is qualified to vote in respect of the sum due from him as consolidated rate shall be entitled to be enrolled, on his satisfying the Chairman that he has paid such sum to the owner of the building in accordance with the provisions of section 179.

Arrangement of list of voters.

4. (1) The list shall be arranged in accordance with the alphabetical order of the names of streets and with the numbering of premises in streets, and shall be subdivided into parts showing separately, for each ward into which Calcutta is divided as provided in this Act, the names of persons entitled to be enrolled as voters for that ward and the number of votes to which each person is entitled.

(2) The list may be further subdivided in such manner as the Chairman may from time to time consider convenient.

(3) In preparing the list, the Chairman shall enter therein the names of the persons who are qualified under section 37, sub-section (2), whether such persons be individuals or companies, bodies corporate, firms, Hindu joint-families or other associations of individuals, or receivers or trustees.

(4) If individual members of any company, body corporate, firm, Hindu joint-family or other association, or any receivers or trustees, so entered be qualified as aforesaid on their own separate account, the Chairman shall enter their names in the list separately.

Publication of list.

5. The Chairman shall publish the list prepared as foresaid by causing a printed copy thereof to be fixed for public inspection in a conspicuous position at the Municipal office, and at such other places as he thinks fit, on or before the said first day of December, and to be kept so fixed during the remaining days of that month.

Delivery of copies of list and fees therefor.

6. Printed copies of the list shall be delivered to any person applying for the same, on payment of such reasonable fee for each copy as may from time to time be prescribed by the Chairman, with the approval of the General Committee, in this behalf.

Notice of publication and sale of list.

7. On or before the tenth day of the said month of December, the Chairman shall give notice, by advertisement in local newspapers, of the publication of the said list, and of the place at which and the fee for which, copies of it may be obtained.

Notice of claim to be entered on list and objections to entries.

8. (1) Every person who claims to have his name inserted in the list as being qualified under any of the clauses of section 37 or who claims to be entitled to more votes than are allotted to him in the list, must, on or before the first day of the succeeding month of January, give written notice of his claim to the Chairman.

(2) Any person whose name is in the list may object to any other person as not being entitled to have his name retained therein.

(3) Every person desiring to make an objection under sub-rule (2) must, on or before the said first day of January, send to the Chairman, and also give to the person objected to, or leave at his last-known place of abode, written notice of the objection and of the nature thereof.

Representation of associations of individuals.

9. If the name of a company, body corporate, firm, Hindu joint-family, or other association of individuals has been entered in the list, any one individual person duly authorized in this behalf by such company, body corporate, firm, Hindu joint-family or association may, by written notice sent to the Chairman on or before the said first day of January, apply that his name be entered in the list as the person qualified to vote or to be elected in behalf of such company, body corporate, firm, Hindu joint-family or association.

Revision of list by Chairman.

10. (1) The Chairman shall, before the first day of the succeeding month of March, revise the said list.

(2) He shall, for that purpose, hear, in open office, the claims, objections and applications which have been duly made as aforesaid, and shall give three clear days' notice of the holding of the inquiry.

(3) Such notice shall be served upon each claimant, each person objecting, each applicant, and each person objected to, and shall be fixed on some conspicuous place in the Municipal office.

(4) The Chairman shall insert in the list—

(a) the name of every person who has duly claimed to have his name inserted therein, and whose claim is proved to the Chairman's satisfaction; and

(*b*) when any person has duly claimed to be entitled to more votes than were originally allotted to him in the list, and such claim is proved to the Chairman's satisfaction, the number of votes to which such person is found to be entitled.

(5) The Chairman shall expunge from the list the name of every person proved to his satisfaction to be dead, and may correct any omission or clerical error in the list.

(6) Except as hereinbefore provided, the Chairman shall retain in the list the name of every person to whom objection has not been duly made.

(7) The Chairman shall also retain in the list the name of every person objected to, unless the objector appears, by himself or by some person duly authorised by him in this behalf, in support of the objection.

(8) Where the objector so appears, the Chairman shall require proof of the qualification of the person objected to; and if, within such reasonable time as the Chairman fixes in this behalf, or on the subsequent day, if any, to which hearing is adjourned under Rule 10, such person's qualification is not proved to the Chairman's satisfaction, he shall expunge his name from the list.

(9) If no individual person has applied to the Chairman under Rule 8 to have his name entered in the list in behalf of a company, body corporate, firm, Hindu joint-family, or other association of individuals, the Chairman may determine what individual person shall be entitled to represent such company, body corporate, firm, Hindu joint-family, or association, and shall enter his name in the list as the person qualified to vote or to be elected in behalf of such company, body corporate, firm, Hindu joint-family or association.

Adjournments.

11. The Chairman may adjourn the hearing of any matter under the foregoing rules from time to time, but so that no adjourned hearing be held after the last day of February immediately preceding the general election.

List when revised and signed to be the municipal election-roll.

12. When the aforesaid list has been revised by the Chairman, he shall sign a printed copy thereof, and that copy shall be the Municipal election-roll.

Publication municipal election-roll.

13. The Chairman shall publish the Municipal election-roll by causing a printed copy thereof to be fixed for public inspection in a conspicuous position at the Municipal office and at such other places as he thinks fit.

Delivery of copies of rolls.

14. Printed copies of the Municipal election-roll shall be delivered to any person applying for the same, on payment of such reasonable fee for each copy as may from time to time be prescribed by the Chairman, with the approval of the General Committee, in this behalf.

Commencement and continuance of roll.

15. (1) The Municipal election-roll shall come into operation on the first day of March immediately preceding the General election, and shall continue in operation for three years beginning on that day.

(2) The roll shall be final, and, while it continues in force, it shall not be altered, except so as to correct such clerical errors as the Chairman may advertise by public notice given from time to time.

(3) If a Municipal election-roll is not prepared in due time, the Municipal election-roll in operation immediately before the time at which the new roll ought to have been prepared shall continue in operation until the new roll is prepared.

SCHEDULE V.

RULES FOR CONDUCT OF ELECTIONS.

[*See sections 54 and 567.*]

Notice of elections.

1. Three weeks at least before the day fixed for an election, notice of such election shall be given by the Chairman by advertisement in the *Calcutta Gazette* and in local newspapers, and by posting placards in conspicuous places in the ward for which the election is to take place.

Nomination papers.

2. Every person who is a candidate for election shall send to the Chairman, not less than fourteen days before the day fixed for the election, a nomination-paper containing—

(*a*) his name and description and a statement of his place of abode,

(*b*) the name of the ward or wards for which he purposes to stand,

(*c*) the signature of two voters other than the candidate in each such ward who respectively propose and second his candidature, and

(*d*) the signature of eighteen voters other than the candidate in each such ward who approve his nomination.

Power to declare nomination invalid.

3. If any person nominated—

(*a*) is not enrolled in the Municipal election-roll as a voter of a ward, or

(*b*) is disqualified for being a Commissioner for any of the reasons set forth in section 39, or

(*c*) has not complied with the provisions in Rule 2,

the Chairman shall declare his nomination to be invalid.

Publication of list of candidates for election.

4. Not less than three days before the day fixed for election, the Chairman shall publish at the Municipal office and in local newspapers a list of all candidates for election.

Poll when unnecessary.

5. In the event of there being not more than one candidate for election in any ward, such candidate shall be deemed to be elected.

Poll when and how to be taken.

6. In the event of there being more than one candidate a poll shall be held in the following manner, that is to say:—

(1) a polling-place shall be provided by the Chairman for each ward, and the Chairman may appoint such and so many polling-officers and other persons to assist at the poll as he may think fit, and, with the approval of the General Committee, pay them such reasonable remuneration for their services as he may determine;

(2) the poll shall commence at nine o'clock in the forenoon, and shall close at six o'clock in the afternoon of the same day, or, with the special permission of the Chairman, at some time on the next following day to be named by him;

(3) all votes must be given in person, and no vote shall be received by proxy or in writing;

(4) no vote shall be received for any candidate whose name has not been published by the Chairman under Rule 4 as having been validly nominated;

(5) when the name in the Municipal election-roll is that of a company, body corporate, firm, Hindu joint-family or other association of individuals, a vote on behalf of such association may be received from any person who produces to the polling-officer a power-of-attorney authorising him to represent the said association for the purposes of the election;

(6) the polling-officer shall read out the list of candidates and the names of the voters, and the votes given by them shall then be recorded by him;

(7) no objection to a voter shall be entertained, except on the ground that he is not the person under whose name, as entered in the Municipal election-roll, he claims to vote;

(8) objections under clause (7) shall be summarily decided by the polling-officer;

(9) the polling-officer shall then and there declare the candidate who has the largest number of votes to be duly elected, and shall report accordingly to the Chairman:

Provided that, if the majority for any candidate consists only of votes to which objections have been raised and if the polling-officer has been unable to decide such objections summarily as provided in clause (8), he shall adjourn the proceedings and report the matter to the Chairman;

(10) when a report is made to the Chairman under the proviso to clause (9), he shall hold such inquiry regarding the disputed votes as he may consider necessary, and his decision shall be final;

(11) on the termination of the said inquiry, the Chairman shall declare the candidate who has the largest number of votes to be duly elected;

(12) if there be an equality of votes, the candidate for whom the greatest number of qualified persons have voted shall be deemed to be elected; and in case of an equality of votes in this respect, the Chairman shall give a casting vote, and the candidate to whom such vote is given shall be deemed to be elected.

Procedure where a Commissioner is elected for more than one ward.

7. If any person is elected a Commissioner for more than one ward, he shall, within five days from the date of the election, declare for which ward he will serve; and if he fails to make such declaration, the Chairman shall forthwith declare the ward for which such person shall serve; and in either case such person shall be held to be elected in the ward in respect of which either of such declarations has been made; and thereupon the electors of the other ward or wards in which such person has been elected shall proceed to elect a Commissioner in the manner hereinbefore provided.

C. E. A. W. OLDHAM,
Secy. to the Govt. of Bengal.

CORPORATION OF CALCUTTA.

THE General Committee, having previously given notice of their intention and no objection having been received within one month from the date of the publication of such notice, hereby, under section 350 (4) of Act III (B.C.) of 1899, define the general line of buildings on each side of Russa Road from Elgin Road to Kalighat Road in accordance with the plan approved by the General Committee on the 6th December 1907.

(247—1)

In the Court of the Subordinate Judge of Burdwan.

MORTGAGE SUIT No. 395 OF 1903.

Dinabandhu Nandi, plaintiff, decree-holder, *versus* Syed Abdul Wares and others, defendants, judgment-debtors.

THE undermentioned properties will be put up for sale at public auction on the 6th April 1908 at 12 o'clock noon by the Nazir of the Subordinate Judge's Court for the realisation of the amount due under the decree passed in the aforesaid suit :—

1. One-third share of mahal Khandagram, situate within parganna Barbacksing, appertaining to tauzi No. 150 of the Birbhum Collectorate, of which the revenue payable for the entire estate in 16 annas is Rs. 3,021-9; two mauzas, namely, Khandagram and Muraripur with thanadari resumed chakran lands No. 14 mentioned in Lot 2 of this notification appertaining to this mahal is let out in patni to Becharan Sar of Khandagram at an annual rent of Rs 2,257-13 3, and three mauzas, namely, Mahanpur with Pati Mirpur, Chandipur and Foyjullapur with thanadari chakran lands No. 14 appertaining to this mahal, is let out in patni to Raghunath Samanta and others of Mahanpur at an annual rent of Rs. 3,711; one-third share of the abovementioned mahal Khandagram with all rights and appurtenances including purchased nakhiraj lands of the judgment-debtors will be put up for sale. Approximate price Rs. 5,000.

1. (ka). Proprietory right of the one-third share of 107 bighas 7 cottahs 10 gandas of resumed chakran lands situate in mauza Khandagram within mahal Khandagram, situate in pargana Barbacksing, appertaining to tauzi No. 150 of the Birbhum Collectorate; this property is let out at an annual rent of Rs. 67-8 by a registered mokarari lease, dated the 21st Baisakha 1307 B.S., by Syedani Aymona Bibi to Gokul Behari Sar of Khandagram, who was *pro formâ* defendant No. 6 in the above suit. Amount payable into the Chaukidari Fund for the said one-third share is Rs. 21-10-8. Approximate price Rs. 100.

1. (kha). Proprietory right of the one-third share of 279 bighas 1 chitak 1 ganda 14½ til of resumed chakran lands situate in mauzas Mohanpur, Foyjullapur and Chandipur within mahal Khandagram, situate in parganna Barbacksing, appertaining to tauzi No. 150 of the Birbhum Collectorate. This property is let out at an annual rent of Rs. 152-14 by a registered mokarari, lease dated the 10th Baisakha 1305 B.S., by Syedani Aymona Bibi to Sitanath Samanta of Mohanpur (*pro formâ* defendant No 7 in the above suit). Amount payable into the Chaukidari Fund for the said one-third share is Rs. 80-9 17½ gandas. Approximate price Rs. 100.

2. Thanadar resumed chakran lands situate in chauki, Sub-Registry Bolepur, appertaining to tauz No. 14 of the Birbhum Collectorate, of which the revenue payable for the entire estate in 16 annas is Rs. 3-1-1 This property is let out in patni in the manner mentioned in Lot 1 of this notification. One-third share of it with all rights and appurtenances. Approximate price Rs. 50.

3. Mahal Joykrista, situate in parganna Barbacksing, chauki Bolepur, appertaining to tauzi No. 357 of the Birbhum Collectorate, of which the revenue payable for the entire estate in 16 annas is Rs. 10-11-10. This property is let out in patni to Giris Chandra Mazumdar at an annual rent of Rs. 133-10. One-third share of this mahal with all rights and appurtenances Approximate price Rs. 300

4. (ka) One-third share of 131 bighas 19½ cottahs of resumed chakran lands situate in mauzas dara Kalikapur and Paskalgram within mahal Bara Kalikapur situate in chauki and Sub registry Bolepur, appertaining to tauzi No 96 of the Burdwan Collectorate. This property is let out at an annual rent of Rs. 65-3 by a registered mokarari lease, dated the 17th Chait 1306 B.S., by Syedani Aymona Bibi to Balo ram Mukhopadhaya (*pro formâ* defendant No. 8 in the above suit). The amount payable into the Chaukidari Fund for the said one-third share is Rs. 36-3-11. Approximate price Rs. 200.

6. Ayma Srikristanagore, situate in pargana Ranihati, appertaining to tauzi No. 1369 of the Burdwan Collectorate, of which the revenue payable for the entire estate in 16 annas is Rs. 76 12-1. The mortgagees and their co-sharers had separate account in respect of this tauzi at the time of the mortgage, of which the revenue payable was Rs. 34-3-6. The judgment-debtors in their one-third share of the said separate account at the time of the mortgage had to pay Rs. 11-6-6 as revenue. Now there are two separate accounts, Nos. 11 and 15, in respect of this mahal standing in the names of late Syed Sadaruddin Ahamed and others and Syed Abdul Wares, respectively, of which the revenue payable is annas 12 and Rs. 12-7-6 respectively. One-third share of the former and whole of the latter will be put up for sale. Approximate price Rs. 100.

A. C. BATABYAL, Subordinate Judge.

Burdwan, the 24th February 1908.

(240—1)

NOTICE.

Midnapore Sub-Judge's Court.

MORTGAGE EXECUTION CASE No. 43 OF 1908.

Midnapore Zamindary Company, Limited, decree-holder, *versus* Jogeswar Narain De, judgment-debtor.

IT is hereby notified that the undermentioned property of the judgment-debtor will be sold for the realization of Rs. 52,940 in execution of a mortgage decree of the Sub-Judge's Court, Midnapore, by the Nazir of the Court, Midnapore on the 15th day of April 1908:—

Schedule of the mortgaged property.

I. Of the four-annas share of the pargana Jhatiboni, better known as Selda, bearing the tauzi No. 860 of the Midnapore Collectorate situated within the police-station Binpur and Sub-Registry Office at Jhargram, including also all niz-jote, tank, bandhs, khas-potit, jungles, bankar, falkar, hat, ghat, khal (canals), bills, hills and hillocks and mines, etc. The entire rights thereof which (4 annas) the judgment-debtor and his mother Durga Kumari Debi obtained by the Will of the judgment-debtor's father, two annas of which stands in the name of Jogeswar Narain and which is exclusive of the mother's share, of the remaining two annas. The price of this two annas is to be estimated at Rs. 50,000.

The total revenue of the entire pargana Selda is Rs. 795-14 5½ gandas.

There was no separate revenue assessed on the aforesaid two annas of the mortgaged property. The judgment-debtor's father late Makunda Narain Deo at the time of his death was in possession of only six annas of Selda; the remaining ten annas he had already disposed of in putni settlement. According to the Will of Makunda Narain, two annas fell to the share of his another son Sunder Narain; of the remaining four annas to the judgment-debtor and his mother. But the judgment-debtor and his mother were directed to pay Rs. 300 as revenue every year to the Collectorate and obtaining dakhila thereof to submit it to Sunder Narain and obtain fresh dakhila from him.

It is to be noticed in this connection that the present petitioners, Midnapore Zamindary Company, Limited, having obtained the aforesaid share of Sunder Narain and other shares having their name registered are entitled to get the aforesaid revenue of Rs. 300.

This mortgaged proprety, viz., the aforesaid two annas share of pargana Selda, was purchased by Mr. K. B. Dutt, Barrister-at-Law, certificated guardian under Act VIII of 1890 on behalf of Raja Jagadish Chandra Deo Dhabel, the minor zamindar of Jamboni and residing at Gur Chilki at an auction sale held in execution of a mortgage decree No. 78 of 1898. The said Mr. K. B. Dutt after this purchase sold the aforesaid property to Mr. C. B. Gregson of Godapiasal by a *Kabala*, dated the 25th June 1907 for Rs. 12,000. Besides the aforesaid mortgage, the judgment-debtor Jogeswar Narain Deo mortgaged the property subsequently also. Hence the petitioners pray that if the mortgaged property be sold at a price in excess of the decretal amount, the excess amount being subjected to the following mortgage bonds, the property may be sold free of the following mortgages:—

Second mortgage.—Mortgage bond executed by Jogeswar Narain Deo in favour of late Kartik Chandra Mitra, dated the 2nd March 1897, for Rs. 4,500.

Third mortgage.—Mortgage bond executed by Jogeswar Narain Deo in favor of late Kartik Chandra Mitra dated the 19th March 1898, for Rs. 3,200.

Fourth mortgage—Mortgage bond executed by Jogeswar Narain Deo in favor of late Kartik Chandra Mitra, dated the 1st July 1899 for Rs. 2,000.

Fifth mortgage—Mortgage bond executed by Jogeswar Narain Deo in favour of late Kartik Chandra Mitra, dated the 24th August 1899, for Rs 3,000.

Sixth mortgage.—Mortgage bond executed by Jogeswar Narain Deo in favour of late Kartik Chandra Mitra, dated the 3rd October for Rs. 2,000.

Seventh mortgage—Mortgage bond executed by Jogeswar Narain Deo in favour of late Kartik Chandra Mitra, dated the 26th May 1900, for Rs 3,500.

Eighth mortgage Mortgage bond executed by Jogeswar Narain Deo in favour of late Kartik Chandra Mitra, dated the 6th November 1900, for Rs. 5,000.

J. N. MITTER, Subordinate Judge.

Midnapore, the 26th day of February 1908. (243—1)

In the Court of the Sub-Judge of Gaya, 2nd Court.

MROTGAGE EXECUTION CASE No. 28 of 1908.

Brijmohan Lal and others, decree-holders, *versus* Mussamat Rameshar Kuer and another, judgment-debtors.

NOTIFICATION OF SALE.

THE following property of the judgment-debtors in the above Execution case will be sold at an auction sale by the Nazir of the Civil Court, Gaya, in his office at 12 o'clock noon on 16th March 1908 for realisation of Rs. 9,726-13:—

Sixteen annas proprietary right, being mortgaged, of M. Mouza Mirzapur Hassanpore *alias* Dharampore, pargana Ekil, *lat*, Ekil, zilla Gaya, bearing tauzi No. 1755 and jama sadar Rs. 80,416-6 within thana, subdivision, and Registry Jehanabad. Approximate value Rs. 5,000.

RAM NARAIN SARKAR, Sub-Judge.

Gaya, the 27th February 1908. (248—1)

In the Court of Sub-Judge of Gaya, 2nd Court.

TITLE EXECUTION CASE No. 24 OF 1908.

Brijmohan Lal and others, decree-holders, *versus* Malik Fazlul Rahman and others, judgment-debtors.

NOTIFICATION OF SALE.

Notice to Creditors.

In the Goods of Sir Dietrich Brandis, K.C.I.E., deceased.

NOTICE is hereby given that Letters of Administration with copy will and codicil annexed to the property and credits of the deceased above named having, on the 14th day of February 1908, been granted to Charles Henry Kesteven, all creditors and other persons having any claim against the estate of the abovenamed deceased are hereby required to send in writing the particulars thereof to the undersigned on or before the 16th day of March 1908, after which date the assets of the estate of the said deceased will be distributed by the said Charles Henry Kesteven, the Administrator, amongst the parties entitled thereto, having regard to the claims of which he has then had notice. And notice is hereby further given that the said Charles Henry Kesteven will not be liable for the assets or any part thereof so distributed to any person of whose claim he shall not have had notice at the time of such distribution; such notice to be sent to the undersigned.

Dated this 15th day of February 1908.

S. S. HODSON,
Royal Insurance Buildings, Dalhousie Square, Calcutta,
Attorney for Charles Henry Kesteven, Administrator to the estate of the deceased. (173—3—106)

Howrah Mills Company, Limited.

PROCEEDINGS of Extraordinary General Meeting of Shareholders held at the Registered Office of the Company, No. 9, Clive Row Calcutta, on Monday, the 2nd March 1908, at 12 o'clock noon.

PRESENT:

Shirley Tremearne, Esq., in the Chair.

P. R. B. Lawrie, Esq., William Bleeck, Esq., D. R Wallace, Esq., Marcus Koch, Esq., H. R. Schuler, Esq. T. B. G. Overend, Esq., O. Hadenfeldt, Esq., Messrs. C. B. Ovenstone, P. Goldschmidt, Chars. Obach, W E. T. Benecke, R. E. Latham, A. Sieger and Mr. A. H. E. F. Benecke, by their Attorney, William Bleeck, Esq., Messrs. B. Stansbury, Frederick Siddons, Lieutenant-Colonel J. L. A. Mackay, Captain A. D. G. Ramsay, Mrs. Caroline Pearce and Mrs. A. J. Siddons, by their Attorney, T. B. G. Overend, Esq., Messrs. L. Oliver, W. R. Partridge, T. Morison, W. E. Lewis and Major P. J. Gordon, by their Attorney, P. R. B. Lawrie, Esq.

The advertisement convening the meeting having been read, the following resolution, which was passed at an Extraordinary General Meeting held on the 14th day of February 1908, was confirmed and passed unanimously as a Special Resolution:—

"That the regulations contained in the printed document submitted to the Meeting and for the purpose of identification subscribed by the Chairman thereof be and the same are hereby adopted as the regulations of the Company to the exclusion of and in substitution for all the existing regulations thereof."

The meeting closed with a vote of thanks to the Chair.

SHIRLEY TREMEARNE, Chairman.

Calcutta, the 2nd March 1908. (255—1—125)

The Bengal Coal Company, Limited.

NOTICE is hereby given that an Extraordinary General Meeting of the Bengal Coal Company, Limited, will be held at 12 o'clock noon on Friday, the 20th day of March 1908, at No. 5, Fairlie Place, Calcutta, the registered office of the Company to consider, and if thought fit, to pass with or without modification the following Resolutions, namely :—

I.

That each of the shares in the Company's capital, now consisting of 27,000 shares of Rs. 100 each, be divided into ten shares of Rs. 10 each, and that the shares resulting from such division be renumbered in such manner as the Directors may determine.

II.

That the capital of the Company be increased to Rs. 36,00,000 by the creation of 9,000 shares of Rs. 10 each, ranking for dividend as from 1st May 1908, and in all other respects *pari passu* with the existing shares of the Company and that such new shares be offered in the first instance at a premium of Rs. 10 per share (making with the nominal amount thereof, Rs. 20 per share) to the members of the Company who shall be on the register of members on the day on which this Resolution shall be duly confirmed, and that the said new shares be otherwise offered and issued in accordance with the terms and conditions prescribed by, and in conformity with, clauses 34 and 38 of the Company's Regulations.

III.

That the Company's Articles of Association be altered and amended as follows :—

(a) By deleting from the third paragraph of Article 3 the figures "100" and by substituting therefor the figures "10."

(b) By deleting Article 3 and substituting therefor the following Article, "the present capital of the Company is Rs. 36,00,000 divided into 3,60,000 shares of Rs. 10 each."

(c) By deleting Article 13 and substituting therefor the following Article : "Certificates shall be issued under the seal of the Company and shall be signed by one Director whose signature may be affixed by means of an impression thereof and also countersigned by the Superintendent of the Company or by such other person as the Directors may from time to time specially authorise in that behalf."

(d) By inserting in Article 14 between the words "part of such shares" and the word "Every" the following words : "but so that no member shall be entitled to a separate Certificate for less than five shares of Rs. 10 each."

(e) By adding to and to the end of Article 22 the words "a fee of one rupee shall be paid for each transfer before the registration thereof."

(f) By deleting Article 52 and the heading thereof, "New Stock Account," and by substituting therefor the following Article : —

"52. The Directors shall be at liberty to open and at discretion to close such special accounts to development of the Company's mines as they shall from time to time consider expedient."

(g) By deleting Article 73 and substituting therefor the following Article :—

"73. Every member entitled to vote shall have one vote for each share held by him."

(h) By deleting the word "fifty" from Articles 81 and 82 and substituting therefor in each of the same Articles the words "five hundred."

(i) By deleting from Article 95, sub-clause (1) the figure "3" in line 24 and substituting therefor the figure "4" so as to read "or any sales in the like period exceeding 4 lakhs."

(j) By inserting at the end of Article 95 headed "Powers of Directors" the following sub-clause : "(11) to accept, take or otherwise acquire and hold shares in any other Company having objects altogether or in part similar to those of this Company, or carrying on any business capable of being conducted, so as directly or indirectly to benefit this Company."

Should the abovementioned Resolutions be passed by the requisite majority, the same or such of them as may be so passed, will be afterwards submitted for confirmation as Special Resolutions to another Meeting to be subsequently convened.

By order of the Directors,

H. MACLEOD, Superintendent.

5, Fairlie Place, Calcutta, the 1st February 1908.

NOTICE.

THE next annual stock-taking of the Indian Law Reports kept at the Bengal Secretariat Book Depôt will commence on the 1st April, 1908. The public are hereby informed that all issues of the said Reports from the said Depôt to subscribers and officials will be suspended during that month.

F. G. WIGLEY,
Secy. to the Bengal Council, and Asst. Secy. to the Govt. of Bengal, Legislative Dept.

LEGISLATIVE DEPT.;
BOOK DEPÔT BRANCH,
The 18th December, 1907.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

PRICES.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 4, 1908.

NOTICES TO MARINERS.

THE following Notices are published for general information.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

CALCUTTA, *the 28th February 1908.*

NEW ZEALAND—NORTH ISLAND, EAST COAST.

Tauranga harbour—Bell disappeared from buoy.

No. 86 (first publication).—With reference to Notice to Mariners No. 456, dated 9th October 1907, issued by this office, the British Admiralty has given further notice (No 1915 of 1907) that the bell, on the buoy recently moored in the entrance to Tauranga harbour, off the south-west end of Maunganui, has disappeared.

Approximate position, lat. 37° 38½′ S., long. 176° 11′ E

This Notice affects the following Admiralty Chart :— Tauranga harbour, No. 2581. Also, New Zealand Pilot, 1901, page 135; and Revised Supplement, 1906.

EASTERN ARCHIPELAGO—CELEBES, WEST COAST—MAKASSAR STRAIT.

Palos bay—Light established.

No. 87 (first publication).—With reference to Notice to Mariners No. 93, dated 22nd February 1907, issued by this office, the British Admiralty has given further notice (No. 1921 of 1907) that a *white group flashing* light of the 4th order, showing groups of two short flashes *every ten seconds*, and visible in clear weather from a distance of 25 miles, has been established on an iron framework support, 69 feet high, painted white, erected on Tanjong Karang, the north-western point of Palos bay.

Approximate position on chart No. 3209, lat. 0° 38′ S., long. 119° 44′ E.

NOTE.—The height of the light above high water is not stated.

This Notice affects the following Admiralty Charts:—Palos bay on sheet No. 3209; strait of Makassar, No. 2636; Eastern archipelago, No. 941b; China sea, Nos. 2660b, 1263, Australia, northern portion, No. 2759a. Also, List of Lights, part VI, 1907, page 103, Eastern Archipelago, part II, 1904, page 220; and Supplement, 1906.

KOREA, WEST COAST—Ping yang inlet approach.

Seitau and Sister islets—Lights and fog-signal established.

No. 88 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 160 of 1908), are republished:—

Particulars.—On 27th December 1907 the undermentioned lights and fog-signal would be established in the entrance to Ping Yang inlet (Chinnampo), in the following positions:—

1. *Name.*—Seitau (West islet).

Position.—On summit of the island.
Lat. 38° 32′ N., long. 124° 46′ E, on chart No. 1656.
Character.—*White flashing every thirty seconds.*
Elevation.—302 feet.
Visibility.—24 miles.
Description of Building.—Concrete cylindrical tower, painted white, the centre of the lantern being 22 feet above the ground.
Order or Power.—4th order.
Fog Signal.—When a vessel's signals are heard, a gun will be fired *twice* with an interval of *three minutes* between each report. If necessary, this signal will be repeated after an interval of ten minutes.
Remarks.—The light is obscured from the bearing of N. 8° W. to N. 86° W.
The light and fog-signal will be discontinued annually from the 15th January to the end of February, on account of ice.
Variation.—4° W.

2. *Name.*—Sister island.

Position.—On the northern point of the island, 5 cables N. 72° W. from the northern point of Dauchen island.
Lat. 38° 40′ N., long. 124° 58¾′ E., on chart No. 1656.
Character.—*Fixed*, showing the following sectors:—
Sectors.—*Red* from N. 5° E. to N. 17° E
White from N. 17° E. to N. 22° E.
Red from N. 22° E to N. 59° E.
White from N. 59° E. to N. 68° E.
Red from N. 68° E, through east and south, to S. 80° W.
White from S. 80° W., through west, to N. 89° W.
Red from N. 89° W. to N. 75° W.
Obscured from N. 75° W., through north, to N. 5° E.
Elevation.—129 feet.
Visibility.—15 miles
Description of Building.—Concrete cylindrical tower painted white, the centre of the lantern being 25 feet above the ground.
Order or Power.—4th order.
Variation.—4° W.
Remarks.—This light will be discontinued annually from 15th January to the end of February, on account of ice.
Charts affected.—No. 1656, Ping Yang inlet.
„ 1655, Ping Yang inlet, southern approach.
„ 1257, Ping Yang inlet approaches.
„ 1256, Pe chili and Liau tung gulfs.
„ 1262, Hong Kong to Liau tung gulf.
„ 2347, Nipon, Kiusiu, &c.
Publications.—List of Lights, part VI, 1907, Nos. 908, 907.
Sailing Directions for Japan and Korea, 1904, page 39; and Supplement, 1906.
Authority.—Seoul Notices, Nos. 29 and 30, 1907.

PACIFIC OCEAN, SOUTH-WEST—New Ireland (Neu Mecklenburg).

Albatross channel—Decreased depth on shoal in approach.

No. 89 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 166 of 1908), are republished:—

Particulars.—Further examination shows that the 3-fathom shoal off the west coast of Manne island in the northern approach to Albatross channel has less water over it, as given below.
Position.—About 7 cables S 12° W. from the north-west point of Manne island.
Lat. 2° 41′ 35″ N., long. 150° 41′ 20″ E.

Depth.—1¼ fathoms.
Variation.—0° E.
Chart affected.—No. 55, Anchorages in New Britain, New Ireland, and New Guinea.
Publications.—Pacific Islands, vol. I, page 375.
Notice to Mariners No. 1452 of 1907. (*This office No. 513 of 16th November 1907.*)
Authority.—Berlin Notice No. 149, 1908.

EASTERN ARCHIPELAGO—Aru islands.

Wokam island—Reef off the west coast.

No. 90 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 168 of 1908), are republished:—

Particulars.—A reef about 2 miles in extent and connected with the shore exists off the west coast of Wokam island, Aru islands.
Depth and position.—The western edge, on which there is a depth of 3 fathoms, is situated with Taordefete point bearing N. 75° E., distant 2$\frac{7}{10}$ miles, and eastern point of Wammer island N. 4° W. on chart No. 470.
Lat. 6° 55′ N., long. 134° 14½′ E.
Variation.—3° E.
Chart affected.—No. 470, Aru islands.
Publication.—Eastern Archipelago Part I. 1902, page 478.
Authority.—Hague Notice No. 133, 1908.

EASTERN ARCHIPELAGO—Sumatra, east coast—Singkep island.

Serak island—Pinnacle rock eastward of—.

No. 91 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 169 of 1908), are republished:—

Particulars.—A pinnacle rock exists about 6 cables to the eastward of the southern end of Serak island, off the west coast of Singkep island
Position.—Lat. 0° 39¾′ S., long. 104° 15½′ E.
Depth.—8 feet
Remarks.—It has been placed on the chart as a rock with less than 6 feet over it.
Chart affected.—No. 1789, Channels between Sumatra, Linga, and Singkep.
Publication.—China Sea Directory, vol. I, 1906, page 602.
Authority.—Hague Notice No. 132, 1908.

BAY OF BENGAL—Burma coast.

Bassein river approach—Non-existence of breakers. Preparis, north channel.

No. 92 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 179 of 1908), are republished:—

Particulars.—The breakers reported by the Master of the S.S. *Lunka* to exist in the approach to Bassein river have been carefully searched for by the officer in charge of the Marine Survey of India, without success, and without finding or seeing any indication of danger. Tide rips, however, are common in this locality, and it is considered that the Master mistook these rips for breakers. "Tide rips" has therefore been inserted in place of "Breakers reported, 1907," on the Admiralty charts in this position.
Position.—Lat. 15° 44′ N., long. 93° 50′ E.
Charts affected.—No. 152, Preparis, north channel.
„ 823, Korange island to White point.
„ 830, Bassein river to Pulo Penang.
„ 829, Cocanada to Bassein river.
„ 70, Bay of Bengal.
Publications.—Bay of Bengal Pilot, 1901, page 337.
Notice to Mariners No. 1383 of 1907. (*This office No. 409 of 31st August 1907.*)
Authority.—Officer in charge of the Marine Survey of India, 14th December 1907.

CHINA—South-east coast.

Bias bay—Shoals in—.

No. 93 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 180 of 1908) are republished:—

Particulars.—Two rocky shoals exist in Bias bay, as follows:—

1. *Position.*—From the shoal the Pillars summit bears S. 14° E., distant 4½ cables, and Hat rock N. 86° W.
   Lat. 22° 36½′ N., long. 114° 38¾′ E.
   Depth.—4½ fathoms.
   Remarks.—There are depths of 7 fathoms around this shoal.
2. *Position.*—From the shoal Outer rock off Bias point bears S. 75° W., distant 8$\frac{3}{10}$ cables, Mendoza island summit S. 48° E.
   Depth.—1½ fathoms.
   Remarks.—There are depths of 6 fathoms, mud bottom, close around this shoal.

Variation.—Nil.
Charts affected.—No. 3002, Bias bay.
„ 3026, Macao to Pedro Blanco.
„ 1962, Hong Kong to the Brothers.
Publication.—China Sea Directory, vol. II, 1904, pages 134, 136.
Authority.—Commanding Officer, H. M. Surveying Vessel *Waterwitch*, 21st December 1907.

CHINA, EAST COAST—Chusan Archipelago.

Tinghai Harbour—Beacon destroyed.

No. 94 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 181 of 1908), are republished:—

Particulars.—The beacon marking Parry rocks, Tinghai harbour, has been destroyed.
Position.—Lat. 30° 0′ 20″ N., long. 122° 6′ 5″ E.
Charts affected.—No. 1395, Tinghai and approaches.
„ 1429, Nimrod sound to Yung river.
Publications.—China Sea Directory, vol. III, 1904, page 340.
Authority.—Paris Notice, No. 110, 1908.

PACIFIC OCEAN, SOUTH—New Caledonia.

Prony bay—Buoy withdrawn.

No. 95 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 193 of 1908), are republished:—

Particulars.—The black conical buoy marking Moziman reef on the western side of the entrance to Prony bay has been withdrawn.
Position.—Lat. 22° 23′ 30″ S., long. 166° 51′ 35″ E.
Charts affected.—No. 1311, Prony bay.
„ 2906, Isle of Pines to Uen island.
Publication.—Pacific islands, vol. II, 1900. page 303.
Authority.—Paris Notice No. 113, 1908.

BAY OF BENGAL—Chittagong coast.

Karnafuli river—Depth of water in the channels.

No. 96 (first publication).—The Port Officer, Chittagong, has given notice that the following depth of water was found in the channels by soundings taken on the 20th February 1908:—

	Ft.
Track No. I—Outer bar—	
Disc on diamond	13
Track No. II—Inner bar—	
Disc on diamond	13
Batten beacon on pillar	12
Track No. III—	
Triangle on cross and ball	16
Track No. IV—Guptakhally crossing—	
Tripod on cross and ball and diamond	19

BAY OF BENGAL—Burma coast.

Cheduba Strait, northern approach—Buoy beacons removed.

No. 97 (first publication).—With reference to Notice to Mariners No. 52, dated 31st January 1908, issued by this Office, the Officer in charge, Marine Survey of India, has given further notice, dated 20th February 1908, that the buoy beacons recently laid in Cheduba Strait (near Kyoukpyu), being no longer required, have been removed.

AFRICA, NORTH-EAST—Gulf of Aden.

Aden Harbour—Light-ship replaced by a red conical buoy.

No. 71 (second publication).—The Bombay Government has given notice (No. 10 of 1908) that on and after the 1st May 1908 the light-ship at Aden will be removed. It will be replaced by a red conical buoy carrying two red lights, moored in the position at present occupied by the light-ship.

CHINA, EAST COAST—Rugged islands.

Sout -west Horn—Light established—Fog signal intended.

No. 72 (second publication).—With reference to Notice to Mariners No. 297, dated 22nd June 1907, issued by this office, the British Admiralty has given further notice (No. 121 of 1908) that on 8th December an *occulting* light *every twenty seconds*, thus:—light, *ten seconds;* eclipse, *ten seconds*, was established on South-west Horn, Rugged islands. The light, which is dioptric, of the 6th order, is elevated 95 feet above high water, shows *red* from the bearing of N. 67° W., through west, to S. 8° W., and *white* in other directions, except where obscured by the land between N. 31° W. and N. 34° W., the white and red lights being visible in clear weather from distances of 15 and 8 miles respectively; it is shown from a white lantern surmounting a white dwelling, 23 feet from vane to base, erected on the western summit of the island. A fog gun will be established at a later date.

Approximate position, lat. 30° 35¾′ N., long. 121° 58′ E.

(*Variation 2° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Video to cape Yang tse, No. 1124; Kue shan islands to Yang tse Kiang, No. 1199; Amoy to Nagasaki, No. 2412; Hong Kong to Liau tung gulf, No. 1262: Also, List of Lights, Part VI, 1907, page 149; and China Sea Directory, vol. III, 1904, page 370.

PACIFIC OCEAN—Philippine islands—Bohol.

Bohol island—Reef reported off north coast.

No. 73 (second publication).—The British Admiralty has given notice (No 122 of 1908) that a reef, which partially dries at low water, is reported to exist off the north coast of Bohol island, in a position from which Maumaun island bears East, distant 2 miles, and Sagasau island N. 19° W.

Approximate position, lat. 10° 10¾′ N., long. 124° 24¾′ E.

This reef, which is about half a mile long in a north-north-westerly and south-south-easterly direction, and a quarter of a mile broad, consists of coral with scattered boulders, with depths of 3 or 4 fathoms between them.

In the passage between this reef and the reef extending eastward from Jau island there are depths of from 5 to 6 fathoms.

(*Variation 1° Easterly in 1908.*)

This Notice affects the following Admiralty Chart:—Sulu or Mindoro sea, No. 2578: Also, Eastern Archipelago, Part I, 1902, page 201; and Supplement, 1906.

PACIFIC OCEAN—THE PHILIPPINE ISLANDS—SAMAR, SOUTH COAST.

San Pedro bay—Shoal reported in—.

No. 74 (second publication).—The British Admiralty has given notice (No 123 of 1908) that a shoal with a least depth of 2¾ fathoms over it, is reported to exist in San Pedro and San Pablo bay in a position from which Punubulu island bears N. 9° W., distant 2¾ miles, and Dio island N. 59° W.

Approximate position, lat. 11° 10′ 35″ N., long. 125° 6′ 35″ E.

This shoal, which is about 60 yards long by 20 yards broad, consists of coral and rock; there are depths of 10 fathoms around it.

(Variation 1° Easterly in 1908.)

This Notice affects the following Admiralty Charts:—San Pedro bay to Libukan islands, No. 2987; Sulu or Mindoro sea, No. 2578; the Philippine islands, No. 2577: Also, Eastern Archipelago, part I, 1902, page 363.

AFRICA, SOUTH—CAPE COLONY.

Mossel bay—Alteration in lights.

No. 75 (second publication).—The British Admiralty has given notice (No. 125 of 1908) that the *fixed* light on the jetty head at Aliwal shows *red* between the bearings of S. 22° W. and S. 37° W., and *green* when bearing to the westward of S. 37° W.

Approximate position, lat. 34° 11′ S., long. 22° 9′ E.

Also, that the red fixed light formerly exhibited in Erme bay, about one mile to the westward, has been discontinued.

(Variation 29° Westerly in 1908.)

This Notice affects the following Admiralty Chart:—Mossel bay, No. 639: Also, List of Lights, part VI, 1907, No. 12, and Remarks; and Africa Pilot, vol III., 1905, pages 105, 107.

CHINA—YANG TSE KIANG, SOUTH CHANNEL.

Tungsha Light-vessel, Fairway Bell, and Tungsha Bank Buoys—Amended positions of—.

No. 76 (second publication).—With reference to Notice to Mariners No. 5 dated 4th January 1907, issued by this office, the British Admiralty has given further notice (No. 146 of 1908) that the undermentioned light-vessel and buoys in the entrance to the Yang tse Kiang are now situated in the following positions:—

(*a*) Tungsha light-vessel is situated in approximately lat. 31° 8′ 0″ N., long. 121° 59′ 50″ E., or about half a mile southward of its position on the chart.

(*b*) The fairway bell buoy is situated in approximately lat. 31° 1′ 35″ N., long. 122° 9′ 0″ E., or about half a mile to the south-westward of the position shown on the chart.

(*c*) The Tungsha banks buoy is situated in approximately lat. 31° 6′ 55″ N., long. 122° 9′ 25″ E., or about half a mile to the southward of the position shown on the chart.

This Notice affects the following Admiralty Charts:—Approaches to the Yang tse Kiang, No. 1609; Kueshan islands to Yang tse Kiang, No 1199.. Also, China Sea Directory, vol. III, 1904, pages 406, 407; and Supplement, 1907.

PACIFIC OCEAN—NEW GUINEA, WEST COAST.

Waigiu island—Bank south-westward of—.

No. 77 (second publication).—The British Admiralty has given notice (No. 147 of 1908) that a bank, with a depth of 6 fathoms over it, exists to the south-westward of Waigiu

island, in a position from which Batang Pale island summit bears N. 34° E., distant 10 miles, and Great Fram island summit S. 46° E.

Approximate position, lat. 0° 25½′ S., long. 130° 6½′ E.

(*Variation 2° Easterly in 1908.*)

This Notice affects the following Admiralty Charts:—Australia, northern portion, No 2759a; Eastern archipelago, No. 2698: Also, Eastern Archipelago, part I, 1902, page 449.

KOREA, SOUTH COAST—Fusan harbour.

Sorio—Lights established.

No. 78 (second publication).—The British Admiralty has given notice (No. 150 of 1908) that a *white fixed* light over a *red fixed* light, elevated respectively 21 and 18 feet above high water, and visible from a distance of 2 miles, has been established on the head of a pier constructed off the Japanese settlement at Sorio, and situated at a distance of 1⅛ cables N. 42° E. from Sorio green light.

Approximate position, lat. 35° 6″ N., long. 129° 2½′ E.

Also, that a *white fixed* electric light of 1,200 candle-power, 30 feet above the ground, has been established at the root of the pier in a position situated at a distance of one cable N. 3° E. from Sorio green light.

(*Variation 4° Westerly in 1908.*)

This Notice affects the following Admiralty Chart:—Fusan harbour, No. 1859: Also List of Lights, part VI, 1907, page 177; and Sailing Directions for Japan, &c., 1904, page 119.

CHINA, NORTH—Yellow sea, Manchurian coast—Elliot (Le Chang Sau) islands.

Sau Chan Shan Tau—Pinnacle rock in west bay.

No. 79 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No 156 of 1908) is republished:—

Particulars.—A pinnacle rock exists in west bay, Sau chan shan tau.
Position.—From the rock Utini (Black) rock bears N. 24° W., distant 7 cables, and summit (412 feet) of Hill point S. 57° E.
Lat 39° 12½′ N., long. 122° 40′ E.
Depth.—1½ fathoms.
Remarks. There are depths of 7 fathoms around this rock
Variation.—4° W.
Charts affected.—No. 3388, Terminal head to Hai yung tau.
No. 1206, Pe chili and Liau tung gulfs.
Publications.—China Sea Directory, vol. III., 1904, page 582.
Authority.—Tokyo Notice, No. 1107 of 1907.

JAPAN—Naikai (Inland sea).

Hiroshima wan—Rock in—.

No 80 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 157 of 1908) is republished:—

Particulars.—A rock exists in the northern part of Hiroshima wan.
Position.—From the rock, the eastern point of Nino shima bears N. 7° E., distant 9$\frac{4}{10}$ cables, and Yakata ishi light-beacon S. 80° E.

Lat. 34° 18′ N., long. 132° 30½′ E.

Depth.—1½ fathoms.
Remarks.—There are depths of from 2½ to 3 fathoms at a distance of about half a cable around the rock.
Variation.—4° W.
Chart affected.—No. 3469, Hiroshima wan.
Publications.—Sailing Directions for Japan, &c., 1904, page 486; and Supplement, 1906.
Authority.—Tokyo Notice, No. 1110 of 1907.

KOREA, SOUTH-WEST COAST—Myangoru islands.

Chu do (Bamboo island)—Light and fog signal established.

No. 81 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 158 of 1908) is republished :—

Particulars.—On 25th December 1907, the provisional white fixed light on Chu do (Bamboo island), Myangoru islands, would be replaced by a permanent light and fog signal as given below :—

Position.—Lat. 34° 13½′ N., long. 125° 51′ E.

Character.—*White group flashing* showing groups of three flashes in succession *every forty seconds*, thus :—

Group of three flashes	...	*Fifteen seconds.*
Eclipse ...	...	*Twenty-five seconds.*

Elevation.—276 feet.

Visibility.—23 miles.

Remark.—The light is obscured from N. 5° W. to N. 33° W.

Variation.—4° W.

Description of Building.—Concrete cylindrical tower, painted white, the centre of the lantern being 20 feet above the ground.

Order or Power.—Third order.

Fog Signal.—Fog siren giving, by compressed air, *one blast every thirty-five seconds*, thus :—

Blast ...	...	*Five seconds.*
Silent interval ...	...	*Thirty seconds.*

Charts affected.—No. 3365, South-west coast of Korea.
„ 104, Korean archipelago.
„ 3480, Shantung to Nagasaki.
„ 1262, Hong Kong to Liau tung gulf.
„ 2347, Nipon Kiusiu, &c.

Publications.—List of Lights, part VI, 1907, No. 923.
Sailing Directions for Japan, &c, 1904, page 81 ; and Supplement, 1906.
Notice to Mariners No. 1204 of 1905 (*this office No. 487 of 12th December 1905*).

Authority.—Seoul Notice, No. 28 of 1907.

JAPAN—Nipon (Honshu), south coast.

Hamashima ko—Shoals in approach; also not-existence of shoal.

No. 82 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 159 of 1908) is republished :—

Particulars.—The undermentioned shoals exist in the approach to Hamashima ko, as follows :—

a. Name.—Watari Kuromi.

Position.—From the shoal, Ko shima summit bears S. 25° W., distant $3\frac{5}{10}$ cables, and Mugi saki N. 82° E
Koshima, lat. 34° 14′ N., long. 136° 49½′ E.

Depth.—1½ fathoms.

Remarks.—There is a depth of 1⅞ fathoms at a distance of four-tenths of a cable N. 13° E. from this shoal.

b. Name.—Nishi Kuromi.

Position.—From the shoal Koshima summit bears S. 13° W., distant $3\frac{5}{10}$ cables, and Mugi saki N. 84° E.

Depth.—2¼ fathoms.

Remarks.—There is a depth of 2¾ fathoms at a distance of four-tenths of a cable N. 41° W. from this shoal.

c. Remarks.—The shoal reported by the Master of the S.S. *Yamoto Maru* to exist in the approach to Hamashima ko, situated at a distance of about 3 cables N. 43° E., from Koshima, has been searched for without finding any indication of danger. This shoal has therefore been erased from the charts.

Variation.—4° W.

Charts affected.—No. 994, Yeboshibana to Anori saki, 552. Owasi bay to Takamatsu no saki.

Publications.—Sailing Directions for Japan &c., 1904, page 341; and Supplement, 1906 Notice to Mariners No. 1354 of 1907 (*this office No. 486 of 2nd November 1907*).

Authority.—Tokyo Notice, No. 1109 of 1907.

BAY OF BENGAL—BURMA COAST.

Caution—The Terribles—Mud volcanic eruption.

No. 83 (second publication).—A telegraphic communication, dated 20th February 1908, has been received from the officer in charge Marine Survey of India, intimating that a mud volcano in active eruption, with 4½ fathoms over it at pr sent, has been discovered in the vicinity of The Terribles.

Position.—Lat. 19° 25′ N.

Long. 93° 14′ E.

Bearing from South Terrible N. 58° W., true, distant 2 miles.

Masters of vessels are requested to avoid this locality.

AUSTRALIA—TORRES STRAIT.

Inner route to Torres strait—Pea (P) reef—Beacon down.

No. 84 (second publication).—The Port Master, Brisbane, has given notice (No. 2 of 1908) that the Beacon on the Eastern Extremity of Pea (P) Reef is down. The beacon will be re-erected as soon as practicable.

Chart affected, No. 2921; Australia Directory, vol. II.

AUSTRALIA—TORRES STRAIT.

Prince of Wales Channel—Ipili reef—Beacon down.

No. 85 (second publication).—The Port Master, Brisbane, has given notice (No. 1 of 1908) that the Red Triangular Beacon marking Ipili Reef is down. It will be re-erected as soon as practicable.

Charts affected, Nos. 447, 2354 and 2357; Australia Directory, vol. II.

INDIA, WEST—BOMBAY COAST.

Bombay Harbour—Elephanta Spit buoy shifted northward.

No. 63 (third publication).—The Bombay Government has given notice (No. 8 of 1908) that the Elephanta Spit buoy in Bombay Harbour is shifted 2¾ cables north of its present position and now watches in 9 feet at low water ordinary spring tide.

This Notice affects the following Admiralty Charts:—Bombay Harbour. No. 2621: Arnlale Island to Kundari Island, No. 737: Also, West Coast of Hindoostan Pilot, 1898, pages 203 and 215.

JAPAN—KIUSIU, NORTH-WEST COAST.

Kure and Sasebo—Time Balls discontinued.

No. 64 (third publication).—The British Admiralty has given notice (No. 93 of 1908 that the Time balls at Kure and Sasebo have been discontinued.

Approximate position, Kure, lat. 34° 14′ N., long. 132° 33′ E.

Approximate position, Sasebo, lat. 33° 10′ N., long. 129° 43′ E.

This Notice affects the following Admiralty Chart:—Io jima to Madara jima, No. 2387: Also, List of Time Signals, 1904, Nos. 179 and 180; and Sailing Directions for Japan, Korea, 1904, pages 487 and 589.

KOREA EAST COAST—Korean gulf.

On shan tin (Gensan) light—Sectors altered.

No. 65 (third publication).—With reference to Notice to Mariners No. 184, dated 27th April 1907, issued by this office, the British Admiralty has given further Notice (No. 112 of 1908) that, on 25th November 1907, the sectors of Chotoku to light (*fixed*), in On shan tin, or Gensan bay, would be altered to show as follows:—*red* from the bearing of N. 49° W. to N. 33° W.; *white* from N. 33° W., through north and east, to S 73 E.; *red* from S. 73° E to S. 68° E., and *white* from S. 68° E, through south and west, to N. 49° W.

Approximate position, lat. 39° 10¾′ N., long. 127° 26¼′ E.

(*Variation 6° Westerly in 1908.*)

This Notice affects the following Admiralty Chart:—Port Lazaref, No. 3037: Also, List of Lights, part VI, 1907, page 179; and Sailing Directions for Japan and Korea, &c., 1904, page 136.

JAPAN—Hokushu (yezo), south coast.

Goyomai saki—Rock south-west ward of—,

No. 66 (third publication).—The British Admiralty has given notice (No. 113 of 1908) that a rock, with a depth of about 2 fathoms over it at low water, is reported to exist south-westward of Goyomai saki, situated in a position from which the rock off Goyomai village (about 8 cables S. 69° W. from Goyomai jima) bears N. 25° W., distant 3$\frac{6}{10}$ cables, and Goyomai jima N. 14° E.

Approximate position, lat. 43° 20¾ N., long 145° 47¾′ E.

(*Variation 5° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Plan of Goygomai channel on No. 1268: Goyomai channel to Yezo strait, No. 507: Also, Sailing Directions for Japan, &c., 1904, page 737.

JAPAN—Kiusiu, south coast.

Kagoshima Harbour—Lights established.

No. 67 (third publication).—The British Admiralty has given notice (No. 114 of 1908) that on 15th December the undermentioned lights would be established in Kagoshima harbour:—

(*a*) A *red fixed* light, elevated 30 feet above high water, and visible from a distance of 4 miles, would be exhibited from a white wooden staff erected on the islet known as Bentendaiba.
Approximate position, lat. 31° 35′ 35″ N., long. 130° 33′ 30″ E.

(*b*) A *green fixed* light, elevated 30 feet above high water, and visible from a distance of 4 miles, would be exhibited from a white woodon staff erected on a wharf known as Shinhatoba.

Approximate position, lat. 31° 35′ 51″ N., long. 130° 33′ 40″ E.

This Notice affects the following Admiralty Chart:—Kagoshima haiwan, No. 372; Also, List of Lights, part VI, 1907, page 185; Sailing Directions for Japan, &c., 1904, page 520; and Supplement, 1906.

PACIFIC OCEAN—North-west.

Caution—Floating mine seen.

No. 68 (third publication).—The British Admiralty has given notice (No. 115 of 1908) that on 13th November 1907, a floating mine is reported to have been seen by a vessel on a voyage between Kobe, Japan, and San Francisco, United States, in approximately lat. 38° 16′ N., long. 170° 8′ E. Mariners are cautioned accordingly.

This Notice affects the following Admiralty Charts:—Kamchatka to Kadaik island, No. 2460; Pacific ocean, No. 2683: Also, Pacific Islands, vol. III, 1900, page 253.

JAPAN—NIPON (HONSHU), EAST COAST.

Todo Zaki lighthouse—Auxiliary light established.

No. 69 (third publication).—The British Admiralty has given notice (No. 116 of 1908) that on and after 15th December 1907, a *red fixed* light, elevated 109 feet above high water, and visible in clear weather from a distance of 15 miles from the bearing N. 12° W. to N. 1° W. over One Sho, would be established in a window below the main light on Todo Zaki.

Approximate position, lat. 39° 32¾′ N., long. 142° 5′ E.

(*Variation 5° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Yamada Ko, No. 210; Sendai bay to Miyako bay, No. 806; Sendai bay to Tsugaru strait, No. 3409: Also, List of Lights, part VI, 1907, No. 1082; and Sailing Directions for Japan, &c, 1904, page 405.

BAY OF BENGAL—BURMA COAST.

Caution—Foul island—Violent eruption in—.

No. 70 (third publication).—A telegraphic communication, dated 10th February 1908, has been received from the Principal Port Officer, Burma, stating that Foul island was in violent eruption on the 6th February 1908.

Mariners are hereby warned.

ST. L. S. WARDEN, COMDR., R.I.M.,
Port Officer of Calcutta.

RESOLUTION ON THE REPORT ON THE PROGRESS OF EDUCATION IN BENGAL FOR THE YEARS 1902-1903 TO 1906-1907.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 22nd February 1908.

RESOLUTION—No. 1317.

READ—

The Report on the progress of Education in Bengal for the years 1902-1903 to 1906-1907.

1. The report covers the period of five years ending the 31st March 1907. It was due to Government on the 1st October 1907 and is reported to have been in fact ready before that date. Owing however to delays in the Press, it was not received by Government till the 1st December. The report is written by Mr. W. W. Hornell, Assistant Director, and is issued over his signature. The Lieutenant-Governor is, however, informed that every Chapter has been considered and passed by the Director of Public Instruction, and that the views expressed in the report may be taken to be Mr. Earle's own.

2. The area dealt with is the Province of Bengal as constituted since the formation of the New Province of Eastern Bengal and Assam on the 16th October 1905. Sir Alexander Pedler, Kt., F.R.S., C I E., was Director of Public Instruction from the commencement of the period under review up to the 31st March 1906. He was succeeded by Mr. A. Earle, of the Indian Civil Service, who held charge of the department for the remainder of the period.

Controlling Agencies.

3. A scheme for the increase of the number of Inspectors from 6 to 12 and of Assistant Inspectors from 5 to 11, which received sanction during the year 1906, had not been brought into force by the close of the period under review. It is hoped, however, that the necessary additional appointments will be made before the close of the year 1907-08. A considerable increase in the number of Deputy Inspectors and of Sub-Inspectors is also impending. It is too early to estimate the results of this general increase of the inspecting staff or of the provincialisation of the staff of Sub-Inspectors, which took place with effect from 1st January 1906. The existing staff is, however, admittedly inadequate; and there can be no doubt that, as the Director remarks, the demands made on inspecting officers increased considerably during the quinquennium under review.

4. It is satisfactory to learn that during 1906-07 great interest was taken in Education by Executive and Judicial Officers, and that the value of that interest is unanimously testified to by the Inspectors. This is a matter to which the Lieutenant-Governor attaches great importance; and His Honour is glad to learn that the instructions issued on the subject by Government in 1905 have borne fruit.

Collegiate Education.

5. The whole course of Collegiate education has been affected by the passing of the Universities Act of 1904 and the promulgation of the revised regulations of the Calcutta University in August 1906. The question how far the reforms thus introduced are to be real is very largely one of funds. Heavy expenditure is needed in many directions for the proper development of Colleges according to the new ideals; and the means by which this expenditure is to be met not only in the Government colleges, but in deserving institutions among the aided colleges, which have no resources of their own, is a problem of the utmost gravity. The Director remarks that it is now for the Government Colleges to take the lead in shaping a better model for University education; but the funds available are insufficient to do more than ensure bare compliance with the regulations. There was a decrease of one college, and of 1,354 students during the quinquennium under review; but expenditure increased during the same period by Rs. 1,17,692, the whole of which was borne by public funds; and the annual cost per student has risen from Rs. 124 in 1904-1905 to Rs. 166 in 1906-1907. As Mr. Earle remarks, while there is practically no limit to what might be spent with advantage on education in its various branches, there is a distinct and practical limit to the resources which Government can make available. If the development of collegiate education is not to be delayed and hampered by sheer lack of funds, it is absolutely necessary that assistance on a large scale should be forthcoming from the liberality of private individuals.

6. There has been some advance in the matter of the promotion of a corporate feeling in colleges by means of common rooms, clubs, and the issue of College Magazines. The introduction of compulsory games at the Patna College, in which the Principal joins, has also had an excellent effect in this direction. There can be little doubt that, as noticed by the Director, the success of college institutions must depend largely on the amount of time and trouble which the professors are willing to devote to them.

Secondary Education for Boys.

7. A marked feature of the period under review has been a steady increase in the number of English schools accompanied by a decrease in the number of secondary vernacular schools. The number of boys attending

English secondary schools at the close of the quinquennium was 122,937, an increase of 2,337 during the period. In the middle vernacular schools there were 24,350 boys at the close of 1906-1907, shewing a decrease of 11,291 in ten years. There has been an increase in expenditure on secondary schools of nearly three lakhs during the quinquennium; and the expenditure during the year 1906-1907 was Rs. 25,43,105 of which Rs. 5,58,103 was from public funds.

8. In his general remarks under this head the Director notices the immense importance of secondary education in the present stage of the development of the country, and raises the question whether, when University education is being reformed, it is not necessary as a preliminary measure to examine the system of secondary education, and to carry out in connection with it any changes which might appear to be required. It is now too late to speculate as to what might have been; but it seems to the Lieutenant-Governor to be obvious that reform of colleges can be of little practical value without reform of the schools through which practically every college student must pass. The improvement of High Schools by the introduction of a school final examination, calculated to remove what the Director describes as the utter and radical unsoundness of the present state of affairs by which secondary schools are mere cramming institutions for the University, and the institution of Government High Schools in every district, which may serve as models of what such schools should be, are reforms which are now under consideration and which are of the greatest importance.

9. The unfitness of the great majority of teachers in secondary schools is generally admitted; and the dictum that efficient schools are not possible without efficient teachers may be accepted as truism. The Director dwells specially on the necessity of training as a factor in the improvement of teaching in secondary schools. The value of training may be freely admitted; but it seems to Lieutenant-Governor to be obvious that the opening of training institutions can by itself be of little avail unless accompanied by such an improvement in the conditions of work in the teaching profession as to attract to that profession men possessed not only of sound academic qualifications but also of genuine zeal in the cause of education and of a desire to perfect themselves by every available means in the art of teaching.

Primary Education.

10. The expansion of primary education is one of the most satisfactory features of the period under review. The number of schools has increased from 32,024 to 33,954 and that of pupils from 818,537 to 953,455; and it is reported that this increase has been secured without any lowering of the standard of efficiency required. The proportion of boys actually at school at the close of the period was 253 out of every 1,000 boys of school-going age. The corresponding figure for 1901-02 was 217. On the other hand the proportion of pupils in upper primary schools has shown no advance during the last 15 years. This, coupled with the unpopularity of middle vernacular schools, points to the conclusion that vernacular teaching beyond the elementary stages does not, under present conditions, commend itself to parents as being of practical value. The total expenditure on primary education was Rs. 25,50,768 during 1906-07, of which public funds contributed Rs. 8,94,749 or 35·1 per cent. The corresponding percentage five years previously was 25·6. It is noticeable that expenditure under this head increased by 4½ lakhs during the quinquennium, of which 1½ lakh was during the last year.

11. A sum of Rs. 5,03,598 was assigned by the Local Government in 1905-06 towards the construction of primary school buildings on condition that a reasonable proportion of the total cost was contributed from local sources. The reports show that the progress made has been disappointingly small, and that the assistance asked for from the public has not, as a rule, been forthcoming.

12. The system introduced by the Resolution of 1901 has proved a failure as regards both the intellectual training of the children and the proper teaching of the vernacular. A revised syllabus for the infant section and for standard I and II has been published and will be introduced from 1910. It is claimed

for this syllabus that it is educationally sound; and there is reason to hope that, even if it is at present beyond the scope of the average primary school teacher, its introduction will mark a distinct step in advance.

Training of Teachers.

13. The Director devotes 18 pages to the training of teachers in its different branches. Of the great value of properly trained teachers there can be no question; but, as already noticed, for training to be effective it is essential that there should be a body of teachers to be trained, prepared, on the one hand, to make teaching their life work, and, on the other, to perfect themselves in the principles and practice of teaching in order to render that work as effective as possible. Of two men equal in other respects the trained will be a more efficient teacher than the untrained; but at the same time an untrained teacher whose heart is in his work will always be more valuable than a trained teacher who is indifferent to his profession.

14. The Lieutenant-Governor looks in vain in the report now under consideration for any definite assurance that the work hitherto done by training institutions of any class has been of permanent practical value; and His Honour cannot but feel that this is in great measure due to the fact that, while the importance of attracting the right class of teacher to these institutions, and of retaining such teachers permanently in the teaching profession, has always been acknowledged, the attainment of this object has not in practice been recognized as an essential preliminary to the opening of any training institution. The whole question of the training of teachers, from teachers of English in secondary schools down to the *gurus* of primary schools, is now under revision; and the Lieutenant-Governor earnestly trusts that this revision will be carried out on such practical lines as will secure a real, if gradual, improvement in the qualifications of teachers of all grades.

15. The above remarks apply specially to the case of female teachers. There is abundant evidence in the report that the training classes of the various missions are turning out a good and constantly improving class of female teacher; but as the Director remarks, it is Hindu and Mahomedan teachers that are wanted; and without these the education of Indian girls and women must remain practically at a standstill. There is unquestionably a demand for properly qualified teachers. It may well be doubted, however, if the opening of training institutions will do much to meet this demand, since such institutions without students can do nothing, and the real difficulty is to attract to them women of the class which can secure access to the houses of orthodox Hindus and Mahomedans. As the Education Commission have said in their report, many of the difficulties connected with female education would disappear if arrangements could be made for employing trained female teachers in their own villages; but the female teachers must first be found before they can be either trained or employed; and the finding of suitable candidates, and he inducing of them to take up the profession of teaching and to undergo the necessary training appears to be still a matter of personal effort and influence.

Professional and Technical Education.

16. The subject of professional and technical education occupies 28 pages of the report. It is disappointing to find that during the past five years little practical progress has been made except as regards engineering and mining.

17. The commercial classes attached to the Presidency College have so far failed to attain popularity and the results of the examinations in connection with them have been very unsatisfactory. The classes are carried on in consultation with the Chambers of Commerce; and there seems little reason to doubt that if the classes can attain their object of turning out a type of man who will be more useful in an office than the ordinary man, the mercantile community will be prepared to recognize a good article and pay for it accordingly. Unless, however, parents see that these classes are likely to help a boy to secure a decent living, it may be feared that they will never be well attended. It is certain that enthusiasm for the commercial profession as apart from prospects of definite profit cannot, at present, be calculated on as a living force in Bengal.

18. The Calcutta School of Art is reported to have started with false ideals and to be only slowly making up leeway, though the work is now on the right lines. Two hundred-and-fifty-two students were attending the school on 30th March 1907.

19. The agricultural classes at the Sibpur College, attracted only 23 students on an average throughout the quinquennium. Fifty students appeared at the Diploma Examination and 34 were successful. The class will close in November 1908 and be transferred to the Provincial Agricultural College at Sabour.

20. The work done in agricultural classes attached to High Schools has not been satisfactory. In fact, the footing on which they were started was not such as to render success possible. Steps are now being taken to place these classes on a business-like footing. Nature study is still prescribed in the Training Schools, but it does not appear that up to date much practical progress has been made in this respect.

21. The Sibpur Engineering College had 366 students on the 30th March 1907, of whom 94 were in the Engineering Department, 233 in the apprentice Department, 24 in the Agricultural class and 15 in the Artisan classes. The total expenditure of the College during 1906 07 was Rs. 2,22,981, an increase of Rs. 55,968 over the previous year. The cost to Provincial Revenues was Rs. 1,93,618 an increase of Rs. 55,312. The result of the examinations held in 1906 were distinctly satisfactory, the percentage of success in the B.E. and F.E. Examinations being 66·7 and 57·9, respectively. The notorious reputation of the College for unhealthiness has unfortunately been maintained, and its transfer to Ranchi has now been definitely sanctioned by the Government of India.

22. The Behar School of Engineering at Patna has worked very satisfactorily during the quinquennium; and the Lieutenant Governor is glad to notice that it is largely made use of by Behari students. It is gratifying to find that the students of this School have entirely of themselves developed a club for debates, lectures, etc, which has had a vigorous existence for two years.

23. The Cuttack Survey School has not worked satisfactorily; but it is about to be enlarged and developed into an Engineering School and will, it is hoped, make a fresh and successful start.

24. The "B" classes attached to Zillah Schools have proved a failure; the number of students presented for examination having steadily decreased from 21 in 1903 to 6 in 1907. Attempts are being made to foster the development of these classes; but their ultimate success must, as the Director remarks, depend on the extent to which the classes of Indian Society who use Secondary Schools are prepared to encourage their sons to take up work other than Government service or clerical employment. At the same time no success can be expected unless these classes are calculated to afford, in the Director's words, "an adequate preparation for the various activities which should find a place in the life of a vigorous community."

25. It is to be regretted that it has not yet been found possible to open the classes for the training of Engineering draftsmen, the need of which was alluded to in the Report on Public Instruction for 1905 1906.

26. The Mining class opened at the Sibpur College, after unfortunate delays in settling the course, is now working successfully Four apprentices who went up for the examination held at the end of 1906-1907 all passed and have since got good appointments; and 10 students joined the class in 1907. The Lieutenant-Governor desires to acknowledge the assistance given to the class while in camp at Jheria by the managers of mines in that locality. The lectures delivered by Mr. Griffiths, Mining Instructor, in the colliery area are reported to have been well-attended; and the members of the Mining Advisory Board have expressed themselves well pleased with the progress made. The success which is attending instruction in mining seems to the Lieutenant-Governor to point to a readiness on the part of the public to take advantage of technical education where this is calculated to lead directly to remunerative employment.

27. As regards Industrial Schools, every preparation has been made for opening the Weaving School at Serampur; and work will be commenced as soon as the officers selected for the charge of the School arrive from England. In the Hazaribagh district the number of industrial schools has increased in two years, thanks to the exertions of Mr. Radice, the Deputy Commissioner, from 3 to 18. Nothing, however, is said in the report as to their results. In other respects no noticeable progress has been made.

28. Generally the Director has to admit that, while views have solidified and aims have been concentrated, no real advance is manifest as regards technical and industrial education and that the effect of existing schools on the industrial development of the Province is practically negligible. Much is hoped from the appointment of a special officer, recruited from England, whose business it will be to be generally acquainted with the larger industries of the province and to advise as to their development. This appointment has been recommended and the Lieutenant-Governor trusts that it will soon be an accomplished fact.

Education of Girls and Women.

29. On the 30th March 1907, there were 121,195 girls and women in public educational institutions, being 1 in every 33 girls of school-going age as against 1 in every 58 at the close of the last quinquennium. Over 99 per cent. of the girls under instruction were in the primary stage. The total expenditure under this head was Rs. 5,46,803, of which public funds contributed Rs. 2,80,631.

30. The Bethune College had during 1906-1907 23 students, of whom 15 were Brahmos, 6 Christians, and 2 Jewesses. Of the staff of Principal, three professors, and three lecturers, only the principal and one lecturer are ladies. The cost of the college during 1906-1907 was Rs. 18,254, of which only Rs. 883 was derived from fees, the balance being paid by Government.

31. There were seven high schools for girls at the close of the period under report with six hundred and eighty girl pupils, six of these are in Calcutta and one at Bankipore, four of the former being Mission schools. The number of secondary schools for girls has increased during the quinquennium by 21 and their pupils by 1,656 or 17·1 per cent. The number of primary schools for girls at the close of the period was 3,218 and that of girl pupils in such schools 70,215, in addition to 46,233 in primary schools for boys. The increase during the quinquennium amounts to 99·1 per cent.

32. The cost of secondary schools for girls during 1906-1907 was Rs. 2,05,834, of which 41·7 per cent. came from Provincial Revenues, the corresponding figures for primary schools being Rs. 3,00,837 and 56 per cent. It is noticeable that the cost of every girl in secondary and primary schools, respectively, is Rs. 51·3 and Rs. 4·1 compared with Rs. 17·7 and Rs. 2·7, the corresponding figures for boys.

33. Among private institutions the Mahakali Pathsala institution in Calcutta had 500 pupils during 1906-1907, the majority of whom came from high caste families. The girls are taught, besides religious instruction, Sanskrit, Bengali, a little arithmetic, cookery, and housewifery. This school depended largely on the influence of Mataji Maharani Tapaswini who, unhappily, died during the year; but it affords a proof that orthodox Hindu girls will come to school if the conditions are suitable.

34. The scheme of zenana instruction by house to house visitation has failed of success owing to the absence of proper teachers. Training can do little and the provision of syllabuses and text-books less until the problem of how to secure female teachers of suitable character and position has been solved. As the Director observes, "If from among the orthodox Hindu and Muhammadan communities lady teachers can be produced, who by their position will command respect, while by their capabilities they will justify in themselves the education which they have received, then progress is assured." That such teachers can be found is certain, but it requires all the efforts and influence of ladies, whether European or Indian, interested in the question of female education, to discover them in the first instance, and then to induce them to devote themselves to the education of their less enlightened sisters.

European Education.

35. There were at the close of 1906-07 72 secondary and primary schools for Europeans, including a night school at Jamalpur and three institutions which are unaided and submit no returns. The number of pupils on the rolls of the 69 institutions which submitted returns was 7,826. The total expenditure incurred was Rs. 17,77,291, of which Rs. 4,43,569 is returned as from Provincial Revenues, Rs. 7,65,544 from fees, and Rs. 5,66,213 from subscriptions and endowments. In 1901-02 the total cost of European schools was Rs. 11,67,077, of which public funds contributed Rs. 1,55,790.

36. The result of the Cambridge Local Examinations was very satisfactory, the success of the Diocesan Girls' School at Darjeeling calling for special mention. The results of the Code Examinations have, on the other hand, been extremely unsatisfactory for the last two years. If, as the Director suggests, these are examinations which nobody wants, and for which it is by no means easy to arrange, their abolition, which has been decided on, would appear to be a wise step.

Muhammadan Education.

37. At the close of the period under review, there were 184,355 Muhammadans under instruction in institutions of all kinds. This shows a satisfactory increase of 23·2 per cent. during the quinquennium.

38. It is unsatisfactory, however, to find that in the Calcutta Madrassa, the Principal Muhammadan educational institution in the Province, the Anglo-Persian Department has steadily declined in popularity; while though the numbers in the Arabic Department have increased, its reputation has not, in the Principal's opinion, been maintained. The question as to how the teaching at the Madrassa can be improved so as to constitute a training for public service as sound as a University course, but at the same time to give due prominence to those branches of study to which Muhammadans as a body attach importance, is now being considered by the Director in conference with leading representatives of that community. On a satisfactory solution of the problem involved the future progress of the Muhammadans of Bengal to a great extent depends. The development of the common room of the Madrassa into an institute for Moslems generally is a notable and interesting fact.

Physical and Moral Training.

39. No general scheme for the residence of school boys has yet been developed. The advantages of the hostel system are universally recognized; but its general adoption is not only a matter of great expense, but would also place great and new responsibilities on the teaching staff. As regards the financial question, it seems to the Lieutenant-Governor that this is a direction in which the Education Department may very well look to assistance from wealthy members of the Indian community. His Honour notices with interest that Mr. Tipping, as Inspector of Schools in Orissa, introduced a system by which teachers of zilla schools are made responsible for the general welfare of specified batches of pupils. If this system works successfully, it will mark a very important advance as regards the *morale* of high schools.

40. Drill in most primary and secondary schools is described as an unqualified farce. Government has undertaken to contribute towards the salary of a physical director to be recruited from America by the Young Men's Christian Association of Calcutta. If this experiment proves a success, the question of recruiting one or more such officers for Government Service will be considered with a view to placing physical training on a more satisfactory footing throughout the province.

41. The standard of discipline, while no marked falling off is noted, still leaves much to be desired. The Director quotes as of general application the following remarks of Mr. Küchler about the schools of the Bhagalpur Division. "The state of discipline in the aided schools of this Division leaves much to be desired, and has indeed shown a tendency to deteriorate during the latter part of the period under review. Discipline in the sense that it is understood in English schools is, of course, unknown as yet in the privately managed schools

of this Province, chiefly because the headmaster is possessed of little or no authority. His tenure of office depends, as he is well aware, entirely on the good will of the Managing Committee, and if he wishes to retain his position and to live in peace, he has at all costs to keep on good terms with the members as well as generally with the parents of the boys. As Indian parents have, unfortunately, not yet learnt the value of school discipline, and for the most part resent any punishment inflicted on their boys, it is obvious that a headmaster who is at the same time a disciplinarian occupies an almost impossible position. The schoolboys, too, are fully aware of the limited nature of the headmaster's powers, as on the rare occasions when he ventures to exercise his authority in the interests of discipline, his decisions are generally reversed by the Managing Committee. And yet the great majority of schoolboys in this Province are by nature so gentle, obedient, and tractable that till within recent times the general standard of behaviour has been fairly good, and such breaches of discipline as have occurred have been of an isolated character. The prominence, however, into which the schoolboy class has of late been brought by the flattering appeals made to it for assistance in semi political movements has given the boys an exaggerated sense of their own importance and has, in the absence of the restraining force of discipline noted above, led them, in some cases, into excesses which are at variance with their true character." There can be question that the difficult position in which head masters are placed, by the failure of the majority of parents to recognize the value of discipline in training boys for the work of life, is one of the most serious obstacles to real progress in secondary schools.

Summary.

42. The five years under review has been a period of great activity and of development. In nearly every branch of education existing arrangements have been overhauled. Much has been done to place the staff generally on a satisfactory footing and further reforms in this respect are impending. If the actual improvement in Colleges and Schools has been small compared with what is required for real efficiency, old errors have been recognized, sounder ideals have been put forward, and the problems of the education question more distinctly delineated. Further advance is now, as the Director remarks, largely a question of funds. Expenditure from Provincial funds has increased largely in almost all branches of educational work during the period under review, and a number of valuable schemes involving further heavy expenditure are either already before Government or under preparation. It is beyond the power of Government to meet all or nearly all the demands thus made upon it; and the one hope of real progress seems to lie in the liberality of private persons. The Director in his report more than once calls attention to the large share of educational expenditure in England, which is met from endowments and private contributions. Unhappily this is far from being at present the case in India. The Lieutenant-Governor trusts that the munificent example set by the Hon'ble Maharaja Bahadur Sir Rameswar Singh, K.C.I.E., of Darbhanga, may be generally followed, and that liberal grants from members of the Indian community for the creation and endowment of educational institutions may become a marked feature of the development of education in this Province.

43. The Lieutenant-Governor desires warmly to acknowledge the whole hearted zeal with which Mr. Earle has thrown himself into the work of the Education Department, and the ability and success with which he has controlled the Department during the period of nearly two years during which he has been Director of Public Instruction. His Honour's thanks are due to Mr. Hornell for the very complete and interesting account of the work of the past five years contained in the report under review.

By order of the Lieutenant-Governor of Bengal,

H. C. STREATFEILD,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON Mr. K. G. GUPTA'S REPORTS ON THE RESULTS OF HIS ENQUIRY INTO THE FISHERIES OF BENGAL AND INTO FISHERY MATTERS IN EUROPE AND AMERICA.

BEVENUE DEPARTMENT LAND REVENUE.

Calcutta, the 3rd March 1908.

RESOLUTION—No. 1336L.R.

READ—

Letter No. 89, dated the 20th February 1907, from Mr. K. G. Gupta, Member, Board of Revenue, on special duty, submitting his report on the results of his inquiry into fisheries of Bengal.

Read also—

Mr. Gupta's letter No. 59, dated the 27th January 1908, submitting the results of his inquiry into fishery matters in Europe and America.

Read again—

This Government's letter No. 1780T.—R., dated the 26th July 1906, appointing Mr. Gupta to inquire and report on the present state of the fisheries of this Province.

The question of the possibility of improving and developing the fisheries in Bengal has, for some time, been under the consideration of Government. The fresh-water fisheries of the Province are very extensive. Not only are there numerous great rivers, lakes, *jhils*, and tanks, but, in the rains, the whole country may be regarded practically as a vast inland fishery. The estuaries of the rivers and tidal creeks in the Sundarbans are an additional source of fish supply; and there is also an extensive sea-board. In spite of these natural advantages, the supply of fish in this Province is quite unequal to the demand, and is far smaller than it is in the British Isles. On the other hand, the demand for fish is greater than elsewhere. Comparatively few people eat meat, whereas, at least four-fifths of the population are fish-eaters. Fish is specially necessary amongst a population whose principal food-grain is rice.

2. Not only is the supply of fish not equal to the demand, but there is reason to fear that it is actually diminishing. This is due partly to the reclamation of *jhils* for cultivation and to the deterioration of tanks, and partly to the wasteful destruction of breeding fish and fry, and the absence of all attempts at artificial propagation. The present supply comes almost entirely from the inland fisheries. The magnificent fishing grounds in the estuaries and the open sea remain practically untouched.

3. In order to ascertain what can be done to remedy this unsatisfactory state of affairs, Mr. K. G. Gupta, then Member, Board of Revenue, was placed on special duty in August 1906. Mr. Gupta made extensive inquiries throughout the Province; and, in February 1907, he submitted a report showing the progress made up to that date in connection with this inquiry. Mr. Gupta subsequently proceeded on six months' leave, and, during this period, he was placed on special duty to study in Europe and America various important questions connected with fishery administration, and especially, the measures which are there taken to improve, by artificial means, the natural supply of fish. The result of these inquiries is embodied in the report appended to his letter No. 59, dated the 27th January 1908. A copy of this report is now published for general information. The first report was published in the *Calcutta Gazette* of the 10th July 1907 with this Government's Notification No. 2228L.R., dated the 8th idem.

4. It is unnecessary to repeat at length the information which Mr. Gupta has collected. The former of his two reports contains a mass of useful information regarding the existing fisheries in Bengal, the castes engaged in fishing, the implements used by them, and the varieties of fish which are caught. Mr. Gupta also discusses various questions connected with the carriage of fish to market, the curing of fish, and the measures to be adopted for preventing waste and with a view to artificial propagation. In his second report,

Mr. Gupta shows how much has been done in European countries and in America to improve the fisheries. Amongst the many interesting facts mentioned by him may be instanced the introduction of the carp into the United States by the Fish Commission in 1877. The measures taken to this end have been so successful that the present annual sales of carp in the United States amount to over twenty million pounds. The shad and striped bass were formerly unknown on the Pacific coast. They were acclimatized at a comparatively small cost only a third of a century ago, but by the end of 1906 the total catches exceeded thirty million pounds. In Canada the supply of shad has been greatly increased, in recent years, by artificial means, in spite of extended fishing operations and the curtailment of spawning grounds. In Bohemia the profits from fish culture, over a given area, are from two to three times as great as those from the cultivation of foodgrains. These illustrations show clearly how much can be done if proper steps are taken.

5. In his two reports, Mr. Gupta has made numerous recommendations. In the fresh-water fisheries, no new methods of capture are needed. What is here required is artificial propagation coupled perhaps with a system of short close seasons and other protective measures. In the estuaries and open sea, on the other hand, it is necessary for Government to lead the way, and to find out where the fish are to be found and how they should be caught and brought to market. Mr. Gupta's recommendations are receiving the careful attention of the Lieutenant-Governor. Some of them are of a tentative nature, and further inquiry is necessary before definite action is taken. It is, for example, not yet known where the *hilsa*, or Indian shad, spawn; and, until this elementary fact has been ascertained, it is impossible to do anything to improve the supply beyond, it may be, enforcing the observance of a close season. Such a measure, however, will not be taken until after the public have been given an ample opportunity of expressing their opinion regarding it Arrangements have been made to obtain at once a steam trawler, with a view to carrying on the work of exploration and investigation in the Bay of Bengal. It is hoped by this means to ascertain where the more valuable bottom fish congregate, and where and at what seasons the shoals of migratory fish appear. Arrangements are also being made to commence an attempt at the artificial propagation by European methods of *rahu*, *katla*, and other members of the carp family in Bengal. In order to assist in this work and in other matters of a technicalnature, a fishery expert is being obtained from America. It is proposed to send two young men, one to Europe and the other to America, to study fishery matters under competent teachers.

6. The Lieutenant-Governor desires to place on record his high appreciation of the services rendered by Mr. Gupta in connection with this inquiry, and His Honour cannot but regret that his services are no longer available for the prosecution of the work which still remains to be done before any practical result can be expected. Sir Andrew Fraser has selected as his successor, Mr. A Ahmad, lately Collector of Khulna; and he hopes that under his energetic guidance, the inquiries so successfully inaugurated may be made to yield results of great benefit to the people of this Province.

By order of the Lieutenant-Governor of Bengal,

E. A. GAIT,

Chief Secretary to the Govt. of Bengal.

No. 59.

FROM K. G. GUPTA, ESQ., I.C.S.,
Member, Board of Revenue, On Special Duty,

TO THE CHIEF SECRETARY TO THE GOVERNMENT OF BENGAL,
REVENUE DEPARTMENT.

Dated Calcutta, the 27th January 1908.

SIR,

I HAVE the honour to submit the results of my inquiry into fishery matters in Europe and America. The report is divided into two parts. The first part is chiefly a narrative of what I saw and learnt on the spot. The second part contains my proposals and suggestions for the conservation and development of our fisheries, both marine and fresh water, and for the organisation of a Government agency for their control and supervision.

2. At the instance of the India Office, I was furnished by the Foreign Office with letters of introduction to His Majesty's representatives in the countries visited, and through their good offices I was placed in communication with the proper local authorities who, without exception, afforded me every facility for the prosecution of my inquiry. Wherever I went I met with uniform courtesy and attention, and any little success that may attend my labours will, in no small measure, be due to the ready assistance I received at the hands of every one, whether official or non-official, with whom I came in contact. To all of them my cordial acknowledgments are due, but I must express my special obligations to Sir Thomas Holderness, Revenue Secretary, India Office, Mr. W. E. Archer, Assistant Secretary, Board of Agriculture and Fisheries, England, Dr. H. Smith, Deputy Commissioner, United States Bureau of Fisheries, Professor E. E. Prince, Dominion Commissioner of Fisheries, Canada, Dr. G. Surbeck, Munich, and Herr Kottas, Wittingau in Bohemia.

3. I have made free use of the numerous official publications so generously placed at my disposal, especially by the authorities in England, United States, and Canada, but have not thought it necessary to burden my report with references.

I have the honour to be,

SIR,

Your most obedient servant,

K. G. GUPTA,
On Special Duty.

PART I.—NARRATIVE.

SECTION I.—COURSE OF TOUR.

United States.

I proceeded to England on leave in April last, and while there was placed on special duty under the orders of the Secretary of State, R. and S. No. 1131, dated the 15th May 1907, with effect from the 31st May 1907. I sailed for America on the following day and landed in New York on the 8th June. The same afternoon I paid a visit to the Aquarium at Castlegreen, which is the finest of its kind on the other side of the Atlantic. On the 9th I proceeded to Washington arriving there the same evening, and stayed there till the 12th. I was very kindly received by Dr. H. Smith, Deputy Commissioner, United States Fishery Bureau, with whom I had several long conferences, and who drew up an itinerary of the places I should visit for the purpose of my investigation. He also furnished me with introductions to his local subordinates and placed me in full possession of all the information available in his office. There is a small aquarium attached to the building which I visited, and also one of the six special railway cars maintained by the department for the transport of fry and "eyed" eggs. He took me to the carp ponds—now abandoned—where carp culture was successfully carried on since its introduction in 1878 until it was given up in 1896. The President, Mr. Roosevelt, was pleased to grant me an interview and received me very kindly.

2. From the 13th June to the 1st July, the following places in the United States were visited.

Wythville (Virginia).—The Government hatchery is close to a flag station about four miles from the small town of Wythville, and is one of the oldest and largest of its kind for trout culture in the States. There are also several ponds devoted to the natural spawning of carp, bream, bass, etc., which do not submit to artificial stripping. The various processes of culture were explained by the Superintendent, and every pond was visited and studied.

Jamestown viâ *Norfolk.*—The International Exposition was visited, the point of chief interest for me being the portable aquarium of considerable size, which is maintained by the Bureau and transported from place to place where exhibitions are held.

Roebuck beach viâ *Fortress Monroe on the Chesapeake Bay.*—We crossed over from Jamestown on board the S. S. *Fish hawk* which is manned by the United States Navy, but works under the orders of the Commissioner of Fisheries. On the way I saw the working of pound nets of which there are many in the Bay. Roebuck beach is a few miles from the Fortress and was reached by electric tramway, which, I may observe in passing, is to be seen not only in all the cities, but also in many rural areas. Mr. J. E. Foster, a master fisherman, explained the methods of fishing and mentioned the fishes caught in the Chesapeake Bay. Shad during the season and bluefish are abundant, and oyster, clam and other shell fish are plentiful.

New York.—I passed through New York again on my way to Boston and spent several hours at the aquarium.

Boston (Massachusetts).—It is the largest fishing port on the East Coast. The T wharf receives most of the ocean fish, a great deal of which comes from Newfoundland, Labrador, etc.; all the fishing is done by sailing schooners; steam trawlers are practically unknown, there being only one along the whole of the East Coast, and the principal mode of fishing is with set lines and hooks. Large quantities of fish are sent inland packed in ice, and some are frozen. Several cool stores were visited. Most of the States have their separate fish and game bureaus. The one appertaining to the State of Massachusetts has its head-quarters at Boston, and its working was carefully studied.

Woodshole, Cape Cod Bay, (Mass).—The United States Government has a large Marine Biological laboratory here, and there is also a hatchery for the propagation of sea fish, such as cod, winter flounder, lobster, etc. There was much to learn here, which will appear in the appropriate places. I went out in one of the steam launches belonging to the station and witnessed the lifting of pound nets and lobster pots.

Gloucester (Massachusetts).—This is another large fishing port, but its importance lies in the direction of drying and curing business. Gorton Pew Fisheries Company, which is a combine of several private firms, is perhaps the largest fish curing house in the world, and its operations are on a gigantic scale. Several hours were profitably spent in going over the different parts of this huge establishment where the Manager and other employés vied with one another in showing me courtesy and attention.

Detroit (Michigan).—Leaving the East Coast I proceeded to the Great Lakes, visiting Buffalo City and the Niagara Falls *en route*.

Detroit is a large city situated on the river of that name which connects lakes St. Clair and Erie. There are a large hatchery for the culture of white fish, and a good aquarium which were visited, as well as the office of the Michigan State Board of Fish Commission. Inquiries were made regarding the wholesale trade in lakefish. A day was spent in visiting the St Clair flats where great quantities of carp are caught.

Northville (Michigan).—There is a Government hatchery for trout and black bass, worked very much on the same lines as the one at Wythville.

Canada.

3. I left Detroit on the 1st July, crossed the border and reached Ottawa on the 2nd. Next morning I visited the office of the Dominion Commissioner of Fisheries where I was very kindly received by the Commissioner, Professor E. E. Prince, with whom I visited the hatchery, aquarium and museum. The following day was spent in obtaining information regarding the working of the Department, and on the 5th I proceeded to Toronto situated on Lake Ontario and the capital of the State of Ontario; there I was mainly occupied in studying the constitution of the Provincial Fishery Department and various questions connected with the lake fisheries. I also saw a fishing village I next visited Montreal where I gleaned some information regarding the trade in fish, and lastly Quebec from which latter place I sailed for Liverpool on the 12th, arriving in London on the 20th July.

Continent of Europe.

4. My Continental tour had to be curtailed owing to my having to come back to India five weeks sooner than was intended, in view of my early return to London. The proposed trip to Norway was wholly given up. I left London early in August and spent the remainder of the month in visiting South Germany, Austria and France. In Germany I stayed a few days at Munich (capital of Bavaria) where I received much assistance from Dr. Georg Surbeck, the Government expert associated with the Landes Fischerie Verein (Land Fish Association). Attached to the well equipped Veterinary College, there is a biological experimental laboratory which, among others, carries on researches in fish food and fish diseases, the expert in charge of the latter being a lady. In the connected museum specimens are preserved better than I have seen anywhere else. They are kept in neat square glass cases, not in spirit, but in a solution of formalin and glycerine. The trout hatchery at Starnberg was visited, but as my principal object was to observe carp culture I proceeded, by Dr. Surbeck's direction, to a large carp establishment at the village of Schwarzenfeld, which is owned by Count Holnstein; and his local agents took me round the ponds, explained the processes and did their best to help me in the prosecution of my inquiry.

5. From Munich I proceeded to Vienna and, after obtaining the necessary introductions, went to Wittingau in Bohemia where I had the advantage of visiting one of the largest carp establishments in the world and where through

the kindness of Herr Kottas, the local Manager of the proprietor of the estate, Prince Fürst Schwarzenberg, I saw and learnt more of carp culture than I had done anywhere else. Leaving Austria, I went to Paris and thence to Bordeaux where I was disappointed with the Maritime Exposition, but where I gathered some interesting information regarding the shad fishery of the Garrone.

Great Britain.

6. Returning to London on 3rd September I left again on the 6th on a visit to the East Coast. At Hull and Grimsby, as well as in Aberdeen, I was greatly impressed with the magnitude and importance of the trawling industry and had much to learn about deep sea fishing and salting and curing. On my way to Aberdeen I halted at Edinburgh and studied the constitution of the Scottish Fisheries Board. At Aberdeen the marine hatchery and laboratory were visited. The next place visited was Preston on the Lancshire Coast, the head-quarters of the largest fisheries district in England. The Superintendent, Dr. Traver Jenkins, furnished me with details of the working of the Committee. He also took me to Liverpool where we got on board the *John Fell*, a small steamer belonging to the Committee, and spent the day in fishing with a beam trawl. I returned to London on the 14th September, on which date my deputation terminated. But before my departure from England I paid a visit to the aquarium and marine laboratory at Plymouth, both the best of their kind in Great Britain.

7. I left Marseilles on the 4th October and arrived in Calcutta on the 21th *vid* Colombo and Tuticorin.

SECTION II.—FISHING INDUSTRY.

United States.

General. 8. The Fisheries of the United States may be broadly divided into the following classes:—

(1) Fresh water { (*a*) Great Lakes. (*b*) Non-tidal streams (*c*) Other internal waters.

(2) Brackish water, including tidal rivers and estuaries.

(3) Marine ... { (*a*) In-shore. (*b*) Deep-sea.

All the three classes of fisheries are of great extent and importance. As for the Great Lakes, which the United States shares with Canada, there is no other part of the world which can present such a wide expanse of fresh water surface. The country also abounds in hill-streams and lakelets which afford excellent field for the pursuit of fish for sport, and to this end the States concerned as well as the Federal Government maintain numerous hatcheries, from which the waters are systematically replenished with trout, bass and other game fish. Excellent food fishes are yielded by all classes of fisheries

9. In the larger rivers, that fall into the sea, are found shad, salmon, herring, white perch, yellow perch, etc., while the hill streams and other internal waters abound in trout (brook, rainbow, &c.) bass (30 or 40 species, peculiar to America), suckers, perch, sunfish, etc. The Great Lakes supply white fish, lake herring, lake trout, pike perch, sturgeon, etc., besides carps in certain localities. Among the marine fishes the principal are the following:—

Cod, haddock, hake, pollock (coal), cusk (ling), mackerel, seaherring, halibut, flounder (American substitute for sole), seamullet, bluefish, drum, rock, scup, smelt, snapper, squeteague, sword, etc. Enormous catches of manhaden (a kind of clupea) are made on the East Coast. This fish is not eaten but is used largely for bait, and is converted into fertilizer. Eels shrimps and lobsters are more or less plentiful, so are crabs. Shell fish such as, oyster and clam are extensively eaten, and at the hotels and restaurants they form an integral part of the daily fare. The oyster beds are the largest and most valuable in the world.

10. With a few exceptions such as smelt and shrimp no small fish are eaten, and when caught are usually thrown away.

11. The comparative smallness of the number of families represented in the American waters is very noticeable. The *gadidæ* (cod, &c), *salmonidæ* (salmon, trout, white fish, lake herring) *centrarchidæ* (bass), *catastomidæ* (sucker), *scombridæ* (mackerel), *pleuronectidæ* (halibut and flounder) *clupeidæ* (sea herring, manhaden, shad), *mugilidæ* (sea mullet), *pomatomidæ* (blue fish), *xiphiidæ* (sword fish), *sparidæ* (scup, snapper), *sciaenidæ* (drum, squeteague), *percidæ* (pike perch, yellow perch), and a few others such as *serranidæ* (striped bass, white perch , *cyprinidæ* (carp) *siluridæ* (cat fish) and *anguillidæ* (eels) may be said to complete the list. Sturgeon represents *ganoidæ*, but it is getting scarce owing to over fishing, since its egg is of great value as forming Russian caviare.

12. There is no legal obligation upon the fishermen to report their catches, and the facilities of the Government Fishery Bureau do not permit collection of fisheries statistics for the entire country every year, and it is therefore necessary to limit the enquiries to particular regions every year, the various groups of States being taken in turn.

Fisheries statistics for 1905.

13. The following extract from the report of the Commissioner of Fisheries for 1905 are of interest, as giving a general view of the extent and value of the fisheries in the United States:—

"The fisheries of the United States exhibit a substantial increase from year to year and as a whole are in a flourishing condition. Their growth has resulted from the invasion of new fishing grounds, the increased abundance of fishes due to protection and artificial propagation, the more active prosecution of the business in long-established lines, and the greater utilization of products which until a comparatively recent time were entirely disregarded or considered as of little economic value. These factors have more than compensated for the decline in some branches owing to indiscreet fishing or to the inevitable effect of civilization on certain kinds of animal life and on certain small waters.

"The value of the water products taken and sold by the United States fishermen in 1905 was approximately $ 56,250,000, and this sum is exclusive of the very considerable fisheries of insular possessions and the immense quantities of fish taken for home consumption and by sportsmen. In no other country are the commercial fisheries more valuable as a whole than in the United States, and in no country is the financial condition of the fishing population better. The number of persons who make a livelihood in this industry is about 232,000, and the capital invested exceeds $ 82,000,000.

"The most valuable of all the fishery products is the oyster, in the output of which the United States surpasses all other countries combined The crop of 1905 may be placed at 32,000,000 bushels, with a market value $ 15,760,000. The most significant feature of the industry is the growing appreciation of the benefits of oyster culture and of the desirability of selling or leasing barren bottoms for oyster planting. Each year a larger proportion of the oyster crop is taken from cultivated grounds and the business is thus placed on a more secure basis. It is estimated that in 1905, over 11,875,000 bushels, valued at $ 8,775,000 were marketed from private grounds. Virginia has recently assumed the first rank as an oyster-producing State, owing chiefly to the more general practice of oyster-farming, the State's yield being now upward of 8,500,000 bushels, with a value to the producers of $ 3,250,000.

"The great high-sea fisheries for cod, haddock, hake, halibut, mackerel, herring, and other well-known food fishes have been fairly successful as a whole, and have yielded about $ 7,500,000. The take of mackerel was less than in any of the four preceding years; the sudden decrease in the abundance of this fish, beginning in 1886 and continuing to the present time, is one of the most remarkable cases of this kind. Swordfish were probably never known to be so abundant as in the summer and fall of 1904, and large numbers were captured for the New England markets.

"The decrease in the abundance of the lobster, which began about 15 years ago and has been due to overfishing and violation of law, can be arrested only by extensive cultural operations and rigidly enforced restrictive measures. At present a large part of the lobsters consumed in the United States come from Nova Scotia.

"The whale fishery, which at one time was carried on by an immense fleet of fine sailing vessels and was the leading fishing industry of the country, is now conducted chiefly with steamers in the north Pacific and Arctic oceans, and is an expensive, uncertain, and often unremunerative business. The value of the baleen, blubber oil, and sperm oil taken has been less than $ 9 0,000, and there is no reason to believe that the fishery will ever show any permanent improvement

"The anadromous fishes of the Atlantic and Pacific sea boards, the salmon, the shad, the alewives, the striped bass, the perches etc., have come to the streams in abundance, and represent $ 15,000,000 of income to the fishermen The run of Atlantic salmon in the spring of 1905 was the largest in a number of years, and is generally attributed to artificial propagation, as natural reproduction is now almost suspended. The shad fishery was poor

in the rivers, but good in the bays and along the outer shores. The salmon pack on the Pacific Coast in 1904, aggregating over 2,800,000 cases, was somewhat less than in the previous year and very materially less than in 1902 and 1901. The decrease was in part due to the growing utilization of the catch in other ways than by canning, but also represented a decrease in the run of fish in two important regions—Alaska and Puget Sound. In the Sacramento River there was a noteworthy increase in the abundance of salmon, while in the Columbia River a larger catch was made at the expense of the future supply

"The fisheries of the Great Lakes have yielded over $ 2,700,000, and in general are in a satisfactory condition. The lake trout, lake herring, and pike perch have occurred in their usual abundance, but the whitefish has decreased, notwithstanding most active fish-cultural work.

"The sponge fishery, confined to the coast of Florida, has special interest at this time because of the efforts of the Bureau to perfect a method of cultivation for maintaining the supply."

Methods of capture.

14. Trawling apparently has not met with much success in America. Beam trawls are almost unknown, and there is only one steam-trawler on the whole of the East Coast. This trawler belongs to Boston. In the ocean fisheries the implements used are chiefly hand lines and set or trawl lines with which most of the cod class and flat fish are caught. Swordfish which are of great size and the flesh of which fetches a good price are harpooned, and during the season, 15th June to 15th September, a few boats are specially fitted out for the purpose The swordfish follows shoals of mackerel and its presence is known by the dorsal fin and the upper lobe of the tail which show on the surface and are seen by the look out-man from a distance. In the rivers and lakes are used gillnets, seines (some with purses) pound or trap nets and fykes. A fyke (verveux) is made up of a series of loops forming a drum with inverted cones inside. It is a fixed net and used for all kinds of common fish in creeks and small streams. Lobsters and eels are caught in basket traps (pots) containing bait. Carrier boats are seldom used, each fishing vessel returning home with its catch. Steamers are used in whale, oyster and manhaden fisheries; but as regards foodfish generally, fishing is done with sailing vessels. In recent years an increasing number of them is being provided with gasolene motors as an auxiliary to sail. Gasolene boats are of 5 to 50 horse-power, have a speed of 7 to 11 knots and are easy to work, the mechanism being simple. Each charge of gasolene will carry about 75 miles in a small boat.

Estuary fishing.

15. *Roebuck beach.*—At Roebuck beach (near Fortress Monroe) on the Chesapeake Bay, I got some interesting information regarding the local fishing from a master fisherman. He lives in a fine two storeyed house and owns a schooner-rigged gasolene vessel, 35 tons, two masted, together with two gasolene boats, one of which is a canoe and the other a fishing scow. He employs 12 to 20 men who are paid wages and get 30 to 40 dollars a month each, besides board. Fishing is done with pound nets and hand lines, chiefly with the former. Pound nets are used throughout the year excepting during winter (December, January and February) when fishing of all kinds ceases there. The Bay is then very rough, the water gets cold and the fish migrate further south. He sells fish throughout the year. In winter he gets his supplies by rail from Florida and South Carolina. He is a regular purveyor to hotels and other establishments. During the other nine months his own catches suffice for his requirements. He commenced busines on a small scale in 1883. There are many (30 or 40) master fishermen like him along the coast within a distance of 6 miles. He employs both white and coloured labour, and both are paid alike and work about equally well. This season he had 6 pound nets. Last year he had 9. He has taken as much as 2,000 bushels (bushel = 70lbs.) or, say, 1,750 maunds from a pound net at a time, but sometimes the catch does not exceed a bushel. A fair average catch is 15 to 25 bushels. Three men can work a pound. The fish is taken up only once a day. Pounds extend to 3 miles from shore and sometimes even more. The greatest depth gone to is about 24 feet for which 40 feet poles are required. In some places the depth reached is 40 feet requiring poles of 60 feet. There is no seining, but small seines are used for hauling in impounded fish.

He uses the schooner only for hand lines and the fish caught is mainly blue fish. The vessel carries 8 men and 4 lines. For attracting the fish to the surface

a compound called chum and consisting of small fish and offal ground up is thrown in fishing grounds. Once drawn to the surface the fish are quickly caught with lines and bait. When the fish are biting an expert fisherman can secure 60 to 70 fish in an hour. A piece of some bony fish is used as bait.

The middle Atlantic States to which the blue fish is practically confined, yielded in 1904 nearly fifteen million pounds, valued at over $ 700,000.

Scow is bigger, thicker and heavier than dory and is used for fixing stakes, etc., and pound fishing generally. The schooner carries 4 dories. A dory is flat bottomed, about 18 feet long and has 4 oars. Some of the new and large schooners carry 10 or 12 dories. Pine stakes (poles) barely last a season, as they are attacked by a kind of worm.

Inshore fishing.

16. *Cape Cod Bay.*—A great many pound nets are set near Martha's Vineyard Island in Cape Cod Bay. Manhaden is caught in large shoals; the Superintendent of the Woods Hole Station once saw 750 barrels (each containing about 300) secured in one haul of the purse seine. The trip lasted for less than a week and the steamer returned to the factory with 1,500 barrels. Gill nets are used for mackerel and herring which also come in shoals.

The ordinary sea-going fishing boats are schooners, many of which are now fitted with gasolene motors, in addition to sail. A big schooner may be 160 to 170 tons, but the usual size for the larger vessels is 100 to 125 tons. The crew varies from 12 to 20 according to the class of fishing. The vessels now seldom have more than two masts. The Gloucester and Boston fishermen bring their catches salted or in ice, never alive. But some fishermen from New York and Connecticut bring the fish alive in wells, especially when intended for the New York market.

Fishermen often use a pocket—a kind of twine bag—for keeping fish alive and selling when there is a good demand. The pockets are immersed and kept in position by stakes or anchors.

Deep sea-fishing.

17. *Boston.*—Boston is the largest port for sea-fish on the East Coast. To look after their common interests the wholesale dealers have a private corporation, named the Boston Fish Bureau, in which 70 firms are represented. The subscription is 50 dollars a year. The secretary also supplies statistics to the Government Bureau of Fisheries. Most of the ocean fish is brought to the T. wharf which on a busy morning presents a very lively scene.

The big fishing vessels are owned by private individuals. Sometimes a vessel is the joint property of several men, and occasionally one man has more than one vessel. The owners are generally dealers and merchants and do not fish themselves. They employ crews. Of the total catch the owner gets one-fourth, the crew dividing the rest after the ice, bait and food are paid for. The crew sell their share to whomsoever they please and are not bound to sell to the owner. The big vessels make three trips in a month, visiting the coasts of Newfoundland, etc.

The size of an ordinary fishing schooner is 75 to 125 tons, cost 5,000 to 15,000 dollars. Crew, 10 to 23 men. The vessels chiefly use line trawls with which the cod class and halibut are caught. The catch is all brought in ice in pens. The vessels always take in a quantity of ground ice when going out.

In Boston harbour a number of Italians carry on fishing in small dories. They often live in them, sometimes with their families. They seldon venture out very far. Some of the boats have gasolene motors.

In Boston there are some 40 wholesale firms of fishmongers, 30 firms for shell-fish and some 20 more for lobster.

There are several large cool stores in the city, refrigerating being done by ammonia on a large scale. Some firms supply private houses with cooling power transmitted through pipes, so that any house may have a cool room. Frozen meat, fish, poultry, butter, fruits, etc., are stored in the warehouses. The firms do not own any of the goods but simply find storage accommodation for which they charge rent.

18. *Gloucester.*—Gloucester is also a very large fishing port and is the centre of the drying and curing trade. The great curing firms own fleets of their own for catching fish, and also buy fish in the open market.

There are some 350 schooners and 50 to 100 small boats engaged in fishing. Their crews number 5,000 to 6,000 men. Some of the boats are owned by independent fishermen The schooners vary in size from 50 to 150 tons, average 110 tons; number of crew 13 to 24, average 18. Each schooner carries 8 to 10 dories. Each dory has 4 trawl lines. A trawl line has some 500 hooks hanging from it about 30 inches apart. For fishing the trawl line is spread out, its two ends being secured and kept in position by two barrels or buoys, attached to which are two perpendicular lines fixed to the bottom by anchors The buoy lines vary in length according to the depth of the water and are sometimes 400 fathoms. Fishing is carried on throughout the year.

The vessels go out to Newfoundland, George's Bank and Grand Bank and a trip may last from one day to four or five months. One hundred and eighty thousand pounds would be considered a good average catch for a trip for a large schooner.

The annual value of the fish trade of the port is estimated at $10,000,000.

Most of the in-shore fishing along the Massachusetts coast is done with pound nets, but seines are used for mackerel and manhaden, and gill nets for shad and herring. Mackerel fishing is important on the coast. It begins about 1st April and ends about 1st December. Some 100 vessels, of which about 20 are steamers, are employed in this fishing. The others are schooners, more than 25 per cent. of which are provided with motor power, size 50 to 150 tons, average 80 to 100 tons. They do not go very far out but keep close to the coast. Mackerel is caught in small boats also. The schooners and steamers carry seine boats which are larger than dories. The length of a seine net is 1,200 feet and it is 70 feet deep. Two boats are required for working a seine and the net is hauled from the big vessel.

19. *Detroit.*—Detroit is one of the large fishing towns on the Great Lakes. The famous St. Clair flats are a few miles distant. They are considered the Venice of the United States and abound in hotels and villas patronized chiefly by anglers. The scenery is very beautiful, there are numerous islands, and the water is clear and of a light blue colour.

Fishing in Great Lakes.

The instruments of fishing in the Great Lakes are—

(1) Gill nets—for white fish and lake trout, lake herring and some coarse fish. The fish are found on reefs, some of which are right in the middle of the lakes. Length 75 to 200 yards, depth 15 to 30 feet.

(2) Pound nets—chiefly for white fish, lake herring, and pike perch, set near the shore. Lake trout does not come to the bank.

(3) Seines—for white fish, carp, perch, suckers, catfish, etc.

Herrings are plentiful in Lake Erie. Sturgeon is caught by line trawls, otherwise they are seldom used in the lakes.

There are no drift nets as there is no tide.

The vessels in use are tugs (50 to 150 feet long and of 50 to 200 tons) and smaller boats most of which have gasolene motors. A few sailing boats are also in use. The tugs and boats do not take out any ice as they return the same day with their catches. In the hot weather it is usual for all boats to carry some ice. In tugs the fish are cleaned and the offal is taken out. On arrival the fish is at once taken to the packing house and packed in ice for despatch. There are several fishing hamlets on the St. Clair river. The men go out in rowing boats and fish only with hand lines. They catch pike perch and grass pike. The retail price on the spot is 12 cents a pound or 12 annas a seer. In winter when the river is frozen and lines cannot be used the fish are speared. A hole about 2 feet square is made in the ice and a little cover placed over it. The man lets down a piece of tin or aluminium by a string which he holds by one hand, and when the fish makes a grab at it he spears the fish with the other hand.

Tug boats that fish in the lakes are variously owned. As a rule the vessel and outfit belong to individual fishermen, some of whom possess more than one vessel. Some are held by companies who pay wages to the captain and crew. There is no system of payment by shares. The crew get 2 to 3 dollars per

head. Fish is sold at prices fixed for the year beforehand to wholesale houses which have arrangements for packing in ice.

Fishermen chiefly work on their own account, but a few wholesale dealers furnish the outfit under a contract to get the fish at fixed prices.

The owners of steam-tugs and gasolene boats, who are themselves fishermen, also pay their crew wages.

There is a good deal of freezing done, and most of the principal towns have cool stores. Where there are no separate warehouses nearly every large fish dealer has a cool storage plant of his own. In this way a glut in the market can be prevented and a supply maintained throughout the year. The demand for fresh fish is so great that there is no drying or salting except with herring, of which a good quantity is salted and smoked.

20. The vastness of the lake fisheries may be judged from the following figures which relate to the State waters of the Great Lakes *i.e.*, from the shore to the middle, of one State only, viz., Michigan, for 1904 :—

Fisheries statistics of Michigan Lakes.

	Quantity.	Value.
	lbs.	$
White fish	4½ millions	270,000
Lake trout	12 „	510,000
Pike perch	3 „	170,000
Herring	20 „	340,000
Perch common	2½ „	60,000
Suckers	5 „	82,000
Other kinds	2 „	40,000
Sturgeon	100,000	10,000
Bass	86,000	3,000
Cat fish	120,000	5,000
Cavier	9,000	8,000
Total ...	49 millions	1,498,000

The number of vessels employed were—

Steam-tugs	226
Sailing boats	679
Pound „	138
Row skiffs	936

Gasolene boats, which came into use six years ago, are increasing every year. The number of men engaged in fishing was 6,948.

Canada.

21. *Toronto.*—Toronto is situated on a fine bay of lake Ontario, but there is not much fishing there. There is a fisherman's hamlet consisting of three houses across the bay, which was visited. The men are not allowed to use any implements except gill nets, or any smaller mesh than 2½". They fish on their own account and sell to a wholesale dealer at a price previously agreed upon. One of the men has a gasolene boat. They catch white fish and lake salmon (fine large fish like trout). On the Canadian side of the lake there are no fishing companies.

22. *Montreal.*—One of the large firms of curers and fish mongers of Montreal and St. John employs a fleet of sailing boats for catching fish on the East Coast. A tender goes round to the fishing grounds and collects the catches. Fishing is done with line trawls (each with about 1,500 hooks . Gasolene engines, ½ to 3 horse-power, are used as an auxiliary plant in dories to enable fishermen to get to their trawls quickly. Some of the fishermen have their own boats, but most of the boats are owned by the firm. The fishermen sell all their catches to the firm at a price fixed from time to time for one month or more. The men are generally poor, and when they possess boats they want advances to fit them out. In July and August it is necessary to use ice and the boats are supplied from the firm's ice factory. Cod, haddock and halibut are the principal kinds caught. Salmon is caught at the mouths of rivers with seine and gill nets. The firm's boats do not go out very far, not more than 20 or 30 miles, but a few of the large vessels go out to the banks.

The firm does a large amount of trade in fresh fish with the principal towns of Canada. It gets salmon and halibut from the West Coast, white fish, lake trout, pike perch, sturgeon and lake herring from the great lakes and cod, haddock, flounder, shad, hake, pollock and alewives from the East Coast. The fish is sent packed in ice except in winter when the fish is frozen singly before despatch. In all the principal towns there are public cold storages where not only fish but many other articles are stored. Patent ammonia machinery is employed for freezing.

23. *Quebec.*—In the St. Lawrence fisheries are caught eel, bar (sea-bass), and dori (colour golden, peculiar to the river) within 50 miles of Quebec, also smelt at certain seasons and tommy cod in winter. These form the commonest food for ordinary people. A large quantity of trout is caught in the lakes and rivers. The number of professional fishermen is not large, but every farmer who lives near the beach has a kind of fixed net* with a leader, placed near his house. The leader is 150 to 200 yards long. The fish enter the pound during flood tide and are gathered at low water. The farmers sell the fish which supply the needs of the ordinary people. The tide rises 16 feet near Quebec.

Methods of capture.

24. As to the modes of capture generally, as regards the fresh waters, the two chief methods are the pound nets or fish traps and the gill nets. The latter (gill nets) hang like a wall in the water, with weights suspended by lines, and buoys or floats, and the fish, in their endeavour to pass through, become meshed by the head and strangled. The former (pound nets or weirs) consist of a "leader" which obstructs the fish and leads them into a staked enclosure, out of which, on account of the arrangement of partitions, they do not readily escape. Pounds of wicker work or brush are used in New Brunswick and Nova Scotia for taking sardines, herring and mackerel. Swing nets and other forms of stake nets are used for salmon, etc., and instead of impounding they gill the fish, but the hoop net (or Verveux) are perhaps the most widely used for taking the inferior kinds of fish, cat fish, suckers, perch and the like. The hoop net has the form of a funnel held open by a series of erect wooden hoops and set in creeks and in-shore waters. A special form of trap or weir is used for taking eels. The seine is a most effective net, but on account of its destructive nature, its use has been discouraged. To the extensive use of seines in former years is attributed the serious decline in some localities of once prolific fisheries. Scoop nets and bag nets are used for taking smelts, striped bass and shad. They are successfully used through the ice, in winter, taking immense quantities of fish, carried in with the tide, as the smelt, or when lying torpid like the striped bass.

As regards the sea fisheries, the chief implements used are long line and hand line and traps for lobster.

Fisheries statistics.

25. In 1905, the whole catch of fish in Canada by Canadians, including fish products, seals, etc., aggregated the sum of nearly 29½ million dollars, nearly as much as the total production of both gold and coal in the Dominion, during the same period. There was an increase of over 6 million dollars over the yield of the previous year. Salmon heads the list with nearly 9 million dollars, the catch in British Columbia alone amounting to 81 million pounds. Of the others the most important are lobsters (4 million dollars), cod (3½ million dollars), herring (over 2 million dollars), whitefish, mackerel, sardine, haddock, pike perch, trout and halibut. During the same year the fish exports from Canada to foreign countries, chiefly to the United States and Great Britain, amounted to 16 million dollars, being an increase of over 5 million dollars over the previous export.

Bavaria.

Fishermen's guilds.

26. There is a system of local guilds among fishermen. In lake Starnberg there are 30 or 35 professional fishermen who form a guild. The lake is the property of the Royal family. The fishermen pay nominal taxes to the Court. Their rights have

come down from generations and no outsider, not belonging to the guild, may fish in the lake. The fishermen use drag or seine nets and fixed gill nets. A few traps are also used Most of the fish is sold locally or sent to Munich. The most important fresh water fish is the carp, a detailed account of which is given elsewhere.

Austria.

Live boxes.

27. In Vienna a visit was paid to the wholesale fish depôt in Franz Josef's quay on a branch of the Danube having a strong current. There were salmon from the Rhine, sturgeon from the Danube, as well as sander and other fish. Twelve wholesale dealers have depôts there with pontoons and boxes for keeping the fish (carp) alive. The boxes are open at the top but the bottom and sides are perforated, and the largest are 6 meters long, 1½ meters broad and 1½ meters deep. They are swung into the river from pontoons on either side by means of rings and in them the fish keep alive for a long time, being taken out when required for the market. The pontoons are held fast and there is a constant current of water through the boxes. No artificial feeding is required as the river water contains enough plankton. Alongside the pontoons and under the road pavement the Municipality has several freezing rooms which are let out to fish dealers.

France.

Alose or shad fishing.

28. There is a considerable amount of shad fishing near Bordeaux. The alose or shad (*clupea alosa*) go up the Garrone and Gironde from March to July when they are in roe. It is not known where they spawn and no fry or young ones have ever been seen. They come up in schools; there is no law preventing their capture in other seasons, but they are not then found. There is very little salmon, but there are some lampreys, also large eels, chiefly in November. There are a good many fishermen living on the banks. The alose net has three folds, the two outer ones with large mesh of 50 centimeters and the inner one with smaller mesh of 12 centimeters. The lower end of the net is made to touch bottom and the upper end is held up by floats. A large net is 125 meters long and 7 feet deep. The fish always go against the tide; one to fifty fish are caught in one throw of the net. The net is cast when the flood-tide makes and again when it is high tide. One boat is sufficient. The lines to which the net is attached are 9 or 10 metres long and are both held by the same man from the boat. One of the master fishermen, who was questioned on the subject, declared that alose did not spawn in the river and that neither he nor any of the other fishermen had seen any alose fry.

England.

Deep sea fishing.

29. *Hull.*—Hull and the neighbouring town of Grimsby are the centres of the trawling industry in England. The principal implements of fishing are:—

(1) trawls for bottom fish, such as sole, plaice, turbot, hake, haddock, &c.,
(2) gill nets for herring and mackerel, and
(3) hooks and lines for large cod, halibut, &c.

Steam trawlers.

30. Steam trawlers go everywhere—from Iceland to the Coast of Africa. The peculiarity of trawling is that the more the bottom of the sea is scraped the more fish seem to come, for the supply seldom fails, especially in the North Sea where certain well-known banks are full of flat fish. Hundreds of steam-trawlers are at work throughout the year, they work in all weathers and are considered as lifeboats, they are so safe. Steamers are now largely employed in herring fishing also, as they are so independent of the weather; each boat carries 3 miles of herring nets. There are fast carrier steamers which go to the fishing flats and bring the catches to market, chiefly London. At Hull, St. Andrew's Dock with its long line of jetties is devoted to the fish trade. One firm, the Cargill

Steam Trawling Company, has a large fleet of steam-trawlers, one of which, *The Ottoman Empire*, carries 9 men including the engineers and captain. She is 112 feet long and 22 feet beam with a draught of 13 feet. She is 150 tons and was built in 1891; 45 horse-power; speed 9 or 10 miles. She can stop out 16 or 17 days with her bunker coal. Carries 12 to 16 tons of crushed ice. Catches all kinds of fish. The nets are of Manilla hemp; spread or breadth 132 feet, the bigger ones going up to 150 feet.

The steamers now all use the otter trawl as distinguished from the beam trawl which it has replaced. The otter trawl was first introduced 10 or 12 years ago. In an otter trawl the mouth is kept open by means of two boards attached to the two ends of the bottom lines, whereas in the case of beam trawls there are no boards but the mouth is kept open by means of a horizontal beam. The two boards of an otter trawl are 8 to 10 feet long and 4 feet 9 inches broad. In the North Sea trawl works in from 10 to 100 fathoms. It can work in 200 fathoms, and large ones even in 300 fathoms. The nets often get damaged but are repaired on board. There are 300 or 400 steam-trawlers in Hull, three of the large companies owning some 60 vessels each. A steam-trawler costs from £6,000 to £10,000 according to size. The slack months are May, June and July, of which advantage is taken to repair and overhaul the vessels. The large companies employing fleets have a system of cutters or carrier steamers which convey the catches direct to the London market. When this is the case, little ice is taken on board the trawlers, all their spare space being utilized for loading coal, so as to enable them to stay out longer. The day's catch is packed in boxes and transferred to the cutter.

Supply of ice.

31. All the fishing firms have their own ice factories; the Cargill Steam Trawling Company has five ice factories which turn out 1,400 to 1,500 tons of ice in a week. These factories are situated at the docks and crushed ice is put on board by means of shoots. The price now charged is 11*s.* 8*d.* per ton which provides for a profit of 5 per cent. The ice machines are all "Linde." The boxes used in packing fish are all made on the premises. The trawlers are well provisioned, the men getting plenty of fresh beef, mutton, vegetables, flour, tinned things, tea, coffee, sugar, butter, cheese, etc. In the store-room where meat is kept for supply to trawlers, a temperature of 47° is maintained, and this is sufficient to keep the meat fresh and good. When no cutter or carrier steamer is used, the steam-trawlers come into port with their own catches and are then refitted for the next voyage.

System of paying crews.

32. The crew are paid, some on the share system, some on wages and others on combined wages and a share of the profit. The following statement gives the details as regards the steamers belonging to one of the large fishing firms:—

Captain	...	...	...	10 per cent. on net profits.
Mate	...	...	...	7 ditto ditto.
Bo'swain	...	...	...	24 *s.* a week and 2 *d.* in the £.
3rd hand	...	...	...	20 *s.* ditto ditto.
Cook	...	...	...	15 *s.* ditto ditto.
Spare hands, each	...	...	...	18 *s.* ditto ditto.
1st Engineer	...	...	...	45 *s.* a week and food (no share).
2nd „	...	...	...	35 *s.* ditto ditto.
Trimmer	...	...	...	16 *s.* ditto ditto.

Cost of steam-trawler.

33. A North Sea steam-trawler 100 to 110 feet long, coal bunkers 60 to 100 tons, horse power 250 to 350, speed 9½ to 10½ knots per hour, costs about £5,000. Iceland steam-trawler, 120 to 150 feet long, 400 to 520 horse-power, coal bunkers 150 to 300 tons, speed 10½ to 11½ knots per hour, costs about £10,000.

A new steam-trawler, *The Indian Empire*, which was being fitted out for her maiden voyage, was visited. She represents the most up-to-date type of steam-trawler and is a large vessel, has triple engines and will carry a crew of 14 men and 2 otter trawls. She has powerful wynches to work the trawls and extensive coal bunkers and fish cellars. She can carry enough coal for over a month and can go any where including Iceland and the African coasts.

Hull fish market.

34. The fish market in Hull extends for over quarter of a mile along the discharging dock, and, though not so long as the one in Grimsby, is more commodious and better arranged. On the day of my visit, business was very brisk and the market full of fish, chiefly plaice and haddock. The principal varieties were—

(*a*) Cod, haddock, hake, coal, ling and whiting.
(*b*) Plaice, sole, turbot, halibut, witch and brill.
(*c*) Skate.
(*d*) Cat fish.

North Sea fish is considered best, as it comes fresher and the meat also is better. Sole is getting rather scarce in the North Sea and the supplies come from the coasts of Spain, &c. The trawlers bring dead fish, all in ice. On being landed at the market, the fish is sold by auction and bought by the wholesale dealers.

Grimsby.

35. At Grimsby there are three fish docks covering a large area. The number of steam trawlers is very large. There are also steam drifters, some of which are from Aberdeen, for herring.

The fish market is more than half a mile long and runs along the discharging dock. There are dry docks for repairing the vessels.

There is a difference between the English and the Scotch herring drift nets.

Scotch.—55 yards long, 54 feet deep, meshes rather fine.

English.—25 yards long, 12 feet deep, meshes large.

A steam drifter carries 60 to 70 Scotch nets or 150 to 200 English nets. No herring goes to Hull, but all is sent away from Grimsby. The number of trawlers at Grimsby is very much larger than in Hull. Grimsby is perhaps the largest fishing port in the world.

Shrimp fishing.

36. *Liverpool.*—While proceeding on board the Lancashire Fisheries Committee's Steamer *John Fell* down the Mersey, the catching of shrimp was observed. Two boats were engaged in hauling shrimp; each boat was in charge of one man who managed both the boat and the net. The net used is a small beam trawl with fine mesh. The quantity caught was fairly good; a large number of sand eels and crabs were caught, but these were thrown away. The trawl is dragged over a certain distance for about an hour and-a-half and then hauled. The boats fish day and night at all stages of the tide. The shrimps are immediately boiled and sold as quickly as possible. The sale in the market is by "Dutch" auction, the bid gradually going down until a fair offer is received. The fishermen own the boats and make their own nets with hemp. A net does not last longer than 18 months. A shrimp trawl costs about £2-10.

Beam trawling.

37. The beam trawl belonging to the steamer was shot twice and brought up a number of dabs with some sole, plaice, skate, etc., besides a very large quantity of star fish. The length of beam is 30 feet, ground or foot rope 54 feet, extreme depth of opening 27 feet. Trawl warp, which is generally made of wire for paying out the net, is 3 to 5 times the depth of water according to the kind of fish to catch. Ground or foot rope is weighted with coils of iron chain. The steamer was going dead slow. The net has a purse divided into pockets and the sides are protected by extra slips of net. Length of net from beam to codend is 54 feet. The fish is emptied simply by drawing in the cod end.

South Coast fishing.

38. *Plymouth.*—At this port there are a few steam-trawlers and a good many sailing trawlers, besides several sailing drifters for catching mackerel, herring and pilchard. There is also a considerable amount of long line fishing. The small drifters use both net and long line. As regards sailing vessels, whether trawlers or drifters, they are owned generally by fishermen, who work them on their own account. Steam trawlers are oftener the property of capitalists and let to fishermen or worked by them on the share system. Squid is largely used as bait. Cut up it is given as food to the fish in the aquarium.

System of paying crews.

39. When hired crews are employed they are paid as follows:—

(1) by share or proportion of the proceeds of the catch—

(*a*) paid for work only (Plymouth trawlers),
(*b*) paid not only for work done but also for fishing materials supplied (Cornish drifters);

(2) by wage;
(3) partly by wage and partly by share. This method is the most advantageous to fishermen, as it ensures them a certain fixed income under all circumstances and enables them to live when the trade is very unremunerative. On the other hand, it stimulates them to work hard in order to increase their income by sharing in the proceeds of the catches.

There is a mutual insurance club for the trawling vessels, composed of the owners of those vessels and managed by a president and a committee elected once a year from amongst themselves.

Fish trade.

40. As regards the method of buying and selling fish, the fishermen place their catch in the hands of fish salesmen who dispose of it by auction either to fish-hawkers, to local fishmongers or to buyers for London and other markets. Auctions are of two kinds; either the lot is handed over to the highest bidder as in ordinary auction or the lot to be sold is put up at a fancy price, the auctioneer gradually reducing it until he reaches a figure which is accepted. This latter method is called "Dutch auction" and is very general on the East Coast. The salesman charges 5 per cent. commission and guarantees the debt to the fisherman. He allows $2\frac{1}{2}$ per cent. discount to all purchasers of 20 *s.* or more, and thus makes $2\frac{1}{2}$ per cent. on the amount he sells.

Lots are made up differently according to the kind of fish sold, *e.g.*,—

(1) *Trawl fish.*—"Head" or prime fish is sold in lots except hake which is sold by the dozen. "Offal" or seconds by the "maund" (maund of flat fish 70 lbs., of round fish 6 lbs.), skate and ray by the lot which may be any number.
(2) *Drift fish.*—Pilchard per 126, herrings per 126, mackerel per 120.
(3) *Hook-fish.*—Congers per cwt., ling per dozen, skate and ray per lot of any number, whiting per dozen, pollock per dozen, turbot per head.

Methods of capture.

41. The modes of capture are:—

(1) Trawling.
(2) Drift net fishing.
(3) Moored net fishing.
(4) Seine fishing.
(5) Buttoring or long line fishing.
(6) Handline fishing.
(7) Eel spearing.
(8) Crab and lobster fishing with pots.
(9) Shrimp and prawn fishing, with small trawls.
(10) Oyster, mussel and cockle fishing.
(11) Mullet trapping. Mullets are trapped in mill ponds which communicate with the sea by means of gates and are utilized as mulletries. The mullet are allowed to enter the ponds with the tide and the gates are then closed and the fish caught with seines.

Scotland.

42. *Aberdeen.*—About 200 steam-trawlers belong to this port. They go all over Iceland, White Sea, Coast of Spain, Faroe Islands, West of Scotland, etc. Some German trawlers also land fish here. There are no sailing trawlers. There are a few small line fishing boats, about 30 in number, that go out for

dab haddock, etc. Some 30 steamers fish only with hook and line, chiefly for halibut, also for cod and skate. Skate is largely eaten. Cat fishes are also eaten. The crew have a small share in the profits. No steam-trawlers are owned by independent fishermen, who however possess a good many sailing-drifters and liners. The fish market in Aberdeen is spacious and flagged. It occupies two sides of the fishing dock where the vessels discharge, and on the third side they refit and take in stores. On the day of my visit, 35 steam-trawlers and one liner brought 340 tons of good fish, including a splendid assortment of halibut, some of which weighed more than 130 lbs.

British Isles.

General.

43. There has been a rapid growth of steam-trawling in England. Of first class fishing vessels in 1893 there were 564 steam and 3,270 sail, whereas in 1905 the number of steamers had gone up to 1,521, the sailing vessels falling to 1,760.

The following figures will give an idea of the extent and value of the sea fishing industry in the United Kingdom :—

	Quantity of fish in cwt.				Total value of fish in the United Kingdom.
	England and Wales.	Scotland.	Ireland.	United Kingdom.	
	Cwts.	Cwts.	Cwts.	Cwts.	£
1901 ...	8,647,805	6,385,170	818,019	15,850,988	9,080,006
1902	10,479,409	6,866,028	634,016	17,979,453	9,384,337
1903	11,198,240	6,518,808	838,412	18,555,670	9,707,763
1904	11,365,084	7,947,829	951,836	20,264,749	9,065,180
1905	11,309,760	7,850,310	998,206	20,164,276	10,210,369

The above figures do not include shell-fish of which more than £400,000 worth are landed every year, or salmon, trout and other fresh water fish.

Varieties of marine fish.

44. The food fishes of the United Kingdom may be said to be all marine, for salmon which is usually classed as freshwater is an anadromous fish, and trout is more or less a game fish. The principal marine varieties are—

(1) *Gadidæ.*—Cod, haddock, hake, whiting, coal, ling, etc.
(2) *Pleuronectidæ.*—Turbot, halibut, sole, brill, plaice, dab, meagrim, lemon sole, etc.
(3) *Clupeidæ.*—Herring, pilchard, sprats.
(4) *Scombridæ.*—Mackerel.
(5) Skates and rays.

Cat fish, conger eels and gurnards are also marketed to a limited extent. In England herring heads the list as regards quantity, followed by haddock, cod and plaice, the others being a long way behind. Of shell fish, oysters, mussel and periwinkle, and of crustacea, crabs, lobsters and shrimp, are largly eaten.

In the United Kingdom, the number of families represented is even smaller than in America, owing, to some extent, to the all but total absence of fresh water fish. But what is wanting in variety is made up by the quantity and quality of the comparatively few kinds found. The *gadidæ* and *clupidæ* rank foremost in point of quantity, while as regards flavour, some species of *pleuronectidæ* are the best and are classed as "prime," and another species, the plaice, is taken in large numbers. At one time carp used to be raised in England as assiduously as it is now in some parts of the Continent, but with the growth and development of the sea fisheries, its culture has been abandoned. The only fresh water fish that is now systematically grown is trout, but it is not of much economic importance, its main value lying in the direction of sport. Salmon, which belongs to the same family (*salmonidæ*), is the finest fish of all, but its supply is limited and it fetches a high price.

SECTION III.—FISH CURING.

United States.

45. At Gloucester (Mass) I visited one of the largest drying and curing establishments belonging to the Gorton Pew Fisheries Company. It is a combine of several private firms and is incorporated. There are also three large private firms and 10 or 12 small ones. The company has a large fleet of schooners of its own for bringing fish from Newfoundland and other places, and also buys fish locally from other parties. There is a considerable export of dried and salted fish, chiefly to Porto Rico and other West Indian Islands, but the bulk of the business is confined to the States. The cod class (cod, hake, pollock, haddock and cusk) is received from boats either fresh in ice, or salted. In both cases the entrails are taken out before storing on board; when salted, the backbone and head are also removed and generally thrown overboard. In the case of fresh fish, on landing the head and backbone are at once removed. The tongue, cheek and sound of the larger cod are separately preserved, and the tongue and cheek are sold fresh to a large extent. The sound is salted. The fish is washed and cleaned and put in hogsheads with layers of salt, about 3½ bushels (bushel=72 to 80 lbs.) of salt in one hogshead (about 1,200lbs.), and is allowed to lie for three weeks or more. If taken out too soon, it has a yellowish green tint, but properly soaked it is white. On being taken out of the hogshead the fish is placed in heaps (kenches) to allow of the brine being drained off for about 24 hours It is then spread in single layers on flakes or racks to dry in the sun. When the weather is all right the drying is done the same day, otherwise it may take two or three days. In warm weather there is an awning or cover, because if the temperature is above 80° the flesh becomes soft and spongy and is then regarded as burnt; the skin also comes off in bits which it should not do when the drying is properly done. The fish is then ready to be packed or manufactured in various ways. In plain packing no salt is used. In the case of fish that is received salted from the boat, it is also put in hogsheads in brine, but is kept there for a shorter period. It is then treated in the same way as fresh fish. Besides plain packing, there are various other ways of dealing with salted fish, such as—

(1) The big and heavy bones as well as the skins are removed and the fish is cut up into different shapes and sizes and then packed. (Pollock is seldom skinned.)

(2) The smaller bones are also removed with pincers and the fish made absolutely boneless and packed in 1lb. packages or 1, 2 and 3lbs. boxes.

(3) The fish is fibred. Both good fish and trimmings are used for the purpose. The flesh is ground, pressed and passed through a sieve by means of machinery. The product is made up into small packets and packed in boxes. Fish balls, fish hash and creamed cod fish, which are considered great delicacies, are made from fibred fish.

(4) Fibred fish, as well as absolutely boneless cod fish, sliced and smoked halibut and boneless herrings are also made up in glass jars, vacuum-sealed. In the hot weather preservative powder is spread over the above preparations (except 4) before packing. Herring, halibut, and a few salmon are smoked. This firm does not smoke haddock, but the industry is largely carried on by other firms in Gloucester. Very little canning is done here. Fish intended for export is dried for more than one day (generally 3 or 4 days) so as to take out all the moisture. The skins of cod and cusk are used for the manufacture of glue, while the bones and other trimmings are made into fertilizers. These waste products are sold to the two local firms that make glue and fertilizers respectively. All the salt is imported from Tripany (an island off the coast of Sicily). The salt is large-grained and is best adapted for salting. Twenty-five to thirty-five thousand tons are imported in a year. There is a duty on imported salt but rebate of the whole duty is granted when the salt is used in curing.

Parchment paper is used in packing and fancy labels are put on in many cases.

The firm also makes cod liver oil cough drops having 10 per cent. cod liver oil.

Mackerel and herring are packed in salt in barrels. There is no drying. Only herring and halibut are smoked. The fish is strung on sticks and put in chambers with a bottom of brick; sawdust is used for smoking as it does not burn unless in flames. Smoking is done in autumn and winter. It takes 24 to 36 hours.

Canada.

46. In Montreal I interviewed Mr. D. J. Byrne, junior partner of the firm of Leonard Brothers, wholesale fish dealers. Their principal fish-curing yard is situated at St. John in New Brunswick and is personally supervised by the senior partner, Mr. Leonard. There are also several out-stations down the Gulf of St. Lawrence. The firm does a large amount of drying and salting for export to the West Indies, Brazil and even to Spain, and for consumption in Canada. Before 1880 there was no curing industry in Canada, all the cured stuff being imported from the United States, but in that year a protective tariff of 1 cent. (=a half-penny) per pound was imposed on preparod, smoked, cured, salted or dried fish and ½ cent. (or ¼*d.*) on fresh fish coming from the States. The imposition of the duty has enabled local firms to build up their fish-curing industry, and they are now in a position to compete with the United States on equal terms. For salting, Cadiz, Tripany or Liverpool coarse salt is used. Two or more firms charter a vessel to take dried fish to Spain, and on the return journey it brings salt. The firm also does smoking.

England.

47. There is a considerable amount of drying, salting and smoking in Hull One of the firms I visited did business chiefly in drying cod, hake and haddock. The fish are first gutted and the heads and big bones removed; they are then cleaned in water and laid in rows with layers of salt between. There is no soaking in brine. The minimum period for salting is one week, but the actual time often extends to 4 or 5 weeks. The fish are then dried in the sun on wire trays for several days, but never less than a week. Drying is done in the open air even if there is no sun, but when the weather is wet, this is done indoors. After the drying is finished, the fish are packed in boxes for despatch. They are largely exported to Spain and Portugal. No shredded or powdered fish is made. Bones and offal are used for the manufacture of manure. Haddocks are also largely smoked. The process requires great care.

Another drying yard visited belonged to Messrs. Andrew Johnson Knudtzon & Co. Here haddock, cod and other fish are salted and dried for export to Spain and Italy. The fish are first gutted and cleaned and then put in brine or between layers of salt for about a week. They are then washed in fresh water and dried in the sun gently for about a fortnight. In winter artificial drying is resorted to. The drying must be slow and gradual, otherwise the fish gets spoiled; when finished the fish is quite hard and is then packed in boxes for export. Cod is considered best for the purpose. Cheshire salt is used; cost at the works £ 1 a ton, the used or refuse salt is sold to farmers for manure at 6 *s.* a ton.

Scotland.

48. In Aberdeen the process of salting herring and preparing it for export was observed. Immediately on the arrival of the fresh fish they are gutted by removing the gills and entrails, but the roe and milt remain when they are called full. The fish are then arranged in rows several deep with layers of salt between and kept in that way for not less than 10 days. Afterwards they are washed in brine (pickle) and packed in barrels. The packing is very close, the t ers are crossed and the fish lie stretched on back. When the barrel is quite full, brine is poured in to fill up the crevices and interstices The mouth is then closed and the barrel is ready for exportation. Salted

herring is sent chiefly to Russia and Germany, but a quantity of the very large ones are sent to America. The Scottish Fisheries Board has introduced a system of branding with the Government mark which is called the crown brand. The fee charged for branding is 4*d.* a barrel and 2*d.* for half barrel. Branding is optional and the greater part of the catches is sent away without brand, a large proportion being unfit for branding, for which certain conditions have to be satisfied. The Government brand commands a better price in the market. The herring season just closed was an exceptionally good one. Some idea of the extent of the business in salted herrings may be formed from the fact that the amount of fees realized for branding was nearly £8,000 in Aberdeen alone. One hundred and forty steam-drifters, besides 180 sailing boats, were employed in catching herrings. Each barrel holds from 600 to 1,200 herrings according to size and class of fish and 1,000 may be taken as the average. It will thus appear that about 480 millions of herrings were dealt with under the branding rules alone. Herrings are also smoked and are known then as kippered herrings. Twenty firms are engaged in this trade. Nine firms do canning in oil and they also tin haddocks. A great quantity of haddock is smoked and is known as Findon haddock, after a little village not far from Aberdeen which had once the reputation of sending out the best smoked haddock. Drying of codlings is also an extensive business. There are three fish manure factories.

The curing factory of C. F. Paton & Co. was visited. The firm also deals in fresh fish which is supplied to inland towns.

49. *Findon haddocks.*—The fresh fish is gutted and cleaned and put in a big barrel containing brine of a density sufficient to float the fish. The fish is immersed for only about a quarter of an hour; on being taken out it is put on bars to drip for a time. Next morning the prepared fish are put in the kiln strung on rods to be smoked. They are taken out after 2½ to 3 hours and allowed to cool. Next they are washed in cold water to take off the dirt, &c., and are packed in boxes wet. The brine in the immersing barrel is changed every morning.

50. *Kippered Herrings.*—The herrings are gutted and cleaned and put in brine for a quarter of an hour. They are then taken out and at once put in the large smoking chambers (without dripping), where they are smoked from 6 to 12 hours, the lower rows being taken out first. They are then packed without washing. This firm supplies locally, chiefly Glasgow, and does not export.

The factory of Mr. John Thomson, fish curer, was next visited. The actual process of kippering was observed here. The firm dries cod for export to Spain, Italy and Brazil. The initial salting is done either dry or in brine.

SECTION IV.—HATCHERIES.

United States.

51. The Wythville Fish Hatchery was established by the State of Virginia in the autumn of 1879. It was operated by that State and the United States jointly for one or two seasons. It was then leased by the United States Fish Commission for a number of years up to the year 1896, when it was purchased by the Federal Government.

Wythville.

The station was rebuilt by the United States Fish Commission in 1898, Congress having made a special appropriation of Rs. 30,000 for that purpose. A second special appropriation of Rs. 7,500 was made by Congress in the early part of 1899, and with this money the principal bass pond of the station was built during the summer and autumn of 1899. The station at present consists of 31 ponds ranging in size from 10′×50′ to 2½ acres, the total water surface of the 31 ponds being about 5 acres. Two buildings, each 25′×50′ are occupied by hatching and rearing troughs for trout. In these troughs the eggs are incubated and hatched, and a large number of the young fish reared to the "fingerlings" stage, which is from two to four inches in length. These buildings are supplied with fresh running water direct from the spring with a temperature of 54° in summer and 53° in winter. In water of this temperature rainbow trout eggs will hatch in 28 to 30 days and brook trout in 30 to 32 days. The young trout require no food until they are about

28 days old, as nature provides them with a yolksac which is filled with an oily substance upon which they subsist during the first four weeks of their life. At the expiration of the sac stage, the fish must be fed. This food consists of freshly ground liver or canned herring roe. After they reach about 2 inches in length, they are given a small portion of vegetable mush mixed with the liver, the proportion of mush being increased as the fish grow until the food consists of equal parts of liver and mush.

A breeding stock of about 5,000 trout from 1 to 15 years old, is kept at the station. These fish produce eggs at 3 years of age and each season after that and until they are from 16 to 18 years old, when they become barren. The eggs are taken from the fish by hand and the process is called "stripping."

The output of the station amounts to about 1,250,000 trout eggs and 800,000 yearlings and fingerlings of the different species, chiefly trout. Trout eggs are shipped not only to all parts of the United States, but to many of the foreign countries as well. Shipments of eggs have been frequently made to France, Germany, Belgium, England, Ireland, Mexico, &c.

Five men are employed at the station, viz., Superintendent (Mr. G. A. Seagle), Foreman (Mr. C. F. Culler), Fish Culturist and two labourers. The present Superintendent has been connected with the station since 1880, and has had charge of the station since 1882.

Annual expenditure Rs. 7,500 to Rs. 9,000 besides salaries. (Labourers get Rs. 1,620 a year, Fish Culturist Rs. 2,700, Foreman Rs. 2,700, and Superintendent Rs. 4,500.)

Food.—For fingerlings 1″ to 4″ in length and with winter temperature from 54° to 60°, a daily ration of 6 per cent. of the fish's weight in liver will keep them in fine growing condition. At this Station the food for trout consists of a mixture of liver and mush (made of wheat middlings) in the proportion of $\frac{1}{3}$ liver and $\frac{2}{3}$ mush. Of this mixture about 7 per cent. of the fish's weight is required for a daily ration for fingerling fish. For trout one to two years old about 5 per cent. of the fish's weight of the mixture is required for a daily ration or proportionately less if a pure liver diet is used. For adult trout, $2\frac{1}{2}$ per cent. of the fish's weight of the mixed diet will keep the fish in thrifty condition.

Jamestown.

52. At the aquarium on view in the Jamestown exposition, the hatching of trout with the artificially impregnated ova was being exhibited. Trout requires a very cool temperature and the water used in hatching trout eggs had to be kept cool by means of a refrigerator. The eggs came all the way from Leadville Hatchery, Colorado, 2,000 miles distant, after a railway journey of three days and three nights. Some of the eggs were just bursting and showing the heads and tails of the young fish. The system of transporting eyed eggs over long distances has been perfected by the introduction of specially fitted wagons.

Trout eggs are hatched in troughs, but large glass jars are used for hatching semi-buoyant eggs. The Macdonald automatic hatching jar is intended for semi-buoyant eggs like those of shad which do not float on the surface nor sink quite to the bottom. It has two tubes through one of which water is let in, and through the other the waste water goes out into the receiving tank along with the hatched fry by means of syphon action. The Downing jar is a slightly modified form of the previous one and is used for white fish and pike perch whose eggs are also semi-buoyant. It has not got a second tube, but the overflow with the newly hatched fry comes out by an open mouth shaped like a spout. For eggs like those of the cod fish which are buoyant or floating, a wooden box with syphon arrangement is used. This box is also used for haddock and pollock. For lobster the Macdonald jar is used. Artificial hatching by stripping is done in the case of—

(*a*) *River fishes.*—Shad, salmon, trout, white perch, yellow perch.
(*b*) *Lake fishes.*—White fish, pike perch, lake trout.
(*c*) *Marine fishes.*—Cod, haddock, pollock, flounder, lobster and tautog.

The salmon and trout fry are kept in the rearing tanks for several months if necessary. The great thing is to keep the fry clean and in motion and to feed them regularly. The fry of other fishes are not kept for more than three or four days when they are let out into the open waters.

Woodshole, Cape Cod Bay (*Mass.*).

53. The Bureau of Fisheries has two biological laboratories of which the largest is situated here. It consists of a group of buildings of which the principal are the following :—

(1) Residence, three-storied, where the permanent officials are located; and there are also several bed-rooms for the use of those who come in summer for research work. The rooms are all furnished.

(2) Office building, three-storied.—The ground-floor contains the hatchery and a small aquarium. The first floor has the office, library, one large research room and several small rooms for separate study by research students. Second floor—museum of aquatic products (specimens not properly arranged) and some small rooms.

(3) Power-house containing steam-engine, pumps and dynamos.

(4) Store-house containing nets, boats, etc.

(5) Coal-shed.

Attached to the station are two steam-launches and several small boats of different kinds. There is a pier with some dock accommodation. The buildings are all lighted by electricity. At the hatchery only marine fish are hatched. The principal varieties dealt with are—

(1) Cod from 14th November to 1st April. Eggs small and buoyant. Hatching is done in wooden boxes (Macdonald automatic).

(2) Winter flounder, 15th February to 15th April. Eggs heavy. Hatched in boxes as well as in jars (Chester).

(3) Lobster, 15th April to 15th July. Eggs large and heavy. Macdonald and Downing jars are used. Downing jar has an open spout like that of a pitcher. Macdonald jar has no such spout but two tubes are used for shad, while for lobster one of the tubes is replaced by a separate spout fixed on to the head of the jar.

Lobsters pair and the female emits eggs in July and August. There is actual copulation, but the male has no proper intromittent organ. The eggs are impregnated as they come out of the ovaries by milt left by the male at the opening. The eggs are then received and borne by the female in the upper portion of the tail, the end of which is folded up when swimming, so as to prevent the eggs from dropping out. The eggs thus remain unhatched for the best part of 12 months. The young fish is liberated and comes up to the surface as soon as it is hatched.

Tautog, sea bass, scup, mackerel, squeteague and haddock are also hatched but in small quantities. The fry are let out in open waters and planted in different parts of the coast as soon as the sac is absorbed, *i.e.*, in four to six days. Lobster has no sac. It is said that actual spawning by the same female lobster takes place every alternate year.

As many as 10 million eggs have been taken from a single cod. Cods are hatched by stripping as well as by putting the brood fish in small salt water tanks where they spawn naturally. Flounders are largely bred in that way by natural spawning in wooden boxes. Cod eggs are also received from Plymouth packed in boxes.

The cistern used for cod spawning here during this season was 25′ × 30′ × 6′, and 100 females and 100 males were put there on 3rd January 1907. A few eggs were got shortly after but they were not good. Good eggs began to come out after 48 hours with the overflow at the surface. This continued for five or six weeks after which the brood fish were taken up and restored to the sea. In this way about 27 million eggs were obtained. Two hundred millions were received from Plymouth. This was the first time that natural spawning with the cod was tried, and it was a success. In Norway this system has been in force for some years, and Dr. Smith after a visit to that country authorized the experiment. But this plan has been tried here with flounder since 10 years or more. This year flounder eggs were chiefly got in that way. The brood fish were put, 20 to 25 in each wooden box (2′ × 3′ × 4′ or 5′). There were more males than females in a box. Owing to a severe winter, the breeding season

was delayed. Spawning began in January and continued to early part of April. The brood fish are liberated as soon as they finish spawning, which is ascertained by looking at their abdomen.

Massachusetts.

54. The Massachusetts State Fishery and Game Bureau maintains four stations for hatching fresh water fish, chiefly brook trout which are put out in streams and also land-locked salmon to a small extent which are let out in lakes. The fish are put in public waters. Fry are supplied free to applicants on condition of their allowing free fishing in the waters in which they are put. Those who want fry for private waters must buy them from dealers. There are some dozen or more private hatcheries.

		Price.	
Eyed eggs	...	... 50 cents.	(Re. 1-8) per 1,000.
Small fry	...	... 2½ dollars	(Rs. 7-8) „ 1,000.
Yearlings	...	... 25 „	(Rs. 75-0) „ 1,000.

Trout sells very dear, the retail price being Rs. 3 per seer. It is claimed for artificial propagation that but for it many of the streams and Lakes would have been long denuded of fish. The hatcheries claim at least to keep up the supply.

Detroit.

55. The Federal Fishery Bureau maintains a hatchery here for the propagation of the white fish of the Lakes. The hatchery building is of good size. The hatching jars are arranged in two tiers like galleries with a wide passage between. Each tier is again divided into two sections, each having four double rows of jars, there being altogether 1,350 jars in the room. Each tier is watered from a long trough placed at the top of the inner row and all the rows receive water by gravitation. White fish are stripped chiefly in November, occasionally also for a few days towards the end of October and for some days in December. The stripping takes place at different places on the Lakes where the brood fish are caught. After the eggs have been mixed with milt they are put in troughs in water and despatched to the hatchery where they arrive in about four days and are immediately put in jars. The filling of jars is completed about the first week of December; the jars are continually fed with water and the bad eggs flow out. The hatching begins about the end of March and is finished by 15th to 20th April. The hatching time is about three weeks. The fry are immediately collected and sent out daily in transportation cars to be planted in various waters. The egg is $\frac{1}{8}$th inch in size when it is ready to go into the jar. The egg is heavy and sinks to the bottom, but is not so heavy as that of salmon or trout. It is of about the same size as a shad-egg. It is transparent. It does not begin to hatch for about four months. Clarke, Downing or Macdonald jars are used, but Clarke is the most recent and saves a certain amount of labour. Another fish hatched here is pikeperch. The eggs are collected from 10th April to 1st May in Saginew Bay and St. Clair Bay and the hatching is done from 15th May to 5th June. The eggs hatch in about 15 to 20 days at a temperature of about 50°. The fry are planted out after 2 or 3 days.

Northville.

56. This inland station also belongs to the United States Fishery Bureau and is situated a few miles from the City of Detroit. The country is wooded and undulating and the grounds are watered by natural springs.

The buildings consist of—

(1) Hatchery with the office, two storied.
(2) Residence of the Superintendent, two stories and an attic.
(3) Store, packing, refrigerator and liver-room. Tools kept on the upper-floor.
(4) Foreman's residence.
(5) Horse barn.

Bass culture.

57. There are six large and two small bass ponds and two large trout ponds besides eight small cement ponds. The large ponds have their sides paved with stone. Cement tanks are used for holding trout and occasionally bass. Pond culture is now practically confined to small-mouthed black bass. The spawning time of bass

is in spring. In April the ponds are cleaned and nests placed in position. The nest is a wooden frame, square in form with two sides closed, but with the front and bottom open, the top having a small board in one corner. On the floor is placed gravel with a sprinkling of sand. Before spawning the male fish scoops out the floor and makes a kind of nest and brings its mate. After spawning the female is driven out and the male guards the nest until the eggs are hatched. As soon as the hatching is over, the wooden frame is taken up and a cylindrical screen made of cheese cloth with iron hoops at top and bottom is placed over the fry. This makes it easy to catch them for distribution when very young.

Season 1907.—Adult fish put in ponds, first week of May. First eggs noticed, 15th May. First fry observed, 24th May. First screens used, 1st June. All the male fish up from the beds, 25th June. On the 10th June most of the transferring of fry from the breeding to the rearing ponds took place. Bass fry are distributed to small lakes having inlets and outlets.

Lake trout hatching.

58. The principal artificial hatching is confined to lake trout of which many millions of incubated or eyed eggs as well as fry are distributed from this station. No brood fish of this class are kept here but the eggs are collected at spawning time at various centres on upper Lake Michigan. The ripe fish are caught by men in the employ of the Department. Their engagement lasts from 1st November to 1st December and occasionally longer. On board each boat there is a spawntaker; he is often a regular employee, but temporary men who are experts in the work are also engaged. They do the stripping and are assisted by helpers to sort the ripe fish. The eggs are taken in pans for mixing with milt. After 3 or 4 minutes the eggs are washed and put in fish halfbarrels. The water is constantly changed until the boat comes into harbour. The eggs are then placed on trays and packed in wooden boxes and sent by rail. They arrive at the station in from 24 hours to three days according to distance. If necessary, a little sprinkling of broken ice is put on the box. On arrival at the station the case is opened, the trays are taken out and the eggs washed. They are then emptied into a tub which is taken to the hatching room (a tub holds about 30 gallons). A man puts a dipper in the tub (dipper holds 10,000 eggs) and empties it in a tray. The trays are thus filled and placed in the hatching troughs, 15 in each. From that time a continual current of water is maintained in the troughs. All this takes place in November, *i.e.*, collecting and placing the eggs on trays in the hatchery. Ten or twelve days after that the picking out of dead eggs begins (dead eggs turn white). This work is done by girls, each of whom receives a dollar (Rs. 3) a day.

The eggs taken in November are eyed and fit to be transported by the middle of December, *i.e.*, when they are about a month old. But eyed eggs are not sent to the sub-stations till about 1st March. By the 20th March the eggs that are to go to sub-stations are all sent out. Sub-stations are maintained only for hatching so as to hatch the fry near the distributing areas and to reduce the cost of transport.

Actual hatching takes place at Northville from 10th March to 1st April. Fry are distributed when they are 35 to 40 days old. A great many are kept in feeding tanks to be reared as fingerlings.

Both lake trout and white fish eggs take months to hatch out in a state of nature also, *i.e.*, until the temperature of the water rises with the advent of spring.

Usefulness of artificial culture.

59. According to Mr. E. A. Davis of the great fishing firm of Wolverine Fish Company, Detroit, the hatcheries are doing a great deal of good work in keeping up the supply of fish. About 20 years ago the white fish had become practically extinct in Lake Erie and the Detroit river. For a number of years there was no white fish to be caught. In 1884 and 1885, Government after much trouble got about 1,500 spawning fish and from that time carried on hatching operations every year with the result that in 1903 the catch was about 46,000 fish with an average weight of 3 lbs. The supply is getting more abundant every year. In his view, it would be a great improvement if the hatched fry could be kept in a large piece of confined water where they could remain for about six months

and be then let out. They would then be better able to protect themselves against their natural enemies.

General. 60. In 1906 fish cultural work was conducted in 31 States and Territories, and there were 72 stations with an output of 397½ million fertilized eggs, 1.527 million fry and 7⅛ million yearlings, fingerlings and adults or a total of 1,932 million fish and eggs.

Canada.

Ottawa. 61. The Dominion Government maintains a station at Ottawa for hatching salmon, trout, and white fish, etc. The processes are very similar to those in force in the United States, but only one kind of jar is used with a spout and tube like the Downing jar.

This is the only hatchery I visited in Canada. But the Department had 34 hatcheries in operation in 1906, chiefly for salmon, trout, white fish and lobster, with an aggregate outturn of 653 millions fry.

Bavaria.

Starnberg. 62. At Starnberg on the lake of the same name, a few miles by rail from Munich, fish culture is carried on under the superintendence of the Consulting Expert to Government. Here various kinds of trout eggs are hatched, such as —

(1) River trout.
(2) Rainbow trout.
(3) Saibling.
(4) Lake trout.
(5) Lake saibling.

The second and third varieties were imported from America by means of eyed eggs.

Renken (a kind of *corregonus*) eggs are also hatched here. The fry when one year old are taken to Barnreid. This fish is considered a great delicacy. The hatchery is situated in a beautifully wooded narrow glen fed by a hill stream, the water of which is pure and cool. The hatchery building is provided with trays, water pipes and taps and a few jars. Another building is given to storing fish-food, specimens of nets, barrels and boxes and trays, etc., for packing and sending eggs and fry. The third is the dwelling-house of the fish culturist with an office room. The ponds are shallow and of small size and arranged in terraces one above the other. There were one and two year trout in some of the ponds. Of brood fish there was only the rainbow trout. As regards the other kinds of trout and saibling, the brood fish are caught in the rivers in September and stripping begins early in October and continues till November. Hatching lasts till April. Eggs and fry are supplied to various local associations and also to private parties. The hatchery belongs to the Landes Fischerie Verein. The station is now self-supporting. The trout fry in stock are fed on the plankton gathered in the lakes and in the hatchery ponds, but more largely with a preparation of shrimps, sea fish, liver, etc., cooked and mixed in various ways. The fish do well on this food.

The hatching arrangements are simpler than in America. Trays are used for trout and saibling, in fact, for all the salmonidæ. Jars are used for renken and pike. Starnberg lake is supplied with fry from this hatchery. There is a good deal of trout culture for sport. The staff consists of a trained fish culturist and three helpers. The former gets 140 marks (£7) a month with free quarters and wood and light free. He has also a vegetable garden. The helpers get 75 to 90 marks a month (£3-15 to £4-10) with certain privileges. Two of them live on the premises. In the busy season a few extra hands are taken.

Scotland.

63. The Scottish Fishery Board has a combined hatchery and laboratory in Aberdeen. The hatchery is furnished with trays and troughs for hatching the eggs of plaice. The brood fish are caught in the open sea near Aberdeen and

kept in a tank which is fed from the sea by a sluice. The fish spawn there from January to the beginning of April and the eggs are gathered by a fine meshed net and hatched in the hatchery. The time occupied in hatching is about a fortnight, the period depending on the temperature. Many millions of fry are hatched in this way and put to the sea as soon as the yolksac disappears The fry are removed to the sea in large glass jars. A little cod hatching is also done. This is the only hatchery maintained by Government in the British Isles. The Lancashire and Western Sea Fisheries Local Committee has a hatchery at Piel.

General.

64. In most parts of the Continent there are many establishments maintained by private parties for the culture of salmon and trout. The same is the case in Great Britain. Trout is hatched chiefly for game.

In the United States and Canada many of the States take special measures and incur considerable expenditure for keeping their rivers and lakes well stocked with game fish, as this attracts a large number of rich sportsmen who in various ways drop a lot of money behind.

SECTION V.—CARP CULTURE.

United States.

65. I PAID a visit to the carp ponds in Monument Lot in Washington. The first carp were put in them in the spring of 1878, and the culture advanced rapidly and large numbers of fry were distributed for some years, but it was finally discontinued in 1897, it being found that enough fry was by that time naturally produced. There were one dozen small artificial ponds, 30 feet square and 2 to 3 feet deep and provided with sluices. Brood fish to the number of some 24 of both sexes were put in each pond and left for six weeks or two months. As soon as they lay, they were taken out as it was thought they would otherwise eat up the ova. The eggs of carp are glutinous and attach themselves to roots or leaves or even to bundles of brushes (which could be taken out). It is of importance to remove the parent fish at once after spawning, and until then they should be constantly watched. The ponds should be emptied every year so as to destroy frogs, eels, etc. This should be done when the fry have grown big enough to be removed. There were five small tanks with the sides and bottom cemented, size—25′ × 8′ × 5′. The fry were collected in them before being sent out. Small seine nets were used for removing fry from breeding to distributing tanks. The present annual sales of carp in the United States now amount to over 20 million pounds a year, besides what is consumed by the owners of private ponds. Annual value £500,000. Special carp ponds were opened in 30 States, but nearly all of them have been given up.

66. *Wythville (Virginia).*—There are several ponds attached to the hatchery, which were at one time devoted to carp culture. A few carps are still kept in one of the ponds. The ponds are all shelving, being shallow at the top and deepest at the lower end. They are all served by channels fed by a hill stream. By means of sluices the ponds can be quickly emptied and filled again. Carp eat up all weeds and vegetable matter found in ponds, which are thus kept clean. Carp cannot be stripped, but the brood carp are kept in the ponds for spawning. When carp culture was carried on, there were about 200 brood fish, half male and half female. Spawning takes place in shallow water. Brushes (cedar, excelsior or willow roots) were placed in the shallow portion of the ponds. Spawning begins early in the morning before sunrise and goes on till about 10. The fish make a good deal of show when spawning time approaches. The brushes get covered with eggs on the first day, and after 10 when the fish are quiet the brushes are turned over, and on the second morning when the other side is also covered over, they are removed to an empty pond and fresh brushes are put in. This prevents the eggs being eaten up by the brood fish. Rice straw would do for brush, but it must be changed or cleaned frequently, as otherwise it would get too slimy.

Bavaria.

67. One of the largest carp establishments in Bavaria is situated in the village of Schwarzenfeld, five miles from the garrison town of Schwandorf. There are two sets of ponds The series of ponds lying to the west of the public road is held by a wholesale fishmonger; and the other series, which is by far the larger of the two and lies on the east side of the road, belongs to Count Holnstein who owns a very large estate here. The land is gently undulating and the ponds are formed by throwing up dams at short intervals across the slopes and depressions. The weirs are provided with sluices at the higher end for letting in water and at the lower end for letting out water. The ponds are fed from streams higher up. There are patches of fir-forests here and there. I was shown round by the Count's Assistant Manager, the Manager being away at the time. The ponds appertaining to the estate are of various sizes and number 66 in all. They are of three kinds:—

Schwarzenfeld

(1) *Breeding*—Seven, size 200 to 300 square yards, and about 3 feet deep. A kind of soft grass is allowed to grow in them which is mown about a week or ten days before spawning time and the soft young shoots that grow up are sought by the brood fish to lay their eggs on.

(2) *Wintering*—Fourteen, size 200 to 600 square yards, and 3 to 6 feet deep. One or two of the larger rearing ponds are also used for wintering.

(3) *Rearing*—The others. Some of them are quite large.

The rearing ponds begin to be emptied in September, the time required for drawing out water being two to seven days according to the size and depth of the pond. It is then that the fish are caught for sale, and this continues till the middle of October. The sale of fish from the ponds belonging to the Count thus lasts for only about six weeks in the year. Those fish that are not large enough to be sold are then put in the wintering ponds. The rearing ponds are kept quite dry during winter. On the approach of spring, *i.e.*, early in March, they are cleaned and refilled, and the fish are removed to them from the wintering ponds. At the same time, the brood fish for the next season are selected and males and females are put in separate wintering ponds having a current of water. In May, about the 28th (the exact date depending on the weather), two females and four males are put in each breeding pond. The females begin to spawn generally within 24 hours and ordinarily seldom later than three days. But if the weather suddenly becomes cold, spawning is retarded, and the best thing then is to put the brood fish back again in the wintering ponds until the weather warms up. Owing to their shallowness, the water in the breeding ponds is generally warmer than that of the wintering ponds in which the brood fish are kept before they are transferred, and the change to warmer water forces spawning. The water in the breeding ponds is almost standing. The eggs sink and are deposited at the bottom or on the grass, and the water being shallow and clear the eggs are easily seen. If the water is not quite transparent, a few bunches of grass are pulled up for examination. It is also then seen whether the eggs are properly fertilized or not. The properly fertilized ones are glossy and transparent, and those that are not, are white and opaque. There is no remedy for improperly impregnated eggs. As soon as the spawning is done and the eggs are visible, the ponds are emptied before sunrise, the parent fish removed and the ponds refilled.

The breeding ponds have small channels at the bottom in which the brood fish collect when the ponds are emptied, and are then easily taken up without disturbing the eggs. The sluice or hole through which the water escapes is protected by a piece of muslin in order to prevent the fry passing out.

The eggs hatch in three to six days according to the temperature of the water. After a week or a fortnight, the fry are fished out with muslin hand nets and removed to larger ponds where they are kept separate from the bigger fish till the autumn of the same year. The produce of each year is put in separate ponds for winter quarters. Nearly a million fry are got from each breeding tank every season.

Feeding.

68. *Young fry.*—Blood from the slaughter houses boiled and mixed with flour and passed through a sausage machine to disintegrate as much as possible. The stuff is simply thrown in the ponds.

Large fish.—Maize, which is broken up for yearlings and given entire to bigger ones. Feeding commences in May in small quantities which are raised in July and August, and ends about the middle of September when the rearing ponds are emptied. In winter the surface of the wintering ponds often gets frozen and the fish lie huddled together and are dormant. They do not eat and their growth also ceases for the time.

69. Growth of fish.

		Weight in lb.	Length in centimeter.
1st year, from May to November	...	¼ ...	16 to 17
2nd „ ditto	...	1 to 2 ...	30 „ 35
3rd „ ditto	...	3 „ 5 ...	40 „ 45

Those that are three summers old are sold for the market, only such as are less than 3 lbs. in weight being kept back for another year. The fish are fit to breed after their fourth summer, *i.e.*, those hatched in May 1907 will be brood fish in May 1911. They can be used consecutively for five or six years, at the end of which they are sold. They are then 15 to 20lbs. in weight and begin to get lazy.

Sale.

70. The Count sells his carp only once in a year—from September to the middle of October, when the ponds are emptied. The entire quantity is sold to the local wholesale dealer at about 66*s.* the cwt. at the ponds, the wholesale price being thus a little over 7*d.* the pound or 14 annas a seer. The dealer does not sell the whole quantity at once, but stocks them in his own ponds and only sends to market what he thinks best. He supplies all the large towns in Bavaria throughout the year. He sells to retail vendors at about 80*s.* a cwt. In Munich the consumer pays 9*d.* a pound. The annual sale of the Count's fisheries amounts to 300 cwt. He also sells fry and yearlings. Altogether his income from the fish ponds is about £1,250. Some of the ponds have trout, pike and perch, but in small quantities. During the last ten years only one of the ponds got diseased and a great many fish died. It is supposed that some one must have thrown poison into it.

Carp is found in the rivers, and some are caught weighing 20 to 25 lbs. But private rearers sell them when they weigh 3 or 4 lbs. The pond carp is fatter than the river carp, but some people think that the former has a muddy taste. I was shown a few carps of last year, 33 centimeters long and weighing about a pound. They had one or two rows of scale and corresponded to the mirror carp of America.

71. *General*—Carp culture is also carried on at Bernried, not far from Starnberg. Some of the carp ponds at Bernried are quite large. They do not belong to the Association, but have been rented from other parties. Renken and other kinds of fish are also reared there; 32 to 35 cwt. of 2-year old fish and 15,000 to 20,000 head of yearlings are sold annually for stocking purposes. It is not the practice to sell any of the fish for consumption. Two-year old fish weighs about ¾lb. There are altogether eight ponds. There is only one kind of carp (*Cyprinus carpio*) in Bavaria, but the fish vary in shape in different localities and have different names. In Bavaria carp flourishes in ponds, but some are found in rivers, especially in backwaters. The rivers are generally mountain streams and the water is cold and unsuitable for carp. It is not known when carp was introduced in Bavaria. The Romans found them in the rivers but in small numbers; it was the monasteries, however, that took to rearing carp systematically. Carp ponds are generally emptied for catching the fish and nets are used only in rivers and lakes, and also occasionally in large ponds which it is not desired to empty completely.

A large female carp carries ¾ million eggs and the produce of one carp would, if they could all be saved, be enough for any large establishment. The

large establishments like the one at Schwarzenfeld do not care so much to sell fish for consumption as to maintain brood carps and supply the small farmers with one-year and two-year old fry for stocking their ponds. In Northern Bavaria where the climatic conditions are more favourable, being warmer, nearly every peasant who owns a pond utilizes it for carp growing, but in Southern Bavaria the climate is colder and the practice is less general. The peasants stock their tanks with two-year old fry and sell them when they are three years old. The cost of two-year old fry is 80*s*. the cwt.; the weight of each fry being about a pound. The three-year old fish weighs about 3lbs. and the price is about 70*s*. the cwt. The profit on one cwt. of two-year old fry sold when they are three years old is $3 \times 70 (=210) - 80 = 130s$, or allowing for waste, etc., £5, an ample return for taking care of the fish for one year only.

The most valuable fish is trout—retail price 2*s*. 6*d*. to 3*s*. a pound. Carp sells for 1*s*. to 1*s*. 3*d*. a pound. Pike and carp are more largely eaten. Fish does not form any considerable portion of the food of the people, as the price is dear. It is not a popular food in Bavaria. Imported North Sea fish is cheaper than local fresh water fish. Carp is not considered a delicacy but is eaten by the best classes, especially during Christmas and Easter. The value of the fresh water fish from the breeding stations and ponds is £100,000 (15 lakhs) and from lakes and rivers £175,000 (26¼ lakhs).

Bohemia.

72. *Wittingau*—From Vienna I proceeded to Wittingau in Bohemia. It is a quaint old manorial village with walls and moats within which the residents live. The estate belongs to Prince Furst Schwarzenberg. The family acquired the property in 1670 with the ponds, dams and other works, almost as they stand now. Along with fish-culture, the estate carries on agricultural operations on a large scale, including the rearing of sheep, pig, horse and cattle, and also has a brewery and a sugar refinery.

Hessel gives the following account of the carp establishment near Wittingau.

"A celebrated establishment for carp-culture, with large, extensive ponds, was located as early as the fourteenth century, near the town of Wittingau, in Bohemia, Austria. The first beginning of it may be traced back to the year 1367. At that time the lords of Rosenberg called into existence and maintained for centuries these establishments on a scale so extensive that to this day they are the admiration of the visitor, the main parts having survived, while the race of the Rosenbergs has long been extinct.

The Manor of Wittingau suffered greatly from the calamities of the thirty years' war, and with it, in consequence, its fish-culture. The latter only recovered the effects of it after passing, together with the large estates of a rich monastery of the same name, in the year 1670, into the possession of the Princes of Schwarzenberg, their present owners. The extent which carp-culture has reached on these princely domains will be seen from the circumstance that their artificial ponds comprise an area of not less than 20,000 acres. The proceeds amount to about 500,000 pounds of carp per annum. The ponds of the Princes of Schwarzenberg are probably the most extensive of the kind on the globe. They are usually situated in some undulating lowland country, where small valleys have been closed in by gigantic dams for the purpose of forming reservoirs. Similar establishments, though not equally extensive, are found in the Provinces of Silesia and Bradenburg; as, for instance near Breslau and Cottbus, in Peitz and Pleitz, which I visited last year. In Hesse-Cassel Hanover, Oldenburg, Mecklenburg and Holstein there are also many hundreds of ponds, none of them covering more than a few acres, but almost every large farm possessing at least, one of them."

The management of the entire estate is in the hands of Herr Kottas, who very kindly showed me all round and explained the various processes connected with carp culture. On arrival I was first taken to a rearing pond which was dragged with a small seine, and fry of this season were caught. They were artificially fed, and on being compared with some which had been left to nature, it was found that the weight of the former was twelve times that of the latter. The fry were of three sorts—scale, leather and mirror. The pond was shallow, small in extent and had grass and weeds. Small ponds are better suited for intense feeding. The large ponds are generally clear. A bigger pond was then dragged and young fish of two summers were caught along with one of three summers. The former weighed

2 lbs. each. I was next shown how the fish were fed with crushed maize shovelled from a punt along the bank. The warehouses were then visited. They contained food-stuffs and various utensils, and I also saw specimens of waterproof leather coats, pants and boots, specially prepared for working in water, all made locally. A complete suit costs about £2-10. There were also nets, barrels, buckets, pails, etc. Next came the reservoirs of which there were 40 for the dealers in that centre. There are several deep wooden tanks, about 6 feet square where full grown fish—carps, pikes sunder and eels are kept for use on special occasions. Several large specimens were caught with hand nets and were shown us. The reservoirs and tanks are all fed from the canal and there is a constant flow of water. It is very necessary to have a free current of water in them, as otherwise the fish would die. Then we drove to the largest pond, about four miles from Wittingau. It is named Rosenberg, is 500 hecktars in extent and is used for rearing carps of five summers for the Vienna market. It is fished every three years. At the lower end it has a dam of immense size provided with three capacious sluice gates. There is also a weir which is used for letting out water when there is a heavy flood. There are 330 ponds of various sizes covering an area of 6,368 hecktars. Besides Rosenberg, there are several of 200 to 300 hecktars, but many are quite small. For purposes of culture they are divided into the following classes:—

(1) Breeding—

(*a*) small ones—15 in number, size 600 square meters, depth $\frac{1}{2}$ meter.
(*b*) large—number 6, size 20 hecktars, depth $1\frac{1}{2}$ meters.

The breeding ponds must be kept entirely free from pirate or predacious fish.

(2) Rearing—varying in size from 2 to 50 hecktars. Depth about 1 meter. The fry are kept in them for one summer.

(3) Wintering—7 in number, size 5 to 25 hecktars, depth 2 to 3 meters.

(4) Growing or chief ponds. They are the largest in size, depth in the deepest places 2 to 3 meters where the fish congregate in winter, elsewhere one meter. These ponds are chiefly made by damming, and some of the dams are very large and substantial and have fine oak trees growing on them. In addition to sluices and escapes, they are provided with special means of letting off water in case of high flood, of which there was an exceptionally heavy one in 1890.

(5) Sets of reservoirs at convenient centres where the fish, caught in October and sold to wholesale dealers, are stocked by them for supplying the market according to requirements. The size of a reservoir is 100 to 200 square meters, and its depth is $1\frac{1}{2}$ meters. Altogether there are 120 of these reservoirs. The fish are kept in them by and for the dealers and at their risk, but are looked after by the estate agency.

Breeding season.

73. It is in May when water reaches 60° F; and when the weather is still and sunny, that the fish show indication by jumping about, and the grass on examination sometimes shows eggs. The brood fish are selected and separated in April when the water has a temperature of about 55° F. In the smaller breeding ponds are placed two females and three males or three females and 4 males, and in the larger ones about 200 of which the females and males are in the proportion of two to three. In the larger ponds all the breeding fish are not put in all at once, but $\frac{1}{3}$ in the beginning of May, $\frac{1}{3}$ in the middle of May, and the remaining $\frac{1}{3}$ in the end of May—the reason being that in case of an unfavourable change in the weather the whole of the brood fish would not be lost. From the larger ponds the parent fish are not removed but are allowed to remain with the fry throughout summer and winter and until next spring. The parent fish do not eat their fry except by accident. From the smaller ponds the parent fish are removed because they eat up all the available food, leaving nothing for the young, and because they might, through excess of hunger, attack their own progeny. It is not necessary to have running water in breeding ponds except in winter.

Spawning takes place in favourable weather almost immediately the fish are put together, but if the water becomes cold or the weather is stormy, spawning may be retarded. The eggs are hatched in four or five days under favourable conditions, otherwise there is delay.

In the case of smaller ponds if one set fail, another set is put in. After the parent fish have been removed, the fry are kept for a few weeks or till the autumn according as there is food for them. The fry are artificially fed in small quantities during the first summer with dried blood and flesh flour. These latter really help the growth of plankton upon which the fry live.

In the large ponds such as the Rosenberg, where fish of both sexes are kept together for several seasons, no fry are ever observed, probably because of the presence of predacious fish. It is not desirable to encourage spawning among marketable fish. It may be that the carp do not care to spawn in view of pirate fish or that the latter destroy the eggs when emitted, but it is a fact that no fry has ever been observed in those ponds. It is always the practice to put a few predacious fish in those ponds, as whichever theory is right the presence of fry would interfere with the proper growth of the marketable fish. The act of breeding affects growth, while the fry would encroach upon the food-supply. It is thus a necessity to have pirate fish in those ponds. Pike is a very useful fish that way. It eats up the fry, and also other small fish that would compete with the food of carp, but it cannot attack a grown up carp. Sander is also good for the purpose. A carp is capable of reproduction after completing four summers. For breeding, carps of four to six summers are preferred. When they have grown too fat and fleshy they do not do well. From the second summer the carp are fed with broken lupine (a cabbage-like plant which throws a spathe like a cauliflower and its seed is lupine; it is grown in Galicia and Russian Poland; it is bitter to the taste). Corn such as barley, maize, rice, etc., may be used, if the price is not prohibitive. Lupine, however, has more nourishing power than the others and is cheapest here. It is slightly wetted in the boat and is thrown in spadefuls along the banks, as the carps look for food not in deep water but near the shallow margin. During the third summer, only those fish are fed that are intended for the market that autumn such as those for Berlin, etc. But Vienna prefers an older fish, five summers. As a matter of economy, the fish are only fed during the second summer and the last summer before sending to market. It has been ascertained that 4 kilos (1 kilo = 1 seer) of lupine produce 1 kilo of fish flesh and the quantity of lupine is regulated by the amount of fishflesh that the pond should produce. The number of fry put in a growing pond depends on the quality of the soil. In most of the chief ponds there is running water, but in some there is nothing, but rainwater, and snow is also gathered in winter. Feeding must be graduated according to temperature. It is started in May in small quantities which are increased in June, further raised in July, but reduced again in August, further diminished in September and stopped altogether at the end of the month. In winter the fish lie dormant.

Sale of fish.

74. The ponds are fished for the market in October. Fishing goes on as they are emptied gradually; seine nets are used for the purpose. The fish are at once sold to wholesale dealers. The sale contract is made in summer at prices fixed for the year by the estate. As soon as the fish are caught, they are weighed and taken to the central reservoirs on account of the dealers who remove the fish from them as required. The price for this year (1907) is per one hundred kilos (1 kilo =2 lbs.):—

	Each fish weighing	
	Under 4lbs. Kronen = 10*d*.	Above 4lbs. Kronen.
Mirror or leather carp ...	148	158
Scale	140	152

The average price is thus about 1½ kronen or 15*d*. per kilo or 15 annas per seer. Last year the prices were slightly higher. In calculating the price, 3 per cent. is deducted from the gross weight. The cost of conveyance from the

pond to the reservoir is paid by the dealer. Thirty persons have entered into contract for this year for the purchase of from 10,000 to 50,000 kilos each, the total sales amounting to 380,000 kilos. A few thousand kilos more or less do not matter. The quantity is practically uniform from year to year.

General.

75. The fry are counted at the time of their transfer from the breeding ponds in September. All breeding ponds, whether large or small, must be emptied in that month, as they are too shallow for wintering. All breeding ponds should have fine (not rough) grass along the edges, as otherwise the fish would not spawn. The carp instinctively seeks for some living substance upon which to deposit the eggs. It would not emit eggs on slime. In spring the ponds are cleaned and the coarse grass removed. In the chief or growing ponds there is fishing only in October. The weight of a carp varies as follows :—

	Artificially fed. Kilo.	Naturally fed. Kilo.
2nd autumn	1	¼ to ½
3rd ,, ...	2	1½ ,, 1½
4th & 5th autumn ...	2 to 3	...

By intense feeding the weight of an artificially fed carp can be considerably raised. The largest carp the Manager has seen here weighed 15 kilos. It was 15 years old. The rate of growth is about one kilo a year, but it may be doubled by intense feeding. In Herr Kottas' opinion there is no difference in the taste and flavour of the three varieties of carp, and when cooked it would not be possible to say which was which, the remark applying to fish reared under the same conditions. The strong taste or muddy smell can be got rid of by keeping the fish in good and clear water for a few days. The sales during the year ending September 1906 amounted to 375,089 kilos of the value of 553,909 kronen, and during the following year they were slightly larger. It has been ascertained that the net profit from a hecktar of water stocked with fish is 2 to 3 times as high as that from a hecktar of crop land. It should also be noted that the ponds occupy land which is inferior and in some cases useless for crop-growing. The area actually covered by water is about 5,800 hecktars. The Manager makes all the general dispositions, but the head executive in the fishery branch is the fish master. His salary is 3,000 kronen annually, besides free quarters. He also gets a bonus on the sales amounting to about 2,000 kronen. Under him are pond-keepers whose salary ranges from 900 to 1,250 kronen, together with a bonus of about 300 kronen and free quarters. and two cows and sufficient pasturage. The labourers are paid 1½ to 2½ kronen a day. Two-thirds of the total quantity sold, consisting of leather and mirror carp, are sent chiefly to Saxony, the remaining third, consisting of scale carp, is consumed in Vienna and the country around. The fish are sent alive in barrels; the capacity of a barrel is 450 litres (litre = 2 pints or one seer). It is filled two-thirds water and one third fish, a little vacant space being kept near the top. In hot weather the quantity of fish put in is reduced.

In Austria, there are no special fish waggons on railways, but in Germany there are such waggons. Generally, the fish all arrive alive. Usually no one accompanies the consignment, but in warm weather it is advisable to send some one to add fresh water in the barrels, especially when the journey is long. There is no system of artificial æration.

SECTION VI.—BIOLOGICAL RESEARCH.

United States.

76. The Federal Fishery Bureau has two marine biological stations, viz., (*a*) Woods Hole near Boston and (*b*) Beaufort in North Carolina. The construction of several others is under contemplation. I visited the Woods Hole station, where I was the guest of the Director, Dr. F. B. Sumner. He is in charge of the Marine Laboratory, while there is a separate Superintendent for the hatchery and the fishery station generally. The station was opened in 1884-1885 with a separate laboratory, the work of which is carried on on the second and third

floors of the main building. The greater portion of the work is purely scientific, though a minority of the workers take up economic subjects directly. The session lasts from 15th June to 15th September, but most of the work is done in July and August. Attached to the laboratory are :—

(*a*) A museum containing specimens of local marine products.
(*b*) A library containing Government publications and books of reference.

The scientific work is carried on by two sets of men, viz.—

(*a*) Paid scientific investigators who receive a remuneration from the Bureau and are given definite subjects to study and work out.
(*b*) Unpaid students who carry on biological work on their own account. They are practically free to choose their subjects, the only condition being that the latter must relate to marine life.

Both classes of workers are provided with free quarters, and each worker generally is assigned a room to work in and is afforded every facility for research, including the supply of specimens. During the rest of the year (nine months) the laboratory remains practically closed. The Director is a professor of a College in New York and takes service under the Fishery Bureau only for the season, but he is thus temporarily appointed every year.

There is also a private association for carrying on marine biological research. It is supported by subscriptions and maintains a laboratory at Woods Hole which attracts a large number of students in summer, so that when the season is full the workers at the two laboratories exceed one hundred.

At the central office in Washington a specialist carries on pathological inquiries into fish diseases and epidemics, and his services are always in great demand.

Canada.

77. The Fishery Department maintains three research stations, one on the Atlantic, one on the Pacific and the third on the Great Lakes. They issue valuable works on fish life and fishery problems.

Bavaria.

78. The biological station in Munich is maintained by Government for the study of fish food and fish diseases. It was formerly managed by the Fishery Association but has been taken over by the Bavarian Government since 1900. The institution carries on general biological work. In connection with fish the work is of the following kinds :—

(*a*) Artificial food.
(*b*) Experiments with natural food, especially for carps.
(*c*) Diseases of fish. Fishes that are diseased are sent alive here for treatment in the aquarium.
(*d*) Giving expert opinion regarding the pollution of water from sewers and factories.
(*e*) Zoological work.

The institution is a branch of the Veterinary Department, and the Director is also Professor of Zoology in the Veterinary High School, which is likewise maintained by the State. Under the Director are five assistants carrying on research in—

(*a*) Zoology.
(*b*) Physiology.
(*c*) Food.
(*d*) Chemistry with special reference to impurities of water.
(*e*) Diseases.

Attached to the institution are an aquarium and a museum. The museum contains a good collection of specimens of Bavarian fish both sound and diseased. They are all freshwater. Each specimen is preserved in a square glass case filled with a mixture of glycerine and formalin. The fish is fixed inside by sewing or tying it to a glass plate accurately fitting into the case. The lid has a

drawing of the fish. The cases are again kept in glass almirahs. I did not see such well preserved specimens anywhere else. Formalin seems to be a better preservative than spirit. It is formaldahyd sol 35-40 per cent. solution. It is usual to dilute it about 8 times in distilled water to get a 5 per cent. solution. In this solution the fish is first placed and during the next few days glycerine is added, little by little, until there is about $\frac{1}{10}$th of glycerine in the whole mixture (nine parts formaline solution and one part glycerine). This preservative would be quite applicable in a tropical climate. Formalin is one of the best antiseptics known. No spirit is used here. The mixture is less costly than spirit which was in use before. The concentrated solution of formalin costs 1*s.* 5*d.* a quart. There is an almirah containing models of nets, etc. The laboratory for diseases has many fine drawings of diseased fishes.

Scotland.

79. There is only one marine laboratory in Scotland and it is situated in Aberdeen. The main building has three rooms assigned to the Superintendent and his two assistants. There are no living rooms either in the laboratory or in the hatchery, and there is not even a care-taker, although the station is located in a lonely spot on the coast, such is the proverbial honesty of Aberdonians. The laboratory carries on investigation in fish-food, migrations of fishes and the development of fisheries generally. Research is chiefly confined to specimens collected by the steamer *Gold Seeker* which belongs to the Fishery Board, but now works in connection with the Council of the International Fisheries Investigation. Formalin is being introduced as a preservative for specimens.

England.

80. *Plymouth.*—The Marine Biological Laboratory is in charge of Dr. Allen as Director, who is also Secretary to the Council of the International Fisheries Investigation. The laboratory originally belonged to an association which was started in 1886, as a private effort of scientific men for the study of marine life, and was mainly supported by voluntary contributions and donations, but from the beginning Government has given a grant of £1,000 annually. In 1902, Government sanctioned a grant of £6,000 per annum for three years for the international investigation. This was continued to 1907, and finally for one year, to 1908. There will be a Commission of Enquiry after this year as to what is to become of this grant. There is another laboratory at Lowestoft with a separate staff which is now taken up exclusively with the international investigation. The aquarium is on the ground floor and the office and the working rooms are on the first floor; the latter are rented to workers chiefly during the long vacation. On the second floor there is a good library, as well as a museum, containing many specimens, but not properly arranged owing to want of space. Mr. L. R. Crawshay, the assistant naturalist, informed me that formalin is good as a preservative, but it dissolves carbonate of lime (calcareus matters), specially small substances such as crustacea. Its action on the bones of the vertebrate will, however, be very slow indeed.

Two of the international staff work at this station—one is a hydrographer concerned entirely with the physical conditions of the sea, *e.g.*, analysis of sea-water, study of ocean currents, surface drifts, influence of Atlantic water on the channel, &c., and the other is an assistant naturalist making a special study of plankton. The Association owns a steam-trawler *Huxley* which at the time of my visit was stationed at Lowestoft, besides one steam-yacht *Oithona* and a sailing boat which are attached to Plymouth. The latter works in winter and the steam-yacht in summer.

SECTION VII.—AQUARIUM.

United States.

81. *Washington.*—There is a very small aquarium on the ground floor of the office building of the Bureau of Fisheries in Washington. It has only a few small glass tanks containing fish.

82. *Jamestown Exposition.*—On the exposition grounds at Jamestown I saw the portable aquarium of the department. It has several glass tanks containing

both marine and fresh water fishes. Complete arrangements exist for keeping a constant flow of both salt and fresh water and ærating it by means of an air pump, as well as for filtering and purifying the water by means of sand filters worked on the principle of gravitation. The power is electrical, there being three dynamos to work the whole set of pumps. Troughs containing eyed trout eggs were on show, exhibiting the actual process of hatching. Models of fishing boats and appliances, specimens of buttons and other articles made from aquatic products, sponges, etc., were there, as well as various kinds of glass jars used for hatching shad, cod and lobster. Specimens of fish and drawings relating to the department are also exhibited.

83 *New York.*—The largest aquarium in the United States is situated in New York and belongs to the city. The Director, Mr. W. C. Townsend, very kindly took me round and explained the details.

It is claimed for the New York Aquarium that it is the largest in the world and contains a greater number of species and of specimens than any other aquarium. It has seven large floor pools, 94 large wall tanks and 30 smaller tanks. There are also 26 reserve tanks containing specimens not on exhibition. The building is circular in form, with a diameter of 205 feet. The largest pool is 37 feet in diameter and 7 feet deep.

The exhibits include fishes, turtles, crocodilians, frogs, salamanders, marine mammals, and invertebrates and are both northern and tropical in character. There are usually about 200 species of fishes and other aquatic vertebrates on exhibition. The total number of specimens, exclusive of invertebrates and young fry in the hatchery, varies from 3,000 to 4,000. Many individuals in the collection of fishes and turtles have lived in the building from five to ten years.

The fish hatchery, maintained as a fish cultural exhibit, produces yearly about two millions of young food and game fishes, which are afterwards deposited in New York State waters. Fish eggs are supplied by the United States Bureau of fisheries from Government hatcheries.

The Aquarium is equipped for heating sea-water for tropical fishes in winter and has a refrigerating plant for cooling fresh water in summer. An air compressor furnishes extra æration to all tanks when necessary. Flowing fresh water is supplied from the City Water System, while the pumps circulate about 300,000 gallons of salt-water daily. The pumps run day and night and the engine-room men work in 8 hour watches. Brackish water for the large floor pools is pumped from the Bay through a well under the building. The salt water wall tanks, now being supplied from the Bay, will soon be supplied from a reservoir holding 100,000 gallons of pure stored sea water. This water, to be brought in by steamer, will be used as a "closed circulation," the water being pumped through the exhibition tanks and falling thence, through sand filters, back to the reservoir. The supply pipes to all tanks are of vulcanized rubber. The drainage pipes from the salt water tanks to the reservoir are iron pipes, lead lined.

There are, exclusive of the Director and clerk, 25 employees whose duty is to attend to the supply and temperature of the different water systems, feed and care for the collections, clean the building and tanks, and look after visitors. Most of the local fresh water and salt water species are collected by the employees. Tropical fishes are brought by steamer from the Bermuda Islands. One member of the Aquarium staff assists the city school teachers in maintaining small aquaria in 100 or more schools in Greater New York. Small marine forms of life are supplied free to teachers from the reserve tanks of the Aquarium.

There is a laboratory containing many kinds of small marine invertebrates, which is visited by 4,000 or 5,000 school children with their teachers during the year. The laboratory is used at times by University Professors in the city for marine biological investigations.

The Aquarium publishes annual reports and occasional bulletins which are issued as publications of the New York Zoological Society. The first volume of a proposed New York Aquarium Nature Series, has already appeared under the title of Sea Shore Life, a popular account of the invertebrates of the adjacent coast region.

The cost of maintenance is Rs. 1,35,000 annually.

84. *Detroit.*—The aquarium is situated in Belleisle, a beautiful and picturesque island at the head of the Detroit river, and is maintained by the city. It

was opened in August 1904. There are 44 side tanks and three floor pools; both fresh-water and marine fish are kept, half the tanks and the three pools containing fresh-water fish and the remaining tanks salt-water fish. There is a supply of both fresh and salt water, cold as well as warm, and pumps are used for lifting water and ærating it. There is a certain amount of natural æration as the water flows into the supply tanks, but the exhibition tanks are also artificially ærated. Salt water is brought by rail from the east coast in tank cars used by the Standard Oil Company, each of which holds from five to six thousand gallons. The first and principal supply of salt water was obtained four years ago when the aquarium was started. Every year about 1,000 gallons come with fresh specimens. The water, as it comes out of the exhibition tanks, is passed through filters (sand and gravel). Owing to evaporation there is a rise in density and fresh water has to be added to keep up the normal amount of salinity. Filtration is done through gravity filters. In the case of fresh water a pressure filter is used with ground quartz and precipitation is induced by alum coagulation. Caution has to be exercised in mixing alum, as an overdose will kill the fish. By thus filtering the water, the same quantity can be used for a long time. The fish are fed on minced beef, liver, clams and minnows and some dead fish. No vegetables are given except the algae that grow in the tanks. Fungus appears generally in spring and sometimes in autumn. In the case of fresh-water fish, an addition of a little salt to the water does good. Marine fish do not suffer so much from fungus, but when they do, there is no cure. The fish are fed daily except on Sundays. They appeared to be in fine condition, although they are more crowded here than in New York. The buildings and equipment, including machinery, cost nearly 3½ lakhs. The annual cost of maintenance of the aquarium proper is Rs. 33,000. The machinery and power-plant cost about Rs. 27,000, but they also supply heat to the adjoining horticultural buildings. In the aquarium proper, there is a staff of two aquarists, one for fresh water and the other for salt water fish, each of whom gets about Rs. 200 a month, and three labourers on Rs. 170 each; an additional hand is employed in summer. The Director exercises control over the whole establishment.

Canada.

85. In Canada I saw only one aquarium. It is situated at Ottawa. It is very much smaller than those in New York and Detroit, and does not call for any special notice.

England.

86. There is a small but excellently equipped aquarium on the ground floor of the building of the Marine Biological Laboratory at Plymouth, containing fine specimens of anemones, flat fishes (turbot, flounder, etc.), also salmon and rainbow trout kept in salt water and fresh water alternately, several grey mullet caught in the estuaries, etc.

Bavaria.

87. Attached to the Biological station at Munich there is a neat little aquarium with 9 small and 3 large cases, containing specimens of carps, small cyprinoids, pearl oysters and trout. Æration is done by suction.

SECTION VIII.—FISHERIES ADMINISTRATION.

United States.

88. The Bureau of Fisheries may be said to date from 1871, in which year Congress passed a joint resolution authorizing the President to appoint a Commissioner of Fish and Fisheries, whose duty it should be to conduct investigations relative to the diminution of the supply of food-fishes and to make recommendations to Congress regarding this subject. From this beginning the work increased yearly in extent and scope; and under the name of Commission of Fish and Fisheries the Bureau had an independent existence until 30th June, 1903, when it became a part of the Department of Commerce and Labour, under the title Bureau of Fisheries. The head executive officer of the Bureau is the Deputy Commissioner, the present incumbent of the post being a fishery expert and a man of high scientific attainments.

Bureau of Fisheries.—Constitution.

The Bureau of Fisheries is peculiarly American in its conception, and its prototype exists in few other countries. It labours directly for the preservation and increase of useful water animals, and, in conjunction with many of the States, has placed certain branches of the fisheries on a permanent basis. It has achieved a wide reputation for originality of method and magnitude of operations, and has given the United States first place in all matters relating to the enrichment of the aquatic food supply by artificial means. The Bureau has participated in all the great expositions at home and many of those abroad, and has received numerous awards for the originality and excellence of its work.

Operations.

89. The operations of the Bureau are now conducted on three general lines: (1) The propagation and distribution of food-fishes; (2) the scientific investigation of the seas, rivers, and lakes and their inhabitants; and (3) the study of the economic fisheries and the collection of statistics thereof.

Propagation and distribution of food-fishes.

90. The work of increasing the supply of food and game fishes by artificial means has become of more importance each year, and there are now maintained by the Government many specially constructed hatcheries and subhatcheries, located in the various States and territories. Of the main hatcheries, three are on the New England coast, eight are on the rivers of the Atlantic and Pacific seaboards, four are on the Great Lakes, and 18 are on the interior fresh waters.

About 50 species are regularly propagated and distributed by the Bureau, and others are from time to time taken up as circumstances require or permit. Among the most important species handled are the cod, pollock, flounder, and lobster among marine forms; the shad, salmon, striped bass, white perch, yellow perch, Atlantic salmon, chinook salmon, and blueback salmon on the coast rivers; the white fish, lake herring, lake trout, and pike perch on the Great Lakes; and the brook trout, rainbow trout, black spotted trout, landlocked salmon, grayling, black bass, rock bass, crappy, and catfish in the interior waters.

One of the most interesting and important lines of work is the introduction of foreign fishes into American waters and the transplanting of native fishes from one section of the country to another. A most noteworthy example of the successful transfer of native fishes to new waters was the acclimatization of the shad and the striped bass on the Pacific Coast between 30 and 35 years ago; the aggregate cost of this experiment was less than $ 5,000, while the catch of these two fishes on the West Coast to the end of 1906 exceeded lbs. 30,000,000, valued at more than $ 1,000.000. Experiments are now in progress having for their object the colonizing of the Atlantic lobster on the Pacific Coast and the establishment of the Pacific salmons in the waters of the Middle and New England States.

Plants of fish are made gratis in suitable public or private waters, on the receipt of applications endorsed by a United States Senator or a Representative or by a State Fish Commissioner. The Bureau also transfers to the State hatcheries large numbers of fish eggs in various stages of incubation. In the transportation of fish for long distances, six specially constructed railway cars are employed.

Inquiry respecting food-fishes and the fishing grounds.

91. To this division of the service belong the investigations and researches addressed to the physical and chemical characters of the seas and fresh waters in their relation to aquatic life; the life-histories, habits, food, abundance, distribution, enemies, and diseases of fishes and other economic animals, as well as the minor forms of life which, while not directly important, are indirectly valuable to man because they furnish food for the higher animals. This branch also makes inquiries regarding the causes of the decrease of food-fishes, points out the remedies therefor, studies particular species and regions in the interest of fish culture, conducts the necessary biological investigations antecedent to the establishment of hatching stations, explores the fishing grounds of the coasts and interior, and in numerous other ways promotes the commercial fisheries and artificial propagation.

The Bureau maintains two well-equipped sea-side laboratories—at Woods Hole, Mass., and Beaufort, N. C.—where scientific and economic questions

connected with the ocean are studied by large numbers of experienced investigators from the leading institutions of learning.

Among the biological problems having an important practical bearing which have been recently under consideration are the possibility of fattening oysters by increasing artificially the abundance of the minute plants (diatoms) on which the oysters feed; the rearing of the lobster; the natural history of the Pacific salmons; the feasibility of growing sponges from cuttings; the bacterial and other diseases of cultivated and wild fishes; the infection of oysters by contaminated water, and the possibility of raising the diamond-back terrapin and the green turtle from the egg on a commercial scale.

One of the most valuable adjuncts of the scientific work is the steamer *Albatross*, a twin-screw iron vessel of over 1,000 tons displacement, which was especially constructed and equipped for exploration of the seas, and is the best known and most efficient vessel of her class. She has conducted investigations in all parts of the world; surveyed the fishing grounds of the East and West Coasts, Alaska, Hawaii, etc., made over 10,000 deep-sea soundings, more than 4,000 dredgings, and brought up from the bottom of the sea hundreds of tons of fishes and other creatures never before seen by man. The greatest depth at which the *Albatross* found life was 4,173 fathoms; the deepest sounding made was 4,813 fathoms. The greatest ocean depth known is 5,269 fathoms (six miles), ascertained by the U. S. S. *Nero*, while using apparatus belonging to the *Albatross* in the Pacific Ocean near the Island of Guam. In October last she left for a thorough biological and economic survey of the Phillipines coast with a view to develop the marine and fresh water resources of the islands. She has been supplied with complete fishing gear, and will be out for two years. She has an expert on board well conversant with all kinds of fishing and carries a small corps of scientific men. The Deputy Commissioner, Dr. Smith, has gone in her for a time to give the work a start.

Statistics and methods of the fisheries.

92. Since the establishment of the Bureau, the collection of fishery statistics has been a part of its work, as it is only by means of specially collected data that the effects of fish culture, the necessity for restrictive measures, the influence of legislation, and the trend of different branches of the industry can be determined. In this division there is a small corps of trained agents who visit all fishing communities to obtain information regarding the number of persons engaged, the quantity and value of the property used, and the amount and value of the catch. This division also makes a study of the apparatus and methods employed in fishing, the manner of utilizing and preparing the catch, the financial relations of the fishermen, the wholesale fish trade of the larger cities, and various other matters connected with the commercial fisheries, and, by means of correspondence and printed reports, disseminates among the fishing population useful information concerning the utilization of new or waste products, the best ways of preparing the catch, the most approved methods of other countries, the opportunities for extending markets, etc.

The latest canvasses show that the high-sea, coastwise, and interior fisheries of the United States give employment to more than 219,500 persons; involve an investment of over $ 88,000,000, and yield annually a product weighing more than lbs. 2,000,000,000 valued at nearly $ 57,000,000.

Other services.

93. Among the other services rendered by the Bureau are the following:—

(1) Diffusion of knowledge on the subject of fish and fisheries by means of periodical reports and other publications, including popular bulletins on special subjects, which are generally supplied to the public free of charge.

(2) The maintenance of a well-equipped portable aquarium which is shown at the different exhibitions.

The Bureau itself has no statutory powers, but each State enacts its own protective laws and looks after their enforcement within its jurisdiction.

The expenditure of the Bureau of Fisheries for the fiscal year 1906 was over 6½ million dollars, the two main heads being salaries $ 231,920 and propagation of food fishes $ 240,000.

State Fishery Boards.

94. Most of the States composing the Union have their separate Fishery Boards, which are usually responsible for the enforcement of their own game and fishery laws. The control of all inland waters and of the coast line within the territorial limit of three miles is vested in the State concerned. These State Fishery Boards are in no way subordinate to the Federal Bureau of Fisheries, but work as co-ordinate agencies for the conservation and development of fisheries in their respective States. Several of the States have got a large staff as well as hatcheries devoted chiefly to the culture of fresh-water fish, the propagation of marine fish being left entirely to the Federal Bureau. The maritime States and those bordering on the Great Lakes keep up launches and boats. In most of the States the control of fish and game is combined in the same authority. I had an opportunity of studying the working of the fishery and game departments of two of the States, viz., Massachusetts with head-quarters at Boston, and Michigan with head-quarters at Detroit.

Massachusetts.

95. The Massachussetts Fishery and Game Bureau consists of three Commissioners and its work is divided into four groups :—

(*a*) *Fresh-water fisheries.*—Several hatcheries are maintained for the propagation and distribution of fish, chiefly trout. Elaborate measures have also been taken to protect the inland waters from wanton destruction, the aim being " to care wisely for this heritage which our fathers so ruthlessly slaughtered and wastefully dissipated."

(*b*) *Marine fisheries.*—There are no hatcheries for marine fish.

(*c*) *Game*, viz , pheasants, grouse, quail and deer.

(*d*) *Enforcement of laws.*

Since 1866 when this department had its origin in the necessity for the protection of the fisheries of the two principal rivers of the State, the scope and importance of its work has steadily increased, and the annual grant now exceeds $ 50,000.

Michigan.

96. The State Board of Fish Commissioners is composed of three non-salaried members, the object being to keep the department free from politics. They are appointed by the Governor for a term of six years, and are eligible for re-appointment. The Superintendent is the principal executive officer under the Board, who appoint him. He receives a salary. The Board also have a Secretary. The State being an inland one, the Board have no sea fisheries to look after, but their main concern is with the replenishing of the lakes and streams with fry obtained at the five hatcheries which the Board maintain.. Unlike Massachusetts, the Board in this State have nothing to do with the enforcement of fishery laws, this duty being entrusted to another agency under an officer designated "The State game, fish and fire warden." The Board also collect statistics of the trade in lake fishes; the work is done by the statistical agent who goes to the different fishing centres and obtains the figures first hand from the actual catchers.

CANADA.

Constitution and functions of the Fisheries Department.

97. The importance of fishing industries did not in the past go unrecognized. A Government department charged with the administration of fishery, as well as shipping matters, was created at Confederation (1867), prior to which the fisheries had been regulated by a branch organized in 1859, of the Crown Lands Department of Upper Canada. Since Confederation the vast fisheries of the Dominion have been under the direct supervision of a Cabinet Minister (the Minister of Marine and Fisheries) at Ottawa. " A Deputy Minister acts immediately under the Minister, and has the administration of the department in his hands, while a Commissioner of Fisheries, who is also General Inspector for the Dominion, has important advisory and executive functions. In addition to the usual inside staff of officers and clerks, there is a body of outside officers who enforce at a yearly cost of about $ 120,000, the close seasons, and the fishery license system, collect statistics, etc. The staff includes 12 inspectors

of fisheries (who receive $700 to $1,500 per annum): several hundred overseers, vested with magisterial powers for the purposes of the Fisheries Act (receiving $100 to $900): and a still larger body of temporary fishery guardians, whose pay ranges from $1·50 to $2 a day. A fleet of 15 armed cruisers with a complement of launches and boats costing about $100,000 annually, patrol the coastal and great inland waters, exercising surveillance over foreign as well as Canadian fishing operations in Dominion waters. Finally, a bounty system is carried out for encouraging the pursuit of the deep-sea fisheries in the Atlantic, the provision for which was secured by the Hallifax award (23rd November 1877), whereby a sum of $5,500,000 was paid by the United States in consideration of the fishery concessions in Canadian inshore waters along the Atlantic coast, granted to the United States fishermen. A sum of $160,000, voted annually by Parliament is by this means available, and is distributed amongst the deep-sea fishermen in the maritime provinces. The work of the Fisheries Department is thus extremely varied and important. The late Professor Brown Goode, United States Commissioner of Fisheries, at a Fisheries Conference in London, 1883, said :—

"It seemed to him that the Canadian Department of Marine and Fisheries was one of the most valuable organisations in the world, and that the system of gathering statistics was one which other countries ought to study with a great deal of care. In the United States they had nothing of the kind."

The collection and publication of statistics is indeed an invaluable branch of the department's work.

Protection and restoration.

98. The methods of protection and restoration adopted by the Department of Marine and Fisheries are—

(1) *Close seasons preventing the capture of spawning fish.*—Besides regular close seasons no fishing of any sort is allowed on Sundays.
(2) *Fishing licenses specifying the kind of net, amount, mesh, etc.*
(3) *Prohibition of obstructions, pollutions, &c.*—As regards the former the owners of milldams are required to build fish-passes, of which there are many hundreds. Pollution of streams chiefly arises from saw dust and mining and chemical works.
(4) *Protection of spawning grounds, spawn, immature fish, &c.*
(5) *Artificial fish culture*, as a means of supplementing natural reproduction and introducing fish into new waters.

A Sea-Fisheries Intelligence Bureau established in 1889, including between 70 and 80 stations under the charge of the Commander of the Protection Fleet, announces daily to the fishermen the movements of fish and the localities for bait as well as the state of the weather.

Research.

99. Canada has also made ample provision for scientific investigation of her fishery resources. There are three biological stations which issue valuable reports on fish-life and fishery problems. On the Atlantic Coast the station is located on board a ship which is floated, season by season, from point to point. There is a second station on Georgian Bay for the Great Lakes and the third one has been established on the Pacific Coast.

Other measures.

100. Along several important lines the Dominion Government has in recent years carried out new works of inestimable value to the fisheries, *e.g.*,—

(*a*) Bait freezers have been erected at about 30 points along the Atlantic Coast, enabling the fishermen to store bait (herrings, squid, etc.) during the months of plenty, and thus have it available in a frozen state during the months of scarcity. The Government contributes one half of the cost of each freezer, and for three years pays a bonus of $ 5 per ton on the amount of bait placed in cold storage.
(*b*) The erection of patent fishdrying buildings also forms part of a great scheme for aiding the fishermen and raising the standard of Canadian fishery products generally.
(*c*) The utilization of fish waste, and especially of worthless predaceous fish, such as the small sharks, is being attempted by the erection of capacious reduction works on the Atlantic Coast, which extract oil from the offal and convert the refuse into valuable fertilizer products.

(*d*) For improving the process of curing herring the department has, as an experimental measure, imported a staff of three fishermen, one cooper and six girls from Scotland and has provided a steam-drifter for catching the herring. The experiment bids fair to be a complete success.

The Dominion Government had till recently exercised the right of property and jurisdiction in regard to the fisheries of Canada, but a decision of the Judicial Committee of the Privy Council, London, passed in 1898, declared the "property" to be vested in the provinces and the "jurisdiction" in the Dominion. The effect of this decision has been a certain amount of conflict of authority which has not yet been quite adjusted. At least one provincial Government has taken the lead in creating a separate department of fisheries and enacting a law respecting the game, fur-bearing animals and fisheries of the province.

The total expenditure of the Dominion Government on fisheries in the year ending on 30th June 1906 amounted to $ 968,722 which included $158,516 distributed as fishing bounties. The total receipts from fines and license fees amounted to $98,010.

Ontario.

101. The department of game and fisheries is in charge of the Provincial Minister of Public Works, but the chief executive officer is the Superintendent who has an office staff of six assistants. For outside work there are at present one Chief Inspector on $ 1,500 per annum. There are six wardens in charge of districts on an average salary of $ 600; they are not, however, whole-time men, but are allowed to undertake other business. Under the wardens are the local overseers getting $ 25 to $ 500 per annum according to the services they render. They are not supposed to devote their whole-time to this work, but this fact does not interfere with the control exercised by the department over them. They have the powers of a constable, including those of arrest and seizure, and are authorized generally to enforce the laws and regulations. Under the old Act the overseers had the power to try fishery cases and were, to that extent, Justices of the Peace, but the new Act has taken this power away. Fishery cases are triable by the Inspector and the wardens. The overseers have no permanent subordinate staff under them, but on special occasions they are authorized to engage men paid so much a day.

The main duty of the department is to enforce the laws and regulations. It also issues licenses and levies fees at scheduled rates. Netting is allowed only to professional fishermen, the number being limited according to the nature and extent of the waters. Netting is permitted only in the big lakes; in the streams and smaller lakes only angling is allowed. No license fee is levied from residents, the non-residents alone being liable to a fee. Fishermen are legally bound to send returns of their catches. The licenses are issued in conformity with the rules and regulations laid down by the Dominion Government.

GERMANY.

102. My visit to Germany was confined to the State of Bavaria, where the culture of carp is carried on to a large extent. Bavaria has got no regular Fishery Deparment. There is a private association, called the Landes Fischerei Verein. It is some 50 years old. Originally an angling club for the promotion of sport, it has gradually developed into a purely economic association, having for its object the furtherance of the fishing interest generally. It is assisted by a consulting expert who is appointed and paid by Government. The office was created in 1898. Bavaria has consulting experts for all branches of agriculture. Under the central organization are local associations for the districts into which the State is divided. The association is doing good work in the propagation of trout and carp. Yearly educational courses of two or three days' duration are held in three or four of the larger Bavarian towns. The course in the capital city of Munich is instituted by the Central Association and in the others by the District Associations. The attendance averages 100 to 120 and is composed of peasants, farmers, fishermen, foresters, ordinary students, veterinary surgeons and managers of fishculture establishments. The lectures are given by one of the professors of the Biological Institute and by the Government consulting expert. The courses are free, in fact, railway expenses are paid, if necessary. In connection with these

lectures, practical demonstrations are given in stripping trout, pond building, carp gathering, transport of fish, &c. From time to time (perhaps ten times a year) the consulting expert undertakes journeys to country districts for the purpose of instructing the peasants in pond culture, etc. These tours of instruction are chiefly of a practical nature, demonstrations being given at the ponds. Each journey lasts 4 to 5 days, at the end of which a short lecture is held at the principal town or village of the district visited. These courses are intended primarily to give the peasants an idea how to utilize their ponds advantageously.

AUSTRIA.

103. The Fishery organization of Austria is very similar to that of Bavaria. The Central Association is called the K. K. Fischerei Gesallschaft (Royal Imperial Fishery Association). It is a private body, but is subsidized by, and is under the patronage of, Government. The members pay subscription. It is the Central Fishery Association of Austria and is in correspondence with the cognate institutions in Hungary. There are District Associations affiliated to it. The object is to further the culture of fish, preserve and guard the interest of fishery owners and consumers, and act as referees in any litigation connected with fish. The association publishes a fortnighly journal Committee meetings are held once a month and correspondence is carried on throughout the Kingdom. Members of the Committee arrange lectures at suitable centres. Originally it was a private society of sporting anglers, but since 1905 the present association has been formed under imperial auspices. It deals mainly with fresh-water fish and only to a small extent with marine fish on the Adriatic Coast. The fishery consultant to Government is a member of the association. The fisheries come under the control of the Department of Agriculture, but there is no separate fishery bureau.

FRANCE.

104. Fishery matters are controlled by the Marine Department. My information on the subject is incomplete.

SCOTLAND.

105. The Scottish Fisheries Board is constituted under the Act of Parliament, 45 and 46 Vict. (1882), Chap. 78, as amended by 58 and 59 Vict. (1895), Chap. 42. The Board consist of a paid chairman and a paid secretary and six honorary members. For the purpose of sea fisheries, Scotland is divided into 27 districts. There are 32 fishery officers under the Board, one or more of whom are assigned to each district. They are divided into two classes, those of the higher class getting £200 to £220 per annum and those of the lower class, £90 to £190. There is no difference in the duties of the two classes, but the men of the higher class are usually posted to the more important districts. The Board get a statutory grant of £3,000 per annum for subsidizing the construction of fish piers and harbours. This amount is supplemented by surplus branding fees. The Board are not allowed to grant more than three-fourths of the cost, the local authorities finding not less than one-fourth. The Board have four steam-cruisers for watching the coast and seeing the rules enforced. The vessels are looked after by a Marine Superintendent. The Board maintain a marine biological station at Aberdeen under a scientific expert. There is a general inspector of sea fisheries with an assistant. The Board have general supervision over salmon fishing.

Constitution of the Board.

Duties of fishery officers.

106. The duties of fishery officers are :—

(1) Collection of statistics largely through the medium of local correspondents, who are not Government officials but who receive a small remuneration. Fish-dealers and fish-curers are bound to supply returns.

(2) Branding of cured herrings which fulfil certain conditions. The herring barrels are marked with the Government brand under the Branding Regulations, 1905. The fee is 4*d*. for a full barrel and 2*d*. for a half barrel. Over £10,000 were realized as fees last season, of which Aberdeen alone contributed more than three-fourths.

(3) Enquiring into and reporting on damages done to fishing boats, nets, etc.

(4) Seeing to the proper numbering of fishing boats. On the west coast the boats are registered by fishery officers and on the east coast by Customs officers.

ENGLAND AND WALES.

Constitution of the department of fisheries.

107. In England, the only purely fresh-water fish, which is of any importance, is the trout, which may, however, be regarded more a game fish. The anadromous salmon occupies a high place both as a game and as a commercial fish. The control of the salmon and fresh-water fisheries is vested in Boards of Salmon Conservators, there being one Board for each of the 59 districts into which the country is divided for the purpose. From an economic point of view the sea fisheries are by far the most valuable. For the control of the sea fisheries along the coast and within territorial waters the entire coast-line has been divided into 24 sea Fisheries Districts which are administered by Local Fisheries Committees. For many years the fisheries, both marine and fresh-water, were under the administration of the Board of Trade, and the districts were created, and the Boards of Salmon Conservators and the Local Fisheries Committees were appointed, by an order of the Board of Trade, but in 1903 the powers and duties of the Board of Trade relating to the industry of fishing were transferred to the Board of Agriculture, which has since been exercising supreme control over the fisheries, through an Assistant Secretary and a Fishery Expert.

The two forms of local bodies referred to above have power to frame bye-laws with the previous sanction of the Board of Agriculture and Fisheries. They have likewise the power of appointing fishery officers for the purpose of enforcing the rules and bye-laws and for collecting statistics regarding all matters connected with the industry. These statistics are regularly submitted to the Board of Agriculture and Fisheries and form in the main the materials for the preparation of the Board's Annual Reports on Fisheries. The two chief functions of the Board appear to be (1) to create fisheries districts and appoint Conservators and local Committees and through them to secure the enforcement of fishery laws and regulations, and (2) to collect, compile and publish full and detailed statistics regarding all branches of the fishing industry.

The Government, as represented by the Board of Agriculture and Fisheries, takes no direct part in the establishment and maintenance of hatcheries, in the institution of biological stations or in the adoption of any other measures for the development of the fisheries. Subsidies are often given to local or scientific bodies for research work, but such action is limited in extent. Private enterprise, however, has done so much to develop and work the sea fisheries not only within territorial waters, but also in the open sea over long distances, that there is not the same scope or necessity for State help and initiative as exists in other countries. Similarly with salmon and trout, for the propagation of which there are several large private establishments. On the other hand, the District Committees, which have large powers in regard to the supervision, regulation and promotion of fishing industries, have, most of them, undertaken some investigations, and a few of them have done much. They have secured the advice and assistance of scientific men, have helped in the establishment of marine laboratories, and have expended considerable sums upon investigations both by special steamers and otherwise.

Lancashire Fisheries District.

108. I visited Preston, the head-quarters of the Lancashire and Western Sea fisheries district. The Local Committee consists of 80 members, but I was told that some of them never attend. As a rule half the members represent a committee of the County Councils concerned and the other half, which are nominated by the Board of Agriculture and Fisheries, represent the fishing interests of the district. The executive work of the Committee is done by the Superintendent, and under him are 30 fishery officers with powers analogous to those of constables, so far as the fisheries are concerned. One steamer of 44 tons and five sailing boats, each boat having a crew of two or three men, are employed in policing the inshore fishing and enforcing the regulations. The fishery officers also collect statistics for the Board of Fisheries. The registering and numbering of the fishing boats is done by the Customs Department. The steamer is provided with a small beam trawl with which a certain amount of fishing is done for collecting specimens. This Committee has fish hatcheries and a marine station at Piel near Barrow.

PART II.—SUGGESTIONS.

SECTION IX.—DEEP SEA AND ESTUARINE FISHING.

Importance of sea-fisheries.

109. The growing demand for fish, owing to the increase of population, improved transport facilities and the opening up of new markets, cannot be met by the old primitive methods of fishing. As most of the fish supply of Bengal now comes from the fresh waters, the effect of this increased demand has been more incessant fishing and more destruction of fry and spawning fish, which, in the total absence of protective regulations and of the means of artificial replenishment, have led to the rapid depletion of the waters and further curtailment of the sources of supply. In other parts of the report proposals are made for the conservation and recuperation of the fresh waters, but it is obvious that in order to secure an adequate and plentiful supply of fish, especially to large cities like Calcutta, it would not do to rely merely on our tanks and rivers or even estuaries, but we must go further out—into the deep sea—which, after all, is the largest repository of piscine wealth. In the section of Fishing Industry, will be found facts and figures relating to the sea-fisheries of Great Britain, United States and Canada, which ought to open our eyes to the great possibilities that lie before us.

Fishing survey of the Bay.

110. As will appear from paragraph 36 of my preliminary report of February last, there is no open sea-fishing to speak of along the Bengal and Orissa littoral, though from the catches made on the foreshore of Balasore and elsewhere, from the swarms that come up the estuaries and from the voyages of the R. I. M. S. *Investigator*, there is every reason to think that the Bay is full of valuable food-fish. The intermittent attempts made in previous years to fish in the Bay failed mainly because they were made without a knowledge of the habits and life history of the fish inhabiting the Bay, and above all, in complete ignorance of the banks and grounds where alone the fish are to be found in any number. In Europe and America where the seas are regularly fished, the great fishing banks are well known, as a result of the experience of many years, and fresh grounds are broken from time to time. As a first step towards the opening up of sea fisheries, it is essential that Government should undertake a systematic survey of the Bay from the fishing point of view, so that the favourite haunts and the periodical migrations of the fishes may be ascertained and recorded and practical demonstration given as to what the sea is capable of yielding; and when the results are satisfactory, private enterprise is sure to come forward and take up the business on commercial lines. It is of importance to find out where the more valuable bottom fish congregate, and where and when great shoals of migratory fish appear, for without a previous knowledge of these facts no attempt to catch them can succeed. Most of the food fishes are gregarious, and whether preferring to crawl below, as the flat fish, or swimming near the surface, as the herring or mackerel, they are usually found in shoals, which makes their capture easy of accomplishment. It is necessary for Government to make the proposed survey, since the initial outlay will be considerable, and there will be no immediate return and the results will be available to the public at large.

For this work a vessel of the type of the latest steam trawlers used on the East Coast of England and Scotland would be suitable; and it will be necessary to bring out a staff of expert fishermen from England with the necessary appliances, such as otter trawl, seines, drift or gill-nets and long lines and hooks, which constitute the chief implements of fishing there.

Precedent furnished by Cape Colony.

111. For the proposal I make Cape Colony furnishes a successful and appropriate precedent. Until recently it had no deep-sea-fishing to speak of. The Government bought a steam trawler, obtained the services of a suitable staff and commenced a systematic investigation of the coast, with the result

that several valuable banks have been discovered where steam trawlers owned by private parties are now engaged in fishing.

The name of the pioneer exploring vessel of the Cape Government is *Picter Faure*. She was the first to introduce the otter trawl in those seas and has also discovered some important fishing grounds.. She has been the means of exposing the inadequacy of the old methods and securing the adoption of the latest methods. The finding by her of inshore fishing areas is satisfactory enough, but the fact that great banks have been found suitable for deep sea fishing is of far greater importance. She has also made experiments on transport by means of ice, and with a fair measure of success.

112. In working a vessel by Government Agency, the chief object to be kept in view is not the amelioration of the condition of the fishermen or the enriching of fishing syndicates, *but the opening up of a great supply of food material, which has been hitherto overlooked or neglected, for the people of the country.*

Object in view.

113. The department should have a vessel, specially built to order for carrying on the work of exploration and investigation, like the *Albatross*, belonging to the Fishery Bureau of the United States. It is possible that no success may be immediately attained, but the attempt should be persisted in for a long time and given up only in the event of all hope of a favourable issue disappearing.

Exploring vessel.

114. In paragraphs 13, 14 and 109 of the preliminary report reference was made to the climatic difficulties that seemed to beset any attempt to work the sea fisheries of Bengal and a doubt was expressed as to the possibility of developing them to any great extent in the near future, especially as the coast was so difficult of approach and so signally devoid of suitable harbours. The observations then made still hold true so far as fishing with sailing craft is concerned. In America steam is seldom employed in deepsea fishing and sailing schooners of 75 to 125 tons go out many miles, as far as Labrador and Newfoundland; the coast, however, is abundantly supplied with excellent harbours at short distances. In Great Britain sail is being largely replaced by steam; nevertheless the number of fishing sailers is still very considerable. But in the Bay of Bengal it is out of the question to attempt fishing with sailing vessels except during the four or five months of the cold weather.

Steamers for sea-fishing.

After studying the work of steam trawlers in Hull and Aberdeen, it seems to me that there is a great opening for them in the Bay of Bengal. They are remarkably safe and seaworthy, so much so, that they are compared with life boats; and although they visit such inhospitable shores as those of Iceland and are out throughout the year, often in most inclement weather, casualties among them are seldom heard of. They are not of any large size, 120 to 300 tons, with a draught of less than 10 feet and a speed of 9 to 12 knots an hour. They ought to stand the worst south-west monsoon of the Bay with ease, and as the bad cyclones are confined to two months, *viz.* May and October, and seldom approach without warning, a sound steam trawler should, with ordinary precautions, be able to fish in the Bay and the adjacent seas throughout the year. There would also be occupation for steam trawlers in some of the larger estuaries.

If the proposed survey of the Bay should, as it is hoped, result in the discovery of the presence of good fish in paying quantities, it is reasonable to expect that private enterprise will step in, and the great question of a plentiful supply of wholesome fish will be solved.

115. The implements of capture used in deep sea fishing in Europe and America fall under three classes, viz.—

Implements of capture.

(1) Otter or beam trawl.

(2) Drift or gill nets.

(3) Lines and hooks, comprising (*a*) long trawl or set lines, and (*b*) hand lines to which harpoon for sword fish may be added in America.

All the above, with the exception of trawls, are not unknown in this country, but those in use here are small and of faulty construction, and must be

greatly improved before they can be used in the sea. It will be for the Government exploring vessel to ascertain by experiment which of the above appliances would be most suitable for particular kinds of fish and for particular localities in the Bay and the estuaries. One of the most effective appliances in use in the estuaries and lakes of America is the pound-net to which reference has already been made. It is far better than the *mál* used on the Balasore coast or the *jún* found on the Chilka, for it goes into deep water, and its introduction in our estuaries would be a great advantage. It could also be used in the inshore of various parts of the coast such as Midnapur and Balasore. I do not advocate its employment in the confined waters of the Chilka, as being too destructive and exhausting.

Transport of fish.

116. Assuming that the fish has been found and caught, there will arise the question of transport. The practice of steam-trawlers and all fishing schooners is to return to port with their catches, discharge their cargo, refit and go out again. When there is a large fleet of steam-trawlers belonging to the same firm, a tug, cutter or carrier steamer, is sometimes employed to visit the fishing grounds, collect the catches, and bring them to port. But in Bengal it will be many years before such a development of the trade as will necessitate the employment of cutters can be looked for. For sometime to come the trawlers must return with their own catches. In Europe and America all the fish caught in the open sea are brought dead, seldom alive. They come either fresh, preserved in ice, or partly cured, in salt. The former is the more usual practice. In a hot climate like ours there must be a very liberal provision of ice, and the exploring vessel will have to make experiments as to the proper quantity of ice to be allowed for keeping the fish sound and fresh. Should the trade develop there must be a separate wharf or jetty in Calcutta for the use of trawlers, or better still, a portion of the Kidderpur dock should be prepared as a fish market for the receipt and disposal of fish and for the accommodation of trawlers, special railway and other facilities being given for the rapid conveyance of fish to the retail stalls in different parts of the city, and for despatch up country. Diamond Harbour and Port Canning may also be used as depôts for the landing and distribution of sea and estuarine fish, but it is unnecessary here to look so far ahead.

Motor boats.

117. Gasolene and petrol boats which are finding increasing favour in Europe and America would be very suitable here both in our estuaries and rivers. The mechanism is simple; it does not take up much space and is not expensive. It can be adapted to both large and small boats. Gasolene boats would be particularly useful in the rapid carriage of fish from the fishing grounds in the Sundarbans and in *hilsa* fishing.

Ice.

118. For preserving fish there must be a sufficiency of reasonably cheap ice, and in order to save the cost of carriage, the ice factory must be located close to where the fishing vessels may moor so that crushed ice may be put on board direct from the factory by means of shoots.

Cheap salt.

119. There can be no curing or drying without salt. In all preservative processes and in all curing factories salt is the chief ingredient used. Salt must be cheap, and it follows that salt required for curing or preserving fish should be relieved of all duty.

Fishing sailers.

120. If trawling is found successful in the Bay, capitalists will no doubt step in, as has been the case in Cape Colony. The impetus thus given to deep-sea fishing may also induce individual fishermen to work on their own account, but as steam-trawlers will be beyond their means, Government may show the way how to work sailing schooners to advantage by building a few and letting them out on hire, even subsidising or granting bounties, as in Canada, to such fishermen as exhibit commendable pluck and enterprise. There seems to be little doubt that a good type of schooners would also be very serviceable in the Sunderbans, especially in the distant estuaries of the Khulna District, which are at present mostly neglected, and the difficulty of transporting the catches would be greatly minimised by the use of small gasoline boats which would be independent of wind and tide.

No local material being available, it is inevitable that imported agency must be employed for the purpose of opening up the sea-fisheries, which will add materially to the working expenses. But it is to be hoped that in course of time local fishermen will have sufficiently got over their prejudices and have been sufficiently trained and educated to take their proper place in the work of developing this great industry and that not only all the appliances, including trawls, nets and lines, will be made, but also suitable vessels built in the country.

Estuarine fishing.

121. The Bengal coast is cut up by numerous broad estuaries, and they seem to be full of valuable food fish. But owing to the absence of good boats and quick transport many of them have not been touched at all, while a few are but imperfectly worked. With the development of the sea fisheries estuarine fishing will also be stimulated. The improved type of vessels intended for sea-fishing will be equally useful in the estuaries, and during the worst period of the south-west monsoon, when sea fishing may become difficult, all the boats could work in the estuaries. A smaller, simpler and cheaper style of boats may also be introduced for work in the estuaries and large rivers, and they could be easily fitted up with motor power. The introduction of gasolene boats would go a long way to solve the question of rapid transport. There is great possibility of improving the supplies to Calcutta and other markets by more vigorous and systematic fishing in the estuaries.

Bheris

122. Another way of increasing the supply of estuarine fish lies in the direction of improving and extending the system of *bheris* which is found so profitable in the Salt Lake in the neighbourhood of Calcutta. These *bheris* are not unlike English mulletries and serve as temporary nurseries. They are within easy distance of Calcutta and can be inspected by any one interested in the business. A large portion of the Salt Lake has been made up into shallow reservoirs by means of low embankments, arranged on the sides of a canal from which the ponds are fed during floodtide through sluices, the valves of which open only inwards. Fry and young fish are thus admitted but their escape is prevented when water is let out. Prawns, bhektis and other fish are thus imprisoned about June and July and are caught from time to time and sold from July till the following January or February when the ponds dry up. Bhekti is largely caught in this way, but it is usually of small size, seldom exceeding $\frac{1}{4}$ seer, and is poor in flavour. The small bhektis that are seen in the Calcutta markets in September, October and November are often the product of *bheris*. The fisher, men come from various places, and there is keen competition among them owing to which the rents are going up, so much so that the owners of the lands find it more profitable to convert their low paddy fields into *bheris*. It is not uncommon to see Rs. 15 paid per bigha for a year, but the fishermen who are not very rich complain bitterly of this rack-renting. The leases are generally annual, though the term is in some cases extended to three years. Owing to the short term system and to the poverty of the fishermen, the *bheris* are emptied and all the fish taken out by the end of January. But if longer terms were given and capital were available, the embankments could be made stronger and higher and the *bheris* made into regular rearing ponds in which the fish could be made to grow to a proper size before being caught for the market. Artificial feeding would improve the rate of growth. The present system is shortsighted and destructive to a degree.

It is almost certain that a system which has been so profitable in the Salt Lake would be equally successful in other areas where the conditions are not dissimilar. There must be many low-lying lands in the Sunderbans where *bheris* can be introduced with success. The main difficulty is the absence of quick means of carriage; but the employment of gasolene boats would obviate this difficulty, and fishermen could get land at no great distance at a much lower rate of rent than what has to be paid in the Salt Lake.

The system of *bheris* is capable of indefinite expansion, and some of the capitalists who are now engaged in reclaiming the Sundarbans for growing rice may find it more profitable to take to fish culture, for which a few acres would suffice and which would call for no great outlay. This work could also be carried on along side of the cultivation of rice.

The fishery department might take up the question of improving and extending the *bheri* system and start a small experimental station for the purpose.

SECTION X.—SHAD.

Fishes of Bengal compared with those of Europe and America.

123. With two notable exceptions, the shad and the carp, to which reference will be made presently, there is little in common between the food-fishes of Bengal on the one hand and those of Europe and North America on the other. This was to be expected, regard being had to the great climatic difference between the two regions. It is true that the Bay of Bengal and the adjacent seas remain to the exploited and that their fish-wealth has not been fully ascertained, but so far as is known, both as regards the marine and fresh water varieties, not only are there marked differences in the species, but even families which are abundantly represented on one side are wholly absent on the other. The most valuable fishes caught in the fresh waters of Europe and North America belong to the salmon family, such as trout and salmon, to which, in America, may be added white fish, lake herring, etc., belonging to the same family, besides several kinds of bass (*centrarchidæ*), pike-perch and yellow-perch (*percidæ*), etc., that are seldom met with in Europe Among the sea fishes the most important in Europe and America belong to the cod family (*gadidæ*) such as cod, haddock, hake, pollock, ling, cusk, etc., herring family (*clupeidæ*) such as herring, sardine, etc., and mackerel family (*scombridæ*) such as mackerel, and flat-fish (*pleuronectidæ*) such as plaice, sole, flounder, halibut, turbot, etc. Eels and mullets are found in both the Continents, and in America there are representatives of a few other families, such as blue fish, etc. Turning to Bengal we find a total absence of the salmon and cod families, while the herring and mackerel families are poorly represented. On the other hand, our fresh waters are exceptionally rich in fishes of the cat (*siluridæ*), carp (*cyprinidæ*), snake-head (*ophiocephalidæ*), mullet (*mugilidæ*), and perch (*percidæ*) families, of each of which there are several varieties. Of the marine families the principal are the *percidæ* (such as *bhekti*) and *polynemidæ* (such as mango fish), but various other families are also more or less extensively represented; and from the small specimens of *pomfret* (*stromateidæ*), flatfish (*pleuronectidæ*) and other important families found along the coast, there is promise of an abundant harvest of them in deep water. Rays, skates and sharks (*chondropterygii*) are found in large numbers both in Bengal and in Europe and America, but they can hardly be regarded as food-fish, though skates are eaten by certain low classes in Bengal and are finding increasing favour in the far west.

As already remarked the two fishes that may be said to be found in Bengal as well as in Europe and America are shad and carp. Both have received considerable attention, the shad in the United States, and the carp on the Continent, and we have much to learn regarding their culture, propagation and capture. A detailed account is given of these valuable varieties, as there is ample scope in Bengal for the introduction of those methods which have been so successful in developing the shad fisheries in the United States, and pond culture for carp in Germany and Austria.

The Shad in North America.

Description.

124. The shad (*alosa sapidissima* or *clupea alosa*) is the largest, best known, and most valuable member of the herring family in the United States. The body is deep and compressed, the depth varying with the sex and spawning condition, but averaging about one-third the body length. The female shad is larger than the male, the average difference in weight being more than a pound. The mature males taken in the fisheries of the Atlantic coast weigh from 1½ to 6 pounds, the average being about 3 pounds; the females usually weigh from 3 to 6 pounds, the average being about 4¾ pounds. The general average for both sexes is between 3¾ and 4 pounds. In the early history of the fisheries, shad weighing 11, 12, and even 14 pounds were reported, but 9 pound shad are very rare on the Atlantic cost, and 10 pounds seems to be the maximum. Some seasons an unusual number of large shad (7 to 9 pounds) appear in certain streams. On the Pacific Coast shad average

a pound or more heavier than on the Atlantic, occasionally attaining a weight of 14 pounds, many have been reported weighing 9 to 12 pounds.

Distribution and abundance.

125. The shad is distributed along the entire east coast of the United States, and northward and eastward to the Gulf of St. Lawrence. It has gradually spread from the Sacramento River, California, where it was introduced by the California Fish Commission, and is now taken from Southern California (Los Angelos county) to south-east Alaska. In the early history of the country its abundance excited unbounded astonishment. Nearly every river on the Atlantic coast was invaded in the spring by immense schools, which, in their upward course, furnished an ample supply of good food. Notwithstanding greatly increased fishing operations and the curtailment of the spawning grounds, the supply in recent years has not only been generally maintained, but owing to fish culture efforts has been largely augmented in certain streams, notably in the Kennebec, Hudson, Delaware, and other rivers, and in Chesapeake Bay, Albemarle Sound, etc.

Shad in the ocean.

126. The shad passes most of its existence at sea, and little is known of its habits and movements when out of the rivers. The ocean areas to which it resorts are unknown, and what its salt water food consists of has not been determined. In the Gulf of Maine it is known to associate in large numbers with mackerel and herring during the months of June, September, and October, being most numerous in June. It has been taken at North Truro, Massachusetts, in the autumn when the ocean temperature was from 43° to 49°. In the month of November, one year after another, it has been found on the west side of Sakonnet river, Rhode Island. In May and June it has been captured with mackerel a few miles north-east of Cape Cod Light. Some instances of capture indicate that under certain conditions the adults may remain in the fresh water rivers a whole year. In November 1890, 600 were taken in the Chesapeake Bay. It has been found in the Potomac in considerable abundance in August and September, and even during the last week in December. Its movements are largely controlled by the water temperature. It is believed that it seeks to occupy an area having a temperature of 60° or 70°, and that its migrations are determined by the shifting of this area.

Shad in the rivers.

127. The annual migration of the shad from the ocean to the rivers is for the sole purpose of reproduction. It ascends to suitable spawning grounds, which are invariably in fresh water, occupying several weeks in depositing and fertilizing its eggs in any given stream.

Its migrations from the sea are in quite a regular succession of time with relation to latitude. It first appears in the St. John's River, Florida, about 15th November, the season of greatest abundance being February and March. In the Savannah river, Georgia, and the Edisto, South Carolina, the run begins early in January and ends the last of March. In the North Carolina rivers these stages of the migration are a little later. In the Potomac River advance individuals appear late in February, but the fish is most numerous in April. In the Delaware river the maximum run is about the 1st of May. It reaches the Hudson River the last of March, and is found in the Connecticut towards the end of April, is most abundant the last of May, and leaves the stream late in July. In the Kennebec and Androscoggin rivers, Maine, it is first taken in April and has left by the middle of July. In the St. John River, New Brunswick, it appears about the middle of May, and in the Miramichi River, New Brunswick, late in May.

The main body of shad ascends the rivers when the temperature of the water is from 56° to 66°, the numbers diminishing when the temperature is over 66°. Successive schools enter the Potomac from February to July, the males preceding the females. Of 61,000 shad comprising the first of the run received at Washington, D. C., from 19th to 24th March 1897, 90 per cent were males. Towards the close of the season males are extremely scarce.

The movement of the shad up the rivers is not constant, but in waves, causing a rise and fall in the catch. In some of the rivers the fishermen claim that a fairly well [illegible]ned run occurs late in the season, consisting of a somewhat different fish, [illegible]s "May shad."

The erection of impassable dams along the rivers and streams was probably the first thing to curtail the natural spawning grounds of these fish and to seriously check their natural increase.

As shad enter the rivers only for the purpose of spawning, the fisheries are necessarily prosecuted during the spawning season, and often upon the favourite spawning grounds. The increase of population necessitates a larger supply of fish and requires the use of more apparatus, and the number of shad that reach fresh water is therefore greatly curtailed by assiduous fishing with all kinds of contrivances in the estuaries, and in the mouths and lower parts of rivers. Under these conditions of a restricted spawning area and increased netting, shad would soon be exterminated without artificial propagation; or the fishery, at least, would greatly diminish and become unprofitable. Such a crisis was fast approaching in 1879, when the Fish Commission entered upon systematic work in shad propagation.

From their birth until their return to the rivers shad are preyed upon incessantly by other fish, so that the larger portion of the young do not survive their few months' sojourn in fresh water, and of those which leave the rivers each season propably not one in a hundred reaches maturity to deposit its eggs and contribute to the perpetuation of its species. In the river striped bass, white perch, black-bass and other predaceous fishes devour the young, and when they reach salt water, sharks, horse-mackerel, kingfish, etc., undoubtedly destroy many adults. It has been observed by North Carolina porpoise fishermen that as the shad swim close along the shore the porpoises follow and feed on them till they pass into fresh water. In the rivers the adult shad is comparatively free from enemies.

To what extent the pollution of the waters has reduced the numbers of shad is not known, but acids, sawdust, garbage, oils, and refuse from dye-works all tends to make the water of rivers unsuitable for them.

Food.

128. After entering the rivers, the shad takes but little, if any, food previous to spawning, but after casting its eggs it bites at flies or any shining object, and has been known to take the artificial fly. The mouth of the adult is practically toothless, and its throat contains no functionally active teeth. The water which passes through the branchial filter—the gillrakers—is deprived of the small animals which are too large to pass through its meshes. It is a common remark with fishermen and others that food is rarely found in the stomach of the adult shad in fresh water, but examinations have shown that the shad does, in some instances, eat crustacea, insects, etc. The only substance commonly found in its stomach in fresh water has the appearance of black mud. It is held by some that the shad swims with its mouth open and may unintentionally swallow the small organisms found in its stomach under such circumstances, but as far as observation of fish in aquaria and experiences of net fishermen go, the shad does not swim with its mouth open.

Natural spawning.

129. Shad are liable to be ripe anywhere above brackish water, and under favourable temperature conditions spawn wherever they happen to be, but in some river basins they exhibit a well-defined choice of spawning places, preferring localities below the mouths of creeks, where the warmer water of creeks mingles with the colder channel water. They ascend with considerable rapidity, and within 12 to 14 days are found crowded on the shallow, sandy or pebbly areas, generally some tributaries of a large river, and deposit their minute semi-buoyant spawn. They hatch out in 7 to 10 days, when the clear shallows are found to be alive with the wriggling jelly-like larvæ. The shad lays its eggs during the highest daily average temperature, a condition realised about sunset, when the warmer shoal water commingles with the colder channel water, establishing a balance. The principal spawning occurs from 5 P.M. to 10 P.M. Observations on the Potomac river show that of the eggs from shad caught in a seine only 11 per cent. were taken between midnight and noon, the percentage in the morning being 14 one year and 8 another.

The eggs in the ovaries remain in a compact mass until they ripen, at first occupying but a small space, but gradually increasing until they distend the whole abdomen, the average weight of the ovaries being about 13 ounces. Close examination at the approach of the spawning time will

disclose large maturing eggs of rather uniform size and others smaller and of variable size. Whether the latter are the forming eggs for the next year, for two or three succeeding years, or for the life time of the fish has not been determined, nor is it known whether shad spawn every year. The small and shrunken ovaries of a spent fish are still found full of these eggs of different sizes. Shortly before spawning, transparent eggs of large size, contrasting strongly with the opaque golden hue of less mature ones, will be found scattered through the still compact ovarian mass, and, becoming more and more numerous, the ovaries disintegrate, the eggs fall apart, and extrusion begins, a liquid stream of eggs and mucus flowing from the oviduct on the slightest pressure of the abdomen.

In a state of nature the shad deposits its eggs loosely in the rivers without building a nest, the two sexes running along together from the channel towords the shore, and the eggs, and milt being ejected simultaneously. On quiet evenings, at the height of the season, spawning shad may be heard surging and plunging along the shores. By fishermen this is termed "washing."

Shad are very prolific, but much less so than many other food-fishes. The quantities of eggs taken by spawn takers do not represent the actual fecundi y, for many are cast in advance of stripping. The average number is not more than 30,000. Single fish have been known to yield 60,000, 80,000, 100,000, and 115,000 eggs; and on the Delaware River, in 1885, one yielded 156,,000. Many eggs fail to be fertilized, and but a comparatively small percentage of those impregnated are hatched. After being extruded, the eggs sink to the bottom, where they remain until hatched, subject to the attacks of fish and other water animals. Eels are very destructive to shad spawn and often attack shad caught in gill nets, devouring the undeposited eggs and sometimes mutilating half the catch of a gillnet fisherman.

The development of fungus is one of the greatest dangers to shad eggs in a natural state, and another potent agency for their destruction is the mud brought down by heavy rains, burying and suffocating the eggs.

After spawning, shad are denominated "down-runners," "racers," and "spent fish." They are then very lean and hardly fit for food, but they begin to feed and have become fatter by the time they reach salt water in the summer or fall.

Young shad.

130. In the Middle States the young fish remain in the rivers, feeding and growing, until the cool weather of fall comes on. They then begin to drop down stream, and by the last of November have passed out into the ocean or bays, and are lost sight of until they come back three or four years after, full grown and ready to spawn. They leave the Potomac River when the water falls to about 40°. By that time they are about 3 inches long. For some years they have been observed in great abundance, about Bryan Point, feeding and jumping out of the water about sunset. They keep within the open streak of water between the shores and the water grass which cover the flats, in water 2 to 5 feet deep. After mild winters young shad have been found in the Potomac River in April, 30 miles above brackish water and 160 miles from the ocean, associated with young alewives and sturgeon. Some inmature shad, apparently 2 years old, are caught each year in seines operated in the fresh water of the Potomac River, and undersized shad are frequently caught in the New England rivers, where the tidal waters are of little length.

Commercial value.

131. The shad is one of the most palatable and popular of fishes. Its flesh is rich, but not oily, and the roe is considered a delicacy. It is the most valuable river fish of the Atlantic Coast, and next to the Pacific salmon, the most important species inhabiting the fresh waters of North America. In every Atlantic State from New Jersey to Florida inclusive, it is the most valuable fish; and in New Work it is second only to the blue fish. Among all the economic fishes of the United States only the salmon and cod exceed it in value, and, considering all branches of the fishing industry, only the whale fishery and the oyster fishery, besides the foregoing, are financially more important than the shad.

In 1896 the shad catch of the Atlantic Seaboard numbered 13,145,395 fish weighing 50,847,967 pounds and worth to the fishermen $ 1,656,580. The

value of the shad catch of the Pacific States in 1904 was $ 13,146, a sum representing 489,505 pounds.

Early attempts at shad-culture.

132. The sytematic development and extension of shad-culture were undertaken with the definite purpose of testing the value of artificial propagation in maintaining an important fishery which was being rapidly depleted. As early as 1848 shad eggs were artificially taken and fertilized, and in 1867 more extensive experiments were made on the Connecticut River, and later on the Potomac, with encouraging results. The attention of many States was thus attracted to the work, and in 1872 it was taken up by the general Government. Prior to the experiments on the Connecticut, certain species of the salmon family had been principally dealt with in fish-culture, and different methods from those in use were necessary for shad hatching, owing to the less specific gravity of shad ova and the much shorter period of time required for the development of the fish from the egg.

During the years of experimental work from 1872 to 1880, 97,471,700 shad fry were planted, beginning with 859,000 in 1872, while in 1880, 28,626,000 were distributed. Prior to 1880 deposits of a few hundred thousand each were made in as many different streams as possible, but the increased production of young fish made it possible to ship and plant the fry by the cartload, and by 1884 shad-culture was established on a large scale, barge operations were abandoned, and the work conducted on shore. The basins of the Chesapeake Bay and Delaware River had meanwhile been selected by the United States Commission as the natural seat of operations, though the State Commissions from Massachusetts to South Carolina were actively engaged on their own account. At present the States, except Connecticut, New York, Pennsylvania and Maryland, have practically abandoned shad-hatching, leaving the work to the general Government.

Egg grounds.

133. Every river on the Atlantic Coast from Massachusetts southwards has been examined by the agents of some State Commission or the United States, or by both, in order to determine the natural spawning grounds of the shad. On nearly every stream hatcheries have been operated at one time or another, but usually eggs were not obtained in sufficient numbers to justify continued operations, except in the Chesapeake and Delaware basins. However, it is not unlikely that after further investigation it will be found practicable to maintain hatcheries on rivers which have long since been abandoned.

In certain river stretches, apparently favourable, no ripe fish are found: for example, in the Roanoke River for 15 miles above its mouth, where 10,000 to 15,000 shad are taken annually, mature eggs cannot be found, though the fish spawn just below there, as they do many miles above at Weldon. In the Sutton Beach seine, the one in North Carolina waters which has afforded the most spawn, only about one spawning shad to each 100 is caught, and the annual catch of this seine is 30,000 to 75,000 per annum. In view of such facts, it is not remarkable that difficulty has been experienced and time consumed in deciding on permanent locations for hatcheries.

The spawning period varies widely in different seasons; in some years shad are numerous and in spawning condition two or three weeks after the time when they have ordinarily disappeared. They deposit eggs at some point along the coast for six continuous months.

Artificial hatching.

134. The United States Fish Commission operates stations at Bryan Point, 12 miles below Washington on the Potomac, and at Battery Island at the mouth of the Susquehanna, while the steamer *Fish Hawk*, fitted up as a floating hatchery, is engaged during the shad season on the Delaware River. These two stations, and the vessel can receive, respectively, 16,000,000, 40,000,000, and 12,000,000 eggs. On more than one occasion each has been taxed to its utmost capacity, but as the average hatching period is eight days, and four of the special cars of the Commission are hatcheries in themselves, and capable of taking 2,000,000 to 4,000,000 eggs aboard at a time, the hatcheries can be quickly relieved in case of emergency.

In 1897, 205,000,000 eggs were taken, from which 134,545,000 fry were hatched. In 1898, the total of shad fry hatched was 156,150,000, and in 1899

it was 210,493,000. In 1906 the season was unfavourable and the number of fry hatched was 38 millions.

In 1900, a permanent hatchery located on an arm of Albemarle Sound, near Edenton, North Carolina, was operated for the first time. This station is adjacent to one of the most important shad fishing grounds in the country, and is intended to replenish the waters of Albemarle, Croatan, Roanoke, and Pamlico Sounds, and their tributaries. This region annually yields upward of 8,500,000 pounds of shad, valued at about $ 350,000, and contributes the principal part of the shad found in the northern and eastern markets in winter and early spring.

Collecting eggs is the work of experienced watermen, who must be prepared to endure all kinds of weather in open boats. The spawn-taker is a practised hand, and must be well up in his work.

The stripping of ripe fish, the mixing of ova with milt and the transport of impregnated eggs to the shore and thence to the hatchery all require great care and delicate handling, as the slightest mistake may spoil the eggs.

A shad-hatching station may be of a temporary character, as it is used only about two months each year, but ample light, space, ventilation, and arrangements for moderate heating are necessary; steam pumps and tanks must be provided; and there is an elaborate arrangement of hatching jars in each of which a constant flow of water is maintained.

Shad eggs are semi-buoyant, and those which will not rise commence lumping on the third or fourth day. The usual period of hatching is from 6 to 10 days, sometimes longer, accordig to the temperature of water, but with high temperature they will hatch in three days.

For obvious reasons, no atempt has been made here to enter into the details of the various processes connected with artificial propagation or to give a description of the many apparatus and appliances required for the successful working of a hatchery. When it is decided to introduce shad-hatching stations in Bengal, it will be necessary to bring out a capable expert from America with the requisite equipment.

The shad on the Continent.

135. The shad is not of much importance on the Continent, and it is found in any considerable quantity in the rivers on the south-west coast of France, especially in the Garonne and the Gironde. They are caught from March to July, when they go up the rivers and are in roe. They travel in schools and are captured in large numbers, but the flesh is not much estoemed.

In France nothing apparently has been done to study the life and habits of the shad, and it is not known where they spawn, and I was assured by some fishermen in Bordeaux that no fry of the shad had ever been seen.

The Shad in India.

136. The Indian shad, *clupea ilisha*, has a very extensive distribution on the East Coast where it is found in all the principal rivers falling into the Bay of Bengal. On the West Coast it appears only in the Indus in Sind and is practically unknown elsewhere. It begins its upward journey usually with the commencement of the freshets and continues moving up in shoals till about the close of the rains. In Madras it ascends the Cauvery from June to September, the Godavery, from July to the middle of October, and the Kistna from October till December. In Bengal it appears about the end of June, is most numerous from July to September and is met with till the end of October and sometimes even later.

Distribution.

It has various local names, viz., *hilsa* or *ilish* in Bengal, *sable* or *palasa* in Madras and *palla* in Sind.

137. There can be no question that the shad is more abundant and the fishery more important in Bengal than anywhere else in India. To the south of the Province it enters the Chilka apparently to work its way up the Daya and is fairly plentiful in the Daya, Mahanadi, Burabulong and Subarnarekha rivers, all in Orissa. In Lower Bengal proper it comes up the various mouths through which the Ganges

The shad in Bengal.

debouches into the sea and are most plentiful in the Hooghly, Rupnarain, Balesvar and the Padma or main channel of the Ganges; where not obstructed by dams or anicuts it goes up long distances, large numbers being annually caught as high up as Patna (about 415 miles from the sea) and even higher. It ascends all the tributaries and branches of the Ganges, and there is scarcely a river in Bengal which does not receive its quota of the fish. The *hilsa* are caught in their thousands from the estuaries upwards, and some idea of the immensity of the shoals may be judged from the fact that though nets, traps and engines of all sizes and shapes are employed to capture them at short distances all along the route, a considerable number still manage to find their way many hundreds of miles from the sea.

In many of the rivers large quantities of *hilsa*, mostly immature, are caught in spring, and there is regular winter fishing in the Madhumati and in the Hooghly near Kalna, as well as in many parts of the coast. In fact the capture of *hilsa* goes on throughout the year, not even the "spent" fish being spared. The fish are rich and of good flavour only during the spawning season, *i.e.*, from July to October, but their destruction never ceases. In the course of our enquiries we received complaints from all directions that the supply of *hilsa* was greatly on the decline. On the one hand, owing to increase of population and improved transport there is a growing demand to meet which incessant fishing is resorted to throughout the year, and on the other, no steps are taken to protect the "spent" fish and fry in their downward run to the sea or to assist nature by artificial propagation. It is certain that if no remedial measures are adopted, in course of time the *hilsa* would at this rate be exterminated, or the fishery at least would greatly diminish, as was the case in the United States in 1879.

Ancient close season.

138. In this connection it is necessary to remember that in Bengal the religion of the Hindus prohibits the eating of *hilsa* from the last day of the Durga Puja (sometime in October) to the Sripanchami day (end of January or beginning of February), or in other words it enjoins a close season from about the middle of October to the end of January, which very nearly corresponds to the period, when, according to the observations made in the United States, the fish ought to be descending to the sea after completing the act of spawning. But owing to general ignorance of the real meaning and purpose of the injunction it has become the practice to disregard it as one more piece of superstition, especially as all religious sanctions have lost much of their force. The only way of reintroducing the close season is by penalising the capture of *hilsa*, say, from the 1st November to the 15th February. No Hindu should object to this legislation, as it would only revive in another shape one of his sacred ordinances, and the facts stated above should convince the Hindu and the non-Hindu alike as to the necessity of affording temporary protection to the fish, the more so as it would involve no serious self-denial, the fish being of poor quality and hardly worth eating during this period.

Hilsa fisheries.

139. During the last season, some attempt was made to get statistics of the *hilsa* fisheries in Bengal. Their presence is reported from all the divisions, and at a rough computation 8,000 boats are engaged in catching the fish. The boats are classified and named according to the kind of net used. The most favourite net is the *sanglia* which is a small wall net with an oval end secured by a piece of split bamboo to which a rope is attached. A *sanglia* boat carries three men and is moved up and down the river, and when a fish is felt in the net it is lifted, the bottom rope being pulled up at the same time so as to secure the fish in the fold. Only a few fish, generally one, is caught at each throw. A smaller form of this net is called *kharke*, and is managed with two men. The other nets in use are *bachhari* (large cast net), *khepla* (small cast net), *kona* (purse seine), *chhandi* (large seine), and *beuti* (small fixed purse net with a funnel end). *Bachhari*, *kona* and *chhandi* require large boats, two or more of which are used with one net, the number of men varying from 6 to 12. But they often make very large hauls. They are used in the large rivers. Of the total, *sanglia* boats number 4,000, *chhandi* 2,000, *kharke* 1,200, and *bachhari* and *kona* 400 each. The principal *hilsa* fishing takes place in the Presidency

and Burdwan Divisions, *i.e.*, in the lower reaches of the rivers, where the fish naturally is more abundant and is of good flavour. During the height of the season the Hooghly on one side and the Padma on the other swarm with *hilsa* boats of all kinds and attract fishermen from other parts of the country. As the *hilsa* continue their upward flight, they become scarcer and loose in quality. The fish caught in winter and spring are quite poor, and are usually of small size.

General.

140. The Indian shad and the American shad are different species of genus clupea of family clupeidæ, and as regards size, shape, colour weight, texture and quality of the flesh, etc, have much in common, though differing in many points of scientific nomenclature. They both ascend the rivers at certain seasons of the year and are caught in large numbers with roe. But while in America careful investigations have been made for many years and much knowledge has been acquired regarding the movements, food, spawning grounds and everything connected with the life history of the shad, in India the profoundest ignorance prevails on the subject, excepting, perhaps, a few obvious points that could not escape even a casual observer. As in France, the fishermen of Bengal believe that the *hilsa* does not spawn in the rivers, in proof of which it is asserted that no fry or young ones have ever been caught or seen. But after witnessing what the United States has achieved in locating the spawning grounds of the shad and in successfully undertaking artificial propagation, one must not rest content until systematic efforts have been made to see what can be done with the *hilsa* on those lines.

In the United States the period during which the shad may be caught is very short, seldom exceeding two months in the same river, and corresponds to the time of their ascent up the rivers in obedience to their spawning necessities. During the rest of the year, a strict close season is observed. For Bengal a much shorter close season is proposed, viz., from 1st November to 15th February. It may be extended hereafter to June, so as to stop the spring netting.

Very strenuous efforts must also be made to observe the reproductive functions of the *hilsa* and ascertain their spawning grounds, so that when their anadromous character has been established hatching stations may be opened to introduce artificial propagation for replenishing our rivers.

SECTION XI.—CARP.

In Europe and America.

141. The carp belongs to a family of fishes (*Cyprinidæ*) best represented in America by the minnows (especially of the genus Notropis) which abound in most of the lakes and streams. In the Eastern United States the members of this family are all small, the largest rarely attaining 18 inches in length, while the smallest is scarcely 2 inches long when adult. The Old World species are generally much larger than this, and on the Pacific Coast there are a few which reach a length of 5 or 6 feet, and which are also apparently more closely related to the European forms in structure.

Scientifically the carp is known as *Cyprinus carpio*. It varies greatly in many of its characters, a condition probably brought about in large part by its state of domestication, or semidomestication, for a number of centuries. In shape it varies from a long, rather slender fish, whose height scarcely equals one-fourth its length, to a deep form nearly or quite half as high as long. The greatest height is at the anterior end of the dorsal fin. In all cases, however, the body is rather strongly compressed laterally, the cross section never approaching close to circular. The greatest breadth is normally a short distance back of the head, but the bodies of the female fish are often, before the breeding season, distended with roe to a considerably greater breadth. This dimension in normal individuals usually equals less than half the height. The snout is blunt, and in typical forms the dorsal outline rises from the snout in a nearly uniform bow or arch to the base of the dorsal fin.

142. Hessel considers all the varieties of carp as falling into three chief groups, which he distinguishes as follows:—

Races and varieties.

(1) *Cyprinus carpio communis*, the scale carp; with regular concentrically arranged scales, being, in fact, the original species improved.

(2) *Cyprinus carpio specularis*, the mirror carp; thus named on account of the extraordinarily large scales, which run along the sides of the body in three or four rows, the rest of the body being bare.

(3) *Cyprinus carpio coriaceus* or *nudus*, the leather carp; which has on the back either only a few scales or none at all, and possesses a thick, soft skin, which feels velvety to the touch.

143. There appears to be but little definite information as to how long carp may live, and what size they may attain. It is said that they may live to be 100 or even 150 years old, and may come to weigh 80 to 90 pounds, but these statements are generally based upon insufficient evidence. That the fish do commonly reach a weight of 30 to 40 pounds, however, seems quite certain, and Hessel says: "It is a well-known fact that two large carps, weighing from 42 to 55 pounds, were taken several years ago on one of the Grand Duke of Oldenburg's domains in Northern Germany." He also claims to have had in his possession some scales 2½ inches in diameter, which came from a Danube carp that weighed 67 pounds.

Size, growth and age.

The rate of growth of carp (as is true of most fishes) depends in a great measure upon the temperature of the water in which the fish lives and the abundance of suitable food. Under ordinary conditions in open waters of temperate regions they will reach a weight of 3 to 3½ pounds in three years, but in warmer climates the growth is very much more rapid, and sexual maturity also is attained at an earlier age. Numerous examples of the rapid growth of carp in the warm waters of the United State have been reported. Thus in a report of the Illinois Fish Commission (Illinois, 1884, page 10) will be found the following statement by Doctor Adams, of Spring Hill Park, Peoria, with regard to some fish received by him from the State:—

> At less than two years of age one of the carp weighed 9½ pounds, measuring 22 inches in length, a growth of over one pound a month from the time it was placed in warm water.

Doctor Adams had previously had the fish in a spring where the water was cold, and they had not done well. Many more statements on the subject may be found in the early reports of the United States Fish Commission.

The Carp in Europe.

144. There seems to be a general agreement that carp were indigenous to the temperate portions of Asia, and they had probably spread into South Eastern Europe before the Christian era. The carp probably came into Western Europe by easy stages. Hessel states that its culture in Austria can be traced as far back as the year 1227, and it is claimed to have been introduced into Germany and France two or three decades later (1258). The extensive ponds at Wittingau, in Bohemia, were begun as early as 1367. Carp culture was carried on especially in connection with monasteries and on a number of large estates, and has come to be an important commercial industry, especiallly in Austria-Hungary and Prussia. It is said that an acre of water suitable for carp culture will rent for as much as an acre of land. The fish's range has gradually extended in Europe, until now it is found over practically the whole of the Continent from Italy to Sweden and Norway, and from France and the British Isles to Russia and the boundaries of Eastern Siberia. It does not do so well, however, and is little cultivated, in the more northern portions of its range, such as Scotland, Sweden, Norway, Finland, etc. Just when and whence the carp came into England is not known. It is generally conceded to have reached there, however, between 1051 and 1486.

Introduction and distribution of Carp in the United States.

145. It is uncertain when the first carp were introduced into the United States. This may have been done at any time by private individuals, though if such was the case the fish were probably only kept in tanks or small ponds as curiosities, for it is certain that with the exception of their establishment in California they never gained a general distribution or attracted much attention until their successful introduction by the Fish Commission in 1877.

The question of the introduction of the carp into the United States was taken up by the Fish Commission within a few years after the organization of that Bureau.

It was not the intention of the Fish Commission to introduce the carp into waters that were already stocked with the good native species, nor was it claimed that the carp was superior to the majority of the indigenous food-fish of the country. But it was believed that it could be successfully raised in many sections of the country not favourable to the growth of better fish.

In the winter of 1876-77, Mr. Rudolph Hessel, in the interests of the Fish Commission, as an initial experiment shipped carp from Bremen to Baltimore, but, owing to a storm of unusual severity to which the vessel was exposed, all were lost on the way. He immediately returned to Europe, however, where, at Höchst, near Frankfort, he procured another lot of fish. These he succeeded in bringing in safety to New York, and on 26th May 1877, they were placed in ponds in Druid Hill Park, Baltimore. This lot consisted of 345 fish, of which 227 were naked and mirror carp, and 118 were common scale carp. The ponds at Druid Hill Park not being sufficient for the proper care of the fish, Congress allowed use to be made of the Babcock Lakes in the Monument lot, in the city of Washington, and appropriated the sum of $5,000 to put these in proper condition. In the following spring these ponds were ready for the reception of the fish, and 65 leather carp and 48 scale carp were transferred to them from the Druid Hill Park ponds.

The fish that remained in Baltimore spawned in 1878, but some gold-fish had entered the pond accidentally, and the carp hybridized with these, so that instead of having young true carp there were some 2,000 hybrid young. These were destroyed as being worthless. The results were more satisfactory in 1879, in which year about 6,000 young were reared. Of these, 2,750 were distributed to applicats throughout Maryland, the remainder in other States. In this year the fish in the ponds at Washington spawned for the first time, and about 6,000 were also reared there. Altogether, in 1879, some 12,265 carp were distributed to over 300 persons in 25 States and territories. Among the recipients were various State Commissioners, who redistributed their fish to applicants in the respective States.

As illustrating how thoroughly carp were disseminated throughout the United States in these early years of its introduction, the data for 1883 furnish an interesting example. In that year carp were sent into 298 of the 301 Congressional districts, representing 1,478 counties; in this way 260,000 carp were distributed, in lots of 20, to 9,872 applicants. The distributions continued large until about 1890, when they began to diminish, and were finally discontinued in 1897.

It is now found in abundance all over the United States wherever the waters are at all suitable. Many were sent to Canada by the United States Government shortly after the introduction of the species, but with the exception of some of the waters of Ontario, especially in the vicinity of the Great Lakes, it does not appear to have become very abundant, owing without doubt to the coldness of the waters.

In reference more particularly to the history of the carp in the Great Lakes region, there can be little doubt that prior to 1879 there were no carp here. In that year the first distribution was made by the United States Fish Commission, and those who received fish were six applicants in Ohio, five in Indiana, two in Illinois, and one in Wisconsin. In the following year a large number of persons in these States received carp either directly from the United States Commission or indirectly through their State Commissions, and the real introduction of this fish into the waters of the Great Lakes basin may be said to date practically from that year. This was only 25 years ago, and the

wonderful increase of carp since that time is in many ways comparable to that of the English sparrow in the country.

Vitality.

146. Like many other hardy fish, carp can be kept alive out of water for considerable periods at ordinary temperatures if they are kept moist, and they are often transported for short distances by packing them in wet moss. In Germany it is said to be a common practice at such times to place in the mouth of the fish a piece of bread or cake soaked in brandy. There is no doubt that these fish can withstand much in the way of adverse conditions, and can live for a considerable period out of water so long as the gills are kept moist. When it is desired to transport fish from where they are caught it is usual for the fishermen merely to load them into the bottom of a boat when the distance is not too great. For longer distances by water they are usually towed in a live car.

When the United States Fish Commission was distributing many thousands of young carp every year it became a matter of great importance to have some practical method that would be economical as well as efficient. The original plan was to send a few fish in a large milk can full of water; but this practice was expensive and unsatisfactory. Later, it was found that the fish could be shipped long distances, requiring several days or a week for the journey, merely by putting them in small pails with only a little water. The usual method was to use four or six quart tin pails, in which were placed 15 to 20 young fish, 2 to 3 inches long, with little more than enough water to cover them. This small amount of water is kept well ærated by the jostling of the pails in transportation and the movements of the fish. In fact, it usually becomes foamy on account of the slime secreted by the fish.

Although carp will live so long out of water if the gills are moist, or in a small amount of water well ærated, they succumb much more quickly to foul water—that is, to water not well ærated, and consequently charged with carbonic acid or unoxidized organic matter. Under such conditions they may usually be seen swimming about with their mouths at the surface, a circumstance that is always to be looked upon with suspicion by the owner of a carp pond, as it usually means that the fish will die unless the conditions are quickly improved. Carp are apt to do the same thing when the temperature of the water becomes too high. Of course this action must be distinquished from the normal feeding of the fish at the surface.

Food.

147. Carp are frequently stated to be "essentially vegetable feeders" It is better to say that they are omnivorous, for there is no food substance which a carp can get into its mouth that it will not eat. Since it connot be considered in the ordinary sense a predacious fish, however, the animal matter which it can ordinarily obtain is limited largely to insect larvæ, small crustacea and mollusca, and other similar small organisms, so that the bulk of its food is undoubtedly in most cases vegetable.

Breeding habits.

148. In Europe the carp is said to spawn principally in May and June, though, in some cases, the process may extend several weeks longer. As far as can be ascertained, the same statement holds for the Northern United States. In the Southern States and California spawning is apparently earlier, often beginning in April. In the waters contiguous to Lake Erie the height of the spawning season seems to be in the latter part of May and early June. On the St. Clair Flats, it is usually a little later on account of the lower temperature of the water, which comes directly down from Lake Huron. This temperature difference affects the time of spawning of other fish as well.

The age at which carp spawn also depends largely upon the temperature. European authors state that they reach maturity in the waters of temperate Europe when they are three years of age; and the same probably holds true in general for the corresponding region in North America, though, apparently, they sometimes spawn, at least in the latitude of New Jersey, when they are only two years old. They commonly breed at the age of two years in the south (where they do not hibernate in the winter), and according to Mr. Poppe, of California, his fish spawned when they were only nine months old. At the time

of first spawning the fish will usually weigh 3 or 4 pounds and have a length of 15 to 18 inches.

At the spawning season, but before the fish have spawned, the females can usually be readily distinguished by their distended condition. Though the ova themselves are rather small, the number is very large, and the reproductive capacity of a carp increases greatly for the next year or two after it begins to spawn. According to Hessel a female weighing 4 to 5 pounds will contain on an average 400,000 to 500,000 ova. Day quotes other estimates, thus: a female of 9 pounds had 600,000 eggs (Bloch); one of 16¾ pounds had 101,200, one of 25½ pounds 203,109 (Harmer); one of 21½ pounds had 1,310,750, and one of 16½ pounds had 2,059,750 (Buckland).

In the case of a female mirror carp from Sandusky Bay, which was weighed at Port Clinton, 22nd June 1903, it was found that the ova comprised more than a fourth of the total weight of the fish. The fish before being opened weighed 17 pounds; after the removal of the ova with as little loss of blood as possible, the weight was 12 pounds 6 ounces, leaving 4 pounds 10 ounces as the weight of the ova. This is 27 per cent. of the entire weight of the fish and 37 per cent. (over a third) of the weight of the remainder of the fish after the ova had been removed.

This enormous fecundity is undoubtedly an adaptation to compensate for the dangers of the exposed condition in which eggs are left after being laid, since they are merely scattered about on the vegetation in shallow water and are given no further care or attention by either of the parent fish.

In pond culture the breeding ponds are usually stocked with male and female fish in a definite proportion; the unit is technically called a "spawning party." Usage differs as to the relative number of each sex that is best for stocking a breeding pond, but it is customary to put in a larger number of males than females. It is usually planned that each "spawning party" shall consist of one "spawner" and two "milters," or else two "spawners" are provided for three "milters," while for each three milters is added one three-year old male fish, known as a "driver" or "enticer," which is not used for spawning, but simply to drive or entice the other fish to that process.

According to Hessel, the male carp at the breeding season assumes a secondary sexual character which is common to many members of the family at that time, namely, a various arrangement of "protuberances, like warts," which are generally known as "pearl organs." In the case of the carp these are said to occur on the skin of the head and back. If they are regularly present in these positions they undoubtedly function as has been found they do in other Cyprinidæ and some of the catastomidæ, in helping to hold the female at the time of spawning. The method of the carp would seem to be much like that of the sucker (*catastomus commersonii*), where the two males lie one on each side of the female, holding her firmly between them with the help of the pearl organs along the sides and tail.

The eggs are not laid in bunches or masses, but are scattered about in the water, and, being adhesive, they become attached to the roots and stems of grass and other aquatic vegetation, or to whatever objects chance to cover the bottom where they are deposited. The fate of the egg probably depends to a large extent upon where it chances to become attached, for should it fall into the mud, there would be little chance for its further developement. The eggs develop rapidly, but the time required for hatching depends very directly upon the temperature of the water. In temperate regions, under favourable conditions, they are said to hatch in about twelve days, though if the weather be so cold as to lower the temperature of the water it may take them sixteen or twenty days to reach their full development. In the warmer waters of the Southern States the development is more rapid; in a pond in Georgia, when the temperature of the water was 69°, the eggs are reported to have hatched in five to six days, while the following year, with the water still warmer, the whole time consumed for development was but forty-eight to seventy-two hours. The young fish also grow very rapidly and in the latitude of Lake Erie reach a length of 4 to 6 inches the first fall.

The Carp in Bengal.

149. Carps (*Cyprinidæ*) are well represented in the freshwaters and estuaries of Bengal, and they and the *Siluridæ* (Cat family) comprise the great mass of fish residing there, especially if the migratory Clupeidæ are omitted. Whereas the siluroids, as a rule, appear to prefer muddy water, carps thrive best in those which are clear. Still many species of this family obtain their subsistence in dirty waters, for which purpose their barbels may prove of considerable assistance. There are few members of this family which are such foul feeders as the siluroids, consequently carps may be deemed more wholesome, and would be greatly preferable as food were it not for the numerous bones with which they are provided. The people of the country, however, do not seem to object much to this, and as these fish are very abundant in places, they enter largely into the diet of the Bengal population.

Description.

Carps do not restrict themselves to a vegetable diet. Those which prey upon their neighbours are largely represented; whilst those small forms that were apparently produced to be preyed upon are the most prolific.

The family Cyprinidæ is in India divided into two sub-families (*a*) Cobitidinæ and (b) Cyprininæ. The first sub-family has not many representatives in Bengal, and the few species that are found are not esteemed as food. The second sub-family has 27 genera in India, nearly all of which have representatives in Bengal. The two most numerous genera are labeo with 25 species and barbus with no less than 70 species. Among the most valued food-fishes in Bengal belonging to this sub-family are:—

(1) labeo rohita (rahu).
(2) catla buchanani (katla).
(3) cirrhina mrigala (mirgal).
(4) labeo calbasu (kalbous).

The nearest resemblance to the cyprinus carpio of Europe and America will be found in the above four forms.

The two species most esteemed in Bengal are rahu and katla, the former taking the first rank easily.

150. All the four varieties are largely used in stocking tanks. Spawn and fry are obtained from the rivers. The work of collecting them begins with the first freshets in June and goes on till the middle of September. All the rivers are utilised for the purpose. The exact spawning grounds are not known and have not been ascertained, but they seem to be in the higher reaches of each stream, for the spawn is always gathered at various points lower down, and in tidal waters, only during ebb tide.

Tank stocking.

In the Metropolitan districts, especially in the neighbourhood of Calcutta, spawn gathering is a great industry and gives occupation to hundreds of people who are not generally fishermen, but comprise some of the lowest castes. In many cases only eyed eggs and imperfectly hatched ova are collected. These as well as the young fry are bought by men of the fishermen caste who put them in growing tanks, and when they are sufficiently large to make a classification possible, they are separated and are sold to owners of tanks or placed again in tanks to grow. Fingerlings and even larger ones are sold later in the season for stocking, and when the tanks are shallow, young ones a few months old are sent to market for food. The fry are never fed artificially and the way that the spawn are handled must lead to a considerable amount of loss.

The fry are transported to long distances by rail and boat. In the former case they are placed in tin cans or earthen pots containing water; when the carriage is by boat, the fry are simply put in the well of the boat. Over short distances, the carriage is usually by land; two pots are suspended from the two ends of a shoulder bar and the shaking that the pots undergo while the man who carries them is walking at a fairly rapid pace causes sufficient æration to keep the fry alive. An account of this trade will be found in Section XV of my preliminary report.

There is an universal belief in Bengal that carps do not spawn in confined water such as tanks, ponds, etc., based doubtless on the fact that carp fry have seldom been seen or observed in such waters, although very large numbers of

carps are kept in them, often for a number of years and they frequently grow to a very large size.

Pond culture

151. The experience of Europe and America is different. There pond culture of carp has been carried on with great success, in Europe for several centuries. In this connection it would be well to study carefully the system which obtains at the great carp establishment at Wittingau which I visited and of which an account has been given in section V of this report.

The manager of the establishment has great knowledge of all points connected with carp culture. There also in the large rearing ponds where mature fish of both sexes are kept together for several seasons, no fry have ever been seen, and Mr. Kottas seems to think that the absence of fry may be due either to the presence of predacious fish which eat up the carp spawn and fry or the carp refuse to spawn in view of their enemies The same reasons may explain the absence of carp fry in our tanks. few of which are free from predacious fish. But when special arrangements are made to induce the carp to spawn by providing suitable ponds and by keeping the male and female fish separate for some time previous to spawning and only putting them togother on the approach of spawning time, the results in Europe have all along been most successful, and it now remains for us to try the same methods here and observe the result of the experiment.

Requirements of pond culture

152. The new department should take immediate steps to start a few pond cultural stations in different parts of the country. The conditions that have to be satisfied are—

(*a*) Abundant supply of water. For this purpose a stream or canal or pipe water would be suitable; in some places reservoirs may be utilised

(*b*) Clayey or loamy soil.

(*c*) Perfect control over the brood fish and facilities for handling them.

(*d*) A set of suitable ponds.

Classes of ponds.

153. There should be three classes of ponds :—

(1) *Spawning ponds.*—Small shallow ponds suitable for spawning fish. At the bottom there should be straw, brush or grass to which the ejected ova may adhere.

(2) *Rearing ponds* —Ponds usually of medium size, to which the fry are transferred and where they are retained, isolated from the larger fish, until they are disposed of as fry or have grown large enough to be removed to the stocking ponds.

(3) *Stock ponds.*—Large ponds in which the fish are kept until they have reached a marketable size. In Europe a number of predacious fish are also put in the stock ponds, as they are supposed to keep the carp in better condition by preventing them from becoming too lazy and sedentary. These fish would destroy the carp fry if the latter were put into the stock ponds while still small.

In a tropical climate like ours there is no necessity for wintering ponds.

An undulating country affords special facilities for carp culture. The ponds can be made by throwing dams across small valleys, and by the aid of dikes, and can be fed by small streams flowing into them, by springs, or they may depend entirely upon the rains to keep them filled. The ponds fed by streams should be protected from flooding by freshets by leading the main channel of the stream around them, so that the amount of water, which flows into the pond, could be regulated at will.

Construction of ponds.

154. As regards construction the following principle is observed in Europe: ditches from the various parts of the pond lead into other ditches which are deeper, and those finally lead into a still deeper pit (the "fish pit") which is situated at the place of outlet, usually near the dam. When it is desired to drain the pond, the water is drawn off gradually, the fish work down into the ditches, which completely drain the pond, and so they all come finally into the fish pit

where they can be taken with nets. It is common on many farms to have a curious "Rotation of crops;" the fish ponds are drained and turned to agricultural purposes for a season or two, when by closing the outlet gates and allowing the water to fill, they are again converted into ponds, and pisciculture is resumed. Such a proceeding is said to have a salutary effect upon both industries.

There are many places in Orissa and Chota Nagpur Divisions as well as in parts of the Burdwan and Bhagalpur Divisions where the land is undulating and where carp culture could be advantageously carried on on a large scale, and lands which are lying absolutely useless could thus be turned into good account. The return on any expenditure that may be incurred in constructing the ponds and working them would be very handsome. A commencement might be made in the larger Government estates, such as Khurda in Puri, which is well adapted for the purpose.

The practice of stocking tanks with fry obtained from rivers exists in many districts, and in some of them it is extending. But nowhere has any attempt been made to introduce spawning in ponds. If this could be done successfully, there is no doubt that pond culture would undergo much expansion. At present fry have to be transported long distances, attended with much loss and expense, both of which could be minimized by having cultural stations at convenient centres. In fact the owners of every considerable carp establishment could grow his own fry, and also supply them to the owners of tanks in the neighbourhood at a price much cheaper than what is paid at present.

Although an undulating country affords exceptional facilities for carp culture, there is no reason why the numberless tanks, ponds and hollows which are to be found in the rest of the province, especially in Lower Bengal, should not be fully utilized for pisciculture. Before carp fry is put in them, they should be carefully dragged and all predacious fish removed, and it would be well to try what artificial feeding can do to increase the rate of growth. It should not also be difficult to maintain the set of small ponds required for spawning purposes; and for filling them with water they should be constructed near a large tank or canal, or where there is facility for obtaining pipe water as in the suburbs of Calcutta, or any other town which has a system of water-supply. When water has to be lifted from a tank a small pump would be very useful.

Advantages of pond culture.

155. If the system of growing fry by pond culture once became general and the fry so raised could be had cheaper than those got from the rivers, the practice of gathering fry and spawn from the rivers would *pro tanto* diminish, and the benefit to the rivers would be incalculable, for there is no question that one of the main causes of the falling off in the supply of carps in our rivers is the capture of fry that incessantly takes place during several months every year.

In the waters of the United States where the carp fry are not liable to capture and the young fish are protected from destruction, carps have increased to such an extent that in less than 30 years of their first introduction, the supply has risen to over 20 million pounds a year, the city of New York alone consuming more than 9 million pounds. The price paid to fishermen is only about 1½ anna a seer.

If the system of getting the carp to spawn in ponds can be successfully introduced in Bengal, and at the same time measures are taken to prevent the destruction of fry and young and immature fish, there is every reason to hope that the growing scarcity of these valued fishes in our rivers would soon be a thing of the past. It is noteworthy that in Bihar where the practice of stocking tanks with fry taken from rivers is rare, the carp are fairly abundant in most of the streams, and considerable quantities of the fish are sent from there to Calcutta and other markets in the cold weather. Apart from the fact that pond-grown fry would be cheaper and more abundant than those taken from the rivers, the stoppage of the present practice would afford great relief to our rivers and be a potent factor in replenishing them; instead of taking fry from the rivers, it may be possible hereafter to plant pond raised fry in them.

It has not yet been found practicable to strip ripe carp and hatch the eggs artificially. What is done is simply to assist natural processes under conditions

that are more or less under control. There are other fish which could be successfully reared in ponds and tanks and hollows of all kinds. There is a great demand for koi (*anabas scandens*) and magur (*clarias magur*) which could be profitably met by regular culture. In fact, there is no reason why every bit of water surface, however shallow, should not be utilised for supporting fish life even temporarily. In Japan rice fields, which are enclosed on all sides, are used for growing small carp.

SECTION XII.—FISHERY LEGISLATION.

Basis and aim of fishery legislation.

156. The basis and aim of fishery legislation may be said to be threefold. These are:—

(1) *The interest of the fish.*—If there were no fish, there would be no fishermen and no fishing industry. Hence the preservation and fostering of the fish supply in their native waters is imperative.

(2) *The interest of the fishermen as an industrial community.*—The body of fishermen have legitimate rights, which must be recognised by the State. The rights of labour cannot and ought not to be ignored, and the fishermen form on important part of the population in most countries. Both on account of their numbers, of the households dependent upon them, and on account of the other industries involved in, and bound up with, the fisheries, the fishermen have a recognised claim to consideration.

(3) *The interest of the State as a whole.*—The interest of the State or as it is commonly expressed, the public interest, may not always coincide with the first or second interest described above, indeed they may come into serious collision, but the public interest should be paramount, and all the other interests should be regarded as of secondary importance. There may be a fourth interest, namely, the international, but in Bengal we are not much concerned with it. In dealing with the interest of the fishermen, it has to be remembered that the rival interests of different classes of fishermen are often conflicting. On the whole, however, these various interests converge, and as the fishermen and the buyers, packers or merchants, are mutually indespensible, the fisheries to be carried on successfully, require the united efforts of all concerned.

Fishery laws classified.

157. Fishery laws may be classified as follow:—

(1) Laws designed directly to preserve and protect fish, by—

(*a*) enforcing close times for a few hours daily or on certain series of days, or for several days together, or for certain seasons;

(*b*) defining a minimum size limit below which none of the kinds of fish specified can be taken. It aims to protect immature and undersized fish until they breed;

(*c*) regulating mesh of net with the same object, viz., liberation of small, immature fish;

(*d*) prohibiting the taking of spawn, the catching, killing, or even possession of, fry and of small sized fish of any specified species;

(*e*) reserving and setting apart special areas of water for encouraging the propagation of fish.

(2) Control of the fisheries, in the public interest, by means of—

(*a*) licenses, leases and permits, involving more or less exacting conditions in the exercise of the privileges conveyed;

(*b*) prohibition of nefarious and injurious methods, such as the use of dynamite and explosive generally or of such implements and appliances as are too destructive to be regarded as fair and legitimate means of capture.

(3) Laws to facilitate the migration of fish to and from their feeding and breeding grounds, by—

(*a*) forbidding obstruction to the ascent of fish to the spawning resorts;

(*b*) requiring that the main channels or rivers may not be obstructed, and no nets shall extend more than a certain proportion of the breadth of such river course;

(*c*) providing fishways and passes over dams and weirs.

(4) Regulations of the nature of precautions.

(5) Preventing injurious influences affecting fish life, such as river pollutions.

(6) Regulations aiming to secure the quality and purity in manufactured and prepared fish products are generally included under fishery laws, though strictly speaking, they belong to trade and commercial legislation.

The above enumeration is by no means exhaustive, and in not a few of the countries I visited there were other matters connected with fisheries that came under legislative interference.

Fishery laws, the fewer and simpler they are, will be all the more effective and beneficial, for the reason that they are then more easily understood, and that there is less excuse for wilful violation.

Fishery legislation justified.

158. The main justification for fishery legislation is the fact that the fishing industries are really the exploitation by a section of the community of a natural resource which is the heritage of all. All the inhabitants of a country have an interest in the regulation and protection of the fisheries, whether they be sea, coast or inland; and this interest of the public is not the less because in some inland waters, consisting of rivers and lakes teeming with the finest fish, private persons may have property therein. Such being the case, the whole country, speaking through the legislature, has the duty and the right to regulate the fisheries, to protect, preserve, and enhance their value and productiveness, as a national resource. This is all the more necessary as the views of fishermen are often narrow and one-sided, if not wholly mistaken. They rarely combine to foster the common interest of all or to further the industries upon which they as a class depend. No doubt the indifference of fishermen generally to the interests of the public, and to their own class, as a class, is due to thoughtlessness. Fish is such an important article of food to the great mass of the people that all unreasonable waste or destruction of this valuable commodity should be prohibited by legislation.

In Europe and America, as well as in Japan, there are very stringent fishery laws having for their object the protection and preservation of fish, the securing of facilities for the passage of fish to their spawning and feeding grounds and the exercise of control over fisheries in a variety of ways.

It is, however, the fresh water fish that require protection, and accordingly in all the countries I visited the strictest laws and regulations are in force for the preservation of fresh water fisheries. Close seasons have been prescribed for nearly all the food-fishes, spawning grounds are carefully guarded, implements of capture minutely regulated, the use of some being wholly forbidden, and of others being allowed under various conditions and the killing of fry and immature fish entirely prohibited.

Hindu close seasons.

159 Even a sparsely peopled country like Canada has found it necessary to protect its fresh water fisheries by direct legislative enactments and by Orders in Council having the force of law. In Canada and the United States especially, the combined effects of artificial propagation and judicious protection are apparent in the abundant supply of fresh water fish, which after satisfying local wants allows of large exports being made to other lands. But Bengal presents a very different picture. In spite of a magnificent river system, and of enormous water surfaces spread over the country, fish is becoming scarcer every day, as a result, among others causes, of want of protective regulations. The ancient Hindus, in their wisdom, prescribed certain rough close seasons which, as religious ordinances, were generally observed. I have already referred to the prohibition of the

eating of *hilsa* during a certain period. But there are other rules which are of general application and the benefits of which were far-reaching. Fish eating was absolutely proscribed during the months of *Baishakh*, April-May, and *Kartik*, October-November. The firstnamed month corresponds to the period when the country is driest and when there is the greatest contraction of the water surface, and fish-life is accordingly most precarious. It is the time when the fish congregate in large numbers in the few pools and hollows which still hold water, and carp and other important varieties are in roe and waiting for the monsoon to burst and liberate them from their confinement and enable them to perform their reproductive functions. During the other month the floods rapidly subside and the spent fish and fry are in a hurry to leave the *jheels*, etc., and return to the rivers through the *khals* where their wholesale capture is then extremely easy. The Hindu sages very wisely thought that if the people did not eat fish, there would be no inducement for the fishermen to catch fish, and a most necessary respite was given to the finny tribe at those times when it is most in need of protection, especially for the maintenance of future supplies. But all this is now changed; the number of non-Hindus upon whom a Hindu ordinance is not binding has become large, and even by Hindus the rules are more honoured in the breach. It is, therefore, incumbent upon the legislature to step in and prevent the merciless destruction of brood fish and spawn, which is fast depleting our waters. It should be remembered that measures of artificial propagation would be of no avail if the young fry remain liable to capture as soon as they are liberated and planted out, and that they can not, and ought not, to be relied upon as, in themselves, sufficient to restore depleted rivers or as furnishing any reason for allowing laxity in the protection of the fish naturally propagated or for permitting capture to exceed the natural producing power of a river or estuary.

Act IV of 1897 criticised.

160. The only fishery enactment in force in Bengal is Act IV of 1897, which was passed after many years of deliberation. It is a short Act of seven sections and wholly inadequate for effectually protecting the fisheries. The definition of "private waters" excludes from its purview many valuable water surfaces, including large rivers, which are sadly in need of protection. Unsatisfying as the Act is, it has remained a dead letter since the day of its passing. No rules have been framed under it, and it contains no provision for establishing close seasons for particular kinds of fish or for preventing the destruction of fry and immature fish. All this should be forthwith remedied. A beginning should be made in introducing a system of short close seasons for some of the most valued of our food-fishes and above all in prohibiting the killing of the fry and young fish of certain specified varieties, such as rahu, katla, mirgal and kalbaus. The definition of "private waters," should be greatly narrowed so as to exclude from it portions of our large rivers for which fishery grants or leases have been given. The Permanent Settlement has not stood in the way of measures being taken to regulate the relations between landlord and tenant, and various enactments have been passed in the interests of both. The mere fact that fishery rights in some waters have been given to private parties should not be an obstacle to the passing of such laws and regulations as are calculated to conserve the fisheries and increase the fish supply of the country. Those who may object to such legislation as being an encroachment upon private property will, it is hoped, come to understand that they also will participate in the benefits that are sure to accrue to the entire community.

Legislation proposed.

In this connection the following extract from the report of the Irish Inland Fisheries Commission, 1901, page 8, may be read with advantage:—

> The right of fishing for salmon and trout in estuaries and tidal waters, other than the open sea, is in Ireland differently circumstanced in different places. In some cases it remains, as it originally was, entirely in the public, by reason of the liberty which the Queen's subjects have. In other cases the right has passed altogether into private hands by means of a lawful grant, or prescription pre-supposing such a grant, and in other cases it is partly vested in such a private proprietor, and partly in the public. The interests of these private proprietors are most valuable vested rights, and it is from capture in tidal waters and estuaries that the supply of salmon for the public is mainly derived; but the interests of the public itself have long since established the necessity for restrictions. These

restrictions are, speaking generally, the annual close season, the weekly close time, and various regulations as to the mode of netting and capture.

The ideal form of protection in the case of any particular kind of fish would be to prevent its destruction until it is of an age when it can perform reproductive functions, and so give it a chance of multiplying for at least one season. Should that not be possible, it would yet be an advantage to save the fry during the first year of their existence, as the weight of meat to be obtained from the same number of fish would be greatly raised. No agency is so destructive as the hand of man; and although fish have many natural enemies, especially among their own class, which constantly prey upon them, yet there occurs no sign of depletion until man steps upon the scene. Hence arises the necessity for protective legislation.

It is not intended to introduce an elaborate system of control; and, for the present, it will be sufficient to take power to establish short close seasons and to prevent the destruction of fry and young fish of a few specified varieties only. Something must also be done to put a stop to the practice of erecting dams and other obstructions right across water courses and river channels, which seriously interfere with the passage of brood fish and fry from the spawning grounds and are great obstacles to navigation. They also contribute, in no small measure, to impede drainage and make the land waterlogged and unhealthy. As regards definite proposals on the subject I have little to add to what has been said in Section XIV of the preliminary report.

Departmental agency.

161. The agency by which the laws and regulations are to be enforced is a question of considerable difficulty. Act IV of 1897 gives the power to the police; but in view of the bad odour in which the police are held all over the country, it would be well if some other agency could be devised. Perhaps the services of the presidents of chaukidari unions and chaukidars might be enlisted, but, in any case, the Fishery Department should have a staff of its own to look after the work. It must also be made clear in all fishery legislation that the object in view is not to raise revenue, but to see that a valuable source of national wealth is worked in such a way as to confer the greatest benefit to the community at large.

Salt duty.

162. The subject of saltduty may also be referred to here. Salt is the principal, and in many cases the sole, ingredient in all curing operations, and even in cold countries no process of preserving fish can be thought of without a liberal allowance of it. In a tropical climate like ours the proportion of salt must be raised. In Europe and America either there is no duty on salt or, where there is, full rebate is granted on all salt used in the preservation of fish. The duty is high in Bengal, and even at the present reduced rate it presses heavily on the curing industry. The Madras Government has recently remitted the duty on salt used in preserving fish, and I would strongly press the Bengal Government to do the same. The concession should not be weighted with a number of harassing restrictions, as at the worst it cannot be abused to any material extent, and the people concerned are poor and ignorant.

SECTION XIII.—ORGANIZATION OF A DEPARTMENT OF FISHERIES FOR BENGAL.

Fisheries Departments in other countries.

163. In the concluding section of my preliminary report the necessity for organizing a Government agency for the conservation and development of the fisheries of Bengal was strongly insisted on. Of that necessity I have been more than ever convinced by my recent investigations in Europe and America. A brief outline of the constitution and working of the fisheries departments of the countries visited has been given in section VIII of the report. The most noticeable point in connection with the subject is the fact that the sea-fisheries call for very much less care and attention than the fresh-water fisheries which run the risk of being exterminated or greatly reduced in value unless measures are taken to protect them from incessant capture and ruthless destruction and to replenish them by artificial propagation. The ocean fish have such a wide range that there is not the same need for protection as in the case of fresh-water fish, and artificial means of replenishment is not required and can but

make little inpression in the face of nature's ample provision for reproduction. The sea is there to yield its piscine wealth, and the harvest depends on the extent and efficiency of the means of capture put forth. In Great Britain the supply of fish comes almost exclusively from the sea, and private enterprise has all along done what was necessary to extend and develop the sea fisheries, and has not waited for the initiative to come from Government. So far, therefore, as the sea-fisheries are concerned, the Government is chiefly occupied in collecting and publishing full statistics of all matters connected with the industry. As regards fresh waters too the action of Government is limited to passing enactments for the protection of salmon fisheries, artificial propagation being left wholly to private enterprise. In Ireland, however, the Congested Districts Board does much to develop the sea-fisheries in its jurisdiction by the grant of subsidies to fishermen, and by giving practical instruction in boat-building, barrel-making, net-mending and other allied industries. In Bavaria and Austria the fresh-water fisheries are mainly looked after by private associations under Government auspices. But it is to America which, in addition to valuable sea-fisheries, possesses the most extensive and the most important fresh-water fisheries in the world that we have to look for guidance. In the United States, the various States have their own separate Fishery Boards, administer their own fishery laws, and do much in the way of artificial propagation in their fresh waters, while the Federal Bureau of Fisheries is concerned chiefly with the work of research and replenishment as regards both sea and fresh water fisheries, and acts as an advisory agency throughout the country. The sea-fisheries are worked entirely by private enterprise. In Canada, owing to its great extent, sparsity of population and other causes, private enterprise has been somewhat wanting, but the Fishery Department of the Dominion Government has been most active in the development and conservation of both marine and fresh-water fisheries and has had to take the initiative in several matters which in the United States and Great Britain were the work solely of private enterpise.

In the United States the Fishery Bureau is a branch of the Department of Commerce and Labour, in Canada of Marine and in England of the Board of Agriculture.

Suggested constitution for Bengal.

164. For Bengal, I would suggest a constitution after the model of the Scottish Fisheries Board, viz., a salaried Commissioner and an advisory Board of six honorary members. For the present it is not desirable to make the proposed Board a branch of the Department of Agriculture, though later on such an union may be considered expedient. In organising a wholly new department, the Commissioner should be able to deal directly with the Government without the intervention of any other authority. The proposed advisory Council would consist of nominated members representing the landed, fishing, industrial and commercial interests. No protective measures, such as the prescription of close seasons, regulation of implements of capture, fixation of minimum size of fish, etc., should be undertaken without the approval of the Board, the members of which ought to be of great help in explaining to the fishermen and others the object of the measures, and in disarming their opposition, if not in securing their co-operation. As regards other work, such as the establishment of hatcheries and of research and observation stations, the introduction of new industries connected with aquatic products, etc., he should be generally free to act for himself, though even in such matters the advice of the members individually or collectively would be of value.

Varied character of the work.

165. The work of the new department, though not large in volume, at all events for the present, will be of a most varied character, and will, in this respect, differ considerably from that of the Fishery Bureaus of other countries. Besides protection, conservation, research and the collection of statistics, which may be said to exhaust the proper functions of Government in regard to fishery matters, the new department in Bengal will have to take the initiative and do many of the things relating to the industrial and commercial aspects of the question which elsewhere have more or less been left to private enterprise. For instance, while in Europe and America the sea-fisheries have been brought to their present state of development entirely by private efforts, so much so that the bulk of the supplies come from the sea, in Bengal we are yet in the dark as to what our seas are capable of yielding. It is not usual for Government to do

what is the legitimate work of private enterprise and capital; but in view of the peculiar and exceptional circumstances of the country the initiative in all such matters must come from Government. One of the duties that the department must take up at once is a full and systematic survey of the Bay and adjacent seas for ascertaining their fish resources, discovering and locating the fishing banks and grounds and finding out the best methods of capture.

It will also be for Government to show the way in the construction of suitable fishing boats, in introducing the best implements and appliances for capture, in the provision of cool store and rapid means of transit and in the adoption of the best and up-to-date methods of curing, salting and drying, of utilizing offal and other refuse and of making the fullest economic use of all marine products. In short, the Government must be the pioneer in the exploitation and development of our marine resources.

The work of the fishery department of Canada furnishes the nearest parallel to what will be expected of the new department in Bengal. In addition to the ordinary work of fishery bureaus, such as protection, fish culture, collection of statistics, research, etc., the Dominion Government gives bounties to fishermen for the encouragement of deep sea-fishing in the Atlantic, assists subsidiary industries for the developement of the sea fisheries, and introduces improved processes of curing and for utilizing fish waste with a view to raising the standard of fish products generally.

In Bengal, Government will have to do a great deal more; it will have to *create* and *build up* the sea fishing industry, with the object of handing it, let us hope at no distant date, to private enterprise. It will also be necessary to show the best way of working the estuarine fisheries by improved methods of capture and of bringing the catches expeditiously to market in a sound state, either fresh or salted.

Fishery laws and regulations.

166. As regards the fresh-water fisheries, the work will be of a very different kind. In Bengal no new methods of capture are required; all that human ingenuity can do has been devised to secure the finny tribe; there is no restriction of any kind, and immature and spawning fish are subjected to widespread slaughter throughout the year. A description of the nets, traps and appliances in use in different parts of the country has been given in the preliminary report. Neither in Europe nor in America can they be beaten in point of number or variety. The rivers and channels are obstructed, especially at the time of the descent of the fry and spent fish, to an extent that seriously interferes with the due growth of fish; and if this downward process is to be arrested, measures of restriction and protection must be taken as in other countries. The department will have most difficult work in connection with the promulgation and enforcement of fishery laws and regulations.

Pisciculture.

167. On the other hand, nature must be helped by artificial propagation, and to that end hatcheries and breeding ponds will have to be opened. Carp culture, which has reached a high state of perfection in Austria and Germany, has many lessons for us, for the best and largest varieties of our fresh-water fish belong to the carp family, and in our myriads of tanks, ponds, *jheels* and rivers we have a wealth of water surface which is capable of being turned into good account. A general extension of pond culture is to be welcomed, not only on its own account as adding to the food supply of the people, but also because it will materially help to prevent the dissemination of malarial poison, as the carp greedily devours mosquito larvæ and would soon convert what are now regarded as hot beds of fever into wholesome pieces of water. In view of the great success of the shad hatcheries in the United States, there is every reason to hope that *hilsa* hatcheries would do equally well in Bengal. With the increase of our knowledge, other kinds of fish will come under artificial culture. When the time comes for establishing hatching stations, it will be necessary to get out an expert from the United States where pisciculture has been developed more than anywhere else. For this work no great scientific knowledge is required; what is wanted is a practical acquaintance with hatching operations.

One branch of fish culture is the introduction of new form of fish either by importing and acclamatising foreign varieties or by transplanting new

species from one part of the country to another. The successful culture of carp in Europe and America furnishes a good example of the former, and the transfer of the shad from the east to the west coast of America, of the latter.

Scientific investigation.

168. Another question which will engage the attention of the department is to make adequate provision for the furtherance of scientific investigation into matters relating to our fisheries. It is perhaps unnecessary to enlarge upon the paramount importance of continuous scientific investigation on the subject. It is a duty and an obligation which is recognized by all countries that possess fisheries of any value, and it is manifest that it is only by obtaining reliable information regarding the history and life habits of fish that we can frame satisfactory regulations for their protection and perpetuation.

The study of fish diseases and parasites and their remedies would form an important part of the work of the scientific branch.

For this purpose observation stations will have to be opened at convenient centres, *e.g.*, Puri for marine fish, Diamond Harbour for estuarine fish, Bhagalpur or Monghyr for fresh-water fish, besides a central one in Calcutta or the suburbs. Each station will have a properly equipped laboratory, a museum containing specimens chiefly of local fish and other aquatic products and a library of books of reference. A well qualified fishery expert will have to be brought out from England for general supervision and for training up local students for the work.

Deputing Indian students to other countries.

169. It would also be desirable to send two young men, one to Europe and the other to America to study fishery matters under competent teachers. They should be graduates of the Calcutta University in Zoology. A two years' course would probably suffice, a portion of the time being devoted to learn practical hatching and pond culture. One of the duties of the scientific branch will be to introduce a system of popular lectures to be delivered at convenient centures, as is done in Austria and Germany.

Aquarium.

170. An important adjunct to the scientific work would be a properly equipped central aquarium containing both fresh-water and marine specimens, and it could not perhaps be located better than in Calcutta. In addition to being of great assistance in the prosecution of scientific research, it would be of value as a means of popular education and of arousing public interest in matters connected with aquatic fauna. The aquarium in New York is largely visited by school children of both sexes and is rightly regarded as an institution of much educational value.

Model curing factory.

171. In Bengal, the supply of fish at present falls so short of the demand that there is little done in the way of preserving fish. By far the greater quantity caught is consumed fresh, and a great deal more could be disposed of in that way. Nevertheless, in some localities, such as the Orissa coast and estuaries a fair amount of drying and salting is done during the cold weather by the fishermen themselves. The work is done roughly and badly and the curing is most imperfect. Yet plain salting and drying, which is all that is required at present, is a simple enough process, though it requires care and delicate handling, especially as to the amount of heat and exposure to be applied in the final process of drying. In Orissa and some other parts of Bengal very small fish are simply dried in the sun, no salt being used. They are mixed up with a lot of sand. Such small fish are never caught or made any use of in Europe or America. They cannot be properly salted and would not be worth the trouble and expenditure. They seem to be only fit for manure or fish paste. As regards the larger fish, only dry salting is done in Bengal; but in the best factories in England and the United States it is usual to keep the fish in brine for several days before drying takes place, and the whole process is so clean and wholesome that there is very little evil smell. But no perceptible improvement can be looked for in this country until curing is taken out of the hands of fishermen and made into a separate industry worked by capital. Individual fishermen have not sufficient means, and can deal only with their own

catches which are of limited extent. The development of the industry in western countries is entirely due to the employment of capital, and to the opening of curing establishments where business is done on a large scale and according to up to-date methods. The department will have to start an experimental model factory for salting, drying and smoking, and for showing how fish-oil can be extracted and isinglass made from the air-bladder. The sea and estuaries abound in sharks, skates and rays which, when caught, are generally thrown away and made no use of, but their oil and air-bladder are of great commercial value and their flesh when properly cured and dried finds a ready market in China. The refuse and offal of every description are convertible into fertilizers, and nothing need be rejected. The inseparable adjunct of a large curing establishment in Europe and America is a factory for the manufacture of manure from all kinds of fish-waste products.

Publications.

172. A very important work of the fishery bureaus is the publication of reports, statistics, and results of scientific investigations relating to all fishery matters and of popular bulletins for the instruction of those who are interested in the fishing industry. The United States Bureau of Fi-heries issues most of its publications free of charge, and they form an educational agency of no mean value. The new department will have to work on similar lines, especially as there is greater need here for the dissemination of sound knowledge on the subject.

APPENDIX A.

ENGLISH EQUIVALENTS OF FOREIGN TERMS.

Money.

America	...	100 cents	=	1 dollar	=	4 shillings	=	3	rupees.
		25 do.			=	1 shilling	=	12	annas.

		10 do.			=	1 *d.*	=	1	anna.

Measure.

Continent of Europe	...	1 metre or meter	=		=	39·37 inches.
		1 centimetre	=	$\frac{1}{100}$ of metre	=	·3937 do.
		1 hectare	=	10,000 square metres	=	about 2½ acres
		1 kilo	=	2½ lbs.	=	do. 1 seer.
		1 litre	=	2 pints	=	do. 1 do.

APPENDIX B.

Extracts from Dr. Alcock's Report.

1. In answer to enquiry, the sea fisheries of the Bay of Bengal are of a value well nigh incalculable. That they are unknown, uncared for, and unappreciated is unfortunately true; but it is equally true that they will prove a mine of wealth to whoever may have the enterprise to exploit them, and the tenacity of purpose to work them in the face of the apathy and incredulity that at present exists regarding them.

2. Before proceeding to any details of explanation in support of my opinion, I may state that, as naturalist to the Indian Marine Survey, I have carefully, and I think throughly, explored the Bay of Bengal from False Point in the Mahanadi Delta, to False Devi Point in the Kistna Delta; and, as these explorations have extended over four years, I have had ample opportunity of correcting and verifying all my earlier conclusions.

3. To make quite clear to practical men the exact value of Bay of Bengal fisheries, I may give the following particulars observed and recorded by myself:—

(*i*) Among the *sea-perches* there are no less than six quite distinct types of fishes occurring in vast numbers in the estuarine waters of the bay, all of which have an easily realisable economic value. The first of these is the Begti (*Lates calcarifer*) which is to be taken in swarms in all the estuaries, which grows to a large size, which furnishes a food of most delicate flavour and isinglass of first-rate quality, and which is easily dried and salted. I believe that the Begti fishery alone would pay handsomely. The other five sea-perches may be classed together. They are Serranus (several species), Lutianus (several species), Pristipoma, Diagramma and Gerres. They are all very abundant, two of them Serranus and Lutianus, grow to a large size and they are all good eating when fresh, and well adapted for salting and drying.

(*ii*) In the family of Squamipinnes there is one fish, Drepane punctata, a large deep flat fish very much like a pomfret, that swarms in all the estuaries, and would well repay the salter.

(*iii*) In the family of Kurtidae, one fish, Kurtus indicus, exists in vast swarms; it is specially well adapted for drying.

(*iv*) Among the Polynemidae occurs the well-known "Topsi" fish and the "Silee" fish. The latter which in cold weather passes up the estuaries in vast shoals commonly reaches a weight of 20 to 30 lbs. Its flesh is as delicate as the "Topsi" and its "sound" furnishes isinglass of the best quality. The "Silee" fishery alone would repay a capitalist, for the fish is easily salted and is highly appreciated by natives, and if it were only brought to the Calcutta market I am sure that it would have a great European demand.

(*v*) Sciaenidae, comprising the genera Scianna Sciaenoides and Otolithus, are practically unknown to the inhabitants of Calcutta; but that this is so appears incredible, for they are not only a fish of most delicate flavour—quite equal to good whiting—but they yield abundance of good isinglass. Many species of these fishes shoal in vast swarms in the Indian estuaries and are readily taken by hook or net. The Sciaena fishery alone would give a large profit to a wholesale fisherman. They are all well adapted for salting, and on the Bombay side are much used and much appreciated by natives.

(*vi*) The Trichiuridae, or Ribbon fish are taken in countless numbers off all the estuaries; they are well adapted for drying, and are well liked by natives.

(*vii*) The Carrengidæ (Caranx, Gazza, Equula, Lactarius, etc.,) are mackerel-like fish known as "Yellow-tails." They swarm through the estuaries, are easy to dry and salt, and are appreciated by natives as food. They alone would pay well.

(*viii*) Among the Stromateidæ we have the Pomfrets. It appears incredible that these delicately flavoured fish, appreciated by Europeans in Madras, Bombay and Karachi, are unknown to the residents in Calcutta. They are taken in vast numbers, off all the estuaries, throughout the cold weather.

(*ix*) Among Trachinidæ there are several species of Sillago, all very common. Their flesh is like good whiting, and in Madras they fetch a good price for the table.

(*x*) The Mugilidæ or Grey Mullets, are also very common.

(*xi*) Next come the flat fishes—the Soles and Flounders. Few, if any, Europeans in Calcuta know of their existence so close at hand; and yet soles 10 to 18 inches long can be got in any quantity desired, off all the estuaries of the Bay of Bengal.

(*xii*) Of the cat-fishes (Siluridæ) it is hard to speak adequately, so abundant are they. Though not much cared for by Europeans, they are highly esteemed by natives.

(*xiii*) The family of Scopelidæ yields the "Bummalo" or "Bombay Duck." Though only known in dried state on Calcutta tables, they are splendid eating when fresh, and they are to be caught all through the cold weather by the maund.

(*xiv*) The family of Clupeidae, or Herrings, which furnishes the well-known *hilsa*, is well represented in the estuaries.

(*xv*) Akin to the herrings is the curious Chirocentrus dorab, a herring-like fish that grows to a length of several feet that is extremely common, and that is much liked by natives.

(*xvi*) The eels grow to a large size and are extremely common.

(*xvii*) Lastly come the sharks and rays. They are taken in thousands. Their flesh is liked by natives, their fins, when dried, can always command a market in China and, perhaps in Burma, and the oil obtained from their liver has a high economic value. The shark fishery alone would amply repay the outlay of a large capital.

In conclusion, I can only repeat the opinions expressed at the outset that the fisheries of the Bay of Bengal are of inestimable value, and that whoever has enterprise enough to take them up, and strength of purpose and length of means to stick to them, will reap a manifold return. The only special question for consideration is that of carriage from sea to market.

A. ALCOCK, SURGEON, I.M.S.,

Surgeon Naturalist, Marine Survey Department, Calcutta.

CALCUTTA,

The 24th June 1898.

WEATHER AND CROP REPORT.

For the week ending the 2nd March 1908.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	Nil	8¼	7¾	Weather seasonable. Preparation of lands for the next season's crops going on. Condition of standing crops fair. Prices of food-grains almost stationary. No cattle-disease. Fodder and water sufficient.
2	BIRBHUM ...	Nil	6¾	7½	Food-grains sufficient at present. Sugarcane-pressing continuing. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	7½	7½	Weather seasonable. Harvesting of *rabi* crops going on. 1,106 men, 725 women and 19 children (total 1,850) on five test-works on the last day ending 28th February. No cattle-disease. Fodder and water sufficient. Condition of agricultural stock good. Common rice selling at 6 to 7 seers a rupee in the affected tracts.
4	MIDNAPORE ...	Nil	6	6	Sugarcane being sown. Prospects of sugarcane fair. *Boro* prospects satisfactory at Ghatal. Collector investigating scarcity at Egra and Ramnagar. Fodder and water sufficient.
5	HOOGHLY ...	Nil	6¾	7½	Weather seasonable. Stocks of food-grains likely to be sufficient till next harvest. Prices of food-grains stationary. No likelihood of scarcity at present. Prospects of *rabi* crops and sugarcane fair. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	Nil	8	8	Weather seasonable. Threshing of winter paddy going on. Transplantation of *boro* paddy seedlings nearly finished. *Rabi* crops being harvested. Prospects of standing crops fair. Stocks of food-grains sufficient till next harvest. Condition of agricultural stock good. Water and fodder supply sufficient.
7	24-PARGANAS	Nil	7	7	Weather seasonable. Harvesting of *rabi* crops going on in Baraset. Common rice selling at 7 seers at Barrackpore, 6½ seers at Baraset, 8 seers at Basirhat and 7⅛ seers at Diamond Harbour.
8	NADIA ...	Nil	6¾	6½	Prospects of standing *rabi* crops not favourable. Ploughing of lands going on. Prices of staple food-grains slightly fallen. Stocks of food-grains insufficient. Scarcity apprehended. Condition of agricultural stock good. Fodder and water barely sufficient.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
9	MURSHIDABAD	Nil	7½	7½	Prospects of *rabi* crops not favourable. Lands being ploughed for *aus* paddy in Lalbagh and Jangipur. Sugarcane cutting and pressing and transplantation of *boro* paddy going on in Kandi. Prices of food-grains stationary. Stocks of food-grains not likely to be sufficient till next harvest. Scarcity apprehended in places in Kandi. Water insufficient. Fodder insufficient in places in the Sadar Subdivision. The condition of agricultural stock fair. No cattle-disease.
10	JESSORE ...	Nil	7⅞	7⅞	Weather seasonable. Condition of standing *rabi* crops not favourable. Rain urgently wanted for cultivation. Stocks of food-grains sufficient at present. Prices of food-grains stationary during the week. Fodder and water sufficient. Scarcity apprehended by April next. No cattle-disease. Condition of agricultural stock good. High prices continuing.
11	KHULNA ...	Nil	9	9	Weather seasonable. Prices of staple food-grains stationary. Stocks of food-grains sufficient till next harvest. No apprehension of scarcity at present. Condition of agricultural stock good. No cattle-disease. Fodder and water sufficient.
12	PATNA ...	...	...	{ 8 / 10½* }	Report not received.
13	GAYA ...	...	...	{ 7 / 8½* }	Report not received.
14	SHAHABAD ...	...	...	{ 8 / 8* }	Report not received.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadar station	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	Saran ...	...	...	$8\frac{1}{2}$ $9\frac{1}{4}$*	Report not received.
16	Champaran ...	0·05	8 $10\frac{1}{3}$*	8 $9\frac{1}{2}$*	Rainfall at Bettiah 0·03 inches. Weather cloudy for two days, then clear. Rainfall though slight good for standing crops. Harvesting of peas commenced. Ploughing of fields continuing. Condition of standing crops good. Prices almost stationary. Stocks of food-grains sufficient.
17	Muzaffarpur	0·33	$8\frac{1}{2}$	$8\frac{1}{4}$ $9\frac{1}{2}$*	Rainfall at Sitamarhi 0·14 inches and at Hajipur 0 03 inches. Rainfall general. Standing *rabi* crops doing well. Condition of agricultural stock normal. Stocks of food-grains sufficient. No likelihood of scarcity. No cattle-disease reported. Fodder and water available. Common rice and maize selling at $8\frac{1}{4}$ and 10 seers a rupee respectively at Sitamarhi and at $7\frac{3}{4}$ and $9\frac{1}{4}$ seers a rupee respectively at Hajipur.
18	Darbhanga ...	0 30	$8\frac{1}{2}$ $9\frac{7}{8}$*	8 $9\frac{7}{8}$*	Weather seasonable. Some rain during the week. Harvesting of mustard still continuing. Tobacco being harvested in Madhubani subdivision. Fields being prepared for sowing *mung* and paddy. Prospects of standing crops good. Food-stocks sufficient. No apprehension of scarcity. No cattle-disease. Fodder and water sufficient.
19	Monghyr	...	...	$7\frac{3}{4}$ $8\frac{1}{4}$*	Report not received.
20	Bhagalpur ...	...		$8\frac{5}{16}$ $8\frac{13}{16}$*	Report not received.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
21	Purnea	...	...	8¼	Report not received.
22	Darjeeling ...	1·47	7 11*	7 11*	Weather seasonable. Hills—Wheat and barley growing well. Potatoes and maize being sown. Terai—Harvesting of mustard and potatoes going on. Harvesting of winter rice nearly finished. Standing crops in good condition.
23	Sonthal Parganas.	Nil	7½ 8 1/16*	7⅛ 9⅛*	Prices of staple food-grains almost stationary. Condition of agricultural stock fair. No apprehension of immediate scarcity. Fodder and water sufficient.
24	Cuttack ...	Nil	9 3/16	9 3/16	*Dalua* paddy, tobacco, mung, and cotton growing well. *Chana*, mustard, castor, wheat and *saradh* paddy being harvested. Sugarcane being pressed. Prospects of standing crops fair. Mango in fruit. Cattle-disease reported from Banki. Fodder and water sufficient. Persons attending test-works in Jajpur—83 men, 6 women and 8 children, total 97. Recipients of gratuitous relief in Jajpur, 1,053 men, 2,997 women and 3,066 children, total 7,116. Persons attending test-works—Kendrapara, 378 men, 63 women and 238 children, total 679. Recipients of gratuitous relief in Kendrapara—458 men, 1,278 women and 1,968 children, total 3,704. Recipients of gratuitous relief—Sadar, 15 men, 16 women and 4 children, total 35. Contract work available in abundance, but much impeded for want of labour.
25	Balasore ...	Nil	8⅛	8⅛	Weather seasonable. Pressing of sugarcane and harvesting of *rabi* crops continuing. *Dalua* paddy thriving, but suffering from insufficient water supply at places. Stocks of paddy insufficient. Scarcity in some places at the Basudebpur, Chandbali, Dhamnagar and Bhadrak thanas. Water scarcity felt in some parts of the Basudebpur, Chandbali and Dhamnagar thanas. Fodder insufficient in flood-affected areas. Common rice selling at 8 seers in Bhadrak. 287 men, 1,586 women and 2,423 children (total 4,296) receiving gratuitous relief in Bhadrak. 247 men, 33 women and 72 children (total 352) attending five test-works in Bhadrak. Figures for one test-work not received.
26	Angul ...	Nil	8	8	Weather seasonable. Planting of sugarcane commenced Prices of food-grains stationary. Cattle-disease reported. Fodder and water available.

* The figures indicate the price of maize in seers per rupee.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
27	PURI ...	Nil	8½	8½	Prospects of standing crops good. Cattle-disease reported from several parts. The price of common rice averaging nearly 7 seers a rupee in affected tracts. Number on gratuitous relief 373 men, 988 women and 760 children (total 2,121). 529 men, 56 women and 174 children (total 759) on test-works.
28	SAMBALPUR ...	Nil	9½	9½	Sugarcane fields being ploughed for plantation. Rice fields being ploughed. Standing crops good. Stocks of food-grains sufficient. No famine or scarcity apprehended. Cattle-disease prevalent in few villages in the Sadar tahsil. Fodder and water supply sufficient. Cheapest rice selling at 10½ seer a rupee at Bargarh.
29	HAZARIBAGH	Nil	6½	6½	Weather seasonable. Ploughing of fields still continuing. Scarcity apprehended in several places by the end of March. Fodder also likely to be insufficient by that time. Cattle-disease reported from one thana.
30	RANCHI ...	Nil	6½	6½	Weather seasonable. Ploughing of lands in progress. Cattle-disease reported from four thanas. Fodder and water sufficient. Large number of persons migrating to other districts.
31	PALAMAU ...	...	...	8 7/16	Report not received.
32	MANBHUM ...	Nil	7½	7½	Weather seasonable. State of standing crops fair. Planting of sugarcane going on. Cattle-disease reported from Barabazar, Gobindpur and Tundi thanas. Fodder and water sufficient so far. Condition of agricultural stock fair. Prices of staple food-grains practically stationary. Stocks of food-grains adequate at present. No sign of any scarcity so far. Demand for labour good. Scarcity possible later on in tracts where local labour not available. Common rice selling at 7 seers a rupee at Gobindpur.
33	SINGHBHUM ...	Nil	6	6	Weather seasonable. Harvesting of spring crops completed. Outturn of harvest not favourable. No cattle-disease. Fodder and water sufficient. Common rice selling at 6½ and 7½ seers a rupee at Kharsawan and Seraikella, respectively.

No.	Name of district.	Rainfall at sadar station	Price of common rice, in seers, per rupee.		Character of the weather, and state and prospects of the crops, etc.

		Inches.			
34	Cooch Behar	0·20	$8\frac{7}{15}$	$8\frac{7}{15}$	Days hot and nights cool. Prospects and condition of standing crops favourable. Prices of staple food-grains almost stationary. No apprehension of scarcity. Fodder and water sufficient.
35	Feudatory States, Orissa.*	...	...	...	Rainfall *nil*. The outturn of paddy estimated to be 10 to 12 annas in Athmallik, Pal Lahera, Daspalla and Nayagarh, of mustard 8 annas in Hindol and gram and sugarcane 12 annas in Boad. Castor promising well in Boad, Ranpur and Talchar. Sugarcane-pressing in progress in Boad, Daspalla, Ranpur, Kalahandi, Patna and Gangpur. Agricultural stock sufficient. Fodder and water sufficient. Public health good. Price of rice ranging from 7½ seers in Athmallik and 8 seers in Bonai, Keonjhar and Hindol, to 13 seers in Patna and 16 seers in Pal Lahera.

* The report is for the week ending the 22nd February 1908.

General Summary.—Reports have not been received from eight districts. Light rain fell during the week in Champaran, Muzaffarpur, Darbhanga and Cooch Behar, and there was a moderate fall of 1·47 inches in Darjeeling. In other districts from which reports have been received there was no rain. The preparation of lands for *bhadoi* crops, the planting of sugarcane and the harvesting of pulses and oilseeds are in progress. Sugarcane-pressing still continues in some districts. The condition and prospects of *rabi* crops are fair, Nadia, Murshidabad and Jessore excepted. *Dalua* paddy is suffering from want of water in parts of Balasore. Stocks of food-grains are reported to be insufficient in Nadia, Murshidabad and Balasore. The price of common rice is stationary in most districts. It has fallen in Burdwan, Nadia and Darbhanga, and has risen in Birbhum and Hooghly. Scarcity is apprehended in parts of Midnapore, in Nadia and Murshidabad, and later on in Jessore, Hazaribagh and in portions of Manbhum. Cattle-disease exists in Orissa and Chota Nagpur. The fodder and water-supply is scarce in parts of Murshidabad and Balasore. The persons attending test-works in Bankura and in Orissa were 3,737, and gratuitous relief was given to 17,272 persons in Orissa. No report has been received in regard to relief-works from Shahabad and Ranchi.

Dept. of Agriculture, Bengal,
Calcutta, the 3rd March 1908.

N. N. BANERJEI,
for Offg. Director of Agriculture, Bengal, on tour.

The total fall from 1st January to 29th February 1908		0·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office		1 40

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 21 hours preceding 8 A.M. of that day.

⌓, dew.

E. A. GAIT,
Chief Secy. to the Govt of Bengal

SURVEY OF INDIA.

NOTIFICATION.

Calcutta, the 18th February 1908.

No. 290.—An examination for admission to the Provincial Service of the Survey of India will commence on the 10th August next at Calcutta, Dehra Dun, Mussooree, Bangalore, Poona and Maymyo.

The number of vacancies offered for this year's examination will probably be four, of which one will probably be for native candidates.

Applications for rules (a copy of which is printed below) should be addressed to the Assistant Surveyor-General, in charge Surveyor-General's Office, 13, Wood Street, Calcutta.

No application to appear as a candidate for the examination will be entertained after the 30th June 1908.

It is probable that this special departmental examination will not be held in future.

SURVEY OF INDIA.

(*Vide* R. & A. Department No. 53—157—2, dated the 4th January 1901.)

MEMO. OF INSTRUCTIONS FOR APPLICANTS FOR THE PROVINCIAL SERVICE OF THE SURVEY OF INDIA.

1st.—Every candidate for the Survey of India must forward his application in writing to the Surveyor-General, accompanied by such certificates as to *age* (Baptismal Certificate required in case of European and Eurasian Candidates), *moral character*, *education*, *soundness of health*, and *good eyesight* as will clearly establish his suitability for employment. The application must further be accompanied by *specimens of plan and Freehand drawing*.* The candidate's name having been registered, he will be informed of the time and place of examination, when decided on. The examination papers will be issued from the Trigonometrical Branch Office in Dehra Dun.

2nd.—No application can be entertained from any individual whose age at the date of the completion of the examination will be under 18 or above 22 years, except in the case of Natives whose maximum age is fixed at 24 years. The Surveyor-General, however, has the power to extend the age limit to 30 years in the case of those candidates who are at the time in pensionable service in the subordinate grades of the Survey of India. No person who is married or is likely to be soon married will be admitted unless of pure Asiatic origin. Candidates, if of European parentage, must be Statutory Natives of India and have at least passed the High School Pass examination or First Arts examination at an Indian University having qualified in Algebra as one of the subjects, and if Natives the F.A. Pass examination.

3rd.—Candidates must be prepared to undergo the examination detailed below, which will give them entrance to the Training School at Dehra; no candidate will be considered to have qualified unless he gets 50 per cent. of the marks in Mathematics and 30 per cent. of the total marks in Drawing.

4th.—Examinations will be held in August as a rule The most suitable of the candidates who qualify will be selected.

5th.—When under examination for the Department, the candidate must sign the Bond printed on the reverse of this paper.

6th.—The selected candidates will enter the Department as Probationary Sub-Assistant Superintendents, 3rd grade, on a salary of Rs 120 *per mensem*, and they must pass out of the Training School within a maximum limit of two years. They will not be confirmed in their appointments until they have served at least one year in a field party and have been well reported on.

7th.—As Surveyors are liable to much exposure and to work in trying climates, the medical certificate should particularly specify that the candidate is of good physique and is likely to stand hard work, such as riding and walking long distances. The medical certificate should be in the form as given overleaf, signed by a Medical officer in Government employ not lower in rank than Lieutenant. During his course at the Training School, should he prove to be, in the opinion of the Superintendent, Trigonometrical Surveys, physically unfitted for the Department, that officer may demand a further certificate of fitness.

F. B. LONGE, Colonel, R.E.,
Surveyor-General of India.

GENERAL DEPARTMENT.

NOTIFICATION.

No. 1560.—The 5th March 1908.—In exercise of the power conferred upon him by section 19 of the Indian Treasure Trove Act, 1878 (VI of 1878), the Lieutenant Governor is pleased to direct that the following revised rules to regulate proceedings under the said Act shall be substituted for the like rules which were published under Notification, dated the 29th October 1885, at pages 989-990 of Part I of the *Calcutta Gazette*, dated the 4th November 1885.

H. C. STREAFIELD,
Offg. Secy. to the Govt. of Bengal.

1. The notification under section 5 (*a*) shall be published at the Collector's cutcherry, Subdivisional cutcherry, Munsif's cutcherry and police-station within the jurisdiction of which the treasure was found, and at some conspicuous spot in the village in which it was found.

Publication of notification.

2. On receipt of any notice under section 4, or on receipt of information from any person other than the finder that treasure has been found, the Collector shall report the fact direct to Government stating—

Collector's report.

(1) The name of finder.
(2) The nature of treasure and number of coins, if any.
(3) The approximate value.
(4) The date of finding.
(5) Whether, the treasure being coin, it is recommended that the Government should acquire it. In the event of such recommendation being made, if the find is small, all the coins shall be submitted to Government. In the case of large finds, only a few specimens of each type shall be submitted. The expert who examines the coins may correspond direct with the Collector and request that in the case of large finds all the coins, or such number of them as he may prescribe, be submitted to him.

(6) The Collector shall also submit a detailed report of the origin, surroundings and exact nature of the find.

(7) A copy of the Collector's report shall be forwarded by Government to the Superintendent, Archæological Survey, Eastern Circle.

3. In the case of information being given by a person other than the finder, the Collector shall issue a notice under section 5 (*b*) of the Act on the person informed against to show cause why he should not be prosecuted for not giving the required notice, and in the event of no cause being shown, the Collector shall take such further action as may seem expedient.

Proceedings when finder does not give notice.

4. All notices under section 5 shall be served at the cost of the Government.

Cost of notices.

5. The acquisition of the whole or any part of the treasure by the Collector, under the authority given by section 16 of the Act, shall be subject to the opinion of the expert or experts whose advice shall be previously obtained by the Government.

Acquisition of coins.

6. If for any special reasons, such as the largeness of the quantity found, or the coins being known to be of merely metal value, the Collector considers it unnecessary to acquire the whole of the coins found, he shall, in the report mentioned in rule 2 above, state (eighthly) why he considers that the whole of the coins found need not be acquired on behalf of the Government.

If only a portion to be acquired.

7. Coins submitted to the Government by Collectors shall be sent for examination to experts. These experts shall report to Government in the forms (A) and (B) appended to these rules the number and nature of the coins and their probable numismatic value. They shall also advise the Government whether the coins or any part of them should be acquired. Ordinarily all coins pronounced by the experts to be rare specimens shall be acquired by Government.

8. Collectors are empowered to purchase, otherwise than when proceeding under the provision of the Treasure Trove Act, any coins, whether gold, silver or copper, which appear to be old and not of British Mintage, when they are less than Rs. 10 in value, on payment of a sum equal to the value of the materials of the coins, together with one-fifth of such value. Coins so purchased shall be submitted to the Government in the General Department for distribution in the manner described in rule 2.

Collector to purchase old coin not treasure trove

Explanation. Such coins include coins struck at Calcutta, Murshidabad, Benares, Surat, Arcot, in the name of Shah Alum, dated 19th Juloos.

Proceeds of fines and sales to be credited to Government.

9. (*a*) All fines levied under this Act shall be credited to the head "Treasure Trove" subordinate to head XXV—Miscellaneous, and any treasure which vests in the Government under section 20 or 21 shall, unless it be such as it is thought advisable for the Government to retain, be sold in the manner described below with reference to the sale of surplus coins, and the proceeds shall be credited to the above head.

(*b*) Any surplus coins which it is considered desirable to retain after the distribution prescribed in rules 11 and 13 shall be sent to the Indian Museum and there kept for sale. Notices containing particulars thereof shall be published quarterly in the local Gazette and the "Gazette of India," copies of the notices being sent to the Asiatic Society and to the other institutions mentioned in rule 11.

Subject to be noticed in the Land Revenue Annual Report.

10. All Collectors shall append a paragraph to their Land Revenue Annual Reports, stating whether any notices have been presented during the year under report under section 4 or any proceedings taken before the Magistrate under section 20 or 21 under rule 8 above. Commissioners shall mention the results of the working of the Act as reported by Collectors in their own reports.

Distribution of coins acquired.

11. Coins, where more than two specimens are found and acquired, shall be distributed by Government, subject to the proviso laid down in rule 12, to the following 14 cabinets in the order in which they are named below. The distribution shall be intimated to the Superintendent, Archæological Survey, Eastern Circle—

(1) The Indian Museum.
(2) The Madras Museum.
(3) The Provincial Museum, Lucknow.
(4) The Lahore Museum.
(5) The Nagpore Museum.
(6) The Public Library, Shillong.
(7) The Archæological Museum, Poona.
(8) The Peshawar Museum.
(9) The Quetta Museum.
(10) The Ajmer Museum.
(11) The Rangoon Museum.
(12) Asiatic Society, Bengal.
(13) Bombay Branch, Royal Asiatic Society.
(14) The British Museum.

Accumulation of duplicates to be avoided.

12. It shall not be necessary to present coins to an institution, which already possesses exactly similar specimens. To facilitate the selection and to avoid the accumulation of duplicates, the Government shall be furnished by each cabinet with a catalogue of the existing collections, which shall also be published.

If the publication of catalogues cannot be arranged for, hand-lists shall be printed giving such details of the coins in each cabinet, that they can be recognised.

Retention of specimen coin by non-official examiner.

13. No official who is entrusted with the examination of the coins as part of his ordinary duties shall, in any circumstances, retain a specimen of any coin. Non-official examiners may, however, retain one specimen only of each variety: provided that specimens remain over after all the cabinets named in rule 11 have been supplied. In such cases a statement shall be furnished to the Government by the examiner or examiners concerned.

Submission of report.

14. The Superintendent of Archæological Survey, Eastern Circle, shall submit to the Government, not later than the 30th of June each year, a report containing a brief summary of the result of the examination, etc., of coins during that year. The report shall show the total number of coins dealt with in the year, classifying them by metal, and also roughly by the series to which they belong; it shall also give a short account of any notable finds. The form (C) appended shall be used for this purpose.

DECLARATION.

No. 1325J.—The 9th March 1908.—Whereas certain land was acquired by the Bengal Government under the provisions of Act I of 1894 and Act XVIII of 1885 for a public purpose, viz., for the laying down of the Joba siding of the East Indian Railway, taking off the main line at mile 124 furlong 4 feet 22 and the land affected by this declaration lying between points situated at mile 2, furlong 5, feet 545, and mile 3, furlong 2, feet 480, respectively, from the main line crossing, and whereas coal mines are situate under the said land, and whereas the Eastern Coal Company, Limited, have given notice to the Government of Bengal, in accordance with the provisions of Act XVIII of 1885, that the said Company intend to work the Joba Coal seam, and whereas the mines have been inspected by the officer appointed by the Bengal Government for the purpose under section 5 (1) of Act XVIII of 1885, and whereas it appears to the Bengal Government that the working out of the coal of the mines underlying the said land is likely to cause damage to the surface of the said land and to the works constructed thereon, and whereas the said Eastern Coal Company, Limited, have agreed not to work and get minerals underlying the land acquired for their siding, or underlying the land acquired for the branch or other lines with which the siding is connected or underlying the land of the branch or branches connecting the said siding with the main line, in such a manner as to injure or to endanger the safety of the undertaking or any part thereof, nor to claim any compensation for any restricted working:

Manbhum.

Now, therefore, the Lieutenant-Governor of Bengal is pleased to declare, under section 5, sub-section (2), clause (*b*) of the abovementioned Act, XVIII of 1885, that the working shall be carried on by the said Eastern Coal Company, Limited, in the manner and subject to the restrictions below specified, viz.—

(*a*) No coal shall be removed from any pillar the length or width of which is less than 40 feet.

(*b*) In the galleries bounding the pillars referred to in (*a*), where there is less than three feet of roof coal, no more roof coal shall be removed.

(*c*) New pillars shall not exceed 40 feet in either length or width, and must remain unworked.

(*d*) New galleries shall not exceed 10 feet in width and not less than 2½ feet of roof coal must be left unworked.

(*e*) No coal shall be worked where the thickness of the overlying rocks is less than 50 feet.

(*f*) Should it be desired to work coal from any other stratum than that known as the Joba seam the working thereof must be the subject of a separate notice under section 4 of the Land Acquisition (Mines) Act, 1885.

The plan marked L. A. M. A. No. 86 signed by the Chief Inspector of Mines, showing the boundaries of the acquired land and the actual heights and widths of the galleries which have already been driven beneath the acquired land may be seen in the office of the Chief Inspector of Mines in India by the parties concerned.

2. The Electrical Division shall be under the control of the Superintending Engineer, Central Circle.

No 35.—Mr. A. K. Taylor, Electrical Inspector, is appointed to be Executive Engineer of the Electrical Division.

M. J. SCOBIE,
Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

The 10th March 1908.

No. 4.— Notification.—In exercise of the powers conferred on him by sections 78 and 99 of Act III (B.C.) of 1876, His Honour the Lieutenant-Governor of Bengal is pleased to pass, with effect from the 1st April 1908, the following rules and to fix the undermentioned rates to be charged for water supplied from the Dhaka Canal in supersession of those now in force.

29th January 1908.	19th February 1908.
5th February ,,	26th ,, ,,
12th ,, ,,	4th March ,,

A draft of the alterations was published in the *Calcutta Gazette* of the dates noted in the margin as Notification No. 2, dated 28th January 1908.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

GENERAL CONDITIONS.

1. The revenue administration of the Dhaka Canal is vested in the Superintending Engineer of the Gandak Circle. The Divisional Canal Officer is responsible for maintaining the Canal in an efficient condition, for the distribution of water to the lessees, and for the closing of the outlets in rotation when required; he is further responsible for the assessment of water-rates.

2. The Collector of the district is responsible for the collection of water-rates.

3. Except as provided in the Act and in these rules, no appeal shall lie from an order passed by a Canal Officer, but the Subdivisional Canal Officer shall modify any order passed by him in accordance with the order of the Divisional Canal Officer, and the Subdivisional Canal Officer or Divisional Canal Officer shall modify any order passed by him in accordance with the orders of the Superintending Canal Officer, who shall exercise a general control over the proceedings of all Canal Officers.

4. In appeals to the Collector under section 91 of the Act other than those especially provided for in rule 16, the Collector may require the Superintending Engineer to state his opinion in writing, which opinion shall form part of the record of the proceedings of the case.

ON APPLICATIONS.

5. Any person who requires a lease for water may apply to—

(*a*) the Sectional Officer, or
(*b*) the Subdivisional Canal Officer

These preliminary applications must be made in writing and may be on plain paper. The person receiving them shall enter on the back any further data required.

ON LEASES AND PERMITS.

6. Leases for a term of 3 years may be granted under the following conditions:—

(i) The lands to be irrigated must constitute a block with defined boundaries and be so situated that adjoining lands will not ordinarily or probably be irrigated with water supplied.
(ii) All the irrigable lands within the limits of the block must be included.
(iii) Sufficient distributing channels must be provided to enable the irrigation to be carried on without waste of water.
(iv) No lease will be granted when the water must cross unleased lands unless there is a channel which will, in the opinion of the Subdivisional Canal Officer, convey the water across the intervening land without waste.

Applications for leases for a term of years will be received up to 1st May in each year. It shall be within the discretion of the Divisional Canal Officer to accept or decline applications for such leases if presented at a later date.

7. The Divisional Canal Officer shall issue permits for leases for a term of years to the lessee through the Subdivisional Canal Officer.

8. When water is required, pending the completion of a lease for a term of years, the Subdivisional Canal Officer may, on application, grant a season lease which will be cancelled if the lease for a term of years is subsequently concluded.

9. Season leases for the supply of water for any crop may be granted, on application, by the Subdivisional Canal Officer.

10. When a lease is granted, an agreement shall be taken in forms given in Appendices I, III, IVA, IVB, VII and IX and a "permit" shall be given to the lessee or lessees in forms given in Appendices II, IV, IVC, X and XI.

11. Water for filling tanks may be supplied when available for cash paid in advance; the water taken into the tanks may be used for irrigation or any other purpose (forms of application and permit are given in Appendices V and VI).

ON WATER-RATES

12. The following rates will be charged for water supplied, whether taken by lift or flow:—

	Rs.	A.	
I.—Leases for a term of 3 years, 16th June to end of February in each year	1	0	per acre.
II.—Season leases, 16th June to 31st October ...	2	0	„ „
III.—Season leases, 1st November to end of February ...	1	0	„ „
IV.—Season leases, 1st March to 15th June	2	0	„ „
V.—For one or more waterings supplied between 1st March and 15th June	0	12	for each watering.
VI.—Water supplied to tanks	1	0	per 10,000 c. ft

ON DEMAND STATEMENTS.

13. The statement of the amounts due for the water-rates leviable under these rules shall be prepared under the supervision and signature of the Divisional Canal Officer in such form as shall, from time to time, be sanctioned by the Lieutenant-Governor. A *parcha* showing the area and amount assessed against each cultivator shall be sent to him through the cultivator's representative when or before the demand statement is sent to the Collector for realization Persons charged under rule 33 shall be served as soon as the charge is made, by post or otherwise, with a statement showing the amounts charged.

14. The rates for water supplied on a lease for a term of years between the 16th June and the end of February shall be payable in two equal instalments, falling due respectively on the 1st January and 1st February following, but all sums of Rs. 10 and under shall become due on the 1st January and be payable in one instalment.

The rates of water supplied on season leases between the 16th June and 31st October shall be payable in two equal instalments falling due respectively on the 1st January and 1st February following, but all sums of Rs. 10 and under shall become due on the 1st January and be payable in one instalment

The rates for water supplied on season leases between 1st November to end of February shall fall due on the 1st April following.

The rates for water supplied on season leases between 1st March and 15th June shall fall due on the 1st July following.

The rates for water to be supplied to tanks shall be payable before water is supplied.

15. Water-rates imposed under rule 33 shall fall due as soon as the assessment is made and shall be realised at once.

ON REMISSIONS.

16. Remission of water-rates, either in whole or in part, shall be granted as follows:—

(*i*) By the Divisional Canal Officer for errors in assessment or rates.

(*ii*) By the Divisional Canal Officer for injury to a crop on a leased area caused by a deficiency in the supply of water.

In the latter case a written application must be made at least 20 days before the crop is cut.

17. Remissions on other grounds than the above require the sanction of Government.

18. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is not realisable may be written off as irrecoverable on the authority of the Superintending Canal Officer.

ON CULTIVATORS' REPRESENTATIVES.

19. In all applications and permits other than those relating to sale of water by volume, the names of one or more persons shall be entered as *lambardar* who will be responsible for discharging the duties mentioned below:—

I.—Obtaining signatures to applications and certifying to the correctness of the same.

II.—Attending and giving assistance in measuring land irrigated, or proposed to be irrigated.

III.—Giving timely information to the Canal Officer or subordinate of any insufficiency in the supply of water and promptly reporting when the irrigation of the leased area, on any channel, is complete.

IV.—Supervising the distribution of the water supplied through an outlet amongst the persons entitled thereto and reporting any misuse of the same.

V.—Being present when complaints are investigated by a Canal Officer, or subordinate, and giving information required in connection with the same.

VI.—Receiving *parchas* from the Canal Officer and distributing the same amongst the persons named therein.

VII.—Reporting before the 15th of October all cases in which crops have been injured by deficiency or irregularity of supply in the *kharif* season so that these cases may be investigated before water-rates are demanded.

VIII.—Reporting to the Collector or to such officer as he may appoint mutations in holdings in the case of leases for a term of years

IX.—Assisting the Collector by pointing out the residences of the persons assessed and identifying them.

20. In the case of season leases the remuneration for performing the duties mentioned in the rule immediately preceding shall be two per cent. on the assessment (excluding fractions of a rupee) which shall be paid by the Canal Officer. The amount paid shall be calculated in rupees and annas only, pies being omitted.

21. In the case of leases for a term of years other than those entered into jointly with contractors the remuneration to be paid to the *lambardar* for performing the duties mentioned in rule 19 shall be three per cent. yearly on the assessment of the year (excluding fractions of a rupee) which shall be paid by the Canal Officer. The amount paid shall be calculated in rupees and annas only, pies being excluded.

22. The *lambardar* will be appointed by the Subdivisional Officer in consultation with the applicants for the lease and must be a substantial person having a beneficial interest in part of the land to be irrigated. There is no objection to different *lambardars* being appointed to represent sections of the applicants or to two or more persons being jointly appointed as *lambardars* on behalf of the whole of the applicants. In case the Subdivisional Canal Officer cannot agree with the applicants in the appointment of *lambardar*, he shall nominate a *lambardar* for approval by the Divisional Canal Officer.

In those cases where an application is made by a contractor and cultivators jointly for a lease for a term of years the *lambardar* shall be nominated by the contractor.

23. The Divisional Canal Officer may, for reasons which appear to him to be sufficient and which must be recorded, remove a *lambardar* from his appointment, and in that case a new *lambardar* shall be appointed in the manner prescribed in the rule immediately preceding.

24. The fees to be paid to *lambardars* will only be disbursed if the duties specified have been satisfactorily performed. The Divisional Canal Officer may retrench the whole or any part of the fees payable for reasons to be recorded in writing In calculating the fees payable, fractions of one anna will be excluded.

Intermediary agency.

25. Leases for a term of years will be entered into with associations of cultivators as specified in these rules; and also on the joint application of the cultivators and of some person hereinafter called the contractor who shall collect and pay to Government all sums due under the agreement on account of water-rates. The joint agreement shall be in the form given in Appendix VII to these rules. The contractor must have a beneficial interest in some part of the land included in the application extending for the full term of the lease

26. Contractors are authorised to collect water-rates from the cultivators who have signed the application and from their successors in interest in the land included in the block at the rates fixed by the Lieutenant-Governor.

27. A contractor (or in case there be more than one, each contractor severally) shall use due diligence in the collection of the water-rates specified in the agreement from the cultivators who have applied for the water-supply. In the case of his failure after due diligence to collect, he shall within thirty days of the rates becoming due submit to the Collector a list showing the names of the defaulters with the sums due from each and the Collector shall thereupon proceed to realise the amount due from the said defaulters according to law.

28. A contractor (or in case there be more than one, each contractor severally) shall be responsible for all sums payable on the agreement except such sums as he may satisfy the Collector that he has been unable to collect after using due diligence and shall be entitled to a commission of 5 per cent on all sums collected by himself.

29. In the case of a lease entered into under an application in the form given as Appendix I, a contractor may subsequently be appointed by the Collector with the written approval of the Divisional Canal Officer. Such contractor must for the whole term of the lease have a beneficial interest in some part of the land included in the application and must sign an application in the form given as Appendix VIII. The appointment shall not be made unless the *lambardars* and leading cultivators give their assent in writing thereto and the Collector is satisfied that the appointment of a contractor is acceptable to the signatories to the lease.

30. The contractor appointed under rules 25 and 29 may, but shall not necessarily be, *lambardar*. The *lambardar* will in all cases be appointed by the Canal Officer under the provision of rule 22 and shall be remunerated at the rate specified in rule 21 subject to the conditions mentioned in rule 24.

31. No steps shall be taken to prepare a joint application by cultivators and a contractor until the written assent of the Collector to the proposed contractor has been received, nor shall the Collector take any steps towards the appointment of a contractor under rule 29 until the written assent of the Divisional Canal Officer has been received. The Collector may, before approving of a contractor under this rule, require him to give security for the due performance of the contract.

32. A contractor may resign his interest in the lease by giving notice to the Divisional Canal Officer three months at least before the 16th June next following, in which case his connection with the lease shall cease from that date and the Subdivisional Canal Officer shall proceed to appoint a *lambardar* under rule 22 and the Collector to realize water-rate due directly from the lessees.

The Divisional Canal Officer may, at the instance of the Collector, remove any contractor who fails to use due diligence in making collections. In such cases three months' notice at the least before the 16th June next following shall be given and the removal shall take effect from that date. The Collector may, under the conditions and procedure specified in rule 29, appoint a new contractor in place of a contractor who has resigned or who has been removed.

On unauthorised irrigation

33. For the unauthorised use of canal water a rate of Rs. 5 per acre shall be charged; this rate may, however, be reduced at the discretion of the Divisional Canal Officer.

34. When it comes to the knowledge of the Subdivisional Canal Officer that canal water has been taken in an unauthorised manner, he shall hold a local investigation, and, if he considers that the land deriving benefit is liable to assessment, he shall serve a notice on the persons concerned, fixing a date for hearing objections. Any objections made shall be taken down and the whole record forwarded to the Divisional Canal Officer for disposal

35. The Divisional Canal Officer after hearing any objection that may be raised shall, if he is of opinion that the land should be assessed, fix the rates allowed under rule 33 and return the record to the Subdivisional Canal Officer who shall then complete the assessment.. Water-rates shall not be charged where the unauthorised irrigation has occurred through the act, neglect or default of a Canal Officer or subordinate. It is not an unauthorised use of water during the *kharif* season to receive or to lead water on to unleased lands which may have been supplied to lands under lease in excess of requirements

36. Applications for leases may be subsequently received from villages in which unauthorised irrigation has occurred, and these villages may be granted leases; in such cases the persons assessed under rule 33 shall also pay the water-rates due in respect of the lease subsequently granted, provided that the total of these two rates shall not exceed the maximum rate chargeable under rule 33. In such cases of double assessment the Divisional Canal Officer may remit, in whole or in part, the rates assessed under rule 33.

On penalties and cancelling of leases.

37. Should it be proved, after due enquiry, that the supply of water given to any area leased for a term of years is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer to direct that the lease shall be cancelled with effect from the 1st June next following.

38. The Superintending Canal Officer may, with the concurrence of the Collector, direct the Divisional Canal Officer to—

(I) Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realising water-rates until all the arrears of water-rates due are paid up; and also, if specially so ordered, until half the amount due under new applications is paid in advance. An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

(II) Cancel any lease for a term of years, if on the 1st June water-rates to the extent of half the demand for one year are in arrears.

(III) Cancel any lease the lands covered by which cannot be irrigated from the canal except by passing water over an unleased area.

Miscellaneous.

39. No person shall, without the written permission of the Divisional or Subdivisional Canal Officer, pass or cause any animal or vehicle to pass along or across any of the works, channels, or banks of a canal or drainage work after he has been desired to desist therefrom, except by means of such bridges, fords, and ferries and their approaches as have been provided for the purpose. Any person who after due warning breaks this rule may be proceeded against under section 93, clause (9) of the Bengal Irrigation Act, III of 1876.

40. Unless specially exempted by the Lieutenant-Governor from the operations of these rules, no officer employed on the canal shall have any interest in the distribution of water from it, or purchase or bid for any Government property sold thereon, either in his own name or in the name of another, or jointly or in shares with others.

APPENDIX I.

APPLICATION FOR A LEASE FOR A TERM OF YEARS.

We, the undersigned, of mauza , pargana , thana , apply for water to be supplied from distributary of the Dhaka Canal, for a term of years, commencing on the 16th June and ending end of February . The supply of water is required for the irrigation of the block of land formed by our holdings as specified below.

(2) We agree that the amounts due shall be payable to the Collector of Champaran or to such person as he may appoint on the 1st January and 1st February, or if the charge is Rs. 10 or under, on 1st January of each year, and shall be payable independently of our requiring water in any particular year or not.

(3) We also agree to be bound by the rules published in the *Calcutta Gazette* for pages , Notification No.

(4) We agree that this application shall not be deemed to have been completed until all the irrigable fields within the block have been signed for, and that failing such completion any season lease which may have been granted shall be enforced.

(5) We agree that the areas and amounts as given in the statement below are correct at the commencement of the lease, and in token of agreement we attach our individual signature or mark.

(6) Our heirs and representatives shall be bound by the terms of this agreement in case of our decease.

APPENDIX III.

(Kharif season.)

APPLICATION FOR A SEASON LEASE.

Mauza , *pargana* , *distributary*

(1) We, whose names are attached, apply for water to be supplied from the above-mentioned distributary from the 16th June to 31st October for the irrigation of the block formed by our holdings as specified below.

(2) The approximate area to be irrigated by each applicant is stated in the schedule following, and each of us agrees to pay water-rates on the area in our occupation as found by actual measurement at the rate of Rs per acre.*

(3) This application is made under the rules passed under Act III (B.C.) of 1876.

We agree to abide by all the rules passed under the Act.

We agree to pay the whole of the water-rates due on the application on or before the 1st January and 1st February next, or if Rs. 10 and under, on or before the 1st January.

The following are the boundaries of the block :—

North—

South—

East—

West—

Signature of applicant.	Date.	Signature of applicant.	Date.

* A note should be given to show the equivalent in the local measure of an acre.

APPENDIX IV.

PERMIT FOR A SEASON LEASE.

Number of application and date—

Name of village—

Name of pargana—

Name of distributary—

Area* to be irrigated, more or less—

Dates of supply—

Water-rates due—

Name of representative—

This permit is issued under section 75[of Act III (B.C.) of 1876 for the irrigation of the area mentioned above. It is expressly agreed that water is supplied for the sole purpose of irrigating the land mentioned in the application. Water-rates will be charged on the areas in the occupation of each applicant within the block as ascertained by actual measurement.

* Areas to be given in acres with a note to show the equivalent in the local measure of an acre.

Subdivisional Canal Officer.

APPENDIX VII.

FORM OF APPLICATION FOR A LEASE FOR A TERM OF YEARS JOINTLY WITH A CONTRACTOR.

Mauza . , *Pargana* , *Distributary* .

1. We, whose names are attached, apply for water to be supplied from the above-mentioned distributary from 16th June to the end of February of each year for years for the irrigation of the block formed of our holdings as specified below.

2. The area to be irrigated by each applicant is stated in the schedule following and each applicant agrees to pay water-rates on the area recorded against his name at the rate of Rs. per acre*. This sum will be payable independently of our requiring water in any particular year or not.

3. The application is made under section 74 of Act III (B.C.) of 1876, and the rules issued under it.

4. We agree to pay the water-rate due on this application in one *kist* on or before the 1st February.

5. The permit granted may be cancelled by the Divisional Canal Officer under the sanction required by rule 38.

(I) If after the lapse of one month from the latest date of payment the water-rates due on this application (except such as are irrecoverable under rule 18) are in arrears.

(II) If water supplied for irrigating the land mentioned in the application is habitually wasted or misused, it being expressly agreed that water is supplied for the sole purpose of irrigating the land mentioned in the application.

6. We desire under rule 25 that shall be appointed as contractor to whom we agree to pay water-rate as they become due so long as he is authorised by proper authority to receive the same. Should the contractor resign or be removed, we engage to pay water-rates to the Collector or to some person authorised by him to receive the same.

SCHEDULE.

Name of cultivator.	Area to be irrigated in acres*	Signature or mark of cultivator.	Signature of witness to culivator's signature.
1	2	3	4

7. I agree to become contractor under rules 25 to 32 for the collection of all sums payable under this application and to be bound by all rules passed under Act III (B.C.) of 1876. I will abide by the rules mentioned and all others passed under the Act, and give every assistance in my power to the Collector in any legal proceedings that may be instituted for the recovery of water-rates under this application.

* A note should be given to show the equivalent in the local measure of an acre.

APPENDIX VIII.

(REFERRED TO IN RULE 29.)

FORM OF APPLICATION FOR APPOINTMENT AS A CONTRACTOR.

1. I apply to be appointed a contractor under rules 25 to 32 for the collection of all sums payable on applications of

Mauza , * *Pargana* &c.

2. I will abide by the rules mentioned above and by all others passed under the Act, and give every assistance in my power to the Collector in any legal proceedings that may be instituted for the recovery of water-rates under this application.

APPENDIX IX.

Form of application for one or more waterings during the hot weather season when the supply is intermittent.

Mauza , *Pargana* , *Distributary* .

1. We, whose names are attached, apply for water to be supplied from the above-mentioned distributary for the irrigation of the areas mentioned below.

2. The approximate area to be irrigated by each applicant is stated below, but each of us agrees to pay water-rates at 12 annas per acre for each watering received between 1st March and 15th of June, on the actual area in our occupation, as found by measurement with the proviso that only areas actually irrigated will be assessed.

3. We agree to prevent, as far as possible, water supplied being wasted or used in an unauthorized manner.

4. This application is made under and subject to the rules passed under Act III (B.C.) of 1876 and we agree to abide by, and to be subject to, these rules.

5. We agree to pay the water-rates due on this application on or before the 1st of July next.

Name of cultivators.	Description of crop.	Area more or less to be irrigated in acres*	Signature or marks of cultivator.	REMARKS.
1	2	3	4	5

* A note should be given to show the equivalent in the local measure of an acre.

I hereby certify that the signature or marks above are genuine and that the areas mentioned are approximately correct.

Signature of Lambardar.

APPENDIX X.

PERMIT FOR A LEASE FOR A TERM OF YEARS JOINTLY WITH A CONTRACTOR.

Number of application and date—
Block number —
Village—
Pargana—
Thana—
Name of distributary—
Area to be irrigated—
Date of supply—16th June to end of February in each year.
Water-rates due—
Duration of permit—
Name of contractor—

This permit is issued under section 75 of Act III (B.C.) of 1876 for the irrigation of the area mentioned above. It is subject to the provisions of all rules passed under the Act and is liable to be cancelled, if on the 1st of March in any year water-rates are in arrears, or if water, which it is expressly agreed is supplied for the sole purpose of irrigating the land mentioned there, is habitually misused or wasted. Water-rates will be charged whether in any particular year water is or is not actually required.

Area of land in acres.*	Boundary.	Name of crop.	Term of kabuliat and block number.	REMARKS.

* A note should be given to show the equivalent in the local measure of an acre.

Canal Officer.

APPENDIX XI.

(HOT-WEATHER SEASON.)

PERMIT FOR ONE OR MORE WATERINGS WHEN THE SUPPLY IS INTERMITTENT.

Number of application and date—

Name of village—

Name of pargana—

Name of distributary—

Area* to be irrigated, more or less—

Dates of supply—

Water-rates due—

Name of lambardar—

This permit is issued under section 75 of Act III (B C.) of 1876 for the irrigation of the area mentioned above. It is expressly agreed that water is supplied for the sole purpose of irrigating the land mentioned in the application. Water rates will be charged on the areas in the occupation of each applicant within the block as ascertained by actual measurement.

* Areas to be given in acres with a note to show the equivalent in the local measure of an acre.

Subdivisional Canal Officer.

[Fourth publication.]

The 18th February 1908.

No. 3.—Notification.—In exercise of the powers conferred upon him by sections 78 and 99 of Act III (B. C.) of 1876, His Honour the Lieutenant-Governor of Bengal proposes to pass the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These rules and rates will supersede those now in force.

R. E. CARTER,

Offg. Secretary to the Govt. of Bengal.

Leases for a term of years.

1. The country served by the canals shall be mapped out into blocks of convenient size in accordance with the features of the ground, natural or artificial. So far as may be practicable, the blocks shall be separated by drainage lines. This shall be done by the Subdivisional Canal Officers under the guidance and control of the Divisional Canal Officer.

2. Each block determined as above shall be numbered and recorded with its gross and irrigable areas in registers to be maintained by the Subdivisional Canal Officers. The blocks shall also be marked on maps to be maintained by the same officers.

3. Leases for not more than seven years may be granted for the whole irrigable area of a block or for definite parts of a block under the following conditions:—

I.—Ordinarily the whole irrigable area of any village so far as situated within the block must be included in the lease. If the lands of a village within the block are divisible into two or more distinct parts which can be irrigated independently, a separate lease may be granted for each part.

II.—All leases within one block shall be so granted that they may expire on the same date.

III.—No lease shall be granted when the supply of water must of necessity be delivered across an unleased area, unless a channel exists, which, in the opinion of the Subdivisional Canal Officer, will deliver water without waste across the unleased area.

4. The Superintending Engineer shall fix from time to time the gross area for which and the limits of the canal within which, leases for a term of years may be granted.

5. Maps of all villages in which lands have been brought under lease for a term of years, or in which there is any probability of such leases being taken, shall be kept in the subdivisional canal offices. These maps to be at scale 32″ = 1 mile when such are available, and elsewhere at scale 16″ = 1 mile.

6. The preliminary application for a lease for a term of years, either new or renewal, may be of an informal nature, but it must be in writing. It may be presented and shall be received either at the Subdivisional or Sectional Canal Office; in the latter case the Sectional Officer shall forward it immediately to the Subdivisional Canal Officer. The Subdivisional Canal Officer as soon as he has, by personal enquiry or by an enquiry made by the Sectional Officer, satisfied himself that the land in question constitutes a definite block or a definite part of a block, and that it can be irrigated, shall at once inform the Divisional Canal Officer giving such particulars as that officer may direct, and shall ask his formal approval to the lease being proceeded with. On receipt of such approval the Subdivisional Canal Officer shall forward the preliminary application to the Zilladar, in order that the detailed assessment may be taken in hand. The lands to be brought under lease shall be indicated on a copy of the map alluded to in rule 5.

7. The Zilladar on receipt of the application shall depute an amin to prepare the *khasra* or detailed assessment paper. This shall be done on the ground with the aid of the revenue survey map and *khasra*. Should the survey map and *khasra* not be available, the amin shall make a sketch map, and shall measure the areas of the holdings with a chain or measuring-rod.

8. When the amin has completed the *khasra*, the Zilladar shall forward it to the Subdivisional Canal Officer for approval.

9. As soon as the *khasra* has been approved by the Subdivisional Canal Officer, he shall return it to the Zilladar endorsed with his signature in token of approval.

The Zilladar shall then prepare a *khatian* or abstract of the *khasra*, and shall have the form of application, given as Appendix No I to these rules, filled up and signed or marked by each of the applicants, in the presence of two witnesses.

When the application has been completely signed, the Zilladar shall send it to the Divisional Canal Officer, by whom the permit or formal approval of the lease shall be signed and issued in the form given as Appendix No. III to these rules. The permit shall be made over to the representative of the cultivators by the Subdivisional Canal Officer by means of his Sectional Officers. The Divisional Canal Officer shall return the application to the Deputy Collector, Revenue Division, with a copy of the permit for record.

10. Should it happen that the cultivators of the block proposed for lease are not unanimous, and that certain of them decline to sign the application, the Zilladar shall report the matter to the Subdivisional Canal Officer. This officer shall hold a local enquiry, recording the statements of the persons who decline to sign and recording his personal opinion on the reasons given. He shall then send a report to the Divisional Canal Officer, who shall decide whether the lease may be accepted excluding the fields in the occupation of the persons who decline to sign, or whether the lease shall be declined. The Divisional Canal Officer is authorised to grant a lease when not less than 95 per cent. of the net irrigable area of the block has been signed for. In particular cases should it be desirable to grant a lease even though an area larger than 5 per cent. of the block has not been signed for, this may be done on the written order of the Superintending Engineer. The reasons for granting the lease shall be fully recorded.

Covering Leases.

11. Applicants for a lease for a term of years who may require water before the lease has been concluded can obtain a supply on tendering an application for a covering lease in the form given as Appendix No. II to these rules. This application must be signed in the presence of the Zilladar or of some other responsible officer nominated for the purpose by the Subdivisional Canal Officer. The signatures should be those of the leading cultivators in the block in question, and they should represent holders of not less than 75 per cent. of the irrigable land within the block.

As soon as the Subdivisional Canal Officer receives the application duly signed, he shall issue a permit in the form given as Appendix No. IV to these rules, and shall at once supply water.

Single Waterings.

12. Applications for a single watering during the *kharif* season, may be entertained if water is available, after meeting the demand for the areas leased for a term of years. The applications may be presented at the Subdivisional Canal Office or to the Sectional Officer. They must be in the form given as Appendix No. V to these rules.

The application must be for a definite block and the signatures of the applicants must cover areas aggregating not less than four-fifths of the lands in the block.

If the Subdivisional Officer is able to supply water and accepts the application he will require the applicants to pay in advance one-half of the amount due on the areas entered in the application at the rate specified in the schedule of rates, and on this sum being paid he will at once issue a permit in the form given as Appendix No. VI to these rules and will supply water. When the watering has been concluded the area actually irrigated shall be determined and the assessment shall be made on the areas actually watered within the limits of the block specified in the application and permit.

Season Leases.

13. Applications for water to irrigate spring rice or other crops between December and April may be presented at the Subdivisional Canal office or to the Sectional Officer. They must be in the form given as Appendix No. VII to these rules.

In the applications the areas for which water is required must be specified but the rate will be charged on those areas for which water is actually used as determined by measurement.

The permit in the form given as Appendix VIII to these rules will be granted by the Subdivisional Canal Officer if he is able to supply the water.

Supply of water.

14. The Divisional Canal Officer shall control the supply of water throughout the Division in his charge.

15. No water shall be supplied to any lands except such as have been brought under a lease for a term of years or for the season, or to such as are provided for by a covering lease or by a lease for a single watering.

16. Under the forms of irrigation lease in use, no specific supply of water is promised: but the undertaking is to give such a supply to each lessee as may be necessary for the lands leased. The supply shall be given, as may be required for the proper cultivation of the crops under irrigation, according to the exigencies of the season.

17. The Divisional Canal Officer is empowered to give the required supply by rotation, should this be advisable for the efficient working of the canals in his charge. In such a case, he is required to give the lessees written notice informing them of the periods when they will be supplied with water.

Collection of water-rates.

18. The rates due for water supplied shall be collected by the Deputy Collector or other officer in charge of the Revenue Division through his staff of Zilladars, Tahsildars and peons. All *khatians* or demand statements shall be signed by the Deputy Collector or other officer in charge of the Revenue Division after scrutiny in his office

19. At the time of preparation of the *khatian* in the Zilladar's office, each person assessed shall be furnished with an extract from the assessment paper, showing the particulars of the charge against him. This extract shall be furnished in such form as may from time to time be approved for the purpose.

20. Each person on paying the sum due from him shall be given a receipt in the form prescribed for the purpose.

21. For the purposes of account, of control over establishment, and of general administration, the Deputy Collector or other officer in charge of the Revenue Division is in the position of an Executive Engineer in charge of a division, and is directly subordinate to the Superintending Engineer. In regard to any proceedings taken under the Public Demands Recovery Act the Deputy Collector is subject to the control of the Collector of the district.

Unauthorized use of water and waste of water.

22. Should it be necessary to take action under the provisions of sections 79 and 80 of the Act, proceedings shall be instituted only under the direct and special order of the Divisional Canal Officer. The primary record of the facts regarding the unauthorised use or the waste of water shall be made by the Subdivisional Canal Officer and his subordinates. The parties whom it is proposed to assess shall be informed in writing, and shall be called on to show cause why they should not be assessed. The record of their statements shall be made by the Divisional or by the Subdivisional Canal Officer. The Divisional Canal Officer shall consider the facts and statements recorded, and shall, in deciding the case, give his reasons for or against assessment, both as regards the facts and as regards the law; and he shall determine the rate to be charged subject to the provision in the schedule of rates attached to these rules.

23. Should the Divisional Canal Officer decide on making an assessment, he shall have the assessment paper prepared by the Subdivisional Canal Officer and his staff. Each person assessed shall be furnished with a statement of the charge against him, and an abstract of the demand or *khatian* shall be sent to the officer in charge of the Revenue Division, who shall proceed to recover the sums assessed. The period of one month within which an appeal may be presented to the Collector under section 91 of the Act shall count from the date on which the statement of the charge may be furnished to the person assessed, which date shall be endorsed on it.

24. No proceedings shall be instituted if the unauthorized use or the waste of water have occurred through the act or neglect of a Canal Officer or subordinate employed on the Canal. During the irrigation of autumn rice, the passing on of surplus water from leased to unleased fields is not an unauthorized use of water.

Complaints and Applications.

25. All complaints or applications with respect to the supply of water, to defective drainage, and generally with respect to the administration of the canals, shall be received on presentation at either divisional or subdivisional canal offices.

Complaints and applications received by a Divisional Canal Officer may be transferred to his Subdivisional Canal Officers for disposal at his discretion.

Any such complaints or applications, if presented to the Deputy Collector or to his staff, shall be returned endorsed with instructions as to the proper office at which to present them. If received by post, they shall be at once forwarded to the Divisional or Subdivisional Canal Officer.

26. Complaints or applications with respect to corrections of the assessment with respect to the actions of the amins in assessing and with respect to the actions of the tahsildars and other staff employed in collections, shall be received at the office of the Deputy Collector or other officer in charge of the Revenue Division, or at the zilladars' offices.

27. Receipts in the prescribed form shall be given at all offices for complaints or applications presented. The receipt of all complaints and applications shall be recorded in registers to be kept for that purpose.

28. The Officer receiving the complaint or application shall either make a personal enquiry into the matter or he shall nominate in writing some responsible person to hold the enquiry.

29. The orders passed on all complaints or applications shall be in writing, and a copy of every order shall be furnished to the complainant or applicant.

The copy of order may be sent by post (registered), if this is convenient.

The period within which an appeal may be presented under section 91 of the Act shall be reckoned from the date on which the copy of the order is received by the person.

30. When an appeal to the Collector is from the order of a Subdivisional Canal Officer, the proceedings shall be called for through the Divisional Canal Officer, who may record on them such remarks as he may think desirable, provided that he does not thereby detain the proceedings.

In all cases in which an appeal against an assessment is preferred to the Collector, that officer may, if he thinks fit, direct that the collection of water-rates be suspended till the appeal is heard.

31. The Divisional Canal Officer is empowered to revise the proceedings of his Subdivisional Canal Officers, and the Superintending Engineer is empowered to call for and to revise the proceedings of all officers under his control.

Remissions and Alterations of Demand.

32. Whenever the crop on land entitled to a supply of water suffers material injury from an insufficient supply of water, or from any interruption in the supply of water, remission of the rate due on such crop shall be given by the Divisional Canal Officer, provided that the person claiming remission shall have applied for such not less than 15 days before the reaping of the crop.

33. On the occasion of lands being brought under a lease for a term of years, the Divisional Canal Officer is empowered to remit the rates for the first season on those fields which from the nature of the cultivation then obtaining, or from other causes, have not, in that season, derived any benefit from the supply of canal water.

34. Should the crop on lands under lease for a term of years suffer material injury from excess of water due to deficient drainage, the Divisional Canal Officer may grant remission of the rates due on such lands in whole or in part, provided that the person asking for remission shall have applied at least 15 days before the reaping of the crop.

35. Revisions of the assessment required in consequence of land under lease being left uncultivated or of land being appropriated for purposes other than cultivation shall be made under the orders of the Divisional Canal Officer.

36. Revisions of the assessment required in consequence of incorrect entries of the names of occupants of lands under lease or of incorrect entries of areas or amounts in the assessment papers, or required by changes in the occupation of lands shall be made under the orders of the Deputy Collector or other officer in charge of the Revenue Division, provided that no change involving any increase or decrease in the total area under lease for a term of years shall be made without the concurrence of the Divisional Canal Officer.

37. Remissions of water-rates on account of injury to the crops caused by inundation, by blight, by storms or by any extraordinary cause will only be allowed under the special orders of the Local Government.

Irrecoverable Demands.

38. The Superintending Engineer is empowered to sanction the write-off of those demands which are reported, after due enquiry by the Deputy Collector or other officer in charge of the Revenue Division, as irrecoverable owing to the poverty of the defaulter or of his successors in case of his death, or owing to the defaulter having absconded.

Cultivators' Representatives.

39. Whenever the preliminary application for a lease for a term of years has been approved by the Divisional Canal Officer, the officer in charge of the Revenue Division shall, with the concurrence of the Subdivisional Canal Officer, select as representative of the cultivators a suitable person or persons who shall generally be acceptable to the cultivators and who shall each have a direct interest in the land for which the lease is executed.

40. The person or persons so selected shall be required to give assistance to the Canal Officers in respect of the following matters:—

(*i*) In the preparation of applications for leases.
(*ii*) In the measurement of irrigated lands.
(*iii*) In recording the names of the occupiers of the holdings.
(*iv*) In receiving demand statements and distributing to the cultivators the individual notices of assessment.
(*v*) In attending, when required, at enquiries into complaints.
(*vi*) In reporting to the zilladars any changes in the occupancy of lands under lease.
(*vii*) In assisting the tahsildar in collecting rates.

41. For such assistance the cultivators' representative or representatives shall be entitled to free irrigation of the lands in his or in their own occupation, which may lie within the boundaries of the leased area subject to a total limit of 3 per cent. of the area assessed. The Deputy Collector or other officer in charge of the Revenue Division may disallow in whole or in part this free irrigation, and may recover the rates which would otherwise have been payable in whole or in part if the assistance specified in Rule 40 has not been efficiently rendered. The reasons for such disallowance shall be recorded in writing.

42. The Deputy Collector shall maintain in his office a register containing a record of the names of all representatives and of the areas of free irrigation allowed to each.

43. Applicants for single waterings or for season leases shall be required to nominate one of their number who must have a substantial interest in the land to be irrigated as their representative. The representative so nominated shall perform the same duties as stated in Rule 40 and shall receive remuneration on the same scale as in Rule 41.

Power to decline or cancel leases.

44. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Engineer to direct that the lease shall be cancelled with effect from the 1st of June next following. The order to cancel a lease shall be passed before the 1st of April of the year in which it is to take effect.

45. The Superintending Engineer may give directions to the Divisional Canal Officer to decline applications for irrigation leases of lands in villages where there has been persistent difficulty in realizing the water-rates, until all arrears have been paid.

He may further suspend, or altogether cancel, any lease for a term of years, if on the 1st June of any year water-rates to the extent of half the demand for one year are in arrears Previous notice of intention to put this rule in force shall be given not later than the 15th April preceding.

Miscellaneous.

46. Tanks may be supplied with canal-water without charge, when water can be made available without injury to the cultivation dependent on a canal, under the following conditions :—

(*i*) That the water is to be exclusively used for domestic purposes, or for watering cattle.

(*ii*) That a channel exists through which water can pass without waste.

(*iii*) That the water shall only be supplied on the written order of the Subdivisional Canal Officer.

(*iv*) That any new outlet or sluice which may be required to allow of the supply being given shall be provided at the cost of the persons who ask for the water.

(*v*) That the supply of water may be stopped at any time if it is found that it is being misused.

47. Except when a public right-of-way exists, no person shall, without the permission expressed in writing of the Divisional or Subdivisional Canal Officer, pass himself, or cause any animal or vehicle to pass, on or across any of the works, banks or channels of a canal, or drainage work which is part of the canal system except by means of such bridges, fords and ferries as may have been provided for the purpose.

Any person who, after due warning, commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act

48. The use of any part of the banks or berms of any canal, drainage work which is part of the canal system, or flood embankment which is subject to the provisions of the Irrigation Act, as a place for relieving the calls of nature, is prohibited. Any person who after due warning commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

49. Should water be required for purposes other than irrigation, it may be supplied, when available, at a rate of one rupee per 10,000 cubic feet of water.

50. No officer employed on the canals, unless especially exempted by the Lieutenant-Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals or purchase or bid for any Government property sold thereon either in his own name or in the name of another, or jointly, or in shares with others.

Schedule of rates for water supplied from the Midnapore Canal

	Rs.	A.	
For water supplied on a lease for a term of years—supply given from 16th June to 30th November of each year	2	0	per acre per season.
The rate is due in two equal instalments on the 1st of January and the 1st February of each year. Provided that when the sum payable by any lessee is less than Rs. 10, the whole amount shall be due on the 1st of January in each year.			
For water supplied on a covering lease to irrigate lands for which a preliminary application for a lease for a term of years has been received and failing the completion of the same	3	0	per acre.
Supply given from date of covering lease to 30th November of that year. The rate is due as in case of lease for a term of years.			
For water supplied as a single watering the rate is payable half in advance at time of supply and half on completion of the watering	1	0	„ „
For water supplied on a season lease for the irrigation of any crops between 1st December and 15th June ...	2	8	„ „
The rate is payable on 1st June following.			
For the unauthorised use of water or for the waste of water such rate may be charged as determined by the Divisional Canal Officer under rule 22 subject to a maximum of Rs. 5 per acre. Such rate shall be due on presentation of the notice of assessment to the person assessed.			

APPENDIX I.

(Referred to in rule 9.)

APPLICATION FOR A LEASE FOR A TERM OF YEARS.

(*Yearly rate, per acre: water to be supplied each year from the 16th June to 30th November only.*)

WE, the undersigned, of mauza, , pargana , thana , apply for water to be supplied from Distributary of the Midnapore Canal for a term of years, commencing on the 16th June and ending 30th November. The supply of water is required for the irrigation of the block of land formed by our holdings as specified below.

2. We agree that the amounts due shall be payable to the Deputy Collector or other officer in charge of the Revenue Division, Midnapore Canal, or to such person as he may appoint on the 1st January and 1st February, or if Rs. 10 or under on 1st of January of each year, and shall be payable independently of our requiring water in any particular year or not.

3. We also agree to be bound by the rules published in the *Calcutta Gazette* for pages , Notification No.

4. We agree that this application shall not be deemed to have been completed until all the irrigable fields within the block have been signed for, and that failing such completion any covering lease which may have been granted shall be enforced.

5. We agree that the areas* and amounts as given in the statement below are correct at the commencement of the lease, and in token of agreement we attach our individual signature or mark.

6. Our heirs and representatives shall be bound by the terms of this agreement in case of our decease.

SCHEDULE No. 1.

* Areas to be given in acres with a note to show the equivalent in the local measure of an acre.

APPENDIX II.

(Referred to in rule 11.)

APPLICATION FOR A COVERING LEASE.

WE, being the principal cultivators of mauza , pargana , thana , on our own behalf and on behalf of the other cultivators of the mauza, hereby certify that we have presented an application for grant of a long lease to cover all the irrigable land in the block situated in mauza , the area of which is approximately acres* the boundaries of the block being specified below.

2. Now in order that we may obtain a supply of water at once and before the long lease can be completed, we, whose signatures or marks are annexed below, severally and jointly bind ourselves to pay the water-rate on the whole area within the limits of the block as specified, which may be determined by the Canal Officer to be irrigable.

3. In the event of a long lease not being completed through the default or non-consent of any of the cultivators of irrigable lands within the block, a rate of Rs. 3 per acre on the area determined for in the present season will be charged to us and will be payable by us on or before the 1st January and 1st February next, or if Rs. 10 and under on or before the 1st January ; water to be supplied up to the 30th November only.

4. In token of our obligation in this agreement we annex our signatures or marks below :—

PERMIT FOR A COVERING LEASE.

of village pargana thana , whereas you have applied for a supply of water which is required at once and before the long lease for which you have applied can be completed, and whereas you have agreed on condition of obtaining a supply of water that you whose names are recorded above will be severally and jointly responsible for the water-rates which may be due on the full irrigable area of the block, the area of which is approximately acres* and the boundaries of which are specified below.

2. This is to inform you that water will now be supplied to the mauza from distributary of the Midnapore Canal and the supply continued as required up to 30th November next. Your responsibility under the terms of your application will remain until the long lease has been completed when it will cease.

3. In the event of the long lease not being completed through default or non-consent of any of the cultivators of irrigable lands within the block, you will under the terms of your application be liable severally and jointly for a rate of Rs. 3 per acre on the full irrigable area of the block, and on the 1st January next or on any subsequent date you may severally or jointly be called on by the Deputy Collector or other Officer in charge of the Revenue Division to pay the full amount.

APPENDIX V.

[Referred to in rule 12.]

Form of application for a single watering during the kharif season between 26th June and 30th November if water should be available.

Mauza , *Pargana* , *Distributary*

1. We, whose names are attached, apply for water to be supplied from the above-mentioned distributary for the irrigation of the areas mentioned below.

2. The approximate area to be irrigated by each applicant is stated below, but each of us agrees to pay water-rates at per acre for the watering received on the actual area in our occupation as found by measurement, with the proviso that only areas actually irrigated will be assessed.

3. We agree to prevent, as far as possible, water supplied being wasted or used in an unauthorized manner.

4. This application is made under and subject to the rules passed under Act III (B.C.) of 1876, and we agree to abide by, and to be subject to, these rules.

5. We agree to pay now in advance a rate of annas per acre and to pay a further rate of annas per acre on the completion of the watering.

Name of cultivator.	Description of crop.	Area more or less to be irrigated in acres. *	Signature or mark of cultivator.	Remarks.
1	2	3	4	5

* A note should be given to show the equivalent in the local measure of an acre.

I HEREBY certify that the signatures or marks above are genuine, and that the areas mentioned are approximately correct.

Signature of Lambardar.

APPENDIX VI.

[Referred to in rule 12.]

Permit for a single watering during the kharif season between 26th June and 30th November.

Number of application and date—
Name of village—
Name of pargana—
Name of distributary—
Area* to be irrigated, more or less—
Date of supply—
Water-rates due—
Date of payment—
Name of *lambardar*—

This permit is issued, under section 75 of Act III (B.C.) of 1876 for the irrigation of the areas mentioned above. It is subject to the provisions of all rules passed under the Act. It is expressly agreed that water is supplied for the sole purpose of irrigating the land mentioned in the application. The area actually irrigated will be measured and charged, and the applicants undertake, as far as is in their power, to prevent water being wasted or applied to the irrigation of land not included in the application.

Subdivisional Canal Officer.

* Area to be given in acres with a note to show the equivalent in the local measure of an acre.

APPENDIX VII.

[Referred to in rule 13.]

Application for a season lease for Irrigation of Crops between December and April.

WE, whose names are attached, cultivators of mauza , pargana , apply for water to be supplied from the Distributary of the Canal.

2. The approximate area to be irrigated by each cultivator is stated in the schedule following, but each of us agrees to pay water-rates at the schedule rate on the area found to be in his occupation by measurement, with the proviso that only areas actually irrigated will be charged, fractions of an acre exceeding one-half being charged as one acre.

3. We agree to prevent water being wasted or used in an unauthorized manner, and to abide by all the rules passed by the Lieutenant-Governor of Bengal under the Irrigation Act.

4. We agree to pay the water-rates due on this application on the of

Name of cultivator.	Description of crop.	Area more or less to be irrigated in acres.*	Signature of cultivator.	Area* found on measurement.	REMARKS.
1	2	3	4	5	6

* Area to be given in acres with a note to show the equivalent in the local measure of an acre.

APPENDIX VIII.

[Referred to in rule 13.]

To *Permit for a season lease.*

being the representive of the cultivators in village , pargana .

THIS is to inform you that on the application submitted by you and other cultivators of village , pargana , water will be supplied for the irrigation of the crop from distributary, canal

The fields actually irrigated will be recorded, and the areas so irrigated as ascertained by measurement or as recorded in the settlement khasras will be assessed at Rs. per acre.*

Those persons who may irrigate their fields without having applied for the water will be liable to be charged a higher rate for the unauthorized use of water.

Signature of Subdivisional Canal Officer.

* A note should be given to show the equivalent in the local measure of an acre.

RAILWAY DEPARTMENT.

The 10th March 1908.

No. 2R.—Notification.—Whereas it appears to the Lieutenant-Governor of Bengal that land in the districts of Gaya and Hazaribagh is likely to be needed for a public purpose, viz., for the construction of a railway from Sone East Bank Station of the East Indian Railway to the Bokaro and Ramgarh Coal-fields:

Notice is hereby given to all whom it may concern that, in exercise of the power conferred by section 4 of the Land Acquisition Act, I of 1894, the Lieutenant-Governor of Bengal has authorized the Engineers of the East Indian Railway Company for the time being engaged on this undertaking to enter upon and survey lands and do all other acts required for the proper execution of their work as provided or specified in the said section.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 5th March 1908.

No. 30 Marine.—It is hereby notified, for general information, that the port of Mandvi in the Bombay Presidency is declared free from plague, and that the regulations for the prevention of the introduction of plague by sea, which were imposed in the ports of Orissa against vessels arriving from Mandvi, are hereby withdrawn.

R. E. CARTER,
Offg Secy to the Govt. of Bengal

The 7th March 1908.

No. 31 Marine.—In exercise of the powers conferred upon him by section 10 of the Indian Merchant Shipping Act of 1859 the Lieutenant-Governor proposes to make the following rule respecting the examination in signalling of candidates for certificates as Master and Mate. The draft rule will be taken into consideration on the expiry of a month from the date of its publication in the *Calcutta Gazette*, and the Lieutenant-Governor will be glad to consider any criticism or suggestion that may be made regarding it within the period.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

DRAFT RULE.

On and after the 1st July 1908, candidates for the Extra Master's Certificate will, in addition to the ordinary examination in the method of signalling dealt with in the International Code and British Signal Manual, be required to show practical proficiency in both the Morse and Movable Semaphore methods of signalling, *i.e.*, the ability to make and take in signals by both these methods with reasonable speed and accuracy.

This examination will also be open to officers holding, or candidates for, certificates of competency as Master or Mate, as a voluntary examination, and, should the candidate pass this examination, the fact with the date and place of passing will be recorded on his certificate of competency. The fee for this voluntary examination will be Rs. 15.

Attention is drawn to the fact that the Pyrotechnic Morse Code at present given in the British Signal Manual* will, in the new edition, now in preparation by the Admiralty, be omitted.

It has therefore been decided that this Code shall not form a subject of this examination.

PART IB.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 499M.—The 7th March 1908.—It is hereby notified that, under section 16 of the Bengal Municipal Act, III of 1884, the Lieutenant-Governor is pleased to appoint the following gentlemen to be Commissioners of the Khagole Municipality, in the district of Patna :—

Patna.

Ward No.	I	... Babu Brijnandan Sahai.
„ „	II	... „ Kedar Nath.
„ „	III	... „ Nanda Kishor Lal.
„ „	IV	... „ Bihari Lal.
„ „	V	... Pandit Satya Narayan Misra.
„ „	VI	... Babu Mathura Prosad.

2. Under section 14 of the Act, the Lieutenant-Governor is also pleased to appoint the following gentlemen to be Commissioners of the Municipality :—

The District Engineer,	East Indian Railway,	Dinapore	}	*Ex-officio.*
The District Medical Officer,	ditto	ditto		
The District Traffic Superintendent	ditto	ditto		

3. Under section 23 (1) of the Act the Lieutenant-Governor is pleased to appoint the District Engineer, East Indian Railway, Dinapore, to be the Chairman of the aforesaid Municipality.

No. 502M.—The 9th March 1908.—Whereas a Notification No. 1215M., dated the 27th December 1907, was published at page 1, Part IB of the *Calcutta Gazette* of the 1st January 1908, declaring the intention of the Lieutenant-Governor to extend the provisions of Part IX of the Bengal Municipal Act, III of 1884, to certain areas of the Kotrung Municipality, in the district of Hooghly, defined below, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Kotrung Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the above provisions of the Municipal Act to the said areas of the Municipality.

Hooghly.

The areas are bounded as folllows:—

Ward No. I.—The portion bounded on the east by the river Hooghly, on the west by the Grand Trunk Road, on the south by Ward No. II, and on the north by the Amratola khal (the existing boundary line between the Serampore and Kotrung Municipalities).

The whole of Ward No. II.

Under section 86 (*f*) of the Act the Lieutenant-Governor also sanctions the levy, by the Municipal Commissioners, of fees for the cleansing of private privies and cesspools within the aforesaid areas of the Municipality.

No. 473L.S.-G., dated the 6th March 1908.—In exercise of the powers conferred on him by clause (*i*) of section 138 of the Bengal Local Self-Government Act of 1885 (Bengal Act III of 1885), the Lieutenant-Governor is pleased to direct that the following amendments shall be made in the rules framed under the said clause, and published with the Notification of the 1st July 1888 at pages 263—265, Part I-B of the *Calcutta Gazette* of the 4th idem.

(1) Substitute the following for rule 12 of the said rules:—

"Road metal will be accounted for in Form No. 9, which will be kept up for each road separately, and will be finally recorded in the District Engineer's office."

(2) Rule 17, expunge the words "Register of road metal (Form No. 16)."

(3) Rule 20, line 1, substitute "yearly," for "half-yearly," and expunge the words "and for road metal."

(4) Rule 20, line 2, substitute the words "Form number" for "Forms numbers," and expunge the words "and 16 respectively."

(5) Rule 20, lines 5 and 7, substitute "year" for "half-year."

(6) For Forms 9, 10, 15 and 16 appended to the said rules, substitute the following forms respectively:—

NOTES.

1. This return of the disposal, mile by mile, of metal, collected for consolidations, should be prepared monthly by the Subdivisional Officer, and forwarded by him to the District Engineer's office, where it will be recorded.

2. For permanent record in the Subdivisional office, these forms will be bound in a book, loose sheets being submitted to the District Engineer monthly.

3. The balance of metal in each mile should be shown monthly, whether there are any transactions on it during the month or not.

4. No yearly register or return of road metal will be required, and the only other record necessary will be the rate-book (Form No. 11).

5. Examiners will test-audit these returns during the course of their periodical inspections.

6. This form may, at the discretion of the District Board, be separately printed or lithographed for each road.

RAJ NARAYAN MUKHERJI, Sub-Judge.

Jessore, the 6th March 1908. (280—1

NOTICE.

In the Court of Munsif of Bongaon, 1st Court.

RENT EXECUTION CASE No. 145 OF 1908.

Bhabasundari Dasi, Administratrix to the Estate of late Prasanna Chandra Chatterjee, decree-holder, *versus* Meher Abdul Bibi, for self and guardian of minor sons and others, judgment-debtors.

THE following property of the judgment-debtors will be sold at auction for arrears due in respect thereof at 12 o'clock noon of the 21st April 1908 for realisation of Rs. 881-11-9. Approximate value Rs. 20 :—

A patni jama of Rs. 1,190-8 under the name of Harmat Mandle, situate in the villages Bahadurpur, etc., within the jurisdiction of thana Sarsa, subdivision Bongaon, district Jessore.

BHAGAVATI CHARAN KUNDU, Munsif.

Bongaon, the 7th March 1908. (282 -1)

Notification of Sale.

TO be peremptorily sold, pursuant to a decree and order of the Calcutta High Court, Original Side, in Suit No. 976 of 1906 (Tarit Bhusan Roy and others *versus* Hariprosad Soor), and dated, respectively, the 6th day of March 1907 and 6th day of December 1907, by the Registrar of the said Court, Original Jurisdiction, in his sale-room in the Court-house on Saturday, the 4th day of April 1908, at the hour of 12 o'clock noon, the following properties of the defendant:—

Lot No. 1.—All that one-storied brick-built tenanted house, together with the land thereunto belonging, containing an area of 4 cottahs and 2 chitaks, a little more or less, situate, lying at and being premises Nos. 279 and 280, Upper Chitpore Road, in the Northern Division of the town of Calcutta, and butted and bounded on the north by the house of Benode Lal Roy and others, on the south by the house of Nundalal Nandy and others, on the east by Upper Chitpore Road, and on the west partly by the dwelling-house of Pancheowry Pattak and partly by the tenanted house of Shibkristo Mistry.

Lot No. 2.—All that the two-storied brick built dwelling-house with the land on part whereof the same is built, containing by estimation 10 cottahs, more or less, situate, lying at and being premises No. 14, Shovabazar Street, in the Northern Division of the town of Calcutta, and butted and bounded on the north partly by the tenanted land of Muthur Mohun Shaw and others and partly by the passage leading from Shovabazar Street, on the south by the tenanted land of No. 14-1, Shovabazar Street, belonging to the said Hariprosad Soor and Juggernathprosad Soor, on the east by the said premises No. 14-1, Shovabazar Street, and on the west by the tenanted house of the late Lalji Mohun Shaw, now belonging to Huro Lal Shaw.

The abstract of title and conditions of sale may be seen at the Office of the Registrar and also at No. 8, Old Post Office Street, the office of Mr. S. C. Ghosh, Attorney for the plaintiff, on any day before the sale and will be produced at the sale.

W. R. FINK, Registrar.

Surendra Chunder Ghose, Plaintiff's Attorney.

Calcutta, the 17th day of February 1908.

(263—1—128)

NOTICE.

THE next annual stock-taking of the Indian Law Reports kept at the Bengal Secretariat Book Depôt will commence on the 1st April, 1908. The public are hereby informed that all issues of the said Reports from the said Depôt to subscribers and officials will be suspended during that month.

F. G. WIGLEY,
Secy. to the Bengal Council, and Asst. Secy. to the Govt. of Bengal, Legislative Dept.

LEGISLATIVE DEPT.;
BOOK DEPÔT BRANCH,
The 18th December, 1907.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

PRICES.

THE terms of subscription, and the terms on which current issues and back numbers are sold, are as follows:—

	Without postage.	With Indian postage.	With Foreign postage.
	Rs. A. P.	Rs. A. P.	Rs. A. P.

MADRAS, BOMBAY OR ALLAHABAD SERIES—		
All Parts for one year	4 4 6	4 11 3
Any one Part	0 5 3	0 5 9

If any Part is lost in transit to a subscriber, and the fact is reported to the office of distribution within three months from the date of publication duplicate will be supplied at the following rate:—

	Without postage.	With Indian postage.
	Rs. A. P.	Rs. A. P.
CALCUTTA SERIES	0 8 9	0 10 3
MADRAS, BOMBAY OR ALLAHABAD SERIES	0 5 3	0 5 9

REPRINTS.

THE Complete Series for the years 1876 to 1878, 1882, 1883, 1889, 1892 to 1895 and 1901 to 1907 has been reprinted, and may be purchased at the Bengal Secretariat Book Depôt, Calcutta, either wholly or in part. All Parts required to complete the stock of the Reports for other years are now being reprinted.

Complete Reports from the beginning to date will therefore shortly be available at the Bengal Secretariat Book Depôt.

ADVERTISEMENTS FOR THE CALCUTTA SERIES.

ADVERTISEMENTS of law publications only are received. Rates can be ascertained on application to the Bengal Secretariat Book Depôt.

Records of the Geological Survey of India, Vol. XXXVI, Part 2. By Director, Geological Survey of India. Re. 1.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 11, 1908.

NOTICES TO MARINERS.

THE following Notices are published for general information.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

CALCUTTA, *the 6th March 1908.*

JAPAN—YEZO (HOKUSHU), WEST COAST—YESASHI ANCHORAGE.

Kamome jima light—Amended arc of visibility.

No. 98 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 197 of 1908) are republished:—

Particulars.—Kamome jima light, Yesashi anchorage, is visible over the arc given below, and not over the arc previously stated.
Position.—Lat. 41° 52′ 10″ N., long. 140° 6′ 25″ E.
Arc of Visibility.—From N. 13° E., through east and south, to N. 77° W.
Variation.—6° W.
Chart affected.—No. 2975, Yesashi anchorage on.
Publications.—List of Lights, Part VI, 1907, No. 1123.
Sailing Directions, Japan, etc., 1904, page 703.
Authority.—Tokyo Notice, No. 1114, 1907.

JAPAN—YEZO (HOKUSHU), WEST COAST.

Ishikari light—Character altered.

No. 99 (first publication).—The following particulars relative to the above issued by the British Admiralty, (No. 198 of 1908) are republished:—

Particulars.—On 1st January 1908, Ishikari lighthouse on the west coast of Yezo having been reconstructed, the light would be altered from white fixed to a light of the following character:—.
Position.—On western side of Ishikari river entrance.
Lat. 43° 15′ 25″ N., long. 141° 21′ 10″ E.
Character.—*White flashing every twenty-five seconds.*
Elevation.—48 feet.
Visibility.—12 miles, from N. 49° E., through east, to S. 49° W.
Light Power.—3,000 candles.
Description of Building.—Iron cylindrical tower, painted white.
Variation.—6° W.

Charts affected.—No. 2981, Furubira wan to Aikappu Misaki.
„ 2405, Kuril islands.
„ 2459, North-west Pacific.
„ 462, Yezo island.
Publications.—List of Lights, Part VI, 1907, No. 1118.
Sailing Directions for Japan, Korea, etc., 1904, page 713.
Authority.—Tokyo (D. of C.) Notice No. 912, 1907.

JAPAN, WEST COAST—Kiusiu.

Shimabara light—Alteration in.

No. 100 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 199 of 1908) are republished:—

Particulars.—On 1st January 1908, Shimabara lighthouse, Shimabara gulf, having been reconstructed, the light would be altered as follows:—
Position.—On islet off Shimabara.
Lat. 32° 46′ 45″ N., long. 130° 22′ 40″ E.
Character.—*White fixed.*
Elevation.—50 feet.
Visibility.—8 miles, from S 25° E., through south and west, to N. 65° E.
Light Power.—80 candles.
Description of Building.—Iron cylindrical pillar, painted red.
Remarks.—The light is 35 feet above the base of the pillar.
Variation.—4° W.
Charts affected.—No. 358, Kiusiu and Nipon.
Publications.—List of Lights, Part VI, 1907, No. 973.
Sailing Directions for Japan, Korea, etc., 1904, page 544.
Authority.—Tokyo Notice (D. of C.), No. 912, 1907.

EASTERN ARCHIPELAGO—Borneo, west coast.

Little Kapuas (Pontianak) river—Wreck in approach.

No. 101 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 200 of 1908) are republished:—

Particulars.—A wreck with masts above water is reported to lie sunk in the northern approach to Little Kapuas river.
Position.—About 12 miles to the northward of the south point of the river entrance.
Lat. 0° 9′ 30″ N., long. 109° 2′ 0″ E.
Chart affected.—No. 941a, Eastern archipelago.
Publication.—China Sea Directory, vol. II, 1906, page 48.
Authority.—Hague Notice, No. 174, 1908.

PACIFIC OCEAN, SOUTH—Society islands, Raiatea.

Téavarua Harbour, south pass—Beacons disappeared.

No. 102 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 214 of 1908) are republished:—

Particulars.—The beacon on the islet and the beacon on the coast, which in line S. 44° W. formerly led through the South pass into Téavarua harbour, no longer existed in November 1907.
Position.—Islet beacon, lat. 16° 45′ S., long. 151° 25′ W.
Variation.—9° E.
Charts affected.—No. 526, Téavarua or Uturoa harbour.
„ 1060, Huaheine to Marua, or Maupiti.
Publication.—Pacific Islands, vol. III, 1900, page 91.
Authority.—Paris Notice, No. 159, 1908.

AUSTRALIA, SOUTH—Spencer gulf.

Port Lincoln—Buoy established.

No. 103 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 222 of 1908) are republished:—

Particulars.—A buoy has been established in port Lincoln, as follows:—

Position.—On north-eastern side of shoal. From the buoy the ruin on Boston island bears N. 87° E., distant $1\frac{1}{10}$ miles, and the extremity of Kirton point S. 17° E.

Lat. 34° 42′ S., long. 135° 52¾′ E.

Character.—White can.

Remarks.—The above danger is now named Le Hunte shoal.

Variation.—4° E.

Charts affected.—No. 784, Port Lincoln.
„ 2389*b*, St. Vincent and Spencer gulfs.

Publication.—Australia Directory, vol. I, 1907, page 203.

Authority.—Hydrographic Note, "Psyche," No. 1, 1907.

AUSTRALIA—Victoria—Port Phillip.

Hobson bay—Alteration in lights on lig t-buoys.

No. 104 (first publication).—The following particulars relative to the above issued by the British Admiralty (No. 223 of 1908) are republished:—

Particulars.—On 1st July 1908 the colours of the lights exhibited from the undermentioned light-buoys in Hobson bay will be altered as follows:—

1. *Position of Buoy.*—6 cables East from Williamstown breakwater pier green light.
   Green light, lat 37° 52′ S., long. 144° 55′ E.
   Alteration.—From red to *white occulting.*
   Remarks.—This buoy is known as St. Kilda bank buoy.
2. *Position of Buoy.*—2 cables N. 17° E. from Williamstown breakwater pier green light.
   Alteration.—From white to *red occulting.*

Variation.—8° E.

Charts affected.—No. 624, Hobson bay.
„ 1171*b*, Port Phillip.

Publication.—Australia Directory, vol. I, 1907, pages 455, 459.

Authority.—Melbourne Harbour Trust Notice, 21st December 1907.

BAY OF BENGAL.

Caution—S.S. "Abbotsford"—Report of a derelict native craft.

No. 105 (first publication).—The Master of the S.S. *Abbotsford* reports that at 6-55 A.M., on the 29th February 1908, he passed a derelict native craft submerged in the following position:—

Lat. 14° 31′ N.
Long. 84° 48′ E.

Mariners are hereby warned.

BAY OF BENGAL—Chittagong coast.

South Patches—Light-vessel replaced in position.

No. 106 (first publication).—With reference to Notice to Mariners No. 15, dated 4th January 1908, issued by this office, a further telegraphic communication, dated 3rd March 1908, has been received from the Port Officer, Chittagong, intimating that the South Patches light-vessel has been replaced in position.

NEW ZEALAND—North island, east coast.

Tauranga harbour—Bell disappeared from buoy.

No. 86 (second publication).—With reference to Notice to Mariners No. 456, dated 9th October 1907, issued by this office, the British Admiralty has given further notice (No. 1915 of 1907) that the bell, on the buoy recently moored in the entrance to Tauranga harbour, off the south-west end of Maunganui, has disappeared.

Approximate position, lat. 37° 38½′ S., long. 176° 11′ E

This Notice affects the following Admiralty Chart :— Tauranga harbour, No. 2521 : Also, New Zealand Pilot, 1901, page 135 ; and Revised Supplement, 1906.

EASTERN ARCHIPELAGO—Celebes, west coast—Makassar strait.

Palos bay—Light established.

No. 87 (second publication).—With reference to Notice to Mariners No. 93, dated 22nd February 1907, issued by this office, the British Admiralty has given further notice (No. 1921 of 1907) that a *white group flashing* light of the 4th order, showing groups of two short flashes *every ten seconds*, and visible in clear weather from a distance of 25 miles, has been established on an iron framework support, 69 feet high, painted white, erected on Tanjong Karang, the north-western point of Palos bay.

Approximate position on chart No. 3209, lat. 0° 38′ S., long. 119° 44′ E.

Note.—The height of the light above high water is not stated.

This Notice affects the following Admiralty Charts :—Palos bay on sheet No. 3209 ; strait of Makassar, No. 2636; Eastern archipelago, No. 941b; China sea, Nos. 2660b, 1263; Australia, northern portion, No 2759a : Also, List of Lights, part VI, 1907, page 103 ; Eastern Archipelago, part II, 1904, page 320 ; and Supplement, 1906.

KOREA, WEST COAST—Ping yang inlet approach.

Seitau and Sister islets—Lights and fog-signal established.

No. 88 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 160 of 1908), are republished :—

Particulars.—On 27th December 1907 the undermentioned lights and fog-signal would be established in the entrance to Ping Yang inlet (Chinnampo), in the following positions :—

1. *Name.*—Seitau (West islet).

Position.—On summit of the island.
Lat. 38° 32′ N., long. 124° 46′ E., on chart No. 1656.

Character.—*White flashing every thirty seconds.*

Elevation.—302 feet.

Visibility.—24 miles.

Description of Building.—Concrete cylindrical tower, painted white, the centre of the lantern being 22 feet above the ground.

Order or Power.—4th order.

Fog Signal.—When a vessel's signals are heard, a gun will be fired *twice* with an interval of *three minutes* between each report. If necessary, this signal will be repeated after an interval of ten minutes.

Remarks.—The light is obscured from the bearing of N. 8° W. to N. 86° W.
The light and fog-signal will be discontinued annually from the 15th January to the end of February, on account of ice.

Variation.—4° W.

2. *Name.*—Sister island.

Position.—On the northern point of the island, 5 cables N. 72° W. from the northern point of Dauchen island.
Lat. 38° 40′ N., long. 124° 58½′ E., on chart No. 1656.

Character.—*Fixed*, showing the following sectors:—

Sectors.—*Red* from N. 5° E. to N. 17° E
White from N. 17° E. to N. 22° E.
Red from N. 22° E. to N. 59° E.
White from N. 59° E. to N. 68° E.
Red from N. 68° E., through east and south, to S. 80° W.
White from S. 80° W., through west, to N. 89° W.
Red from N. 89° W. to N. 75° W.
Obscured from N. 75° W., through north, to N. 5° E.

Elevation.—129 feet.

Visibility.—15 miles.

Description of Building.—Concrete cylindrical tower painted white, the centre of the lantern being 25 feet above the ground.

Order or Power.—4th order.

Variation.—4° W.

Remarks.—This light will be discontinued annually from 15th January to the end of February, on account of ice.

Charts affected.—No. 1656, Ping Yang inlet.
" 1655, Ping Yang inlet, southern approach.
" 1257, Ping Yang inlet approaches.
" 1256, Pe chili and Liau tung gulfs.
" 1262, Hong Kong to Liau tung gulf.
" 2847, Nipon, Kiusiu, &c.

Publications.—List of Lights, part VI, 1907, Nos. 908, 907.
Sailing Directions for Japan and Korea, 1904, page 39; and Supplement, 1906.

Authority.—Seoul Notices, Nos. 29 and 30, 1907.

PACIFIC OCEAN, SOUTH-WEST—New Ireland (Neu Mecklenburg).

Albatross channel—Decreased depth on shoal in approach.

No. 89 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 166 of 1908), are republished:—

Particulars.—Further examination shows that the 3-fathom shoal off the west coast of Manne island in the northern approach to Albatross channel has less water over it, as given below.

Position.—About 7 cables S 12° W. from the north-west point of Manne island.
Lat. 2° 41′ 35″ N., long. 150° 41′ 20″ E.

Depth.—1½ fathoms.

Variation.—5° E.

Chart affected.—No. 55, Anchorages in New Britain, New Ireland, and New Guinea.

Publications.—Pacific Islands, vol. I, page 375.

Notice to Mariners No. 1452 of 1907. (*This office No. 513 of 16th November 1907.*)

Authority.—Berlin Notice No. 149, 1908.

EASTERN ARCHIPELAGO—Aru islands.

Wokam island—Reef off the west coast.

No. 90 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 168 of 1908), are republished:—

Particulars.—A reef about 2 miles in extent and connected with the shore exists off the west coast of Wokam island, Aru islands.

Depth and position.—The western edge, on which there is a depth of 3 fathoms, is situated with Taordefete point bearing N. 75° E., distant 2$\frac{1}{16}$ miles, and eastern point of Wammer island N. 1° W. on chart No. 470.
Lat. 5° 55′ N., long. 134° 14½′ E.

Variation.—3° E.

Chart affected.—No. 470, Aru islands.

Publication.—Eastern Archipelago Part I. 1902, page 478.

Authority.—Hague Notice No. 133, 1908.

EASTERN ARCHIPELAGO—Sumatra, east coast—Singkep island.

Serak island—Pinnacle rock eastward of—.

No. 91 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 169 of 1908), are republished:—

Particulars.—A pinnacle rock exists about 6 cables to the eastward of the southern end of Serak island, off the west coast of Singkep island.
Position.— Lat. 0° 39¾′ S., long. 104° 15½′ E.
Depth.—8 feet
Remarks.—It has been placed on the chart as a rock with less than 6 feet over it.
Chart affected.—No. 1789, Channels between Sumatra, Linga, and Singkep.
Publication.—China Sea Directory, vol. I, 1906, page 682.
Authority.—Hague Notice No. 132, 1908.

BAY OF BENGAL—Burma coast.

Bassein river approach—Non-existence of breakers. Preparis, north channel.

No. 92 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 179 of 1908), are republished:—

Particulars.—The breakers reported by the Master of the S.S. *Lunka* to exist in the approach to Bassein river have been carefully searched for by the officer in charge of the Marine Survey of India, without success, and without finding or seeing any indication of danger. Tide rips, however, are common in this locality, and it is considered that the Master mistook these rips for breakers. "Tide rips" has therefore been inserted in place of "Breakers reported, 1907," on the Admiralty charts in this position.
Position.—Lat. 15° 44′ N., long. 93° 50′ E.
Charts affected.—No. 152, Preparis, north channel.
„ 823, Korange island to White point.
„ 830, Bassein river to Pulo Penang.
„ 829, Cocanada to Bassein river.
„ 70, Bay of Bengal.
Publications.—Bay of Bengal Pilot, 1901, page 337.
Notice to Mariners No. 1383 of 1907. (*This office No. 409 of 31st August 1907.*)
Authority.—Officer in charge of the Marine Survey of India, 14th December 1907.

CHINA—South-east coast.

Bias bay—Shoals in—.

No. 93 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 180 of 1908) are republished:—

Particulars.—Two rocky shoals exist in Bias bay, as follows:—

1. *Position.*—From the shoal the Pillars summit bears S. 14° E., distant 4½ cables, and Hat rock N. 86° W.
Lat. 22° 36½′ N., long. 114° 38¾′ E.
Depth.—4½ fathoms.
Remarks.—There are depths of 7 fathoms around this shoal.
2. *Position.*—From the shoal Outer rock off Bias point bears S. 75° W., distant 8 1/10 cables, Mendoza island summit S. 48° E.
Depth.—1½ fathoms.
Remarks.—There are depths of 6 fathoms, mud bottom, close around this shoal.

Variation.—Nil.
Charts affected.—No. 3002, Bias bay.
„ 3026, Macao to Pedro Blanco.
„ 1962, Hong Kong to the Brothers.
Publication.—China Sea Directory, vol. II, 1904, pages 134, 136.
Authority.—Commanding Officer, H. M. Surveying Vessel *Waterwitch*, 21st December 1907.

CHINA, EAST COAST—Chusan Archipelago.

Tinghai Harbour—Beacon destroyed.

No. 94 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No 181 of 1908), are republished:—

Particulars.—The beacon marking Parry rocks, Tinghai harbour, has been destroyed.
Position.—Lat. 30° 0′ 20″ N., long. 122° 6′ 5″ E.
Charts affected.—No. 1395, Tinghai and approaches.
„ 1429, Nimrod sound to Yung river.
Publications.—China Sea Directory, vol III, 1904, page 340.
Authority.—Paris Notice, No. 110, 1908.

PACIFIC OCEAN, SOUTH—New Caledonia.

Prony bay—Buoy withdrawn.

No. 95 (second publication).—The following particulars relative to the above, issued by the British Admiralty (No. 193 of 1908), are republished:—

Particulars.—The black conical buoy marking Moziman reef on the western side of the entrance to Prony bay has been withdrawn.
Position.—Lat. 22° 23′ 30″ S., long. 166° 51′ 35″ E.
Charts affected.—No. 1311, Prony bay.
„ 2906, Isle of Pines to Uen island.
Publication.—Pacific islands, vol. II, 1900, page 303.
Authority.—Paris Notice No. 113, 1908.

BAY OF BENGAL—Chittagong coast.

Karnafuli river—Depth of water in the channels.

No. 96 (second publication).—The Port Officer, Chittagong, has given notice that the following depth of water was found in the channels by soundings taken on the 29th February 1908:—

	Ft.
Track No. I—Outer bar—	
Disc on diamond	13
Track No. II—Inner bar—	
Disc on diamond	13
Batten beacon on pillar	12
Track No. III—	
Triangle on cross and ball	16
Track No. IV—Guptakhally crossing—	
Tripod on cross and ball and diamond	19

BAY OF BENGAL—Burma coast.

Cheduba Strait, northern approach—Buoy beacons removed.

No. 97 (second publication).—With reference to Notice to Mariners No. 52, dated 31st January 1908, issued by this Office, the Officer in charge, Marine Survey of India, has given further notice, dated 20th February 1908, that the buoy beacons recently laid in Cheduba Strait (near Kyoukpyu), being no longer required, have been removed.

AFRICA, NORTH-EAST—Gulf of Aden.

Aden Harbour—Light-ship replaced by a red conical buoy.

No. 71 (third publication).—The Bombay Government has given notice (No. 10 of 1908) that on and after the 1st May 1908 the light-ship at Aden will be removed. It will be replaced by a red conical buoy carrying two red lights, moored in the position at present occupied by the light-ship.

CHINA, EAST COAST—Rugged islands.

South-west Horn—Light established—Fog signal intended.

No. 72 (third publication).—With reference to Notice to Mariners No. 297, dated 22nd June 1907, issued by this office, the British Admiralty has given further notice (No. 121 of 1908) that on 8th December an *occulting* light *every twenty seconds*, thus:—light, *ten seconds;* eclipse, *ten seconds*, was established on South-west Horn, Rugged islands. The light, which is dioptric, of the 6th order, is elevated 95 feet above high water, shows *red* from the bearing of N. 67° W., through west, to S. 8° W., and *white* in other directions, except where obscured by the land between N. 31° W. and N. 34° W., the white and red lights being visible in clear weather from distances of 15 and 8 miles respectively; it is shown from a white lantern surmounting a white dwelling, 23 feet from vane to base, erected on the western summit of the island. A fog gun will be established at a later date.

Approximate position, lat. 30° 35¾′ N., long. 121° 58′ E.

(*Variation 2° Westerly in 1908.*)

This Notice affects the following Admiralty Charts:—Video to cape Yang tse, No. 1124; Kue shan islands to Yang tse kiang, No. 1199; Amoy to Nagasaki, No. 2412; Hong Kong to Liau tung gulf, No. 1263: Also, List of Lights, Part VI, 1907, page 149; and China Sea Directory, vol. III, 1904, page 370.

PACIFIC OCEAN—Philippine islands—Bohol.

Bohol island—Reef reported off north coast.

No. 73 (third publication).—The British Admiralty has given notice (No. 122 of 1908) that a reef, which partially dries at low water, is reported to exist off the north coast of Bohol island, in a position from which Maumaun island bears East, distant 2 miles, and Sagasau island N. 19° W.

Approximate position, lat. 10° 10¾′ N., long. 124° 24¾′ E.

This reef, which is about half a mile long in a north-north-westerly and south-south-easterly direction, and a quarter of a mile broad, consists of coral with scattered boulders, with depths of 3 or 4 fathoms between them.

In the passage between this reef and the reef extending eastward from Jau island there are depths of from 5 to 6 fathoms.

(*Variation 1° Easterly in 1908.*)

This Notice affects the following Admiralty Chart:—Sulu or Mindoro sea, No. 2578: Also, Eastern Archipelago, Part I, 1902, page 291; and Supplement, 1906.

PACIFIC OCEAN—The Philippine islands—Samar, south coast.

San Pedro bay—Shoal reported in—.

No. 74 (third publication).—The British Admiralty has given notice (No. 123 of 1908) that a shoal with a least depth of 2¾ fathoms over it, is reported to exist in San Pedro and San Pablo bay in a position from which Punubulu island bears N. 9° W., distant 2$\frac{1}{16}$ miles, and Dio island N. 59° W.

Approximate position, lat. 11° 10′ 35″ N., long. 125° 6′ 35″ E.

This shoal, which is about 60 yards long by 20 yards broad, consists of coral and rock; there are depths of 10 fathoms around it.

(*Variation 1° Easterly in 1908.*)

This Notice affects the following Admiralty Charts:—San Pedro bay to Libukan islands, No. 2987; Sulu or Mindoro sea, No. 2578; the Philippine islands, No. 2577: Also, Eastern Archipelago, part I, 1902, page 363.

AFRICA, SOUTH—Cape Colony.

Mossel bay—Alteration in lights.

No. 75 (third publication).—The British Admiralty has given notice (No. 125 of 1908) that the *fixed* light on the jetty head at Aliwal shows *red* between the bearings of S. 22° W. and S. 37° W., and *green* when bearing to the westward of S. 37° W.

Approximate position, lat. 34° 11′ S., long. 22° 9′ E.

Also, that the red fixed light formerly exhibited in Erme bay, about one mile to the westward, has been discontinued.

(*Variation 29° Westerly in 1908.*)

This Notice affects the following Admiralty Chart:—Mossel bay, No. 639: Also, List of Lights, part VI, 1907, No. 12, and Remarks; and Africa Pilot, vol III. 1905, pages 105, 107.

CHINA—Yang tse Kiang, South channel.

Tungsha Light-vessel, Fairway Bell, and Tungsha Bank Buoys—Amended positions of—.

No. 76 (third publication).—With reference to Notice to Mariners No., 5 dated 4th January 1907, issued by this office, the British Admiralty has given further notice (No. 146 of 1908) that the undermentioned light-vessel and buoys in the entrance to the Yang tse Kiang are now situated in the following positions:—

(*a*) Tungsha light-vessel is situated in approximately lat. 31° 8′ 0″ N., long. 121° 59′ 50″ E., or about half a mile southward of its position on the chart.

(*b*) The fairway bell buoy is situated in approximately lat. 31° 1′ 35″ N., long. 122° 9′ 0″ E., or about half a mile to the south-westward of the position shown on the chart.

(*c*) The Tungsha banks buoy is situated in approximately lat. 31° 6′ 55″ N., long 122° 9′ 25″ E., or about half a mile to the southward of the position shown on the chart.

This Notice affects the following Admiralty Charts:—Approaches to the Yang tse Kiang, No. 1602; Kuoshan islands to Yang tse Kiang, No. 1199: Also, China Sea Directory, vol. III, 1904, pages 406, 407; and Supplement, 1907.

PACIFIC OCEAN—New Guinea, west coast.

Waigiu island—Bank south-westward of—.

No. 77 (third publication).—The British Admiralty has given notice (No. 147 of 1908) that a bank, with a depth of 6 fathoms over it, exists to the south-westward of Waigiu island, in a position from which Batang Pale island summit bears N. 34° E., distant 10 miles, and Great Fram island summit S. 46° E.

Approximate position, lat. 0° 25½′ S., long. 130° 6½′ E.

(*Variation 2° Easterly in 1908.*)

This Notice affects the following Admiralty Charts:—Australia, northern portion, No. 2759a; Eastern archipelago, No. 942b: Also, Eastern Archipelago, part I, 1902, page 499.

KOREA, SOUTH COAST—Fusan harbour.

Sorio—Lights established.

No. 78 (third publication).—The British Admiralty has given notice (No. 150 of 1908) that a *white fixed* light over a *red fixed* light, elevated respectively 21 and 18 feet above high water, and visible from a distance of 2 miles, has been established on the head of a pier constructed off the Japanese settlement at Sorio, and situated at a distance of 1½ cables N. 42° E. from Sorio green light.

Approximate position, lat. 35° 6′ N., long. 129° 2½′ E.

Also, that a *white fixed* electric light of 1,200 candle power, 30 feet above the ground, has been established at the root of the pier in a position situated at a distance of one cable N. 3° E. from Sorio green light.

(*Variation 4° Westerly in 1908.*)

This Notice affects the following Admiralty Chart:—Fusan harbour, No. 1959: Also List of Lights, part VI, 1907, page 177; and Sailing Directions for Japan, &c., 1904, page 119.

CHINA, NORTH—YELLOW SEA, MANCHURIAN COAST—ELLIOT (LI CHANG SAU) ISLANDS.

Sau Chan Shan Tau—Pinnacle rock in west bay.

No. 79 (third publication)—The following particulars relative to the above, issued by the British Admiralty (No. 156 of 1908) is republished:—

Particulars.—A pinnacle rock exists in west bay, Sau chan shan tau.

Position.—From the rock Utini (Black) rock bears N. 24° W., distant 7 cables, and summit (412 feet) of Hill point S. 87° E.

Lat 39° 12½′ N., long. 122° 40′ E.

Depth.—1½ fathoms.

Remarks.—There are depths of 7 fathoms around this rock.

Variation.—4° W.

Charts affected.—No. 3388, Terminal head to Hai yung tau.
No. 1256, Pe chili and Liau tung gulfs.

Publications.—China Sea Directory, vol. III., 1904, page 582.

Authority.—Tokyo Notice, No. 1107 of 1907.

JAPAN—NAIKAI (INLAND SEA).

Hiroshima wan—Rock in—.

No. 80 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 157 of 1908) is republished:—

Particulars.—A rock exists in the northern part of Hiroshima wan.

Position.—From the rock, the eastern point of Nino shima bears N. 7° E., distant 9$\frac{4}{10}$ cables, and Yakata ishi light beacon S. 80° E.

Lat. 34° 18′ N., long. 132° 26½′ E.

Depth.—1½ fathoms.

Remarks.—There are depths of from 2½ to 3 fathoms at a distance of about half a cable around the rock.

Variation.—4° W.

Chart affected.—No. 3469, Hiroshima wan.

Publications.—Sailing Directions for Japan, &c., 1904, page 486; and Supplement, 1906.

Authority.—Tokyo Notice, No. 1110 of 1907.

KOREA, SOUTH-WEST COAST—MYANGORU ISLANDS.

Chu do (Bamboo island)—Light and fog signal established.

No. 81 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 158 of 1908) is republished:—

Particulars.—On 25th December 1907, the provisional white fixed light on Chu do (Bamboo island), Myangoru islands, would be replaced by a permanent light and fog signal as given below:—

Position.—Lat. 34° 13½′ N., long. 125° 51′ E.

Character.—*White group flashing* showing groups of three flashes in succession *every forty seconds*, thus:—

Group of three flashes	...	*Fifteen seconds.*
Eclipse ...	...	*Twenty-five seconds.*

Elevation.—276 feet.

Visibility.—23 miles.

Remark.—The light is obscured from N. 5° W. to N. 33° W.

Variation.—4° W.

Description of Building.—Concrete cylindrical tower, painted white, the centre of the lantern being 20 feet above the ground.

Order or Power.—Third order.

Fog Signal.—Fog siren giving, by compressed air, *one blast every thirty-five seconds*, thus:—

Blast	...	...	*Five seconds.*
Silent interval	...	...	*Thirty seconds.*

Charts affected.—No. 3365, South-west coast of Korea.
„ 104, Korean archipelago.
„ 3480, Shantung to Nagasaki.
„ 1262, Hong Kong to Liau tung gulf.
„ 2347, Nipon Kiusiu, &c.

Publications.—List of Lights, part VI, 1907, No. 923.
Sailing Directions for Japan, &c., 1904, page 81; and Supplement, 1906.
Notice to Mariners No. 1204 of 1905 (*this office No. 487 of 12th December 1905*).

Authority.—Seoul Notice, No. 28 of 1907.

JAPAN—Nipon (Honshu), south coast.

Hamashima ko—Shoals in approach; also not-existence of shoal.

No. 82 (third publication).—The following particulars relative to the above issued by the British Admiralty (No. 159 of 1908) is republished:—

Particulars.—The undermentioned shoals exist in the approach to Hamashima ko, as follows:—

a. Name.—Watari Kuromi.

Position.—From the shoal, Ko shima summit bears S. 25° W., distant $3\frac{6}{10}$ cables, and Mugi saki N. 82° E
Koshima, lat. 34° 14′ N., long. 136° 49½′ E.

Depth.—1½ fathoms.

Remarks.—There is a depth of 1¾ fathoms at a distance of four-tenths of a cable N. 13° E. from this shoal.

b. Name.—Nishi Kuromi.

Position.—From the shoal Koshima summit bears S. 13° W., distant $3\frac{6}{10}$ cables, and Mugi saki N. 84° E.

Depth.—2¼ fathoms.

Remarks.—There is a depth of 2¾ fathoms at a distance of four-tenths of a cable N. 41° W. from this shoal.

c. Remarks.—The shoal reported by the Master of the S.S. *Yamoto Maru* to exist in the approach to Hamashima ko, situated at a distance of about 3 cables N. 43° E., from Koshima, has been searched for without finding any indication of danger. This shoal has therefore been erased from the charts.

Variation.—4° W.

Charts affected.—No. 994, Yeboshibana to Anori saki, 952. Owasi bay to Takamatsu no saki.

Publications.—Sailing Directions for Japan &c., 1904, page 341; and Supplement, 1906
Notice to Mariners No. 1354 of 1907 (*this office No. 486 of 2nd November 1907*).

Authority.—Tokyo Notice, No. 1109 of 1907.

BAY OF BENGAL—Burma coast.

Caution—The Terribles—Mud volcanic eruption.

No. 83 (third publication).—A telegraphic communication, dated 20th February 1908, has been received from the officer in charge Marine Survey of India, intimating that a mud volcano in active eruption, with 4½ fathoms over it at present, has been discovered in the vicinity of The Terribles.

Position.—Lat. 19° 25′ N.

Long. 93° 14′ E.

Bearing from South Terrible N. 58° W., true, distant 2 miles.

Masters of vessels are requested to avoid this locality.

AUSTRALIA—TORRES STRAIT.

Inner route to Torres strait—Pea (P) reef—Beacon down.

No. 84 (third publication).—The Port Master, Brisbane, has given notice (No. 2 of 1908) that the Beacon on the Eastern Extremity of Pea (P) Reef is down. The beacon will be re-erected as soon as practicable.

Chart affected, No. 2921; Australia Directory, vol. II.

AUSTRALIA—TORRES STRAIT.

Prince of Wales Channel—Ipili reef—Beacon down.

No. 85 (third publication).—The Port Master, Brisbane, has given notice (No. 1 of 1908) that the Red Triangular Beacon marking Ipili Reef is down. It will be re-erected as soon as practicable.

Charts affected, Nos. 447, 2354 and 2357; Australia Directory, vol. II.

SECOND FORECAST OF THE WHEAT CROP OF BENGAL.

THE following note is published for general information.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

The 5th March 1908.

DEPARTMENT OF AGRICULTURE, BENGAL.

SECOND FORECAST OF THE WHEAT CROP OF BENGAL, 1907-08.

[On an average of five years ending 1905-06, the area under wheat in the territory to which this forecast relates has represented some 4·8 per cent. of the total area under wheat in India.

The ratio of irrigated wheat acreage to the total wheat acreage (a) in British India and (b) in the territory now reported on has, in the five years ending 1905-06, averaged (a) 38·7 per cent. and (b) 2·1 per cent., respectively.]

Explanatory.—This is the second of the three forecasts of the wheat crop which are now to be issued annually under the latest orders of the Government of India. It gives as accurate information as is now procurable regarding both the estimated area and the prospects of the crop.

Character of the season.—Very little rain fell in September and in October and November there was practically no rain. The soil was very dry at seed time and the sowing of a full normal area was prevented. Owing to the want of moisture in the soil, the proper growth of the plants was impeded in the beginning of the season. Some rain was received in parts of the Province in the middle of December, but not in Bihar where the crop is of most importance. It is reported that prospects have been somewhat improved by showers received in January, but rain is still wanted in many districts, and owing to its general scarcity up to the present a good outturn cannot be expected. A little damage to the crop by insect-pests is reported from the Kendrapara Subdivision of Cuttack.

Area sown.—The area sown as now reported amounts to 1,008,000 acres against 965,500 acres which were recorded for the first forecast of December. The difference in the figures is due to the fact that sowings were still in progress at the time of issue of the first forecast.

Outturn.—The reports now received suggest for the entire wheat-growing area of Bihar an average estimate of 64 per cent. of the normal crop. Outside Bihar, the important wheat-growing districts of Murshidabad, Nadia and Hazaribagh return poor crops of 23, 31 and 22 per cent. of the normal respectively.

Accepting the estimates of District Officers, the outturn for the whole Province amounts to 63 per cent. of a normal crop, but some of these estimates appear to be pessimistic.

N. N. BANERJEI,

for *Offg. Director of Agriculture, Bengal, on tour.*

CALCUTTA ;

The 27th February 1908.

Second Forecast of the Wheat Crop of 1907-1908.

District.	Total area of the district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under the wheat crop, in acres.	Approximate area under wheat last year (1906-1907), in acres.	Estimated area under wheat this year (1907-1908), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1906-1907) ?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1907-1908) ?	Figures from the Cadastral Survey.			Date at which the sowing of the crop was begun this year.	A brief statement regarding the weather and general condition of the crop, and whether the date of sowing was, this year early, normal or late.
								Total area of the district which has been cadastrally surveyed.	Years during which the cadastral survey took place.	Area found under the crop during the cadastral survey.		
1	2	3	4	5	6	7	8	9	10	11	12	13
								Acres.		Acres.		
Burdwan ...	1,771,200	1,234,200	1,200	1,300	700	84	45	58,740	1889 to 1893 and 1905-1907.	497	Latter part of October and beginning of November.	The normal area could not be sown for want of moisture in the soil. A poor outturn is expected. The sowing was rather late.
Birbhum ...	1,121,280	785,700	4,000	4,000	1,000	76	70	49,671	1889 to 1891 and 1904.	Not known.	Middle of November	Sowings were late this year. The weather was not favourable at the time of sowing, but good rain has been received after the sowings.
Bankura ...	1,677,440	668,870	4,500	4,000	4,000	95	80	13,534	1889 to 1902 and 1906.	Do. ...	7th November ...	The general condition of the crop is fair. If there be no heavy rain the outturn of the crop will be 60 per cent. The date of sowing was a little late. The decrease in area is due to want of sufficient moisture in the soil in November last.
Midnapore ...	2,918,040	2,190,600	2,600	2,500	1,500	85	83	25,343	1893 to 1898	...	November and December.	The sowing was late this year owing to want of rain. The area under cultivation and the outturn are below the normal.
Hooghly ...	761,210	445,900	2,400	2,100	1,700	85	89	Not cadastrally surveyed.			November ...	The dates of sowing were normal. Owing to want of rain at the time of sowing there has been a reduction in the area sown this year as compared with that of last year. The recent rains have improved the prospects of the crops.

DISTRICT.	Total area of the district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under the wheat crop, in acres.	Approximate area under wheat last year (1906-1907), in acres.	Estimated area under wheat this year (1907-1908), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1906-1907) ?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1907-1908) ?	FIGURES FROM THE CADASTRAL SURVEY. Total area of the district which has been cadastrally surveyed.	FIGURES FROM THE CADASTRAL SURVEY. Years during which the cadastral survey took place.	FIGURES FROM THE CADASTRAL SURVEY. Area found under the crop during the cadastral survey.	Date at which the sowing of the crop was begun this year.	A brief statement regarding the weather and general condition of the crop, and whether the date of sowing was this year early, normal or late.
1	2	3	4	5	6	7	8	9	10	11	12	13
	Acres.							Acres.		Acres.		
Nadia ...	1,757,280	1,848,800	53,100	51,100	9,800	46	31	Not cadastrally surveyed	...	...	25th September, 15th October and 1st November.	Sowings were normal. The decrease in the area sown is due to want of rain. The Subdivisional Officer of Meherpur has shown the area sown this year as 4,800 acres against 3,800 acres shown in the first forecast. His explanation is awaited. The Subdivisional Officer of Chuadanga has reduced the area sown from 3,700 acres as shown in the first forecast to 1,400 acres, explaining that germination has been defective. The above explains the discrepancy between the figures shown in column 6 of this forecast and those shown in column 8 of the first forecast.
Murshidabad	1,571,680	985,600	60,300	60,000	21,300	67	23	...	...	...	Beginning of October	The general condition of the crop is not good owing to insufficient rain. The date of sowing was normal in half the area and late in the other half.
Jessore ...	1,272,153	1,191,000	1,700	1,100	1,800	70	40	...	...	...	1st November to 15th November.	The outturn is not satisfactory for want of rain.
Pabna ...	1,352,640	1,032,100	125,500	117,800	105,700	57	55	73,164	1900-01	1,361	From 1st October ...	The condition of the crop has improved since the rain-fall of the 11th January last. The sowings were begun at the normal time.
Bogra ...	2,015,680	2,119,100	167,000	168,800	65,400	60	65	514,565	1893 to 1898 and 1900 to 1902	23,192	15th October ...	There were floods in the beginning of September and drought afterwards which proved extremely unfavourable to the growth of the crop. The condition of the crop has however been greatly improved by the recent rain-fall. The date of sowing this year was late.

Shahabad ...	2,000,848	1,848,000	226,800	170,000	122,000	65	88	...	...	16th October ...	...	The figures in columns 2, 3 and 4 have been revised. The sowings were late all over owing to want of rain. The decrease in the area and in the outturn are due to failure of rain.
Saran	1,771,296	1,637,800	77,840	72,800	44,500	48	66	1,633,488	1858 to 1901	20th October	77,825	—	The germination of the crop was good where artificially irrigated. The recent rain-fall of the 11th instant has helped the crop in general. Prospects at present are favourable. Sowings were late for want of timely rain
Champaran ...	2,339,840	1,647,600	186,900	98,200	88,200	88	83	2,250,240	1892 to 1899	End of September and beginning of October.	103,300		The weather has not been favourable. The recent rain in January though slight has done some good, but more rain is needed. The date of sowing was normal.
Muzaffarpur ...	1,546,400	1,631,600	69,700	69,700	61,700	70	65	1,946,400	1892-93 to 1904-05.	November ...	69,700		Sowings were late for want of the Kathiya rains. The weather and general conditions were not favourable for the growth of the crop for want of moisture in the beginning of the season but the recent rain has effected some improvement.
Darbhanga ...	2,148,800	1,673,900	85,700	99,840	66,000	64	93	2,148,800	1896 to 1906	October ...	88,700		Owing to lack of rain at the time of sowing and the failure of the Kathiya rains the crop is not expected to be up to the average. Its condition has been somewhat improved by the recent rainfall in January. The date of sowing was normal.
Monghyr ...	2,118,000	1,852,300	150,000	246,800	184,500	60	89	960,933	1900 to 1906	1st week of October ...	186,618		The crops suffered a good deal for want of rain.

District	Total area of the district, in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under the wheat, crop in acres.	Approximate area under wheat last year (1906-1907), in acres.	Estimated area under wheat this year (1907-1908), in acres.	Taking 100 to represent the normal outturn, how much represented the outturn last year (1906-1907) ?	Taking 100 to represent the normal outturn, how much will represent this year's outturn (1907-1908) ?	Figures from the Cadastral Survey.			Date at which the sowing of the crop was begun this year.	A brief statement regarding the weather and general condition of the crop, and whether the date of sowing was this year early, normal or late.

Shaukipur	2,704,640	2,073,600	185,200	185,600	185,000	80	81	1,857,048	1902 to 1904	65,500	Last week of October	The date of sowing was a little late. The condition of the crop is fair. It is poor in Banka. The recent rain has done much good. The area sown was short for want of moisture.
Purnea	3,196,183	1,894,400	94,000	93,600	93,600	70	67	2,508,346	1901-02 and 1904-05.	Not known yet.	Middle of October	The condition and prospects of the crop were not at all favourable for want of rain in October last, but owing to rain received in January prospects have improved somewhat. The date of sowing was normal. Enquiries are being made with regard to the figure for column 8 received from Amin which appears to be open to doubt.
Darjeeling	744,960	104,800	4,200	4,300	4,303	70	63	125,949	1897 to 1903	1,711	15th September to 1st October.	Sowings were normal. The weather was unfavourable. The return is poorer than that of last year.
Sonthal Parganas.	4,000,320	1,548,800	98,970	97,200	10,200	75	48	3,573,008	1899 to 1903	16,134	15th October	The weather was unfavourable. The general condition of the crop was not good for want of rain, but the recent rain has improved it to some extent.
Cuttack	2,333,120	1,333,120	1,440	1,300	1,300	77	71	2,603,457	1899 to 1905 and 1900 to 1901.	831	Between 5th October and 15th November.	The date of sowing was normal. The weather was not favourable to the crop for want of rain. The crops were damaged in Kendrapara subdivision by an insect called Kalasandi. Hence the outturn is low.
Balasore	1,354,880	933,200	100	100	100	75	75	1,066,778	1901-02 to 1904-05	..	15th October	The date of sowing was early. The weather conditions and the rainfall were not favourable for the growth of the crop; hence the area is less than that of last year. The condition of the crop is poor. The normal area was revised during the year.

Angul ...	1,078,840	852,400	100	100	70	30	The Sadar subdivision of Angul was cadastrally surveyed in 1898-99.	5,483,520	1894 to 1897 and 1901 to 1907.	100	15th October to 1st November.	15th October ...	...	The date of sowing was late for want of rain.
Sambalpur ...	8,453,360	889,300	100	100	90	60								Sowings were a little late this year on account of the early cessation of rain. Wheat is grown here under irrigation only, the soil, being not retentive of moisture, and as much of the water from tanks was spent in irrigating rice fields, the wheat crop suffered to a great extent in the Sadar subdivision which accounts for the low outturn.
Hazaribagh ...	6,872,440	1,703,000	18,700	18,100	65	32	...	...	...	...	September and October.			The weather and general condition of the crop are unfavourable. The date of sowing was rather late.
Ranchi ...	4,807,360	1,809,000	880	800	75	60					By end of October ...			The date of sowing was normal. Owing to the early cessation of rain the condition of the crop is bad.
Palamau ...	2,144,960	687,000	14,700	13,900	90	60		157,880	1896-97	1,460	15th October ...			The date of sowing was early. Though the area sown is very small in comparison with that of last year, the condition of the crop is fair at present and the recent rain has been of much benefit.
Manbhum ...	2,654,080	1,419,200	4,000	3,600	75	60	Not cadastrally surveyed.				Last week of November.			The low outturn is due to want of rain. The date of sowing this year was late.
Singhbhum ...	3,490,240	849,700	5,000	3,000	80	60		1,701,984	1895 to 1897 and 1900 to 1903.	1,957	15th October ...			The weather was not quite favourable and the condition of the crop is not good as there was no seasonable rain. The date of sowing was normal.

		Inches.			
1	Burdwan ...	Nil	8	8½	Weather seasonable. Pressing of sugarcane and harvesting of spring crops continuing. No cattle-disease. Scarcity of fodder and water apprehended at Katwa.
2	Birbhum ...	Nil	6¾	6¾	Food-grains sufficient at present. No cattle-disease. Sugarcane-pressing continuing. Fodder and water sufficient.
3	Bankura ...	Nil	7½	7½	Weather seasonable. Harvesting of *rabi* crops nearly finished. Pressing of sugarcane going on. 551 men, 390 women and 57 children (total 998) on four test-works on the last day ending 6th March. No cattle-disease. Fodder and water sufficient. Condition of agricultural stock fair. Common rice selling at 6 to 7 seers a rupee in the affected tracts.
4	Midnapore ...	Nil	7	6	Planting of sugarcane and sowings of *rabi til* progressing. Prospects of sugarcane and tobacco fair. No change in general condition. Fodder and water sufficient.
5	Hooghly ...	Nil	7½	6¾	Weather seasonable. Stocks of food-grains likely to be sufficient till next harvest. Prices of food-grains stationary. No likelihood of scarcity at present. Prospects of *rabi* crops fair. No cattle-disease. Fodder and water sufficient.
6	Howrah ...	Nil	8	8	Sky clear. Prospects of standing crops fair. *Rabi* crops being harvested and sugarcane being pressed Stocks of food-grains sufficient till next harvest. Prices stationary. Condition of agricultural stock good Fodder and water supply sufficient. No apprehension of scarcity.
7	24-Parganas	Nil	7½	7	Weather seasonable. Harvesting of *rabi* crops finished. Common rice selling at 6⅞ seers at Barasat, 7 seers at Barrackpore and 8⅛ seers at Basirhat. No report from Diamond Harbour.
8	Nadia ...	Nil	7½	6¾	Prospects of standing *rabi* crops not favourable. Ploughing of lands going on. Prices of staple food-grains falling now. Stocks of food-grains insufficient. Scarcity apprehended. Condition of agricultural stock good. Fodder and water barely sufficient.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
9	Murshidabad	...	...	7½	Prospects of *rabi* crops not hopeful. Lands being ploughed for *bhados* paddy in Jangipur. Sugarcane cutting and pressing continuing in Kandi. Stocks of food-grains not likely to last till next harvest. Fodder sufficient except in some places in the Sadar subdivision. Water insufficient. No cattle-disease. Condition of agricultural stock fair. Potato crops very good in Kandi and mango blossoms very promising.
10	Jessore ...	Nil	8	7½	Weather seasonable. Condition of standing *rabi* crops not favourable. Rain wanted everywhere for cultivation. Stocks of food-grains sufficient at present. Prices of food-grains slightly fallen during the week. Scarcity apprehended by April next. No cattle-disease. Condition of agricultural stock good. Fodder and water sufficient. High prices continuing.
11	Khulna ...	Nil	9	9	Weather seasonable. Prices of staple food-grains almost stationary. Stocks of food-grains sufficient till next harvest. No apprehension of famine at present. Condition of agricultural stock good. Fodder and water sufficient.
12	Patna ...	Nil	7½ 10½*	8 10½*	Weather seasonable. Harvesting of *rabi* crops going on. Planting and pressing of sugarcane in progress. Opium being collected. Prices of food-grains almost stationary, and stocks likely to be sufficient if not largely exported. Condition of cattle good. Fodder and water supply sufficient.
13	Gaya ...	Nil	8½† 9½*	7½ 9½*	Weather seasonable with west winds. Condition of standing *rabi* crops good. Sowings of *china* going on. Harvesting of some *rabi* crops commencing. Prices slightly falling at the Sadar and Aurangabad subdivisions; almost stationary elsewhere. Fodder and water for cattle sufficient. Cattle-disease continuing in one village of the Nawadah subdivision. Scarcity not apprehended in the near future.
14	Shahabad ...	Nil	8½ 10*	8½ 8*	Rainfall at Buxar 0·06 and Dehri 0·38 inch. *Rabi* crops doing well. Harvesting of peas, *masur*, gram and wheat continuing. Sugarcane-planting and pressing going on. Poppy doing well. Prices of food-grains tending to fall. Stocks under normal, but sufficient if not exported. Condition of agricultural stock good. Number relieved at Chenari kitchen on last reported date 75, including children. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
34	Cooch Behar	Nil	$9\frac{7}{17}$	$8\frac{7}{17}$	Days hot and nights cool. Lands being prepared for paddy and jute. Prices of staple food-crops coming down. No apprehension of scarcity or famine. Fodder and water sufficient.
35	Feudatory States, Orissa.*	...	...	...	Rainfall *nil*. Harvesting of gram going on in Kalahandi. Pressing of sugarcane continuing in Baramba, Daspalla, Narsingpur, Ranpur, Patna and Kalahandi. The estimated outturn of castor 16 annas in Bonai; in good condition in Athmallik, Ranpur and Boad. *Mung* and gram growing in Nayagarh. Agricultural stock sufficient. Fodder and water sufficient. Price of rice varying from 7 seers in Bonai, and 7¼ seers in Athmallik to 13 seers in Patna and 16 seers in Pal Lahera.

* The report is for the week ending the 29th February 1908.

General Summary.—There was a slight fall of rain in parts of Bihar. Such *rabi* as could be sown is doing well except in the Presidency Division. The prospects of the mango crop are good. The *dalua* rice in Balasore is suffering for want of rain. There is still some sugarcane-pressing going on and the planting of the new crop is in full swing. The *rabi* harvest is in progress. Stocks are reported insufficient in Nadia, Murshidabad, Balasore and Palamau. Scarcity apprehended in Nadia, Hazaribagh and later on in Jessore. Prices throughout the province tend to fall. Fodder and water is reported to be insufficient in parts of Burdwan, Murshidabad and Balasore. Cattle-disease is reported from Gaya, the Santhal Parganas, Cuttack, Puri, Sambalpur, Hazaribagh, Ranchi and Palamau. The numbers on test-works and in receipt of gratuitous relief have declined. The test-works in Bankura, Ranchi and Orissa were attended by 3,668 persons and gratuitous relief was given to 15,015 persons in Orissa and 75 in Shahabad.

Dept. of Agriculture, Bengal,
Calcutta, the 10th March 1908.

SUMMARY OF THE RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE MONTH OF FEBRUARY 1908.

In February rain was general throughout the province except in Orissa and the districts immediately round Calcutta. The fall in Bihar and Chota Nagpur was considerably in excess to the normal (282 and 247 per cent. respectively). In South-West Bengal the fall was only 20 per cent. of the average and in Orissa it was nil.

The following table gives the summary of the rainfall data of each of the four Meteorological Divisions of the Province of Bengal for the month of February 1908:—

Meteorological Divisions.	Rainfall of month. Average.	Normal average	Variation	Rainy days. Average number in month.	Normal average number in month	Variation.	Rainfall since 16th October 1907. Average.	Normal average.

The total fall from 1st January to 7th March 1908		0·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·10

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

≏, dew; ≡, fog.

GENERAL DEPARTMENT.

NOTIFICATIONS.

STATE TECHNICAL SCHOLARSHIPS FOR NATIVES OF INDIA.

No. 1798.—The 16th March 1908.—In the year 1903 His Majesty's Secretary for State for India sanctioned as a provisional measure the institution of a certain number of scholarships, tenable by natives of India, in Europe or America. The purpose of these scholarships was to provide for natives of India that higher technical education which might qualify them to assist in promoting existing native indutries, and developing new industries, wherever this might be possible. Technical education for this purpose was defined as—(*a*) the study of the scientific methods and principles underlying the practice of any handicraft, industry or profession, and (*b*) the application of these methods and principles to the handicraft, industry or profession in question. Law, medicine, forestry and veterinary science, being already provided for, were not included among the subjects to be studied by the holders of the technial scholarships, and agriculture was excluded from the scope of the scheme. As far as Bengal was concerned, it was decided that the mining industry offered the most favourable field for the initiation of the experiment, and the scholarships hitherto awarded on the recommendation of the Government of Bengal have been utilised for the encouragement of that industry. Eleven State technical scholars have been sent from Bengal in the four years 1904 to 1907.

2. The Government of India have now decided to award, during the year 1908 and the following years, one scholarship annually to each province, provided that the Local Government or Administration concerned has a suitable candidate to nominate, and that its recommendation is submitted in accordance with the principles which are stated in paragraph 5 below, and that the industry to be studied is either already developed or in the process of development.

3. It may, however, sometimes happen that, owing to the dearth of eligible candidates in certain provinces, two or more scholarships may on occasion be available for allotment to other provinces. If, therefore, a Local Government is in a position to recommend confidently more than one candidate, such recommendation may be submitted to the Government of India. In such cases the candidates need not necessarily be selected for the same industry.

4. As regards the current year, it has been decided, after consultation with representatives of the mercantile and industrial communities, that the industry to be primarily encouraged is the mining industry. It has further been decided that the industry which should be considered as coming next to the mining industry as regards its claims to encouragement, is the leather tanning industry. One candidate will, if possible, be recommended for a scholarship in connexion with the mining industry. The question whether, in the event of this Government recommending to the Government of India more than one candidate, the selections will be made for the mining industry alone, or for both the mining and the leather tanning industries, will depend largely on the character of the applications received

5. The principles in accordance with which recommendations for scholarships will be submitted to the Government of India are as follow :—

(*a*) In making selections Government will bear in mind the fact that it will be necessary for the students to have a competent knowledge of English, or of the language of any other country to which they may be sent.

(*b*) Government will also be guided by considerations of the capacity and intelligence of applicants, and of the practical interest shown by them in the industries selected, as also the assurance which they may afford that they will continue to devote themselves to the industries selected on their return in India. These being matters which cannot be decided by competition, it is to be understood that the scholarships are not to be regarded as prizes, for which every one has a right to claim an equal opportunity of competing.

(*c*) As a general rule, a scholar, before being nominated, should have received the best technical education available in the province in the particular industry which he proposes to study. The standard of this education differs in different industries, and each may be considered on its own merits. Even if the standard of technical education in a particular industry is low, the scholar may be nominated, if he has availed himself of the best facilities obtainable, and shown an interest in the industry selected.

(*d*) No age limit is fixed for scholars, but an age limit may, at the discretion of Government, be fixed for any particular scholarship for which it invites applications.

6. The following are the conditions and terms on which the scholarships are tenable :—

(*a*) The value of the scholarships has been fixed at £150 a year, exclusive of fees payable to the institutions, where the scholars will study, and travelling expenses; but in special cases Government will consider proposals for increasing the amount of the scholarships.

(*b*) In ordinary circumstances the period for which a scholarship is tenable will be two years, but in special cases it may be increased to a third year, or, on the other hand, it may be reduced below even two years.

(*c*) The scholarships are tenable in foreign countries as well as in Great Britain, and are payable from the date on which a scholar reports his arrival in the country which he may have selected for the purpose of study.

(*d*) The scholarships are tenable by persons who are natives of India within the meaning of section 6, Statutes 33 and 34 Vic., Cap. 3.

(*e*) The scholars, while in England or elsewhere, will be under the supervision and control of the Secretary of State The conditions under which they will hold the scholarships are given in the "Rules for Indian Government Technical Scholars in England," a copy of which is attached to this notification.

7. It is essential, not only in the interests of the scholars themselves, but also in order to avoid unnecessary extensions of scholarships, that the beginning of the period of the scholar's residence in England should coincide with the opening of the academical session of the institution which they propose to enter. It has accordingly been arranged, in consultation with the Secretary of State, that scholars shall report themselves in England not later than the middle of September. It has also been ascertained that it is of no advantage to them to reach England earlier than this, and that consequently they should not ordinarily leave India before the middle of August.

8. Government does not guarantee to provide scholars with employment on their return to India

9. All applications for scholarships to be awarded during the year 1908 must reach the Director of Public Instruction on or before the 5th April 1908. This notification is issued in lieu of the notification issued by the Director of Public Instruction and dated the 23rd October 1907.

10. Applicants for scholarships must file certificates as to—(1) moral character and antecedents, (2) educational qualifications, (3) knowledge of the language of the country in which the scholarship is to be held, and (4) physical fitness. Candidates must name the country to which they propose to proceed, and the course of studies which they propose to take up while in receipt of scholarships. They should also state whether they have had any actual experience of the industry or industries for which the scholarships are offered.

11. If more than one duly qualified candidate is available, endeavour will be made to reserve one nomination for a Hindi-speaking candidate. If, however, no such candidate is forthcoming, some other qualified candidate who may apply will be recommended.

RULES FOR INDIAN GOVERNMENT TECHNICAL SCHOLARS IN ENGLAND.

1. Every scholar shall, on reaching England, at once present himself to the Secretary Judicial and Public Department, at the India Office, and report his arrival in writing.

2. Every scholar shall, without any unnecessary delay, inform the Secretary of State to which University or College he is about to proceed, and shall at once take steps to enter himself thereat.

3. Every scholar shall, within four weeks of reaching England, submit, for the approval of the Secretary of State, a statement showing the general course of study he proposes to follow; and the course approved shall not be changed without the sanction of the Secretary of State.

4. Every scholar shall, at the end of each term of residence at a University or College, submit to the Secretary of State a certificate from the proper University or College authority showing that his residence, conduct, and progress in study have been satisfactory during the term.

5. Every scholar shall at all times obey such instructions as he may receive from the Secretary of State.

6. Subject to a due compliance with the above conditions, the allowance, at the rate of £150 a year, for two years, or three years, if so determined, will be paid quarterly, in advance by the India Office, commencing from the date of the scholar's reporting his arrival in England; but this allowance shall be reduced by the amount of any other sum which may become payable to him out of the revenues of India in respect of residence at a University or College during the same period or any part of it, but not in respect of University or College fees, the cost of which will be separately defrayed by the Secretary of State.

The necessary travelling expenses of scholars, by second class, or by third class if no second class be available, will also be separately defrayed by the Secretary of State; these should be claimed on forms obtainable from the Accountant-General, India Office, S. W.

Charges for hotel bills are not defrayed.

7. Every scholar will forfeit his scholarship, who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to complete the required term of residence in England according to the terms and conditions approved by the Secretary of State under Rule 3, or who is guilty of misconduct or disregard of the orders of the Secretary of State. If a scholarship be forfeited, the scholar will lose his claim to a free return passage to India, and will further become liable to refund the cost of his free passage to England.

8. The scholars will be under the special supervision and charge of the Political Aide-de-Camp to the Secretary of State, through whom the necessary orders will be given and to whom all reports and other communications respecting them should be sent.

No. 1702.—The 12th March 1908.—In exercise of the powers conferred by section 3 of the Indian Factories Act, 1881 (XV of 1881), as amended by Act XI of 1891, the Lieutenant-Governor is pleased to appoint Mr. R. P. Adams to be an Assistant Inspector of Factories within the limits of the Province of Bengal for a period of six months, with effect from the forenoon of the 24th February 1908.

ESTABLISHMENT.

The 14th March 1908.

No. 96—Mr. H. A. Gubbay, Assistant Engineer, Champaran Division, is granted, under articles 260, 316 and 233 (*ii*) of the Civil Service Regulations, privilege leave for two months and twenty-one days, combined with special leave on urgent private affairs for three months and ten days, with effect from 26th March 1908, or such subsequent date as he may avail himself of it.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

[Fifth publication.]

The 18th February 1908.

No. 3.—Notification.—In exercise of the powers conferred upon him by sections 78 and 99 of Act III (B. C.) of 1876, His Honour the Lieutenant-Governor of Bengal proposes to pass the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These rules and rates will supersede those now in force.

R. E. CARTER,

Offg. Secretary to the Govt. of Bengal.

Leases for a term of years.

1. The country served by the canals shall be mapped out into blocks of convenient size in accordance with the features of the ground, natural or artificial. So far as may be practicable, the blocks shall be separated by drainage lines. This shall be done by the Subdivisional Canal Officers under the guidance and control of the Divisional Canal Officer.

2. Each block determined as above shall be numbered and recorded with its gross and irrigable areas in registers to be maintained by the Subdivisional Canal Officers. The blocks shall also be marked on maps to be maintained by the same officers.

3. Leases for not more than seven years may be granted for the whole irrigable area of a block or for definite parts of a block under the following conditions:—

I.—Ordinarily the whole irrigable area of any village so far as situated within the block must be included in the lease. If the lands of a village within the block are divisible into two or more distinct parts which can be irrigated independently, a separate lease may be granted for each part.

II.—All leases within one block shall be so granted that they may expire on the same date.

III.—No lease shall be granted when the supply of water must of necessity be delivered across an unleased area, unless a channel exists, which, in the opinion of the Subdivisional Canal Officer, will deliver water without waste across the unleased area.

4. The Superintending Engineer shall fix from time to time the gross area for which and the limits of the canal within which, leases for a term of years may be granted.

5. Maps of all villages in which lands have been brought under lease for a term of years, or in which there is any probability of such leases being taken, shall be kept in the subdivisional canal offices. These maps to be at scale 32″ = 1 mile when such are available, and elsewhere at scale 16″ = 1 mile.

6. The preliminary application for a lease for a term of years, either new or renewal, may be of an informal nature, but it must be in writing. It may be presented and shall be received either at the Subdivisional or Sectional Canal Office; in the latter case the Sectional Officer shall forward it immediately to the Subdivisional Canal Officer. The Subdivisional Canal Officer as soon as he has, by personal enquiry or by an enquiry made by the Sectional Officer, satisfied himself that the land in question constitutes a definite block or a definite part of a block, and that it can be irrigated, shall at once inform the Divisional Canal Officer giving such particulars as that officer may direct, and shall ask his formal approval to the lease being proceeded with. On receipt of such approval the Subdivisional Canal Officer shall forward the preliminary application to the Zilladar, in order that the detailed assessment may be taken in hand. The lands to be brought under lease shall be indicated on a copy of the map alluded to in rule 5.

7. The Zilladar on receipt of the application shall depute an amin to prepare the *khasra* or detailed assessment paper. This shall be done on the ground with the aid of the revenue survey map and *khasra*. Should the survey map and *khasra* not be available, the amin shall make a sketch map, and shall measure the areas of the holdings with a chain or measuring-rod.

8. When the amin has completed the *khasra*, the Zilladar shall forward it to the Subdivisional Canal Officer for approval.

9. As soon as the *khasra* has been approved by the Subdivisional Canal Officer, he shall return it to the Zilladar endorsed with his signature in token of approval.

The Zilladar shall then prepare a *khatian* or abstract of the *khasra*, and shall have the form of application, given as Appendix No I to these rules, filled up and signed or marked by each of the applicants, in the presence of two witnesses.

When the application has been completely signed, the Zilladar shall send it to the Divisional Canal Officer, by whom the permit or formal approval of the lease shall be signed and issued in the form given as Appendix No. III to these rules. The permit shall be made over to the representative of the cultivators by the Subdivisional Canal Officer by means of his Sectional Officers. The Divisional Canal Officer shall return the application to the Deputy Collector, Revenue Division, with a copy of the permit for record.

10. Should it happen that the cultivators of the block proposed for lease are not unanimous, and that certain of them decline to sign the application, the Zilladar shall report the matter to the Subdivisional Canal Officer. This officer shall hold a local enquiry, recording the statements of the persons who decline to sign and recording his personal opinion on the reasons given. He shall then send a report to the Divisional Canal Officer, who shall decide whether the lease may be accepted excluding the fields in the occupation of the persons who decline to sign, or whether the lease shall be declined. The Divisional Canal Officer is authorised to grant a lease when not less than 95 per cent. of the net irrigable area of the block has been signed for. In particular cases should it be desirable to grant a lease even though an area larger than 5 per cent. of the block has not been signed for, this may be done on the written order of the Superintending Engineer. The reasons for granting the lease shall be fully recorded.

Covering Leases.

11. Applicants for a lease for a term of years who may require water before the lease has been concluded can obtain a supply on tendering an application for a covering lease in the form given as Appendix No. II to these rules. This application must be signed in the presence of the Zilladar or of some other responsible officer nominated for the purpose by the Subdivisional Canal Officer. The signatures should be those of the leading cultivators in the block in question, and they should represent holders of not less than 75 per cent. of the irrigable land within the block.

As soon as the Subdivisional Canal Officer receives the application duly signed, he shall issue a permit in the form given as Appendix No. IV to these rules, and shall at once supply water.

Single Waterings.

12. Applications for a single watering during the *kharif* season, may be entertained if water is available, after meeting the demand for the areas leased for a term of years. The applications may be presented at the Subdivisional Canal Office or to the Sectional Officer They must be in the form given as Appendix No. V to these rules.

The application must be for a definite block and the signatures of the applicants must cover areas aggregating not less than four fifths of the lands in the block.

If the Subdivisional Officer is able to supply water and accepts the application he will require the applicants to pay in advance one-half of the amount due on the areas entered in the application at the rate specified in the schedule of rates, and on this sum being paid he will at once issue a permit in the form given as Appendix No. VI to these rules and will supply water. When the watering has been concluded the area actually irrigated shall be determined and the assessment shall be made on the areas actually watered within the limits of the block specified in the application and permit.

Season Leases.

13. Applications for water to irrigate spring rice or other crops between December and April may be presented at the Subdivisional Canal office or to the Sectional Officer. They must be in the form given as Appendix No. VII to these rules.

In the applications the areas for which water is required must be specified but the rate will be charged on those areas for which water is actually used as determined by measurement.

The permit in the form given as Appendix VIII to these rules will be granted by the Subdivisional Canal Officer if he is able to supply the water.

Supply of water.

14. The Divisional Canal Officer shall control the supply of water throughout the Division in his charge.

15. No water shall be supplied to any lands except such as have been brought under a lease for a term of years or for the season, or to such as are provided for by a covering lease or by a lease for a single watering.

16. Under the forms of irrigation lease in use, no specific supply of water is promised: but the undertaking is to give such a supply to each lessee as may be necessary for the lands leased. The supply shall be given, as may be required for the proper cultivation of the crops under irrigation, according to the exigencies of the season.

17. The Divisional Canal Officer is empowered to give the required supply by rotation, should this be advisable for the efficient working of the canals in his charge. In such a case, he is required to give the lessees written notice informing them of the periods when they will be supplied with water.

Collection of water-rates.

18. The rates due for water supplied shall be collected by the Deputy Collector or other officer in charge of the Revenue Division through his staff of Zilladars, Tahsildars and peons. All *khatians* or demand statements shall be signed by the Deputy Collector or other officer in charge of the Revenue Division after scrutiny in his office

19. At the time of preparation of the *khatian* in the Zilladar's office, each person assessed shall be furnished with an extract from the assessment paper, showing the particulars of the charge against him. This extract shall be furnished in such form as may from time to time be approved for the purpose.

20. Each person on paying the sum due from him shall be given a receipt in the form prescribed for the purpose.

21. For the purposes of account, of control over establishment, and of general administration, the Deputy Collector or other officer in charge of the Revenue Division is in the position of an Executive Engineer in charge of a division, and is directly subordinate to the Superintending Engineer. In regard to any proceedings taken under the Public Demands Recovery Act the Deputy Collector is subject to the control of the Collector of the district.

Unauthorised use of water and waste of water.

22. Should it be necessary to take action under the provisions of sections 79 and 80 of the Act, proceedings shall be instituted only under the direct and special order of the Divisional Canal Officer. The primary record of the facts regarding the unauthorised use or the waste of water shall be made by the Subdivisional Canal Officer and his subordinates. The parties whom it is proposed to assess shall be informed in writing, and shall be called on to show cause why they should not be assessed. The record of their statements shall be made by the Divisional or by the Subdivisional Canal Officer. The Divisional Canal Officer shall consider the facts and statements recorded, and shall, in deciding the case, give his reasons for or against assessment, both as regards the facts and as regards the law; and he shall determine the rate to be charged subject to the provision in the schedule of rates attached to these rules.

23. Should the Divisional Canal Officer decide on making an assessment, he shall have the assessment paper prepared by the Subdivisional Canal Officer and his staff. Each person assessed shall be furnished with a statement of the charge against him, and an abstract of the demand or *khatian* shall be sent to the officer in charge of the Revenue Division, who shall proceed to recover the sums assessed. The period of one month within which an appeal may be presented to the Collector under section 91 of the Act shall count from the date on which the statement of the charge may be furnished to the person assessed, which date shall be endorsed on it.

24. No proceedings shall be instituted if the unauthorized use or the waste of water have occurred through the act or neglect of a Canal Officer or subordinate employed on the Canal. During the irrigation of autumn rice, the passing on of surplus water from leased to unleased fields is not an unauthorised use of water.

Complaints and Applications.

25. All complaints or applications with respect to the supply of water, to defective drainage, and generally with respect to the administration of the canals, shall be received on presentation at either divisional or subdivisional canal offices.

Complaints and applications received by a Divisional Canal Officer may be transferred to his Subdivisional Canal Officers for disposal at his discretion.

Any such complaints or applications, if presented to the Deputy Collector or to his staff, shall be returned endorsed with instructions as to the proper office at which to present them. If received by post, they shall be at once forwarded to the Divisional or Subdivisional Canal Officer.

26. Complaints or applications with respect to corrections of the assessment with respect to the actions of the amins in assessing and with respect to the actions of the tahsildars and other staff employed in collections, shall be received at the office of the Deputy Collector or other officer in charge of the Revenue Division, or at the zilladars' offices.

27 Receipts in the prescribed form shall be given at all offices for complaints or applications presented. The receipt of all complaints and applications shall be recorded in registers to be kept for that purpose.

28. The Officer receiving the complaint or application shall either make a personal enquiry into the matter or he shall nominate in writing some responsible person to hold the enquiry.

29. The orders passed on all complaints or applications shall be in writing, and a copy of every order shall be furnished to the complainant or applicant.

The copy of order may be sent by post (registered), if this is convenient.

The period within which an appeal may be presented under section 91 of the Act shall be reckoned from the date on which the copy of the order is received by the person.

30. When an appeal to the Collector is from the order of a Subdivisional Canal Officer, the proceedings shall be called for through the Divisional Canal Officer, who may record on them such remarks as he may think desirable, provided that he does not thereby detain the proceedings.

In all cases in which an appeal against an assessment is preferred to the Collector, that officer may, if he thinks fit, direct that the collection of water-rates be suspended till the appeal is heard.

31. The Divisional Canal Officer is empowered to revise the proceedings of his Subdivisional Canal Officers, and the Superintending Engineer is empowered to call for and to revise the proceedings of all officers under his control.

Remissions and Alterations of Demand.

32. Whenever the crop on land entitled to a supply of water suffers material injury from an insufficient supply of water, or from any interruption in the supply of water, remission of the rate due on such crop shall be given by the Divisional Canal Officer, provided that the person claiming remission shall have applied for such not less than 15 days before the reaping of the crop.

33. On the occasion of lands being brought under a lease for a term of years, the Divisional Canal Officer is empowered to remit the rates for the first season on those fields which from the nature of the cultivation then obtaining, or from other causes, have not, in that season, derived any benefit from the supply of canal water.

34. Should the crop on lands under lease for a term of years suffer material injury from excess of water due to deficient drainage, the Divisional Canal Officer may grant remission of the rates due on such lands in whole or in part, provided that the person asking for remission shall have applied at least 15 days before the reaping of the crop.

35. Revisions of the assessment required in consequence of land under lease being left uncultivated or of land being appropriated for purposes other than cultivation shall be made under the orders of the Divisional Canal Officer.

36. Revisions of the assessment required in consequence of incorrect entries of the names of occupants of lands under lease or of incorrect entries of areas or amounts in the assessment papers, or required by changes in the occupation of lands shall be made under the orders of the Deputy Collector or other officer in charge of the Revenue Division, provided that no change involving any increase or decrease in the total area under lease for a term of years shall be made without the concurrence of the Divisional Canal Officer.

37. Remissions of water-rates on account of injury to the crops caused by inundation, by blight, by storms or by any extraordinary cause will only be allowed under the special orders of the Local Government.

Irrecoverable Demands.

38. The Superintending Engineer is empowered to sanction the write-off of those demands which are reported, after due enquiry by the Deputy Collector or other officer in charge of the Revenue Division, as irrecoverable owing to the poverty of the defaulter or of his successors in case of his death, or owing to the defaulter having absconded.

Cultivators' Representatives.

39. Whenever the preliminary application for a lease for a term of years has been approved by the Divisional Canal Officer, the officer in charge of the Revenue Division shall, with the concurrence of the Subdivisional Canal Officer, select as representative of the cultivators a suitable person or persons who shall generally be acceptable to the cultivators and who shall each have a direct interest in the land for which the lease is executed.

40. The person or persons so selected shall be required to give assistance to the Canal Officers in respect of the following matters:—

(*i*) In the preparation of applications for leases.
(*ii*) In the measurement of irrigated lands.
(*iii*) In recording the names of the occupiers of the holdings.
(*iv*) In receiving demand statements and distributing to the cultivators the individual notices of assessment.
(*v*) In attending, when required, at enquiries into complaints.
(*vi*) In reporting to the silladars any changes in the occupancy of lands under lease.
(*vii*) In assisting the tahsildar in collecting rates.

41. For such assistance the cultivators' representative or representatives shall be entitled to free irrigation of the lands in his or in their own occupation, which may lie within the boundaries of the leased area subject to a total limit of 3 per cent. of the area assessed. The Deputy Collector or other officer in charge of the Revenue Division may disallow in whole or in part this free irrigation, and may recover the rates which would otherwise have been payable in whole or in part if the assistance specified in Rule 40 has not been efficiently rendered. The reasons for such disallowance shall be recorded in writing.

42. The Deputy Collector shall maintain in his office a register containing a record of the names of all representatives and of the areas of free irrigation allowed to each.

43. Applicants for single waterings or for season leases shall be required to nominate one of their number who must have a substantial interest in the land to be irrigated as their representative. The representative so nominated shall perform the same duties as stated in Rule 40 and shall receive remuneration on the same scale as in Rule 41.

Power to decline or cancel leases.

44. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Engineer to direct that the lease shall be cancelled with effect from the 1st of June next following. The order to cancel a lease shall be passed before the 1st of April of the year in which it is to take effect.

45. The Superintending Engineer may give directions to the Divisional Canal Officer to decline applications for irrigation leases of lands in villages where there has been persistent difficulty in realising the water-rates, until all arrears have been paid.

He may further suspend, or altogether cancel, any lease for a term of years, if on the 1st June of any year water-rates to the extent of half the demand for one year are in arrears. Previous notice of intention to put this rule in force shall be given not later than the 15th April preceding.

Miscellaneous.

46. Tanks may be supplied with canal-water without charge, when water can be made available without injury to the cultivation dependent on a canal, under the following conditions:—

(*i*) That the water is to be exclusively used for domestic purposes, or for watering cattle.

(*ii*) That a channel exists through which water can pass without waste.

(*iii*) That the water shall only be supplied on the written order of the Subdivisional Canal Officer.

(*iv*) That any new outlet or sluice which may be required to allow of the supply being given shall be provided at the cost of the persons who ask for the water.

(*v*) That the supply of water may be stopped at any time if it is found that it is being misused.

47. Except when a public right-of-way exists, no person shall, without the permission expressed in writing of the Divisional or Subdivisional Canal Officer, pass himself, or cause any animal or vehicle to pass, on or across any of the works, banks or channels of a canal, or drainage work which is part of the canal system except by means of such bridges, fords and ferries as may have been provided for the purpose.

Any person who, after due warning, commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

48. The use of any part of the banks or berms of any canal, drainage work which is part of the canal system, or flood embankment which is subject to the provisions of the Irrigation Act, as a place for relieving the calls of nature, is prohibited. Any person who after due warning commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

49. Should water be required for purposes other than irrigation, it may be supplied, when available, at a rate of one rupee per 10,000 cubic feet of water.

50. No officer employed on the canals, unless especially exempted by the Lieutenant-Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals or purchase or bid for any Government property sold thereon either in his own name or in the name of another, or jointly, or in shares with others.

Schedule of rates for water supplied from the Midnapore Canal

	Rs.	A.	
For water supplied on a lease for a term of years—supply given from 16th June to 30th November of each year	2	0	per acre per season.
The rate is due in two equal instalments on the 1st of January and the 1st February of each year. Provided that when the sum payable by any lessee is less than Rs. 10, the whole amount shall be due on the 1st of January in each year.			
For water supplied on a covering lease to irrigate lands for which a preliminary application for a lease for a term of years has been received and failing the completion of the same	3	0	per acre.
Supply given from date of covering lease to 30th November of that year. The rate is due as in case of lease for a term of years.			
For water supplied as a single watering the rate is payable half in advance at time of supply and half on completion of the watering	1	0	„ „
For water supplied on a season lease for the irrigation of any crops between 1st December and 15th June ...	2	8	„ „
The rate is payable on 1st June following.			
For the unauthorised use of water or for the waste of water such rate may be charged as determined by the Divisional Canal Officer under rule 22 subject to a maximum of Rs. 5 per acre. Such rate shall be due on presentation of the notice of assessment to the person assessed.			

APPENDIX I.

(Referred to in rule 9.)

APPLICATION FOR A LEASE FOR A TERM OF YEARS.

(Yearly rate, per acre: water to be supplied each year from the 16th June to 30th November only.)

We, the undersigned, of mauza, , pargana , thana , apply for water to be supplied from Distributary of the Midnapore Canal for a term of years, commencing on the 16th June and ending 30th November. The supply of water is required for the irrigation of the block of land formed by our holdings as specified below.

2. We agree that the amounts due shall be payable to the Deputy Collector or other officer in charge of the Revenue Division, Midnapore Canal, or to such person as he may appoint on the 1st January and 1st February, or if Rs. 10 or under on 1st of January of each year, and shall be payable independently of our requiring water in any particular year or not.

3. We also agree to be bound by the rules published in the *Calcutta Gazette* for pages , Notification No.

4. We agree that this application shall not be deemed to have been completed until all the irrigable fields within the block have been signed for, and that failing such completion any covering lease which may have been granted shall be enforced.

5. We agree that the areas* and amounts as given in the statement below are correct at the commencement of the lease, and in token of agreement we attach our individual signature or mark.

6. Our heirs and representatives shall be bound by the terms of this agreement in case of our decease.

SCHEDULE No. 1.

		Mauza.	Pargana.					
1	2	3	4	5	6	7	8	9

* Areas to be given in acres with a note to show the equivalent in the local measure of an acre.

APPENDIX II.

(Referred to in rule 11.)

APPLICATION FOR A COVERING LEASE.

WE, being the principal cultivators of mauza , pargana , thana , on our own behalf and on behalf of the other cultivators of the mauza, hereby certify that we have presented an application for grant of a long lease to cover all the irrigable land in the block situated in mauza , the area of which is approximately acres* the boundaries of the block being specified below.

2. Now in order that we may obtain a supply of water at once and before the long lease can be completed, we, whose signatures or marks are annexed below, severally and jointly bind ourselves to pay the water-rate on the whole area within the limits of the block as specified, which may be determined by the Canal Officer to be irrigable.

3. In the event of a long lease not being completed through the default or non-consent of any of the cultivators of irrigable lands within the block, a rate of Rs. 3 per acre on the area determined for in the present season will be charged to us and will be payable by us on or before the 1st January and 1st February next, or if Rs. 10 and under on or before the 1st January ; water to be supplied up to the 30th November only.

4. In token of our obligation in this agreement we annex our signatures or marks below :—

To *Permit for a season lease.*

being the representive of the cultivators in village , pargana

THIS is to inform you that on the application submitted by you and other cultivators of village , pargana , water will be supplied for the irrigation of the crop from distributary, canal.

The fields actually irrigated will be recorded, and the areas so irrigated as ascertained by measurement or as recorded in the settlement khasras will be assessed at Rs. per acre.*

Those persons who may irrigate their fields without having applied for the water will be liable to be charged a higher rate for the unauthorized use of water.

Signature of Subdivisional Canal Officer.

* A note should be given to show the equivalent in the local measure of an acre.

MARINE DEPARTMENT.

The 11th March 1908.

No. 32Marine.—Mr. A. H. Manger, Mate Pilot, is granted privilege leave for three days, under article 676 (*b*) of the Civil Service Regulations, in extension of the privilege leave for one month granted to him under this Department Notification No. 26Marine, dated the 25th February 1908.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

The 16th March 1908.

No. 33Marine.—It is hereby notified, for general information, that Mr. John Taylor, of Messrs. Burn & Co., who has been nominated by the Bengal Chamber of Commerce to represent that body in the Smoke-nuisances Commission in place of Mr. J. Gillespie, resigned, is appointed, under section 4, sub-section (4) of the Bengal Smoke-nuisances Act, 1905, to be a member of that Commission.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

The 16th March 1908.

No. 34Marine.—Intimation having been received of the outbreak of plague in Cannanore Port, Madras Presidency, it is hereby notified, for general information, that Cannanore is declared an infected port, and that the regulations for the prevention of the introduction of plague by sea, issued by this Government, will be enforced in the ports of Orissa against vessels arriving from Cannanore.

R. E. CARTER,
Offg. Secy. to the Govt of Bengal.

The 17th March 1908.

No. 35Marine.—It is hereby notified for general information, under the provisions of section 109 of the Calcutta Port Act, 1890, that, from the 1st April 1908, the following charges, framed by the Commissioners under section 108 of that Act, as amended by the Calcutta Port (Amendment) Act, 1907, will be levied *by way of River Due* upon goods landed from, or shipped into, any sea-going vessel lying or being within the limits of the Port, whether such goods shall or shall not be landed or shipped at any dock, wharf, quay, stage, jetty or pier belonging to the Commissioners, viz.—

On all goods including Coal other than Bunker Coal and Manganese Ore	...	...	...	4 annas per ton.
On Coal loaded into a vessel's bunkers for consumption on board the vessel	...	...	...	3 „ „
On Manganese Ore	...	...	...	1½ „ „

Goods landed from one vessel and shipped into another vessel in the course of transhipment within the Port shall be exempt from the payment of River Due; also ballast, with the exception of dressed stone.

On miscellaneous general cargo, landed or shipped at the jetties or the docks, for which the landing and shipping charges are not levied on the ton by weight, one-fifth of those charges will be levied as river due.

On goods landed or shipped over the Inland Vessels wharves or otherwise than through the docks or jetties, the due shall be levied on the actual weight where such is ascertainable, and in all other cases in accordance with the weights and measurements given in the schedule in force for the Inland Vessels Wharves.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

By order of the Board of Revenue, L. P.,

R. B. MISRA, *Secretary.*

BOARD OF REVENUE, L. P, CALCUTTA, *the 28th February 1908.*

No. 1417B.

THE HON'BLE MR. W. C. MACPHERSON, C.S.I.

Dated Calcutta, the 11th March 1908.

IN exercise of the powers conferred by section 75 of the Sea Customs Act, 1878 (VIII of 1878), the Board of Revenue, Lower Provinces, direct that the following modifications be made in the rules published under Notification No. 6795B., dated the 2nd December 1907, at pages 2119-2129 of Part I of the *Calcutta Gazette* of the 4th December 1907, for the landing and shipping of passengers' baggage and the passing of the same through the Calcutta Custom House :—

(1) *For* the words "by the baggage staff in charge of a baggage officer or peon with a green boat note," in clause (*2*) of rule 13, *substitute* "by the Master or Agents of the vessel under cover of a green boat note, accompanied, if necessary, by a baggage officer or peon."

(2) *For* Rule 18 *substitute* the following :—

18. "A fee of 8 annas shall be chargeable for every package made over to an officer of Customs for the purpose of being landed."

By order of the Board of Revenue, L. P.,

R. B. MISRA,
Secretary.

CALCUTTA COLLECTORATE.

The 20th February 1908.

EXCISE NOTIFICATION.

HOLDERS of licenses for—

(1) The wholesale vend of imported spirituous and fermented liquors,
(2) The retail vend of imported spirituous and fermented liquors by the bottle only, not to be drunk on the premises,
(3) Both wholesale and retail vend of the above liquors combined in a single license,
(4) Hotels, Restaurants and their subsidiary bars and late closing licenses,
(5) The retail vend of imported spirituous and fermented liquors on board steamers, dining cars, dâk bungalows and railway refreshment rooms,
(6) The sale of imported medicated wines by Chemists and Druggists (to be sold by bottle only not to be drunk on the premises),
(7) The sale or use of spirits rendered effectually and permanently unfit for human consumption,
(8) The sale of cocaine, novocaine, poppy heads and siddhi and its preparation by Druggists and Chemists,
(9) The sale of opium and its preparation under "Druggist permit" by Chemists and Druggists,
(10) The sale of the preparation of siddhi for *bonâ fide* medicinal purposes by Chemists and Druggists under "Druggist permit,"

Monghyr Collectorate, the 18th February 1908. H. F. SAMMAN, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietory right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Nadia, will be put up to sale at the Subdivisional Office, Ranaghat, in the district of Nadia, on the 22nd April 1908, corresponding with Bengali 9th Baisakh 1315.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price, which will be fixed by the Subdivisional Officer at the time of sale. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them, subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100 one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Hooghly Collectorate, Chinsura, the 11th March 1908.

K. MITRA, *for* Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the district of Hooghly, will be put up to sale at the Hooghly Collectorate on the 26th March 1908, corresponding with 13th Chaitra 1314 B. S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of the sale. The purchaser of the estate will be considered as the proprietor of the estate, and the proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2nd.—The sale is to be subject to the existing leases and to the rights conferred by the settlement proceedings and to the laws in force; and purchasers to be bound to respect the rights of the resident cultivators who have signed the schedule of assessment.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount of bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by the noon of the succeeding day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Hooghly Collectorate, Chinsura, the 10th March 1908. K. MITRA, *for* Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the Bangaon subdivision of the district of Jessore, will be put up to sale at the Bangaon Subdivisional Office on the 4th May 1908, corresponding with 21st Byshakh 1315 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary rights of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

N.B.—The conditions regarding the payment of a land revenue fixed in perpetuity are not applicable to estates in temporarily-settled districts, in which the land revenue should be fixed for a term of the current settlement and be subject to periodical revision on expiry of each settlement. In the case of an estate situated in a permanently-settled area and yielding an annual rental of less them Re. 1, there should be no condition regarding payment of land revenue.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount of bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

LALIT KUMAR BASU, Subordinate Judge.

Monghyr, the 14th March 1908 (312—1)

In the Court of the Munsif, Fyzabad.

SUMMONS FOR DISPOSAL OF SUIT.

(*Sections 64 and 68 of the Code of Civil Procedure.*)

SUIT No. 577.

Sheo Narain Lal, of Barma, pargana Haveli Oudh, Fyzabad, plaintiff, *versus* Randhir Singh, of Barma, pargana Hamboudh, defendant.

To Randhir Singh, aged 24 years, son of Lal Singh, dwelling at present Sealdah Railway Station Godown, Calcutta.

WHEREAS the abovenamed plaintiff has instituted a suit in this Court against you for possession and damages, you are hereby summoned to appear in this Court in person, or by a duly authorised pleader of the Court, duly instructed and able to answer all material questions relating to the suit, or who shall be accompanied by some other person able to answer all such questions on the 28th day of March at 10 o'clock in the forenoon, to answer the abovenamed plaintiff; and as the day fixed for your appearance is appointed for the final disposal of the suit, you must be prepared to produce all your witnesses on that day; and you are hereby required to take notice that, in default of your appearance on the day before mentioned, the suit will be heard and determined in your absence.

Given under my hand and the seal of the Court this 28th day of February 1908.

(ILLEGIBLE), Munsif.

(295—1)

Notice.

WANTED a District Engineer for the District Board of Muzaffarpur on a salary of Rs. 700 rising to Rs. 800 by annual increment of Rs. 25. The present appointment is temporary, but there is a possibility of its becoming permanent. Any candidate for the post must be qualified in one of the manners following :—

(*a*) He must be, at the time of seeking the employment, or have previously been, a member of the permanent establishment of the Public Works Department in the grade of Executive or Assistant Engineer or Sub-Engineer or Supervisor; or

(*b*) He must hold the degree of Bachelor of Engineering or be a Licentiate of Engineering of the Calcutta University, or have passed the final examination of the Engineering Department of the Civil Engineering College at Sibpur; or

(*c*) He must have served an apprenticeship of not less than three years in the United Kingdom with some recognised firm of Engineers of high standing; or

(*d*) He must have passed satisfactorily through the whole course of instruction at the recognised School of Engineering in the United Kingdom (*e.g.*, King's College, London; Cooper's Hill College; the Crystal Palace School of Engineering).

Provided that in all cases the candidate must have held charge of important works for not less than five years and must produce a certificate from his immediate superior during such employment that his conduct was satisfactory. The candidate must also produce evidence that his knowledge of the native language is such as to qualify him for employment as a District Engineer.

2. All applications from intending candidates shall be submitted in sealed and registered covers, addressed to Chairman, District Board, Muzaffarpur, and superscribed "Application of appointment of District Engineer." Each application must be accompanied by all the necessary certificates and testimonials required by the preceding rules, together with a suitable envelope addressed and sufficiently stamped for registration in which they can be returned in the event of the application being unsuccessful.

3. Applications will be received by the undersigned up to the evening of the 4th April 1908.

H. C. WOODMAN,
Chairman, District Board, Muzaffarpur.

NOTICE.

THE next annual stock-taking of the Indian Law Reports kept at the Bengal Secretariat Book Depôt will commence on the 1st April, 1908. The public are hereby informed that all issues of the said Reports from the said Depôt to subscribers and officials will be suspended during that month.

F. G. WIGLEY,
Secy. to the Bengal Council, and Asst. Secy. to the Govt. of Bengal, Legislative Dept.

LEGISLATIVE DEPT.;
BOOK DEPÔT BRANCH,
The 18th December, 1907.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

PRICES.

THE terms of subscription, and the terms on which current issues and back numbers are sold, are as follows:—

	Without postage.	With Indian postage.	With Foreign postage.
	Rs. A. P.	Rs. A. P.	Rs. A. P.

Tripod on cross and ball and diamond	19

BAY OF BENGAL—Burma coast.

Kyaukpyu harbour approach—Sunken wreck, no danger.

No. 110 (first publication).—With reference to Notice to Mariners No. 278, dated 7th June 1907, issued by this office, regarding a wreck outside Kyaukpyu, the Bombay Government has given notice (No. 18 of 1908) that the Officer in charge of the Marine Survey of India closely sounded over the position of the reported wreck and found no danger.

The above Notice to Mariners may now be cancelled.

This Notice affects the following Admiralty Chart:—Elephant Point to Cheduba Strait, No. 821: Also, Bay of Bengal Pilot, 1901, page 263.

BAY OF BENGAL—Burma coast.

Akyab—Non-existence of the reported shoal.

No. 111 (first publication).—With reference to Notice to Mariners No. 359, dated 29th July 1907, issued by this office, regarding a reported shoal outside Akyab, the Bombay Government has given notice (No. 19 of 1908) that the Officer in charge of the Marine Survey of India has closely sounded a ten-mile area over the position of the reported shoal of six fathoms, but found no less water than shown on the chart.

This Notice affects the following Admiralty Charts:—Coconada to Bassein River, No 829; Elephant Point to Cheduba Strait, No 821: Also, Bay of Bengal Pilot, 1901, page 255, and Supplement, 1903, page 10.

JAPAN—Yezo (Hokushiu), west coast—Yesashi anchorage.

Kamome jima light—Amended arc of visibility.

No. 98 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 197 of 1908) are republished:—

Particulars.—Kamome jima light, Yesashi anchorage, is visible over the arc given below, and not over the arc previously stated.
Position.—Lat. 41° 52′ 10″ N., long. 140° 6′ 25″ E.
Arc of Visibility.—From N. 18° E., through east and south, to N. 77° W.
Variation.—6° W.
Chart affected.—No. 2975, Yesashi anchorage on.
Publications.—List of Lights, Part VI, 1907, No. 1123.
Sailing Directions, Japan, etc., 1904, page 703.
Authority.—Tokyo Notice, No 1114, 1907.

JAPAN—YEZO (HOKUSHU), WEST COAST.

Ishikari light – Character altered.

No. 99 (second publication).—The following particulars relative to the above issued by the British Admiralty, (No. 198 of 1908) are republished:—

Particulars.—On 1st January 1908, Ishikari lighthouse on the west coast of Yezo having been reconstructed, the light would be altered from white fixed to a light of the following character:—

Position.—On western side of Ishikari river entrance.

Lat. 43° 15′ 25″ N., long. 141° 21′ 10″ E.

Character.—*White flashing every twenty-five seconds.*
Elevation.—48 feet.
Visibility.—12 miles, from N. 49° E., through east, to S. 49° W.
Light Power.- 3,000 candles.
Description of Building.—Iron cylindrical tower, painted white.
Variation.—6° W.
Charts affected.—No. 2681, Furubira wan to Aikappu Misaki.
„ 2405, Kuril islands.
„ 2459, North-west Pacific.
„ 452, Yezo island.
Publications.—List of Lights, Part VI, 1907, No. 1118.
Sailing Directions for Japan, Korea, etc., 1904, page 713.
Authority.—Tokyo (D. of C.) Notice No. 912, 1907.

JAPAN, WEST COAST—KIUSIU.

Shimabara light—Alteration in.

No. 100 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 199 of 1908) are republished:—

Particulars.—On 1st January 1908, Shimabara lighthouse, Shimabara gulf, having been reconstructed, the light would be altered as follows:—

Position.—On islet off Shimabara.

Lat. 32° 46′ 45″ N., long. 130° 22′ 40″ E.

Character.—*White fixed.*
Elevation.—50 feet.
Visibility.—8 miles, from S. 25° E., through south and west, to N. 65° E.
Light Power.—80 candles.
Description of Building.—Iron cylindrical pillar, painted red.
Remarks.—The light is 35 feet above the base of the pillar.
Variation.—4° W.
Charts affected.—No. 358, Kiusiu and Nipon.
Publications.—List of Lights, Part VI, 1907, No. 973.
Sailing Directions for Japan, Korea, etc., 1904, page 544.
Authority.—Tokyo Notice (D. of C), No. 912, 1907.

EASTERN ARCHIPELAGO—BORNEO, WEST COAST.

Little Kapuas (Pontianak) river—Wreck in approach.

No. 101 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 200 of 1908) are republished:—

Particulars.—A wreck with masts above water is reported to lie sunk in the northern approach to Little Kapuas river.

Position.—About 12 miles to the northward of the south point of the river entrance.

Lat. 0° 9′ 30″ N., long. 109° 2′ 0″ E.

Chart affected.—No. 941a, Eastern archipelago.
Publication.—China Sea Directory, vol II, 1906, page 48.
Authority.—Hague Notice, No. 174, 1908.

PACIFIC OCEAN, SOUTH—Society islands, Raiatea.

Téavarua Harbour, south pass—Beacons disappeared.

No. 102 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 214 of 1908) are republished:—

Particulars.—The beacon on the islet and the beacon on the coast, which in line S. 44° W. formerly led through the South pass into Téavarua harbour, no longer existed in November 1907.

Position.—Islet beacon, lat. 16° 45′ S., long. 151° 25′ W.

Variation.—9° E.

Charts affected.—No. 526, Téavarua or Uturoa harbour.
„ 1060, Huaheine to Marua, or Maupiti.

Publication.—Pacific Islands, vol. III, 1900, page 91.

Authority.—Paris Notice, No. 159, 1908.

AUSTRALIA, SOUTH—Spencer gulf.

Port Lincoln—Buoy established.

No. 103 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 222 of 1908) are republished:—

Particulars.—A buoy has been established in port Lincoln, as follows:—

Position.—On north-eastern side of shoal. From the buoy the ruin on Boston island bears N. 87° E., distant $1\frac{1}{10}$ miles, and the extremity of Kirton point S. 17° E.

Lat. 34° 42′ S., long. 135° 52¾′ E.

Character.—White can.

Remarks.—The above danger is now named Le Hunte shoal.

Variation.—4° E.

Charts affected.—No 784, Port Lincoln.
„ 2389*b*, St Vincent and Spencer gulfs.

Publication.—Australia Directory, vol. I, 1907, page 203.

Authority.—Hydrographic Note, "Psyche," No. 1, 1907.

AUSTRALIA—Victoria—Port Phillip.

Hobson bay—Alteration in lights on light-buoys.

No. 104 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 223 of 1908) are republished:—

Particulars.—On 1st July 1908 the colours of the lights exhibited from the undermentioned light-buoys in Hobson bay will be altered as follows:—

1. *Position of Buoy.*—6 cables East from Williamstown breakwater pier green light.
Green light, lat 37° 52′ S., long. 144° 55′ E.
Alteration.—From red to *white occulting.*
Remarks.—This buoy is known as St. Kilda bank buoy.
2. *Position of Buoy.*—2 cables N. 17° E. from Williamstown breakwater pier green light.
Alteration.—From white to *red occulting.*

Variation.—8° E.

Charts affected.—No. 624, Hobson bay.
„ 1171*b*, Port Phillip.

Publication.—Australia Directory, vol. I, 1907, pages 455, 459.

Authority.—Melbourne Harbour Trust Notice, 21st December 1907.

BAY OF BENGAL.

Caution—S.S. "Abbotsford"—Report of a derelict native craft.

No. 105 (second publication).—The Master of the S.S. *Abbotsford* reports that at 6·55 A.M., on the 29th February 1908, he passed a derelict native craft submerged in the following position:—

Lat. 14° 31′ N.
Long. 84° 48′ E.

Mariners are hereby warned.

BAY OF BENGAL—Chittagong coast.

South Patches—Light-vessel replaced in position.

No. 106 (second publication).—With reference to Notice to Mariners No. 15, dated 4th January 1908, issued by this office, a further telegraphic communication, dated 3rd March 1908, has been received from the Port Officer, Chittagong, intimating that the South Patches light-vessel has been replaced in position.

NEW ZEALAND—North island, east coast.

Tauranga harbour—Bell disappeared from buoy.

No. 86 (third publication).—With reference to Notice to Mariners No. 456, dated 9th October 1907, issued by this office, the British Admiralty has given further notice (No. 1915 of 1907) that the bell, on the buoy recently moored in the entrance to Tauranga harbour, off the south-west end of Maunganui, has disappeared.

Approximate position, lat. 37° 38¼′ S., long. 176° 11′ E.

This Notice affects the following Admiralty Chart :— Tauranga harbour, No. 2521 : Also, New Zealand Pilot, 1901, page 135 ; and Revised Supplement, 1906.

EASTERN ARCHIPELAGO—Celebes, west coast—Makassar strait.

Palos bay—Light established.

No. 87 (third publication).—With reference to Notice to Mariners No. 93, dated 22nd February 1907, issued by this office, the British Admiralty has given further notice (No. 1921 of 1907) that a *white group flashing* light of the 4th order, showing groups of two short flashes *every ten seconds*, and visible in clear weather from a distance of 25 miles, has been established on an iron framework support, 69 feet high, painted white, erected on Tanjong Karang, the north-western point of Palos bay.

Approximate position on chart No. 3209, lat. 0° 38′ S., long. 119° 44′ E.

Note.—The height of the light above high water is not stated.

This Notice affects the following Admiralty Charts :—Palos bay on sheet No. 3209 ; strait of Makassar, No. 2636; Eastern archipelago, No. 941b; China sea, Nos. 2660b, 1263; Australia, northern portion, No. 2759a : Also, List of Lights, part VI, 1907, page 103 ; Eastern Archipelago, part II, 1904, page 320 ; and Supplement, 1906.

KOREA, WEST COAST—Ping yang inlet approach.

Seitau and Sister islets—Lights and fog-signal established.

No. 88 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 160 of 1908), are republished :—

Particulars.—On 27th December 1907 the undermentioned lights and fog-signal would be established in the entrance to Ping Yang inlet (Chinnampo), in the following positions :—

1. *Name.*—Seitau (West islet).

Position.—On summit of the island.
Lat. 38° 32′ N., long. 124° 46′ E., on chart No. 1656.

Character.—*White flashing every thirty seconds.*

Elevation.—302 feet.

Visibility.—24 miles.

Description of Building.—Concrete cylindrical tower, painted white, the centre of the lantern being 22 feet above the ground.

Order or Power.—4th order.

Fog Signal.—When a vessel's signals are heard, a gun will be fired *twice* with an interval of *three minutes* between each report. If necessary, this signal will be repeated after an interval of ten minutes.

Remarks.—The light is obscured from the bearing of N. 8° W. to N. 86° W.
The light and fog-signal will be discontinued annually from the 15th January to the end of February, on account of ice.

Variation.—4° W.

2. *Name.*—Sister island.

Position.—On the northern point of the island, 5 cables N. 72° W. from the northern point of Dauchen island.
Lat. 38° 40′ N., long. 124° 58¾′ E., on chart No. 1656.

Character.—*Fixed*, showing the following sectors: —

Sectors.—*Red* from N. 5° E. to N. 17° E.
White from N. 17° E. to N. 22° E.
Red from N. 22° E. to N. 59° E.
White from N. 59° E. to N. 68° E.
Red from N. 68° E., through east and south, to S. 80° W.
White from S. 8° W., through west, to N. 89° W.
Red from N. 89° W. to N. 75° W.
Obscured from N. 75° W., through north, to N. 5° E.

Elevation.—129 feet.

Visibility.—15 miles.

Description of Building.—Concrete cylindrical tower painted white, the centre of the lantern being 25 feet above the ground.

Order or Power.—4th order.

Variation.—4° W.

Remarks.—This light will be discontinued annually from 15th January to the end of February, on account of ice.

Charts affected.—No. 1656, Ping Yang inlet.
„ 1655, Ping Yang inlet, southern approach.
„ 1257, Ping Yang inlet approaches.
„ 1256, Pe chili and Liau tung gulfs.
„ 1262, Hong Kong to Liau tung gulf.
„ 2347, Nipon, Kiusiu, &c.

Publications.—List of Lights, part VI, 1907, Nos. 908, 907.
Sailing Directions for Japan and Korea, 1904, page 39; and Supplement, 1906.

Authority.—Seoul Notices, Nos. 29 and 30, 1907.

PACIFIC OCEAN, SOUTH-WEST—New Ireland (Neu Mecklenburg).

Albatross channel—Decreased depth on shoal in approach.

No. 89 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 166 of 1908), are republished:—

Particulars.—Further examination shows that the 3-fathom shoal off the west coast of Manne island in the northern approach to Albatross channel has less water over it, as given below.

Position.—About 7 cables S. 12° W. from the north-west point of Manne island.
Lat. 2° 41′ 35″ N., long. 150° 41′ 20″ E.

Depth.—1½ fathoms.

Variation.—6° E.

Chart affected.—No. 55, Anchorages in New Britain, New Ireland, and New Guinea.

Publications.—Pacific Islands, vol. I, page 375.

Notice to Mariners No. 1452 of 1907. (*This office No. 513 of 16th November 1907.*)

Authority.—Berlin Notice No. 149, 1908.

EASTERN ARCHIPELAGO—Aru islands.

Wokam island—Reef off the west coast.

No. 90 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 168 of 1908), are republished:—

Particulars.—A reef about 2 miles in extent and connected with the shore exists off the west coast of Wokam island, Aru islands.

Depth and position.—The western edge, on which there is a depth of 3 fathoms is situated with Taordefete point bearing N. 75° E, distant 2$\frac{1}{10}$ miles, and eastern point of Wammer island N. 4° W. on chart, No. 470.

Lat. 6° 55′ N., long. 134° 14½′ E.

Variation.—3° E.
Chart affected.—No. 470, Aru islands.
Publication.—Eastern Archipelago Part I. 1902, page 478.
Authority.—Hague Notice No. 133, 1908.

EASTERN ARCHIPELAGO—Sumatra, east coast—Singkep island.

Serak island—Pinnacle rock eastward of—.

No. 91 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 169 of 1908), are republished:—

Particulars.—A pinnacle rock exists about 6 cables to the eastward of the southern end of Serak island, off the west coast of Singkep island
Position.— Lat. 0° 39¾′ S., long. 104° 15½′ E.
Depth.—8 feet
Remarks.—It has been placed on the chart as a rock with less than 6 feet over it.
Chart affected.—No. 1789, Channels between Sumatra, Linga, and Singkep.
Publication.— China Sea Directory, vol. I, 1906, page 6.2.
Authority.—Hague Notice No. 132, 1908.

BAY OF BENGAL—Burma coast.

Bassein river approach—Non-existence of breakers. Preparis, north channel.

No. 92 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 179 of 1908), are republished:—

Particulars.—The breakers reported by the Master of the S.S. *Lunka* to exist in the approach to Bassein river have been carefully searched for by the officer in charge of the Marine Survey of India, without success, and without finding or seeing any indication of danger. Tide rips, however, are common in this locality, and it is considered that the Master mistook these rips for breakers. "Tide rips" has therefore been inserted in place of "Breakers reported, 1907," on the Admiralty charts in this position.
Position.—Lat. 15° 44′ N., long. 93° 50′ E.
Charts affected.—No. 152, Preparis, north channel.
„ 823, Korange island to White point.
„ 830, Bassein river to Pulo Penang.
„ 829, Cocanada to Bassein river.
„ 70, Bay of Bengal.
Publications.—Bay of Bengal Pilot, 1901, page 337.
Notice to Mariners No. 1383 of 1907. (*This office No. 409 of 31st August 1907.*)
Authority.—Officer in charge of the Marine Survey of India, 14th December 1907.

CHINA—South-east coast.

Bias bay—Shoals in—.

No. 93 (third publication).—The following particulars relative to the above issued by the British Admiralty (No. 180 of 1908) are republished:—

Particulars.—Two rocky shoals exist in Bias bay, as follows:—

1. *Position.*—From the shoal the Pillars summit bears S. 14° E., distant 4½ cables, and Hat rock N. 86° W.
Lat. 22° 36½′ N., long. 114° 38¾′ E.
Depth.—4½ fathoms.
Remarks.—There are depths of 7 fathoms around this shoal.

2. *Position.*—From the shoal Outer rock off Bias point bears S. 75° W., distant $8\frac{1}{10}$ cables, Mendoza island summit S. 48° E.
Depth.—$1\frac{1}{4}$ fathoms.
Remarks.—There are depths of 6 fathoms, mud bottom, close around this shoal.
Variation.—Nil.
Charts affected.—No. 3002, Bias bay.
,, 3026, Macao to Pedro Blanco.
,, 1962, Hong Kong to the Brothers.
Publication.—China Sea Directory, vol. III, 1904, pages 134, 136.
Authority.—Commanding Officer, H M. Surveying Vessel *Waterwitch*, 21st December 1907.

CHINA, EAST COAST—Chusan Archipelago.

Tinghai Harbour—Beacon destroyed.

No. 94 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 181 of 1908), are republished:—

Particulars.—The beacon marking Parry rocks, Tinghai harbour, has been destroyed.
Position.—Lat. 30° 0′ 20″ N., long. 122° 6′ 5″ E.
Charts affected.—No. 1395, Tinghai and approaches.
,, 1429, Nimrod sound to Yung river.
Publications.—China Sea Directory, vol. III, 1904, page 340.
Authority.—Paris Notice, No. 110, 1908.

PACIFIC OCEAN, SOUTH—New Caledonia.

Prony bay—Buoy withdrawn.

No. 95 (third publication).—The following particulars relative to the above, issued by the British Admiralty (No. 193 of 1908), are republished:—

Particulars.—The black conical buoy marking Moziman reef on the western side of the entrance to Prony bay has been withdrawn.
Position.—Lat. 22° 23′ 30″ S., long. 166° 51′ 35″ E.
Charts affected.—No. 1311, Prony bay.
,, 2906, Isle of Pines to Uen island.
Publication.—Pacific islands, vol. II, 1900. page 303.
Authority.—Paris Notice No. 113, 1908.

BAY OF BENGAL—Chittagong coast.

Karnafuli river—Depth of water in the channels.

No. 96 (third publication).—The Port Officer, Chittagong, has given notice that the following depth of water was found in the channels by soundings taken on the 20th February 1908:—

	Ft.
Track No. I—Outer bar—	
Disc on diamond	13
Track No. II—Inner bar—	
Disc on diamond	13
Batten beacon on pillar	12
Track No. III—	
Triangle on cross and ball	16
Track No. IV—Guptakhally crossing—	
Tripod on cross and ball and diamond	19

BAY OF BENGAL—Burma coast.

Cheduba Strait, northern approach—Buoy beacons removed.

No. 97 (third publication).—With reference to Notice to Mariners No. 52, dated 31st January 1908, issued by this Office, the Officer in charge, Marine Survey of India, has given further notice, dated 20th February 1908, that the buoy beacons recently laid in Cheduba Strait (near Kyoukpyu), being no longer required, have been removed.

REPORT ON THE ADMINISTRATION OF THE OPIUM DEPARTMENT DURING THE SEASON 1906-1907.

NOTIFICATION.

No. 294-O.—The 13th March 1908.—The following extracts from the Report of the Board of Revenue on the Administration of the Opium Department during the year 1906-1907 are published for general information.

C. E. A. W. OLDHAM,
Secy. to the Govt. of Bengal.

No. 108-½B., dated Calcutta, the 24th February 1908.

From—PANDIT RAMA BALLABHA MISRA, M A., Secy., to the Board of Rev., L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

OPIUM.

THE HON'BLE MR. W. C. MACPHERSON, C.S.I.

I AM directed by the Board of Revenue to submit the annual report on the operations of the Opium Agencies of Bihar and Benares during the season 1906-1907, that is to say, from the 1st November 1906 to 31st October 1907.

* * * * * *

5. *Check-measurement by Gazetted officers.*—In the Bihar Agency the test-measurements commenced early in November, and were finished by the middle of January, as the crop was then too forward to permit of further measurements.

In 8,359 villages, 73,006 plots belonging to 32,468 raiyats, containing an area of 18,946 bighas, were test-measured by the Gazetted officers, the total area test-measured being 6·6 of the cultivated area.

The return of test-measurements in the Benares Agency exhibits 42,381 bighas test-measured out of a total of 632,410 bighas or 6·7 per cent. against 7·21 in the previous year. Mr. House writes on this subject:—

"There can be no doubt that more energy is shown in their cold-weather work by officers nowadays than was formerly the case. Turning up at random the papers of twenty years ago, I find that the average number of inspections made was 312 per officer, and that the average area test-measured was 515 bighas. In the year under report the averages are nearly 500 licenses and 1,000 bighas—very much more creditable results than are shown by the earlier figures."

6. *Settlements.*—There was again a decrease in the area settled in the Bihar Agency. The land engaged for during the year under report was 320,781 bighas as compared with 338,020 in the previous year. This decrease occurred in all the Sub-Agencies, and was largest in Motihari, Chapra and Patna, and smallest in Aliganj. It was mainly due to the relinquishment of unprofitable and unproductive lands. In Chapra decrease is also attributed to unsuitable weather which prevailed at the time of sowing, while in Patna the bad outturn of the previous season, and the extension of the cultivation of sugarcane were additional factors in bringing about this result. Further substantial reductions of the area engaged for in this Agency have been made since the close of the year under report.

* * * * * *

In the Benares Agency the orders were to engage for not more than 640,000 bighas. The area actually engaged for was 631,232 bighas against 643,726 in the previous year. As compared with the previous year, there is a noticeable decrease of over 8,000 bighas in the Budaon Division. * *

7. *Measurements and actual cultivation.*—In the Bihar Agency the area measured and cultivated, excluding failures, was 283,379 bighas as compared with 327,640 bighas in 1905-1906. Out of this decrease, 17,239 bighas are accounted for by the reduction in the area settled. All the Sub-Agencies show a decrease, the largest being in Tirhut, with a decrease of 10,460 bighas, and in Motihari (7,959 bighas). The smallest decrease is reported from Monghyr, 1,329 bighas. The Agent notes that the causes which chiefly contributed to this result were (*a*) early cessation of the monsoon and consequent unwillingness on the part of the raiyats to grow opium, which is a delicate crop, and (*b*) unsatisfactory germination of seed which necessitated resowings and irrigation, and thus increased the cost of cultivation and induced raiyats to try other crops in place of poppy.

The total failures amounted to 30,681 bighas, of which 17,920 bighas represented non-fulfilment of engagements, and the remainder, viz., 12,761 bighas, were due to climatic causes.

Special orders were issued by the Board in order to avoid sowings in excess of engagements in the Benares Agency. The measurement area obtained was 632,410 bighas, or an increase of 1,178 bighas only on the settlement area.

Only 1,236 cultivators in this Agency, or 1·29 per 1,000, wilfully evaded their engagements. The area wilfully left unsown is returned at 725 bighas (as against 386 in the previous year), and is in striking contrast with the figures for the Bihar Agency; the failures due to climatic causes affected 12,453 bighas as compared with 16,311 in the preceding year.

8. *Weather and general results.*—In the Bihar Agency the season was very unfavourable to the production of good opium. Rain was general and fairly heavy in the Patna Division in June and August 1906, and considerable damage was done by excessive rain and floods to the autumn crops in the Shahabad, Champaran, Muzaffarpur, and Darbhanga districts. For the greater part of September and October the fall was confined to light showers; there was unusual heat during the greater part of October and rain was much

needed. The unirrigated lands in Muzaffarpur specially suffered. In parts three and even four sowings were necessary. The supply of water was short in Hazaribagh and germination backward. By the middle of December the want of rain had done much damage, and there was a very marked tendency on the part of raiyats to sow *rabi* instead of poppy, the earlier poppy having, to a large extent, failed, while the later and irrigated crops were doing well. The weather in January 1907 was very adverse to poppy, the sun being very strong. The crop even in irrigated lands was very stunted, and what plants were in flower were much smaller than usual. In February the weather was rainy and unsettled, and this interfered seriously with the production of leaf in most districts. There was also a fall of hail in Sassaram which much damaged the crop in a confined area. The unsettled weather continued almost throughout March, and this seriously affected the yield and also the consistence of the drug.

In the Benares Agency the season was practically rainless until the beginning of February, from which month onwards until about the end of April wet and cloudy weather was experienced with occasional hailstorms. Notwithstanding the dryness of the earlier part of the season and the damage done by insect pests, the crop generally was fine and vigorous and cultivators were confident of a bumper outturn: but the excessive rain which followed did much harm, especially in the eastern poppy tracts of the Agency, where as Mr. House reports, one of the most promising crops seen for several years was converted into one of the worst on record.

9. *Outturn of opium.*— * * In the two Agencies taken together, the *damdeta* produce at 70° consistence, which showed an increase of 3,260 maunds in 1905-1906, as compared with that of the season 1904-1905, has decreased by 14,093 maunds, or by 13 per cent. in the year under review. This decrease has been shared by both Agencies, and is due partly to the smaller area sown and partly to the unfavourable weather which prevailed. Eight out of eleven divisions in Bihar and sixteen out of nineteen in the Benares Agency show a decrease. The general average gross produce per bigha (excluding failures) as compared with that of the preceding year fell from 3 seers 3 kachas to 2 seers 14 chitaks and 3 kachas in the Bihar Agency, and from 5 seers 1 chitak to 4 seers and 14 chitaks in the Benares Agency. The best divisional average in Bihar was obtained in Patna, viz., 3 seers 12 chitaks and 3 kachas, and in the Benares Agency was obtained in Bara Banki, viz., 6 seers 1 chitak.

10. *Average area per license and per cultivator.*—In the Bihar Agency the average area cultivated with poppy by a raiyat is again highest (16 kattas 13 dhurs) in Shahabad and lowest in Tirhut (6 kattas 3 dhurs). The Etawah Division again shows the highest average area per cultivator in the Benares Agency, viz., 19 kattas 9 dhurs, the Agency average being 13 kattas.

11. *Average produce per license and per cultivator.*—In the Bihar Agency the average produce per license fell from 1 maund 9 seers 5 chitaks to 1 maund 2 seers 1 chitak during the year under review. The fall is due entirely to the disastrous character of the year, as the early part was unusually dry and hot, and therefore unfavourable for sowing, while the latter part was wet, damp and cloudy, and unfavourable for the collection of the juice.

In the Benares Agency also there has been a fall from 2 maunds 27 seers and 15 chitaks to 2 maunds 18 seers and 13 chitaks per license, attributable to the generally unfavourable character of the season especially in the eastern districts.

The average produce of a cultivator decreased in the Bihar Agency from 1 seer 12 chitaks 2 kachas to 1 seer 9 chitaks and 2 kachas, and in the Benares Agency from 3 seers 6 chitaks to 3 seers 2 chitaks and 2 kachas. Six Sub-Agencies, viz., Etawah, Fatehgarh, Budaon, Hardoi, Lucknow and Bara Banki, show an average produce of more than 4 seers per cultivator. No Sub-Agency in Bihar shows even 3 seers as the average produce per cultivator, the highest (2 seers 11 chitaks 3 kachas) being in the Shahabad Sub-Agency.

* * * * * * *

13. *Consistence of the season's opium.*—The general average of the consistence of the drug delivered in the Bihar Agency this year was 72·69° as compared with 74·68° in the previous year, showing a fall of 1·99° due to the unsettled weather before and at the time of collection of the drug. The

consistence was best in Aliganj, Motihari, and Hazaribagh, where it exceeded 74°, and was worst in Monghyr, where it only averaged 69·38°, a decrease of 2·60 on the previous ten years' average of this Sub-Agency.

The character of the season in the Benares Agency was also reflected in the consistence of the opium produced there which worked out at 67·35° or about 2½ degrees below the ten years' average consistence for the Agency. This is about the same as the average for 1892-1893 (67·20°), but much lower figures were reached in 1900-1901 (65·80°), and in 1885-1886 (64·80°).

* * * * * * *

19. *Advances and outstanding balances.*—In the Bihar Agency the value of opium delivered by cultivators was Rs. 51,15,255. The payments made for this opium were (1) at settlements Rs. 23,21,766, (2) at weighments Rs. 27,86,512 (3) at final adjustments Rs. 2,64,854, giving a total of Rs. 53,73,132 or Rs. 2,57,877 in excess of the value of opium. Of this, Rs. 2,36,317 were recovered, leaving a balance of Rs. 21,560 as due to Government at the end of the year, which, when added to those of the previous year, amounts to Rs. 22,305* (*i.e.* 0·4 per cent. on the total advances), as compared with Rs. 17,970 in the preceding year. A large portion of the balances is in course of realization. During the year outstandings of previous years to the amount of Rs. 17,241 were adjusted. Considering the very disastrous character of the season and having regard to the difficulty in realizing the amounts in respect of those *kothis*, which were abolished owing to reduction of cultivation, the Board notice that the amount outstanding is small, and that the collections are creditable to the officers concerned.

	Rs.
* On account of the year 1906-1907 ...	21,560
On account of preceding years ...	745
Total ...	22,305

In Benares the value of the opium delivered was Rs. 1,71,98,043. The payments made for this opium were (1) at settlements Rs. 41,18,529, (2) at weighments Rs. 1,17,32,248, (3) at final adjustments Rs. 15,92,328, giving a total of Rs. 1,74,43,105 or Rs. 2,45,062 in excess of the value of the opium. Rupees 2,43,668 of this excess were made good by (1) repayments before weighments Rs. 28,505, (2) repayments during weighments Rs. 2,03,020, and (3) repayments at final adjustments Rs. 12,143. The balance due to Government therefore is Rs. 1,394, which, together with the balance outstanding on account of the previous year, *i.e.*, Rs. 1,014, amount to Rs. 2,408,† or a little over 0·01 per cent. on the total advances. Nearly the whole of the amount outstanding on account of previous years is reported to be irrecoverable. These results are very satisfactory.

	Rs.
† On account of the year 1906-1907 ...	1,394
On account of previous years ...	1,014
Total ...	2,408

* * * * * * *

20. *Advances for wells.*— * * In the Bihar Agency 119 pucka wells were constructed, 1,432 earthen wells were dug, and 62 masonry wells were repaired.

In the Benares Agency there was a marked increase in the amounts advanced in the Ghazipur, Azamgarh and Etawah Divisions: in the Mainpuri Division a marked decrease. During the year 598 masonry wells and 781 kutcha wells were completed, and 877 masonry wells and 307 kutcha wells were under construction, at the close of the year, in this Agency. Advances were made for the repairs of 510 wells.

* * * * * * *

21. *Factory Operation—Provision Opium.*— * * The average consistence of the opium produced in the Bihar Agency was 72·69° as compared with 74·68° in the previous year, showing a decrease of 1·99°; and it was 1·73° lower than that of the average of the last ten years (74·42°).

The average consistence of the Benares opium received was 68·28° as compared with 69·72° or a decrease of 1·44°, and the average of both Bihar and Benares opium taken together worked out to 70·62° as against 72° last year.

The gross district weight of the opium produced in the Benares Agency was 76,563 maunds and the Factory weighment gave 75,164 maunds, the difference being due to dryage.

* * * * * * *

26. *Manufacture and surply of Excise opium.*—Two thousand six hundred and seven chests, 285 cakes were manufactured this year at Patna, against 2,283 chests, 30 cakes last year. The aggregate cost of the manufacture of this opium was Rs. 9,378 12-6, giving an average of Rs. 3 9-5 per chest compared with Rs. 3-12-8 last year, showing a decrease of annas 3-3 per chest manufactured. This is due to the larger amount manufactured.

At Ghazipur 5,917½ maunds or 3,945 chests were manufactured during the year; and the cost of manufacture of a chest of Excise opium was Rs. 5-10-11, as against Rs. 5-11-0 in the preceding year. The difference in the cost at the two factories is chiefly due to the difference of the average consistence of the raw opium produced in the two Agencies—the Benares opium requiring more labour and manipulation to raise it to the required consistence.

* * * * * * *

29. *Expenditure.*—The total expenditure of the Bihar Agency amounted to Rs. 61,32,930, as compared with Rs. 73,75,481 in the previous year. The decrease is mainly due to the decrease in the total amount of opium delivered; and in consequence, the average cost per maund and per chest of opium rose from Rs. 277 to Rs. 286 and from Rs. 497 to Rs. 502, respectively.

In the Benares Agency the total expenditure of the season has also fallen to Rs. 1,93,41,283 from Rs. 2,14,44,733 in the previous year. The average cost per maund of opium has been Rs. 269 as compared with Rs. 266 in the previous year, and the average cost per chest was Rs. 494, against Rs. 467, the increase in both cases being due to smaller outturn.

30. *Cost of a chest of provision opium and net revenue.*—During the calendar year 1907, 50,400 chests of provision opium were sold in equal proportions from Bihar and Benares and the average prices realized for a chest from each Agency were Rs. 1,397 and Rs. 1,347, or Rs. 1,372 for both combined, against an average of Rs. 1,370 in 1906. The total sale-proceeds in 1907 amounted to Rs. 6,91,75,475. The total cost of manufacture of the produce (including Presidency charges, etc.) amounted to Rs. 1,24 99,187 in Bihar and to Rs. 1,29,51,610 in Benares, or a total of Rs. 2,54,50,797, giving an average cost per chest of Rs. 505 The net revenue derived from opium during the two calendar years 1906 and 1907 amounted to Rs. 4,54,02,094 and Rs. 4,37,24,679, respectively.

31. *Sales.*—The opium sales during the twelve months from November 1906 to October 1907 comprised 45,257 chests manufactured in 1904-1905 and 5,943 chests manufactured in 1905-1906, in all 51,200 chests, of which half was taken from each Agency in monthly lots of 4,400 chests during November 1906 to June 1907, and of 4,000 chests during July to October 1907. The number of chests sold during the twelve months was 51,200 chests, or 800 chests fewer than were sold during the previous corresponding period.

* * As compared with 1905 1906, the average prices of Bihar and Benares opium for the twelve months under notice show an increase of Rs. 39 and Rs. 65, respectively.

32. The total outturn of provision opium during the season 1906-1907 was 38,125 chests, and the balance of the previous year's crop amounted to 34,807. The number of chests available for sale at the beginning of 1908 was therefore 72,932. In accordance with the orders of the Government of India contained in their notification No. 4236A., dated the 5th July 1907, 46,800 chests or 3,900 chests monthly, made up of 1,950 chests each of Bihar and Benares opium, will be sold during the year 1908 and there will, therefore, be left on the 1st January 1909 a reserve of 26,132 chests, viz., 15,706 of Bihar and 10,426 of Benares opium. In addition, however, there was a reserve (at the end of the year 1906-1907) of about 31,880 maunds of crude opium in the vats.

WEATHER AND CROP REPORT.

For the week ending the 16th March 1908.

No.	Name of district.	Rainfall at Sadar station.	Price of common rice, in seers, per rupee.		Character of the weather and state and prospects of the crops, etc
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
1	BURDWAN ...	Nil	8½	8	Weather seasonable. Pressing of sugarcane continuing. Manuring of lands going on. Condition of agricultural stock fair. Water scarcity felt in places in the Kalna and Katwa subdivisions. Fodder sufficient. No cattle-disease.
2	BIRBHUM ...	Nil	7	6¾	Food-grains sufficient at present. Sugarcane-pressing over. No cattle-disease. Fodder and water sufficient.
3	BANKURA ...	Nil	7½	7½	Weather seasonable. Pressing of sugarcane going on. 373 men, 263 women and 23 children (total 664) attended five test-works on last day ending 13th March. Recipients of gratuitous relief on 13th—202 men, 389 women and 157 children (total 748). No cattle-disease. Fodder and water sufficient. Condition of agricultural stock fair. Common rice selling at 6 to 7 seers a rupee in the affected tracts.
4	MIDNAPORE ...	Nil	7	7	Planting of sugarcane and sowings of *rabi* and *til* continuing. Prospects of standing crops fair. No change in their general condition. Some rain wanted for ploughing Fodder and water sufficient.
5	HOOGHLY ...	Nil	7½	7½	Weather seasonable. Stocks of food-grains likely to be sufficient till next harvest. Prices of food-grains stationary. No likelihood of scarcity at present. Prospects of wheat crops fair. Pressing of sugarcane continuing. No cattle-disease. Fodder and water sufficient.
6	HOWRAH ...	Nil	8	8	Sky cloudy at the middle and end of the week. Prospects of standing crops fair. Pressing of sugarcane nearly over. Stocks of food-grains sufficient till next harvest. Prices generally stationary. Condition of agricultural stock good. Fodder and water supply sufficient.
7	24-PARGANAS	Nil	7½	7½	Weather seasonable. Common rice selling at 6¾ seers at Barasat, 7 seers at Barrackpore, 8 seers at Basirhat and 8 1/16 seers at Diamond Harbour.
8	NADIA ...	Nil	7¼	7¼	Harvesting of *rabi* crops going on. Lands being prepared for *bhadoi* paddy and jute. Prices of staple food-grains stationary. Stocks of food-grains insufficient. Scarcity apprehended. Condition of agricultural stock good. Cattle-disease reported from thana Meherpur. Fodder and water barely sufficient.

9	MURSHIDABAD	Nil	7½	...	Prospects of *rabi* crops not favourable. Sugarcane cutting and pressing now going on in Kandi. Lands being prepared for *bhadoi* paddy and jute in Jangipur. Stocks of food-grains not likely to be sufficient till next harvest. Apprehension of scarcity in Kandi somewhat reduced owing to a good potato crop, promising mango crop and to the liberal distribution of loans Fodder sufficient except in places in the Sadar subdivision Water insufficient. Agricultural stock fair. Prices of food-grains stationary. Price of common rice decreasing in Lalbagh. No cattle-disease.
10	JESSORE ...	Nil	8	8	Weather seasonable. Prospects of standing crops not favourable. Cultivation stopped for want of rain. Standing crops withering. Stocks of food-grains sufficient at present. Prices of food-grains stationary during the week. Scarcity apprehended by April next. No cattle-disease. Condition of agricultural stock good. Fodder and water sufficient. High prices continuing.
11	KHULNA ...	Nil	9	9	Weather seasonable. Prices of staple food-grains stationary. Stocks of food-grains sufficient till next harvest. No apprehension of famine at present. Condition of agricultural stock good. Fodder and water sufficient.
12	PATNA ...	0·03	7¼ 10½*	7¼ 10½*	Weather seasonable. *Rabi* harvesting in progress. Sugarcane planting and pressing going on. Collection of opium continuing. Prices of food stuffs almost stationary, and stocks likely to be sufficient if not largely exported. No cattle-disease. Fodder and water sufficient.
13	GAYA ...	Nil	8½† 9½*	8½† 9½*	Weather seasonable with west winds. Condition of standing *rabi* crops good. Harvesting of *masur*, mustard and peas almost finished. *China* doing well. Prices almost stationary. Fodder and water for cattle sufficient. Cattle-disease reported from one village in Nawadah subdivision. Stocks of food-grains believed to be sufficient for the present.
14	SHAHABAD ...	Nil	8½ ...	8½ 10*	Harvesting of *rabi* crops continuing. Planting of sugarcane going on. Poppy doing well. Prices of food-grains tending to fall. Stocks under normal, but sufficient if not exported. The condition of agricultural stock normal Number relieved at Chenari kitchen on last reported date 61. Fodder and water sufficient.

* The figures indicate the price of maize in seers per rupee.

15	Saran ...	Nil	$8\frac{3}{4}$ $9\frac{1}{2}$*	9 $9\frac{1}{2}$*	Weather seasonable. Planting and pressing of sugarcane and harvesting of mustard and rape going on. Harvesting of wheat and barley commenced in places. Indigo being sown in Gopalganj and poppy-lancing going on in Siwan. Prospects of *rabi* crops good. Mango trees loaded with blossoms. Prices of staple food-grains slightly fallen. Food-stock resources external. Owing to emigration male labour hardly obtainable. Condition of agricultural stock good. No cattle-disease Fodder and water sufficient.
16	Champaran ...	Nil	8 $10\frac{1}{4}$*	8 $10\frac{1}{4}$*	Rainfall at Bettiah 0·03 inch. Weather seasonable. Prospects of spring crops good. Lancing of poppy and pressing of sugarcane going on. Prices stationary except that of *arhar*, which has fallen. No cattle-disease. Fodder and water sufficient.
17	Muzaffarpur	Nil	$8\frac{1}{4}$ $9\frac{1}{2}$*	$8\frac{1}{4}$ $9\frac{1}{2}$*	Weather seasonable. Sometimes cloudy. Rainfall at Hajipur 0·05 inch. *Rabi* crops ripening in some places, but not yet harvested. Prospects fair. Stocks of staple food-grains sufficient. Scarcity not apprehended. Fodder and water sufficient. General condition of agricultural stock good. Cattle-disease reported in only one village in police-station Sahebganj Jute sowing commenced. Common rice and maize selling at $7\frac{7}{16}$ and $9\frac{1}{2}$ seers a rupee, respectively, at Hajipur, and at 8 and $10\frac{1}{2}$ seers a rupee, respectively, at Sitamarhi.
18	Darbhanga ...	Nil	$8\frac{1}{2}$ $9\frac{7}{8}$*	$8\frac{1}{4}$ $9\frac{7}{8}$*	Weather getting hot. Harvesting of mustard nearly finished. *Mung* and paddy being sown in places Prospects of standing crops good. Food-stocks sufficient. No apprehension of scarcity. Fodder and water sufficient.
19	Monghyr ..	0·09	9 10*	9 $9\frac{1}{2}$*	Weather seasonable. *Rabi* prospects continuing good. Prices of common rice continuing steady. Maize gone up to 10 seers a rupee. No cattle-disease. Fodder and water sufficient. Condition of agricultural stock good.
20	Bhagalpur ...	Nil	$7\frac{9}{16}$ $9\frac{1}{2}$*	$8\frac{3}{16}$ $9\frac{1}{2}$*	Weather seasonable. Sugarcane planting finished in Supaul, but going on in Banka. Standing crops doing well. Slight damage apprehended to *rabi* crops in Colgong from high west winds. Prices falling in Supaul, but stationary elsewhere. No famine or scarcity apprehened. Cattle-disease reported from Rajown in Banka and Dagmora in Supaul. Fodder and water sufficient.

35	Feudatory States, Orissa.*	...	...	...	Rainfall *nil*. Planting of sugarcane in progress in some of the States. *Mung*, gram and sweet potatoes in fair condition in Narsingpur. State of standing crops (gram, *mung* and wheat) good and hopeful in Daspalla. Harvesting of castor going on in Talcher and Bonai. Pressing of sugarcane continuing in Narsingpur, Nayagarh, Ranpur and Patna. Agricultural stock sufficient. Fodder and water sufficient. Prices of rice varying from 6 seers in Tigiria and 6½ seers in Bonai to 11 seers in Kalahandi and Talcher to 12 seers in Gangpur, Patna and Nayagarh.

* The report is for the week ending the 7th March 1908.

General Summary.—Light rain was received in parts of Bihar. In Kishanganj and in Balasore a moderate rainfall of 1·03 and 0·70 inches were respectively recorded. Planting of sugarcane and harvesting of *rabi* crops are in progress. Lands are being prepared for the next season's sowings. The collection of opium and the sowing of indigo have commenced in Bihar. It is reported from Jessore that ploughing operations are being retarded for want of rain. Prospects of the *rabi* crops are fair excepting in the Presidency Division. The crops in the Kishanganj subdivision have been slightly damaged by the recent rain, and in Bhagalpur by west winds. The price of common rice has fallen in Burdwan, Birbhum and Hazaribagh, and has risen in Saran, Bhagalpur, Cuttack, Angul, Puri and Ranchi, and is stationary elsewhere. Stocks of food-grains are insufficient in Nadia, Murshidabad, Balasore and Palamau. Scarcity is apprehended in Nadia and later on in Jessore. A test-work has been opened in Hazaribagh, and gratuitous relief is being given on a small scale in Palamau. Four thousand and forty-five persons were on test-works in Bankura, Hazaribagh, Ranchi and Orissa, and gratuitous relief was given to 15,109 persons in Orissa and 809 persons in Bankura and Shahabad. Cattle-disease prevails in Nadia, Gaya, Muzaffarpur, Bhagalpur, Cuttack, Puri, Sambalpur, Hazaribagh, Ranchi, Palamau and Manbhum. Scarcity of fodder and water is reported from parts of Burdwan, Murshidabad and Balasore.

The total fall from 1st January to 14th March 1908	0·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·29

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

⌓, dew.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT.

NOTIFICATIONS.

No. 1702L.R.—The 23rd March 1908.—In exercise of the power conferred upon him

Midnapore. by section 108A of the Bengal Tenancy Act, 1885 (VIII of 1885), as amended by Bengal Act I of 1907, the Lieutenant-Governor of Bengal is pleased to empower Mr. C. W. Hodson, Settlement Officer of Midnapore, to make corrections in entries of records-of-rights in the district of Midnapore in accordance with the provisions of the said section.

No. 1703L.R.—The 23rd March 1908.—As the portion of the zamindari embank-

Hooghly. ment on the left bank of the Madaria khal, from Penro to Dilakas, in the subdivisions of Ulubaria and Serampore, a length of 5 miles, was in a very bad condition in many parts, and floods from the Madaria khal, during recent years, have overtopped and breached the embankment and caused considerable damage to crops in several villages, proceedings were taken by the Collector of Hooghly, under section 25 of the Bengal Embankment Act, II of 1882, on receipt of a report from the Subdivisional Officer of Ulubaria to the effect that the work was very urgent and should be taken charge of and maintained by Government at the cost of the zamindars interested. The work has been in progress, and the Superintending Engineer, South-Western Circle, at the request of the Collector, having forwarded, with the approval of the Chief Engineer, Bengal, a plan and estimate, amounting to Rs. 24,431 including the cost for filling in the big breach at Gabtola, which has already been done, and the value of land to be acquired, proceedings were instituted, under sections 7 and 8 of the Act, and, after due enquiry under section 10, the Collector has recommended the execution of the work under clause 1, section 7 of the Act. The Commissioner of the Burdwan Division and the Board of Revenue have supported the recommendation of the Collector; and the Lieutenant-Governor of Bengal having considered their report, is pleased, under section 14 of the said Act, to declare the said embankment public and to order that the said work should be executed at the estimated cost and in accordance with the plans specified above.

No. 1761L.R.—The 24th March 1908.—Mr. A. B. Petter, Deputy Collector, Cuttack,

Balasore. Cuttack. is appointed to be an Assistant Settlement Officer in the districts of Balasore and Cuttack, with effect from the date on which he joins his appointment.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

DECLARATION.

No. 1654L.A.—The 20th March 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken at the public expense for a public purpose, viz., for the location of the Police Training School in the village of Doranda, pargana Udaipur, zilla Ranchi, in addition to what has already been acquired under Declarations No. 264T.R., dated the 30th April 1906, and No. 804T.R., dated the 1st June 1906, published, respectively, at pages 975 and 1149, Part I of the *Calcutta Gazette* of the 2nd May and 6th June 1906, respectively, it is hereby declared that for the above purpose two plots of land measuring, more or less, 94 bighas 1 cottah 3 chitaks of standard measurement with buildings thereon as per following boundaries, are required within the aforesaid village of Doranda :—

Ranchi.

DECLARATION.

Burdwan.

No. 1708L.A.—The 23rd March 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the expense of the East Indian Railway Company for a public purpose, viz., for assisted siding to serve Bengal Coal Company's Domohani Incline, in the village of Freedpur, pargana Shergurh, zilla Burdwan, it is hereby declared that, for the above purpose, a piece of land measuring, more or less, 12 cottahs 2·88 chitaks of standard measurement (0·20 acre), bounded on the north and east by the East Indian Railway Company's land, and on the south and west by the cultivated lands of Shekh Matabbar and Shekh Asruf, is required within the aforesaid village of Freedpur.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6 of Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

A plan of the land may be inspected in the office of the Collector of Burdwan, as well as in that of the District Engineer, East Indian Railway, Asansol.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

DECLARATION.

Hooghly.

No. 1711L.A.—The 23rd March 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for accommodation of constables in the village of Kristapur, pargana Jahanabad, zilla Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 11 cottahs 1 chitak of standard measurement, bounded on the—

North—Tank belonging to Maksad Khan,
West—House of Upendra Barrik,
South—Old Benares road,
East—A road,

is required within the aforesaid village of Kristapur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Subdivisional Officer, Arambagh.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

DECLARATION.

No. 1713L.A.—The 23rd March 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government, at the expense of the District Board, Darbhanga, for a public purpose, viz., for diversion of Road No. 75, Rampati-Jhanjharpur, at village Partapur Ghat and Belni Mehath, in the villages of Partapur and Belni Mehath, pargana Bhour, zilla Darbhanga, it is hereby declared that, for the above purpose, a piece of land measuring, more or less, 5 bighas 18 cottahs 14 chitaks of standard measurement, bounded on the—

Darbhanga.

North—Nanu Babu's bramhotter and Babu Ackdewar's parti across the river,
South—A tank and Sone Lal Jha's land,
East—District Board road,
West—Nanu Babu's bramhotter and Babu Ackdeswar's parti across the river,

is required within the aforesaid villages of Partapur and Belni Mehath.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the District Engineer, Darbhanga.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

DECLARATION.

No. 1751L.A.—The 24th March 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for Katihar-Godagari Railway Main Line, in the village of Bengnah, pargana Katihar, zilla Purnea, it is hereby declared that for the above purpose two pieces of land measuring, more or less, 11 bighas 16 cottahs 2 chitaks of standard measurement, bounded on the—

Purnea.

PLOT (1).
North—By Babu Ramani Mohan Das's garden and patit land and Babu Dino Nath Misser's land,
East—By patit land of Babu Dino Nath Misser,
South—By Katihar-Godagari Railway land,
West—By Babu Dino Nath Misser's land;

PLOT (2).
North—By Katihar-Godagari Railway land,
East—By patit land of Babu Dino Nath Misser,
South—By Babu Dino Nath Misser's land,
West—By ditto ditto;

are required within the aforesaid village of Bengnah.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Collector of Purnea.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

DECLARATION.

No. 1754L.A.—The 24th March 1908.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the canalization of the River Konsiki, in the villages of Koikala, Chowtara and Kristapur, pargana Baliguri, zilla Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 58 bighas 2 cottahs 7 chitaks of standard measurement, is required within the aforesaid villages of Koikala, Chowtara and Kristapur.

Hooghly.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Collector of Hooghly.

E. A. GAIT,
Chief Secy. to the Govt. of Bengal.

F. C. HIRST, CAPTAIN, I.A.,
Offg. Superintendent, Provincial Surveys, Bengal.

HAZARIBAGH, *the 17th March 1908.*

GENERAL DEPARTMENT.

NOTIFICATIONS.

No. 1996.—The 20th March 1908.—The following gentlemen are appointed to be members of the Joint Technical Examination Board in order to control and consolidate the Overseer and Sub-Overseer Examinations in the Provinces of Bengal and Eastern Bengal and Assam:—

1. Chief Engineer, Roads and Buildings Branch, Public Works Department, Bengal ... ... *Ex-officio President.*
2. Mr. W. H. Everett, Professor of Mechanical and Electrical Engineering, Civil Engineering College, nominated by the Board of Visitors of the Civil Engineering College, Sibpur ... ... *Member.*
3. Mr. F. Walford, Head Master, Bihar School of Engineering, nominated by the Board of Visitors of the Bihar School of Engineering ... ... *Member.*
4. Superintending Engineer, Eastern Bengal Circle, representing the Public Works Department, Eastern Bengal and Assam ... . } *Ex-officio Members.*
5. Head Master, Dacca School of Engineering, representing the Dacca School of Engineering ... ... }
6. Principal, Civil Engineering College, Sibpur ... *Ex-officio Secretary.*

The nominated members will hold office for three years.

2. The duties of the Board will be to control the Overseer and Sub-Overseer Examinations in Bengal and Eastern Bengal and Assam, these duties being more specifically—

(*a*) to appoint Examiners for these Examinations;
(*b*) to receive the reports of the Examiners;
(*c*) to issue to successful candidates certificates signed by the *ex-officio* President of the Board; and
(*d*) to notify the results of the Examinations to the Governments of Bengal and Eastern Bengal and Assam, sending copies for information to the Boards of Visitors of the institutions concerned.

3. The Board will also issue, in the manner prescribed above, the certificates which are awarded at the end of the 18 months' practical course at the Civil Engineering College, Sibpur, which follows the Overseer Examination. In the event of the Dacca or Bihar School of Engineering making arrangements for a similar course, a like procedure as regards the issue of certificates will be followed.

4. It will be the duty of the Board to advise the Governments of Bengal and Eastern Bengal and Assam with reference to the syllabuses of studies to be followed in the Overseer and Sub-Overseer classes.

No. 1925.—The 20th March 1908.—The following Resolution, issued by the Government of India, in the Department of Commerce and Industry, is republished for general information.

H. C. STREATFEILD,
Offg. Secy. to the Govt. of Bengal.

No. 2493-2507—15, dated Calcutta, the 11th March 1908.

RESOLUTION—By the Govt. of India, Dept. of Commerce and Industry.

THE Government of India have received from His Majesty's Secretary of State for India a copy of an Act which has been passed by the Transvaal Government to place restrictions on immigration into the Colony, to provide for the removal therefrom of prohibited immigrants

and other persons, and to establish and maintain an Immigration Department. The more important provisions of the Act are published for general information.

ACT No. 15 OF 1907.

Be it enacted by the King's Most Excellent Majesty by and with the advice and consent of the Legislative Council and the Legislative Assembly of the Transvaal as follows:—

Repeal of Ordinance No 5 of 1903.

1. The Peace Preservation Ordinance 1903 shall be and is hereby repealed; provided that no such repeal shall affect or abridge any powers or jurisdiction by the Asiatic Law Amendment Act 1907 conferred for the purpose of carrying out such Act; but the said Ordinance shall for all the purposes of such Act be deemed to remain of full force and effect.

Interpretation of terms.

2. In this Act and in any regulation made thereunder unless inconsistent with the context;

"department" shall mean the Immigration Department established and maintained under the provisions of this Act;

"Governor" shall mean the officer for the time being administering the Government of this Colony acting by and with the advice of the Executive Council;

"imprisonment" shall mean imprisonment with or without hard labour as the court sentencing an offender to imprisonment may direct;

"magistrate" shall include a resident magistrate and an assistant resident magistrate of any district of the Colony;

"Minister" shall mean the Colonial Secretary or such other Minister to whom the Governor may from time to time assign the carrying out of this Act;

"minor" shall mean any person under the age of sixteen years;

"police officer" shall mean any member of a police force lawfully established in this Colony;

"prohibited immigrant" shall mean and include any of the following classes of persons desiring to enter or entering this Colony after the date of the taking effect of this Act;

(1) any person who when asked whether within or outside this Colony by a duly authorized officer shall be unable through deficient education to write out (from dictation or otherwise) and sign in the characters of an European language an application for permission to enter this Colony or such other document as such officer may require; provided that for the purposes of this sub-section Yiddish shall be accepted as an European language; provided further that

(*a*) if the Minister publish a notice in the *Gazette* that arrangements have been made with the Government of any country for regulating the admission to this Colony of the subjects or citizens of such country such subjects or citizens shall not while such notice is in force be required to comply with the provisions of this sub-section;

(*b*) the Minister shall not issue any such notice unless such arrangements have been sanctioned by resolution of both Houses of Parliament;

(*c*) any such notice shall cease to have effect as soon as it is cancelled by further notice of the Minister in the *Gazette*;

(2) any person who has not in his possession or at his disposal means to support himself for a reasonable time within this Colony or who is likely to become a public charge if he were allowed to enter therein;

(3) any prostitute or person living on the earnings of prostitution or procuring women for immoral purposes;

(4) any person who at the date of his entering or attempting to enter this Colony is subject or would if he entered this Colony be subject to the provisions of any law in force at such date which might render him liable either at such date or thereafter if found therein to be removed from or to be ordered to leave this Colony whether on conviction of an offence against such law or for failure to comply with its provisions or otherwise in accordance with its provisions; provided that such conviction be not the result of the commission by such person elsewhere than in this Colony of an offence for which he has received a free pardon;

(5) any person who is a lunatic within the meaning of the Lunacy Proclamation 1902 or any amendment thereof;

(6) any person who is a leper or is suffering from such infectious or contagious disease of a loathsome or dangerous character as may from time to time be prescribed by regulation;

(7) any person who owing to information officially received by the Minister from any Secretary of State or from a member of any Colonial Government (whether British or foreign) or through diplomatic channels from an officer of any foreign state is deemed by the Minister to be an undesirable;

(8) any person who the Minister has resonable grounds for believing would be dangerous to the peace order and good government of this Colony if he entered therein;

but shall not include—

(*a*) members of His Majesty's regular forces;

(*b*) the officers and crew of any public ship of a foreign state;

(*c*) any person who is duly accredited to this Colony by or under the authority of His Majesty or of the government of a foreign state together with his wife family and servants;

(*d*) any person who has served in any of His Majesty's volunteer forces in South Africa and has received a good discharge and who does not come within the scope of sub-sections (3) (4) (5) (6) (7) or (8) of the definition of "prohibited immigrant";

(*e*) the wife or minor child of any person who is not a "prohibited immigrant";

(*f*) any European person who has been at any time lawfully resident within this Colony and who has not under the provisions of any law been removed from or ordered to leave this Colony;

(*g*) any Asiatic who is eligible for or has obtained a certificate of registration under the Asiatic Law Amendment Act 1907 and who does not come within the scope of sub-sections (3) (4) (5) (6) (7) or (8) of the definition of "prohibited immigrant";

(*h*) descendants of the aboriginal races of Africa south of the Equator who do not come within the scope of sub-sections (3) (4) (5) (6) (7) or (8) of the definition of "prohibited immigrant";

(*i*) European persons who are agricultural or domestic servants skilled artizans mechanics workmen or miners who are able to produce a certificate signed by the Agent General of this Colony in England or by an officer in England or elsewhere appointed for the purpose by the Governor to the effect that the person named therein has been engaged to serve immediately on arrival in this Colony an employer therein of repute at an adequate remuneration and for a reasonable period of time; provided that such persons do not come within the scope of any sub-section of the definition of "prohibited immigrant" other than sub-section (2);

"regulation" shall mean any regulation made under section *fifteen* of this Act.

* * * * * * *

Penalties for prohibited immigration.

5. Every prohibited immigrant entering into or found within this Colony shall be guilty of an offence and shall be liable on conviction—

(1) to a fine not exceeding one hundred pounds or in default of payment to imprisonment for a period not exceeding six months or to both such fine and such imprisonment; and

(2) to be removed at any time from the Colony by warrant under the hand of the Minister and pending such removal to be detained in such custody as may by regulation be prescribed; provided that

(*a*) such prohibited immigrant my be discharged from such detention if he find two approved sureties in this Colony (each in the sum of one hundred pounds) for his leaving the Colony within one month;

(*b*) if such prohibited immigrant be sentenced to imprisonment such imprisonment shall terminate as soon as he is removed from the colony.

Removal from Colony of certain persons convicted under Immorality Ordinance 1903 and of dangerous persons.

6. Any person who—

(*a*) is convicted after the date of the taking effect of this Act of a contravention of sections *three*, *thirteen* or *twenty-one* of the Immorality Ordinance 1903 or any amendment of such sections; or

(*b*) is deemed by the Minister on reasonable grounds to be dangerous to the peace order and good government of this colony if he remain therein; or

(*c*) having been ordered under any law to leave this colony fails to comply with the terms of such order;

may be arrested and removed from this Colony by warrant under the hand of the Minister and pending removal may be detained in such custody as may be prescribed by regulation; provided that no such person as is in paragraph (*b*) hereof described shall be removed from this Colony except on the order of the Governor; provided further that every such person arrested shall be discharged from custody unless an order be made by the Governor for his removal from this Colony within ten days after the date of his arrest.

7. Any person who—

Offences of aiding or being accessory to prohibited immigration.

(1) wilfully aids or abets a prohibited immigrant in entering or remaining in this Colony; or

(2) wilfully aids or abets a person ordered to be removed under section *six* in remaining in this Colony; or

(3) enters into or purports to enter into a contract as employer with any person outside this Colony with intent that the provisions of this Act be evaded or at the time of entering into or purporting to enter into such contract shall be unable to fulfil his part thereof or has no reasonable expectation of being so able; or

(4) uses or attempts to use any certificate issued under paragraph (*i*) of the classes of persons excluded from the definition of "prohibited immigrant" unless he be the lawful holder of such certificate; or

(5) forges or uses knowing the same to be forged any document purporting to be such certificate

shall be guilty of an offence and shall be liable on conviction to a fine not exceeding one hundred pounds or in default of payment to imprisonment for a period not exceeding six months or to both such fine and such imprisonment.

8. No prohibited immigrant shall be entitled to obtain a license to carry on in this Colony any trade or calling or to acquire therein any interest in land whether leasehold freehold or other interest; and any such license (if obtained) or any contract deed or other document by which such interest is acquired in contravention of this section shall on conviction of such immigrant under section *five* of this Act be null and void.

Prohibited immigrant not to obtain a license to carry on trade or calling or acquire interest in land.

9. Every person found in this Colony who is reasonably suspected of being a prohibited immigrant may be arrested without warrant by any magistrate justice of the peace police officer or officer of the department and shall as soon as possible be brought before a court of resident magistrate to be dealt with according to law.

Arrest without warrant of persons suspected of being prohibited immigrants.

10. No prohibited immigrant shall be exempt from the provisions of this Act or allowed to remain in this Colony by reason only that he had not been informed that he could not enter this Colony or that he may have been allowed to enter through oversight or owing to the fact being undiscovered that he was a prohibited immigrant.

Prohibited immigrant not exempt from Act by reason that he was allowed to enter through oversight.

11. Any person ordered to be removed from this Colony under this Act and any other person who shall have been convicted under section *seven* of aiding or abetting him in entering or remaining in the Colony in contravention of this Act shall be liable to pay all expenditure incurred by the Government in carrying out such removal whether from the Colony or South Africa or in the detention within the Colony or elsewhere of any person pending his removal; and the amount of such expenditure on production to the Sheriff of the certificate of an officer of the department stating the items and total amount of such expenditure shall be recovered by execution levied on the property within the Colony of the person so liable in manner provided for execution levied under a judgment of the Supreme Court; and the proceeds of such execution shall be paid by the Sheriff to the Treasurer who after deduction of the amount of expenditure aforesaid and the costs of execution shall remit the balance to the person so liable or to any person appointed by him to receive same.

Prohibited immigrant, etc., and person assisting him liable to pay expense of his removal and custody.

* * * * * * *

13. The burden of proving that a person has not entered or remained in this Colony in contravention of this Act or any regulation shall in any prosecution for such contravention lie upon the accused person.

Evidence.

14. Every court of resident magistrate shall have jurisdiction to impose the maximum penalties for all contraventions of this Act or of any regulation.

Special jurisdiction of resident magistrates.

* * * * * * *

16. This Act may be cited for all purposes as the Immigrants Restriction Act, 1907, and shall not take effect unless and until the Governor shall proclaim in the *Gazette* that it is His Majesty's pleasure not to disallow the same and thereafter it shall take effect upon such date as the Governor shall notify by proclamation.

Title and date of taking effect.

DECLARATION.

No. 1405J.—The 17th March 1908.—Whereas certain land was acquired by the Bengal Government under the provisions of Act I of 1894 and Act XVIII of 1885 for a public purpose, viz., for the Jealgora assisted siding, taking off the Damuda Branch at mile 177·3960 feet, and whereas coal mines are situate under the said land, and whereas the East Indian Coal Company, Limited, have given notice to the Government of Bengal, in accordance with the provisions of Act XVIII of 1885, that the said Company intend to work the seams known as Nos. 14 and 14A, and whereas the mines have been inspected by the officer appointed by the Bengal Government for the purpose under section 5 (1) of Act XVIII of 1885, and whereas it appears to the Bengal Government that the working out of the coal of the mines underlying the said land is likely to cause damage to the surface of the said land and to the works constructed thereon, and whereas the said East Indian Coal Company, Limited, have agreed not to work and get minerals underlying the land acquired for their siding, or underlying the land acquired for the branch or other lines with which the siding is connected or underlying the land of the branch or branches connecting the said siding with the main line, in such a manner as to injure or to endanger the safety of the undertaking or any part thereof, nor to claim any compensation for any restricted working:

Manbhum.

Now, therefore, the Lieutenant-Governor of Bengal is pleased to declare, under section 5, sub-section (2), clause (*b*) of the abovementioned Act, XVIII of 1885, that the

working shall be carried on by the said East Indian Coal Company, Limited, in the manner and subject to the restrictions below specified, viz.—

(*a*) Galleries may be driven not more than 15 feet wide and not more than 28 feet high in 14 seam and not more than the thickness of the seam in height in 14A seam, with centres not less than 75 feet, forming pillars not less than 60 feet square to be left unworked for the support of the acquired land.

(*b*) Manholes not exceeding 6 feet high, 6 feet wide, and 8 feet deep, may be made when required by any rule made under the Indian Mines Act, 1901.

(*c*) The above restrictions shall apply to the seams known as No. 14 and No. 14A only, and to the area edged with pink on the plan, and the East Indian Coal Company, Limited, shall give notice under section 4 of the Land Acquisition (Mines) Act, 1885, of their intention to work any other seam under the above area, or to work coal under any other area of acquired land and that in all the above cases, except in compliance with the above conditions, no further excavation shall be made in any of the galleries which already have been driven, the actual heights and widths of which have been carefully recorded on the plan marked L. A. M. A. No. 80 signed by the Chief Inspector of Mines.

The plan referred to may be seen in the office of the Chief Inspector of Mines in India by the parties concerned.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

[Sixth publication.]

The 18th February 1908.

No. 3.—Notification.—In exercise of the powers conferred upon him by sections 78 and 99 of Act III (B. C.) of 1876, His Honour the Lieutenant-Governor of Bengal proposes to pass the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These rules and rates will supersede those now in force.

R. E. CARTER,
Offg. Secretary to the Govt. of Bengal.

Leases for a term of years.

1. The country served by the canals shall be mapped out into blocks of convenient size in accordance with the features of the ground, natural or artificial. So far as may be practicable, the blocks shall be separated by drainage lines. This shall be done by the Subdivisional Canal Officers under the guidance and control of the Divisional Canal Officer.

2. Each block determined as above shall be numbered and recorded with its gross and irrigable areas in registers to be maintained by the Subdivisional Canal Officers. The blocks shall also be marked on maps to be maintained by the same officers.

3. Leases for not more than seven years may be granted for the whole irrigable area of a block or for definite parts of a block under the following conditions:—

I.—Ordinarily the whole irrigable area of any village so far as situated within the block must be included in the lease. If the lands of a village within the block are divisible into two or more distinct parts which can be irrigated independently, a separate lease may be granted for each part.

II.—All leases within one block shall be so granted that they may expire on the same date.

III.—No lease shall be granted when the supply of water must of necessity be delivered across an unleased area, unless a channel exists, which, in the opinion of the Subdivisional Canal Officer, will deliver water without waste across the unleased area.

4. The Superintending Engineer shall fix from time to time the gross area for which and the limits of the canal within which, leases for a term of years may be granted.

5. Maps of all villages in which lands have been brought under lease for a term of years, or in which there is any probability of such leases being taken, shall be kept in the subdivisional canal offices. These maps to be at scale 32″ = 1 mile when such are available, and elsewhere at scale 16″ = 1 mile.

6. The preliminary application for a lease for a term of years, either new or renewal, may be of an informal nature, but it must be in writing. It may be presented and shall be received either at the Subdivisional or Sectional Canal Office; in the latter case the Sectional Officer shall forward it immediately to the Subdivisional Canal Officer. The Subdivisional Canal Officer as soon as he has, by personal enquiry or by an enquiry made by the Sectional Officer, satisfied himself that the land in question constitutes a definite block or a definite part of a block, and that it can be irrigated, shall at once inform the Divisional Canal Officer giving such particulars as that officer may direct, and shall ask his formal approval to the lease being proceeded with. On receipt of such approval the Subdivisional Canal Officer shall forward the preliminary application to the Zilladar, in order that the detailed assessment may be taken in hand. The lands to be brought under lease shall be indicated on a copy of the map alluded to in rule 5.

7. The Zilladar on receipt of the application shall depute an amin to prepare the *khasra* or detailed assessment paper. This shall be done on the ground with the aid of the revenue survey map and *khasra*. Should the survey map and *khasra* not be available, the amin shall make a sketch map, and shall measure the areas of the holdings with a chain or measuring-rod.

8. When the amin has completed the *khasra*, the Zilladar shall forward it to the Subdivisional Canal Officer for approval.

9. As soon as the *khasra* has been approved by the Subdivisional Canal Officer, he shall return it to the Zilladar endorsed with his signature in token of approval.

The Zilladar shall then prepare a *khatian* or abstract of the *khasra*, and shall have the form of application, given as Appendix No I to these rules, filled up and signed or marked by each of the applicants, in the presence of two witnesses.

When the application has been completely signed, the Zilladar shall send it to the Divisional Canal Officer, by whom the permit or formal approval of the lease shall be signed and issued in the form given as Appendix No. III to these rules. The permit shall be made over to the representative of the cultivators by the Subdivisional Canal Officer by means of his Sectional Officers. The Divisional Canal Officer shall return the application to the Deputy Collector, Revenue Division, with a copy of the permit for record.

10. Should it happen that the cultivators of the block proposed for lease are not unanimous, and that certain of them decline to sign the application, the Zilladar shall report the matter to the Subdivisional Canal Officer. This officer shall hold a local enquiry, recording the statements of the persons who decline to sign and recording his personal opinion on the reasons given. He shall then send a report to the Divisional Canal Officer, who shall decide whether the lease may be accepted excluding the fields in the occupation of the persons who decline to sign, or whether the lease shall be declined. The Divisional Canal Officer is authorised to grant a lease when not less than 95 per cent. of the net irrigable area of the block has been signed for. In particular cases should it be desirable to grant a lease even though an area larger than 5 per cent. of the block has not been signed for, this may be done on the written order of the Superintending Engineer. The reasons for granting the lease shall be fully recorded.

Covering Leases.

11. Applicants for a lease for a term of years who may require water before the lease has been concluded can obtain a supply on tendering an application for a covering lease in the form given as Appendix No. II to these rules. This application must be signed in the presence of the Zilladar or of some other responsible officer nominated for the purpose by the Subdivisional Canal Officer. The signatures should be those of the leading cultivators in the block in question, and they should represent holders of not less than 75 per cent. of the irrigable land within the block.

As soon as the Subdivisional Canal Officer receives the application duly signed, he shall issue a permit in the form given as Appendix No. IV to these rules, and shall at once supply water.

Single Waterings.

12. Applications for a single watering during the *kharif* season, may be entertained if water is available, after meeting the demand for the areas leased for a term of years. The applications may be presented at the Subdivisional Canal Office or to the Sectional Officer. They must be in the form given as Appendix No. V to these rules.

The application must be for a definite block and the signatures of the applicants must cover areas aggregating not less than four fifths of the lands in the block.

If the Subdivisional Officer is able to supply water and accepts the application he will require the applicants to pay in advance one-half of the amount due on the areas entered in the application at the rate specified in the schedule of rates, and on this sum being paid he will at once issue a permit in the form given as Appendix No. VI to these rules and will supply water. When the watering has been concluded the area actually irrigated shall be determined and the assessment shall be made on the areas actually watered within the limits of the block specified in the application and permit.

Season Leases.

13. Applications for water to irrigate spring rice or other crops between December and April may be presented at the Subdivisional Canal office or to the Sectional Officer. They must be in the form given as Appendix No. VII to these rules.

In the applications the areas for which water is required must be specified but the rate will be charged on those areas for which water is actually used as determined by measurement.

The permit in the form given as Appendix VIII to these rules will be granted by the Subdivisional Canal Officer if he is able to supply the water.

Supply of water.

14. The Divisional Canal Officer shall control the supply of water throughout the Division in his charge.

15. No water shall be supplied to any lands except such as have been brought under a lease for a term of years or for the season, or to such as are provided for by a covering lease or by a lease for a single watering.

16. Under the forms of irrigation lease in use, no specific supply of water is promised: but the undertaking is to give such a supply to each lessee as may be necessary for the lands leased. The supply shall be given, as may be required for the proper cultivation of the crops under irrigation, according to the exigencies of the season.

17. The Divisional Canal Officer is empowered to give the required supply by rotation, should this be advisable for the efficient working of the canals in his charge. In such a case, he is required to give the lessees written notice informing them of the periods when they will be supplied with water.

Collection of water-rates.

18. The rates due for water supplied shall be collected by the Deputy Collector or other officer in charge of the Revenue Division through his staff of Zilladars, Tahsildars and peons. All *khatians* or demand statements shall be signed by the Deputy Collector or other officer in charge of the Revenue Division after scrutiny in his office

19. At the time of preparation of the *khatian* in the Zilladar's office, each person assessed shall be furnished with an extract from the assessment paper, showing the particulars of the charge against him. This extract shall be furnished in such form as may from time to time be approved for the purpose.

20. Each person on paying the sum due from him shall be given a receipt in the form prescribed for the purpose.

21. For the purposes of account, of control over establishment, and of general administration, the Deputy Collector or other officer in charge of the Revenue Division is in the position of an Executive Engineer in charge of a division, and is directly subordinate to the Superintending Engineer. In regard to any proceedings taken under the Public Demands Recovery Act the Deputy Collector is subject to the control of the Collector of the district.

Unauthorized use of water and waste of water.

22. Should it be necessary to take action under the provisions of sections 79 and 80 of the Act, proceedings shall be instituted only under the direct and special order of the Divisional Canal Officer. The primary record of the facts regarding the unauthorized use or the waste of water shall be made by the Subdivisional Canal Officer and his subordinates. The parties whom it is proposed to assess shall be informed in writing, and shall be called on to show cause why they should not be assessed. The record of their statements shall be made by the Divisional or by the Subdivisional Canal Officer. The Divisional Canal Officer shall consider the facts and statements recorded, and shall, in deciding the case, give his reasons for or against assessment, both as regards the facts and as regards the law; and he shall determine the rate to be charged subject to the provision in the schedule of rates attached to these rules.

23. Should the Divisional Canal Officer decide on making an assessment, he shall have the assessment paper prepared by the Subdivisional Canal Officer and his staff. Each person assessed shall be furnished with a statement of the charge against him, and an abstract of the demand or *khatian* shall be sent to the officer in charge of the Revenue Division, who shall proceed to recover the sums assessed. The period of one month within which an appeal may be presented to the Collector under section 91 of the Act shall count from the date on which the statement of the charge may be furnished to the person assessed, which date shall be endorsed on it.

24. No proceedings shall be instituted if the unauthorized use or the waste of water have occurred through the act or neglect of a Canal Officer or subordinate employed on the Canal. During the irrigation of autumn rice, the passing on of surplus water from leased to unleased fields is not an unauthorized use of water.

Complaints and Applications.

25. All complaints or applications with respect to the supply of water, to defective drainage, and generally with respect to the administration of the canals, shall be received on presentation at either divisional or subdivisional canal offices.

Complaints and applications received by a Divisional Canal Officer may be transferred to his Subdivisional Canal Officers for disposal at his discretion.

Any such complaints or applications, if presented to the Deputy Collector or to his staff, shall be returned endorsed with instructions as to the proper office at which to present them If received by post, they shall be at once forwarded to the Divisional or Subdivisional Canal Officer.

26. Complaints or applications with respect to corrections of the assessment with respect to the actions of the amins in assessing and with respect to the actions of the tahsildars and other staff employed in collections, shall be received at the office of the Deputy Collector or other officer in charge of the Revenue Division, or at the zilladars' offices.

27 Receipts in the prescribed form shall be given at all offices for complaints or applications presented. The receipt of all complaints and applications shall be recorded in registers to be kept for that purpose.

28. The Officer receiving the complaint or application shall either make a personal enquiry into the matter or he shall nominate in writing some responsible person to hold the enquiry.

29. The orders passed on all complaints or applications shall be in writing, and a copy of every order shall be furnished to the complainant or applicant.

The copy of order may be sent by post (registered), if this is convenient.

The period within which an appeal may be presented under section 91 of the Act shall be reckoned from the date on which the copy of the order is received by the person.

30. When an appeal to the Collector is from the order of a Subdivisional Canal Officer, the proceedings shall be called for through the Divisional Canal Officer, who may record on them such remarks as he may think desirable, provided that he does not thereby detain the proceedings.

In all cases in which an appeal against an assessment is preferred to the Collector, that officer may, if he thinks fit, direct that the collection of water-rates be suspended till the appeal is heard.

31. The Divisional Canal Officer is empowered to revise the proceedings of his Subdivisional Canal Officers, and the Superintending Engineer is empowered to call for and to revise the proceedings of all officers under his control.

Remissions and Alterations of Demand.

32. Whenever the crop on land entitled to a supply of water suffers material injury from an insufficient supply of water, or from any interruption in the supply of water, remission of the rate due on such crop shall be given by the Divisional Canal Officer, provided that the person claiming remission shall have applied for such not less than 15 days before the reaping of the crop.

33. On the occasion of lands being brought under a lease for a term of years, the Divisional Canal Officer is empowered to remit the rates for the first season on those fields which from the nature of the cultivation then obtaining, or from other causes, have not, in that season, derived any benefit from the supply of canal water.

34. Should the crop on lands under lease for a term of years suffer material injury from excess of water due to deficient drainage, the Divisional Canal Officer may grant remission of the rates due on such lands in whole or in part, provided that the person asking for remission shall have applied at least 15 days before the reaping of the crop.

35. Revisions of the assessment required in consequence of land under lease being left uncultivated or of land being appropriated for purposes other than cultivation shall be made under the orders of the Divisional Canal Officer.

36. Revisions of the assessment required in consequence of incorrect entries of the names of occupants of lands under lease or of incorrect entries of areas or amounts in the assessment papers, or required by changes in the occupation of lands shall be made under the orders of the Deputy Collector or other officer in charge of the Revenue Division, provided that no change involving any increase or decrease in the total area under lease for a term of years shall be made without the concurrence of the Divisional Canal Officer.

37. Remissions of water-rates on account of injury to the crops caused by inundation, by blight, by storms or by any extraordinary cause will only be allowed under the special orders of the Local Government.

Irrecoverable Demands.

38. The Superintending Engineer is empowered to sanction the write-off of those demands which are reported, after due enquiry by the Deputy Collector or other officer in charge of the Revenue Division, as irrecoverable owing to the poverty of the defaulter or of his successors in case of his death, or owing to the defaulter having absconded.

Cultivators' Representatives.

39. Whenever the preliminary application for a lease for a term of years has been approved by the Divisional Canal Officer, the officer in charge of the Revenue Division shall, with the concurrence of the Subdivisional Canal Officer, select as representative of the cultivators a suitable person or persons who shall generally be acceptable to the cultivators and who shall each have a direct interest in the land for which the lease is executed.

40. The person or persons so selected shall be required to give assistance to the Canal Officers in respect of the following matters:—

(*i*) In the preparation of applications for leases.
(*ii*) In the measurement of irrigated lands.
(*iii*) In recording the names of the occupiers of the holdings.
(*iv*) In receiving demand statements and distributing to the cultivators the individual notices of assessment.
(*v*) In attending, when required, at enquiries into complaints.
(*vi*) In reporting to the zilladars any changes in the occupancy of lands under lease.
(*vii*) In assisting the tahsildar in collecting rates.

41. For such assistance the cultivators' representative or representatives shall be entitled to free irrigation of the lands in his or in their own occupation, which may lie within the boundaries of the leased area subject to a total limit of 3 per cent. of the area assessed. The Deputy Collector or other officer in charge of the Revenue Division may disallow in whole or in part this free irrigation, and may recover the rates which would otherwise have been payable in whole or in part if the assistance specified in Rule 40 has not been efficiently rendered. The reasons for such disallowance shall be recorded in writing.

42. The Deputy Collector shall maintain in his office a register containing a record of the names of all representatives and of the areas of free irrigation allowed to each.

43. Applicants for single waterings or for season leases shall be required to nominate one of their number who must have a substantial interest in the land to be irrigated as their representative. The representative so nominated shall perform the same duties as stated in Rule 40 and shall receive remuneration on the same scale as in Rule 41.

Power to decline or cancel leases.

44. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted or used for the irrigation of lands not under lease, it shall be competent for the Superintending Engineer to direct that the lease shall be cancelled with effect from the 1st of June next following. The order to cancel a lease shall be passed before the 1st of April of the year in which it is to take effect.

45. The Superintending Engineer may give directions to the Divisional Canal Officer to decline applications for irrigation leases of lands in villages where there has been persistent difficulty in realizing the water-rates, until all arrears have been paid.

He may further suspend, or altogether cancel, any lease for a term of years, if on the 1st June of any year water rates to the extent of half the demand for one year are in arrears. Previous notice of intention to put this rule in force shall be given not later than the 15th April preceding.

Miscellaneous.

46. Tanks may be supplied with canal-water without charge, when water can be made available without injury to the cultivation dependent on a canal, under the following conditions:—

(*i*) That the water is to be exclusively used for domestic purposes, or for watering cattle.

(*ii*) That a channel exists through which water can pass without waste.

(*iii*) That the water shall only be supplied on the written order of the Subdivisional Canal Officer.

(*iv*) That any new outlet or sluice which may be required to allow of the supply being given shall be provided at the cost of the persons who ask for the water.

(*v*) That the supply of water may be stopped at any time if it is found that it is being misused.

47. Except when a public right-of-way exists, no person shall, without the permission expressed in writing of the Divisional or Subdivisional Canal Officer, pass himself, or cause any animal or vehicle to pass, on or across any of the works, banks or channels of a canal, or drainage work which is part of the canal system except by means of such bridges, fords and ferries as may have been provided for the purpose.

Any person who, after due warning, commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

48. The use of any part of the banks or berms of any canal, drainage work which is part of the canal system, or flood embankment which is subject to the provisions of the Irrigation Act, as a place for relieving the calls of nature, is prohibited. Any person who after due warning commits a breach of this rule may be proceeded against under section 93, clause (9), of the Irrigation Act.

49. Should water be required for purposes other than irrigation, it may be supplied, when available, at a rate of one rupee per 10,000 cubic feet of water.

50. No officer employed on the canals, unless especially exempted by the Lieutenant-Governor from the operation of this rule, shall have any interest in the distribution of water from any of the canals or purchase or bid for any Government property sold thereon either in his own name or in the name of another, or jointly, or in shares with others.

Schedule of rates for water supplied from the Midnapore Canal

	Rs.	A.	
For water supplied on a lease for a term of years—supply given from 16th June to 30th November of each year	2	0	per acre per season.
The rate is due in two equal instalments on the 1st of January and the 1st February of each year. Provided that when the sum payable by any lessee is less than Rs. 10, the whole amount shall be due on the 1st of January in each year.			
For water supplied on a covering lease to irrigate lands for which a preliminary application for a lease for a term of years has been received and failing the completion of the same	3	0	per acre
Supply given from date of covering lease to 30th November of that year. The rate is due as in case of lease for a term of years.			
For water supplied as a single watering the rate is payable half in advance at time of supply and half on completion of the watering	1	0	„ „
For water supplied on a season lease for the irrigation of any crops between 1st December and 15th June ...	2	8	„ „
The rate is payable on 1st June following.			
For the unauthorised use of water or for the waste of water such rate may be charged as determined by the Divisional Canal Officer under rule 22 subject to a maximum of Rs. 5 per acre. Such rate shall be due on presentation of the notice of assessment to the person assessed.			

APPENDIX I.

(Referred to in rule 9.)

APPLICATION FOR A LEASE FOR A TERM OF YEARS.

(*Yearly rate, per acre: water to be supplied each year from the 16th June to 30th November only.*)

WE, the undersigned, of mauza, , pargana , thana , apply for water to be supplied from Distributary of the Midnapore Canal for a term of years, commencing on the 16th June and ending 30th November. The supply of water is required for the irrigation of the block of land formed by our holdings as specified below.

2. We agree that the amounts due shall be payable to the Deputy Collector or other officer in charge of the Revenue Division, Midnapore Canal, or to such person as he may appoint on the 1st January and 1st February, or if Rs. 10 or under on 1st of January of each year, and shall be payable independently of our requiring water in any particular year or not.

3. We also agree to be bound by the rules published in the *Calcutta Gazette* for pages , Notification No.

4. We agree that this application shall not be deemed to have been completed until all the irrigable fields within the block have been signed for, and that failing such completion any covering lease which may have been granted shall be enforced.

5. We agree that the areas* and amounts as given in the statement below are correct at the commencement of the lease, and in token of agreement we attach our individual signature or mark.

6. Our heirs and representatives shall be bound by the terms of this agreement in case of our decease.

SCHEDULE No. 1.

* Areas to be given in acres with a note to show the equivalent in the local measure of an acre.

APPENDIX II.

(Referred to in rule 11.)

APPLICATION FOR A COVERING LEASE.

WE, being the principal cultivators of mauza , pargana , thana , on our own behalf and on behalf of the other cultivators of the mauza, hereby certify that we have presented an application for grant of a long lease to cover all the irrigable land in the block situated in mauza , the area of which is approximately acres* the boundaries of the block being specified below.

2. Now in order that we may obtain a supply of water at once and before the long lease can be completed, we, whose signatures or marks are annexed below, severally and jointly bind ourselves to pay the water-rate on the whole area within the limits of the block as specified, which may be determined by the Canal Officer to be irrigable.

3. In the event of a long lease not being completed through the default or non-consent of any of the cultivators of irrigable lands within the block, a rate of Rs. 3 per acre on the area determined for in the present season will be charged to us and will be payable by us on or before the 1st January and 1st February next, or if Rs. 10 and under on or before the 1st January ; water to be supplied up to the 30th November only.

4. In token of our obligation in this agreement we annex our signatures or marks below :—

being the representive of the cultivators in village , pargana

THIS is to inform you that on the application submitted by you and other cultivators of village , pargana , water will be supplied for the irrigation of the crop from distributary, canal.

The fields actually irrigated will be recorded, and the areas so irrigated as ascertained by measurement or as recorded in the settlement khasras will be assessed at Rs. per acre.*

Those persons who may irrigate their fields without having applied for the water will be liable to be charged a higher rate for the unauthorized use of water.

Signature of Subdivisional Canal Officer.

* A note should be given to show the equivalent in the local measure of an acre.

RAILWAY DEPARTMENT.

The 19th March 1908.

No. 3R.—Notification.—Whereas it appears to the Lieutenant-Governor of Bengal that land in the Saran district is likely to be needed for a public purpose, viz., for a railway line from Thawe to Domritollah, notice is hereby given to all whom it may concern that in exercise of the power conferred by section 4 of the Land Acquisition Act, I of 1894, the Lieutenant-Governor of Bengal has authorized the Bengal and North-Western Railway Engineers for the time being engaged on this undertaking to enter upon and survey lands and do all other acts required for the proper execution of their works as provided for or specified in the said section.

The general route for the railway will probably be from Thawe through or near Sirsia, Koochaikote and Domritollah.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 19th March 1908.

No. 36Marine.—It is hereby notified that, under section 16 of the Calcutta Port Act, 1890, the Lieutenant-Governor is pleased to appoint the Hon'ble Mr. W. C. Macpherson, C.S.I., to be a Commissioner of the Port of Calcutta, *vice* the Hon'ble Mr. F. A. Slacke, with effect from the afternoon of the 26th instant, or any subsequent date on which the latter may avail himself of the combined leave for seven months and fourteen days that has been granted to him.

The Lieutenant-Governor is also pleased to appoint the Hon'ble Mr. W. C. Macpherson, C.S.I., to be Chairman of the Commissioners under section 8 of the Act.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

The 20th March 1908.

By order of the Board of Revenue, L. P.,

R. B. MISRA, *Secretary.*

BOARD OF REVENUE, L. P., CALCUTTA, *the 28th February 1908.*

No. 1417B.

THE HON'BLE MR. W. C. MACPHERSON, C.S.I.

Dated Calcutta, the 11th March 1908.

IN exercise of the powers conferred by section 75 of the Sea Customs Act, 1878 (VIII of 1878), the Board of Revenue, Lower Provinces, direct that the following modifications be made in the rules published under Notification No. 6795B., dated the 2nd December 1907, at pages 2119-2129 of Part I of the *Calcutta Gazette* of the 4th December 1907, for the landing and shipping of passengers' baggage and the passing of the same through the Calcutta Custom House:—

(1) *For* the words "by the baggage staff in charge of a baggage officer or peon with a green boat note," in clause (2) of rule 13, *substitute* "by the Master or Agents of the vessel under cover of a green boat note, accompanied, if necessary, by a baggage officer or peon."

(2) *For* Rule 18 *substitute* the following:—

18. "A fee of 8 annas shall be chargeable for every package made over to an officer of Customs for the purpose of being landed."

By order of the Board of Revenue, L. P.,

R. B. MISRA,

Secretary.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Calcutta, the 20th March 1908.

No. 834M.—His Excellency the Viceroy and Governor-General will leave Calcutta on Saturday, the 28th March 1908, starting by special train from Howrah at 3-24 P.M., Calcutta time. His Excellency's departure from Calcutta will be private.

The Viceroy will visit Allahabad, Gwalior, Aligarh and Dehra Dun.

All covers intended to reach the Viceroy and party during His Excellency's tour should be addressed "Viceroy's Camp" without the addition of any post town. Communications of a mere routine nature should be sent, as usual, to the head-quarters of the various Departments.

The party accompanying His Excellency on tour will be as follows :—

Lieutenant-Colonel J. R. Dunlop-Smith, C.I.E., Private Secretary.
Lieutenant-Colonel V. R. Brooke, D.S.O., Military Secretary.
Captain Lord F. Scott, A.-D.-C.
Captain R. G. Jelf, A.-D.-C.
Captain J. E. Gibbs, A.-D.-C.

The date of the Viceroy's arrival at Simla will be notified later.

By Command,

VICTOR BROOKE, *Lieut.-Colonel,*
Military Secretary to the Viceroy.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 575L S.-G.—The 20th March 1908.—It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Sadar Local Board, in the district of Hooghly, under section 25 of the Bengal Local Self-Government Act, III of 1885, of Babu Chandra Narain Roy to be their Chairman.

Hooghly.

No. 591M.—The 21st March 1908.—It is hereby notified that, under section 27 of the Bengal Municipal Act, III of 1884, as modified up to 1st November 1896, the Lieutenant-Governor is pleased to appoint Babu Hridaya Nath Chaudhuri to be a Commissioner of the Khirpai Municipality, in the district of Midnapore, *vice* Babu Ram Chandra Tewari, deceased.

Midnapore.

No. 625M.—The 23rd March 1908.—Whereas a Notification No. 1171M., dated the 21st December 1907, was published at page 197, Part IB of the *Calcutta Gazette* of the 25th idem, declaring the intention of the Lieutenant-Governor to sanction the imposition by the Commissioners of the Berhampore Municipality, in the district of Murshidabad, of a rate on the annual value of holdings within the Municipality, in lieu of the tax on persons occupying holdings within the Municipality, and whereas no valid objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 85 of the Act, and in accordance with the recommendation of the Commissioners of the Berhampore Municipality, made at a meeting, the Lieutenant-Governor sanctions the imposition of the said rate within the above Municipality in lieu of the tax upon persons occupying holdings within the Municipality at present in force in that Municipality.

Murshidabad.

No. 626M.—The 23rd March 1908.—It is hereby notified for general information that, in accordance with the recommendation of the Commissioners of the South Barrackpore Municipality, in the district of the 24-Parganas, made at a meeting, the Lieutenant-Governor intends, in exercise of the power vested in the Local Government by section 9 (*c*) of the Bengal Municipal Act, III of 1884, to alter the number of Commissioners of the said Municipality, so as to raise it to twelve, unless good reasons are shown to the contrary within six weeks from the date of publication of this notification within the Municipality.

24-Parganas.

No. 636M.—The 23rd March 1908.—It is hereby notified that, under section 27 of the Bengal Municipal Act, III of 1884, the Lieutenant-Governor is pleased to appoint Babu Kanai Lal Das to be a Commissioner of the Basirhat Municipality, in the district of the 24-Parganas, *vice* Babu Rajendra Nath Maitra, deceased.

24-Parganas.

No. 645M.—The 23rd March 1908.—In accordance with the provisions of section 223 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and on the recommendation of the Commissioners of the Sitamarhi Municipality, in the district of Muzaffarpur, made at a meeting, the Lieutenant-Governor is pleased to declare his intention to modify Government Notification No. 755M, dated the 9th February 1905, published at page 31, Part IB of the *Calcutta Gazette* of the 15th idem, extending the provisions of Part IX of the aforesaid Act to the Sitamarhi Municipality, so as to withdraw the areas specified below from the operation of the said provisions of the law, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

Hooghly Collectorate, the 15th February 1908.

B. DE, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the Bangaon subdivision of the district of Jessore, will be put up to sale at the Bangaon Subdivisional Office on the 4th May 1908, corresponding with 21st Byshakh 1315 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary rights of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

N.B.—The conditions regarding the payment of a land revenue fixed in perpetuity are not applicable to estates in temporarily-settled districts, in which the land revenue should be fixed for a term of the current settlement and be subject to periodical revision on expiry of each settlement. In the case of an estate situated in a permanently-settled area and yielding an annual rental of less than Re. 1, there should be no condition regarding payment of land revenue.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount of bid to be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number on the district roll.	Name of estate and pargana.	Approximate area in acres.	Government revenue assessed.	REMARKS.

Jessore Collectorate, the 11th March 1908.

S. K. AGASTI, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the Magura subdivision of the district of Jessore, will be put up to sale at the Magura Subdivisional Office on the 11th May 1908, corresponding with 28th Byshakh 1315 B.S.

The purchasers will be subject to the following conditions of sale :—

1st.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietory right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity.

N.B.—The conditions regarding the payment of land revenue fixed in perpetuity are not applicable to estates in temporarily-settled districts in which the land revenue should be fixed for a term of the current settlement and be subject to periodical revision on expiry of each settlement. In the case of an estate situated in a permanently-settled area and yielding an annual rental of less than Re. 1, there should be no condition regarding the payment of land revenue.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Jessore Collectorate, the 9th March 1908.

S. K. AGASTI, *for* Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates, situate in the Sadar subdivision of the district of Jessore, will be put up to sale at the Jessore Collectorate on the 23rd April 1908, corresponding with 10th Byshakh 1315 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of these estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them, subject to the revenue fixed in perpetuity.

N.B.—The conditions regarding the payment of land revenue fixed in perpetuity are not applicable to estates in temporarily-settled districts in which the land revenue should be fixed for a term of the current settlement and be subject to periodical revision on expiry of each settlement. In the case of an estate situated in a permanently settled area and yielding an annual rental of less than Re. 1, there should be no condition regarding payment of land revenue.

2nd.—The sale to be subject to existing leases and to the rights confered by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by the noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

KEDAR NATH MUKHARJI, *Certificate Officer.*

HOOGHLY CERTIFICATE OFFICE, *the 17th February 1908.*

In the Court of the District Judge of Tippera at Comilla.

CASE No. 7 OF 1908.

In the matter of the estate of the late Mr. J. Edmound Courjon, of Comilla, who died intestate.

WHEREAS it has been intimated to this Court that the aforesaid Mr. J. Edmound Courjon, a European inhabitant of Comilla town, died on the 15th March 1908, without, as far as it appears, any heir, but leaving moveable properties:

It is hereby notified that any person who has a claim to receive the said properties as an heir, executor, or administrator to the deceased, or in any other capacity, is required to appear and prove his claim in this Court. If any person appears and proves his or her right to the said properties within a year, the properties will be made over to the said person after he or she shall have deposited the necessary expenses incurred in taking care of the said properties; otherwise the said properties shall be sold and the sale-proceeds appropriated by Government.

Dated this 20th day of March in the year 1908.

A. H. CUMING, District Judge.

(367—3)

Notification of sale.

TO be peremptorily sold, pursuant to a decree and order of the High Court of Judicature at Fort William in Bengal, in its Ordinary Original Civil Jurisdiction, made in suit No. 759 of 1905 (wherein Tripoora Churun Mookerjee is plaintiff and Sreemutty Thakurani Dasi Debi and another are defendants), and dated, respectively, the 23rd day of February 1906 and the 29th day of May 1907, by the Registrar of the said Court in his sale-room on Saturday, the 28th day of March, at the hour of 12 o'clock noon, the following property free from all charges created under the decree made in suit No. 207½ of 1902:—

1. All that two-storied brick-built house and premises formerly No. 20, now numbered 60, Boloram Dey's Street, in the North Division, in the town of Calcutta, and the land appertaining thereto, containing by estimation 1 cottah, more or less on which the same is erected and built, being Holding No. 227 and Block No. XIX, and bounded on the north by Boloram Dey's Street, on the east by Ram Tanoo Bose's Lane, on the south by the premises No. 12/1, Ram Tanoo Bose's Lane, and on the west by the dwelling-house of Jadu Nath Paul. The annual revenue payable to Collector of Calcutta in respect whereof is 8 annas and 8 pies.

2. All that the moiety or half part of the two-storied brick-built house and the land appertaining thereto, containing as to the entirety by estaiimation 2 cottahs, more or less, lying at and being the eastern portion of No. 33/1, Boloram Dey's Street, in Sootanooty, in the North Division of the town of Calcutta, and bounded as to the entirety of No. 33/1, Boloram Dey's Street, on the north by the premises No. 33, Boloram Dey's Street, on the south and east by Boloram Dey's Street, and on the west partly by the dwelling-house of Shama Pado Mookerjee, and partly by the tenanted house of Deno Nath Mookerjee.

3. All that the undivided moiety or half part or share of the premises known as No. 106, mohulla Agustakoondoo, in thana Agustakoondoo in Bengalitollah, in the city of Benares, in the district of Benares, in the sub-district of Benares, a two-storied brick-built house and the land appertaining thereto, containing by estimation 1 cottah 8 chitaks and 20 square feet, more or less, bounded on the north by Krishna Rai's Gully, on the south by Debi Brahmin's dwelling-house, on the east by Girish Chundra Paul's dwelling-house, and on the west by Sreesoondery Dobee's house.

The abstract of title and the conditions of sale may be seen at the office of Basanta Kumar Bhose, Attorney for the plaintiff, at No. 6, Old Post Office Street, Calcutta, on any day before the sale and will be produced at the sale.

W. R. FINK, Registrar.

Basanta Kumar Bhose, Attorney for the Plaintiff.

The 14th day of February 1908.
Re-issued this 17th March 1908. (348—1—148)

Notification of sale.

TO be peremptorily sold, pursuant to an order of the High Court of Judicature at Fort William in Bengal, in its Ordinary Original Civil Jurisdiction, dated the 31st day of July 1907, and made in suit No. 387 of 1906 (Gobind Lall Roy *versus* Sreedam Chunder Dey), by the *Registrar* of the said Court, in his sale-room in the Court-house on *Saturday, the 4th day of April 1908, at 12 o'clock noon*, the following property belonging to the said defendant:—

Lot No. 1.—No. 21-3, Tara Chand Dutt's Street, being a two-storied brick-built dwelling-house, together with the land appertaining thereto, containing according to the deed of mortgage in this suit, dated 22nd July 1902, 3 cottahs 3 chitaks and 5 square feet, but found on measurement to contain 2 cottahs and 7 square feet, more or less, being a portion of Holding No. 199, Block No. X, in the North Division of Calcutta, the Government revenue for the entire holding being Rs. 4 annas 14 and pies 8, payable to the Collector of Calcutta, and bounded on the north partly by the premises No. 21-2, Tara Chand Dutt's Street, and portion of the premises purchased by Manik Lal Seal, and partly by premises Nos 21-2, Tara Chand Dutt's Street, on the east partly by the Thakoorbati, and partly by the Thakoorbati yard and partly by premises No. 21-5, Tara Chand Dutt's Street, on the south partly by the premises Nos. 21-4 and 21-5, Tara Chand Dutt's Street, and partly by premises No. 10, Peary Lall Mullick's Lane, and on the west partly by the premises No. 21, Tara Chand Dutt's Street, and partly by the premises No. 10, Peary Lall Mullick's Lane.

Lot No. 2.—No. 21-2, Tara Chand Dutt's Street, being a three-storied brick-built dwelling-house, together with the piece or parcel of land appertaining thereto, containing, according to the said deed of mortgage, 2 cottahs, but found on measurement to contain 1 cottah 3 chitaks and 9 square feet, more or less, being a portion of Holding No. 199, Block No. X, in the North Division of the town of Calcutta, the Government revenue for the entire holding being Rupees 4 annas 14 and pies 8, and bounded on the north partly by Tara Chand Dutt's Street, and partly by portion of the premises purchased by Manik Lal Seal, on the east partly by common passage and partly by the Thakoorbati yard and Thakoorbati, on the south partly by Thakoorbati yard and partly by premises No. 21-3, Tara Chand Dutt's Street, and on the west partly by premises No. 21-1, Tara Chand Dutt's Street, and partly by portion of premises purchased by Manik Lal Seal.

The abstract of title and conditions of sale may be seen at the office of Babu Nalin Chandra Gupta, Plaintiff's Attorney, at No. 5, Hastings Street, Calcutta, and at the office of the undersigned in the Court premises on any day, before the sale and will be produced at the sale.

W. R. FINK, Registrar.

Nalin Chandra Gupta, Plaintiff's Attorney.

Calcutta, the 19th day of February 1908.

(345—1—149)

Notification.

TO be peremptorily sold, pursuant to a decree and order of the Calcutta High Court, Ordinary Original Civil Jurisdiction, in suit No. 20 of 1901 (K. S. Bonnerjee *versus* Uma Churn Ghose and others), and dated, respectively, 13th July 1904 and 26th August 1907, by the Registrar of the said Court in his sale-room on Saturday, the 25th day of April 1908, at 12 o'clock noon, the following property:—

All that the eastern portion of the premises No. 16 Chunapukur Lane, in the town of Calcutta, together with the one-storied buildings erected on portion thereof, containing by estimation 6 cottahs 12 chitaks and 7½ square feet, in the north division and being a portion of the Holding No. 132, Block No. 2, and paying in respect of the entire holding an annual Government revenue of Rs. 3-5-6 to the Collectorate, and butted and bounded on the east by a public lane formed by filling up a drain separating this portion and buildings partly from the house of Kanto Money Dassee, partly from the house of Kali Das Sil and partly from the dwelling-house of Gopaul Chunder Roy Goopta, on the west partly by the

remaining portion of the premises No 16, Chunapukur Lane, belonging to Sreemutty Shakambory Dassee, and partly by the dwelling-houses of Ram Ratan Dhur and Manick Lall Dhur, on the north by the dwelling-house of Hurry Nath Nayak, and on the south by a public lane formed by filling up a public drain which separates this property from the property of Boocol Dutt.

The abstract of title and conditions of sale may be seen at the office of the Registrar and at No. 8-2, Hastings Street, the office of Messrs. Rutter & Co., Attorneys for the plaintiff, on any day before the sale and will be produced at the sale.

W. R. FINK, Registrar.

Rutter & Co., Plaintiff's Attorneys.

Notice.

WANTED a District Engineer for the District Board of Muzaffarpur on a salary of Rs. 700 rising to Rs. 800 by annual increment of Rs. 25. The present appointment is temporary, but there is a possibility of its becoming permanent. Any candidate for the post must be qualified in one of the manners following:—

(*a*) He must be, at the time of seeking the employment, or have previously been, a member of the permanent establishment of the Public Works Department in the grade of Executive or Assistant Engineer or Sub-Engineer or Supervisor; or

(*b*) He must hold the degree of Bachelor of Engineering or be a Licentiate of Engineering of the Calcutta University, or have passed the final examination of the Engineering Department of the Civil Engineering College at Sibpur; or

(*c*) He must have served an apprenticeship of not less than three years in the United Kingdom with some recognised firm of Engineers of high standing; or

(*d*) He must have passed satisfactorily through the whole course of instruction at the recognised School of Engineering in the United Kingdom (*e.g.*, King's College, London; Cooper's Hill College; the Crystal Palace School of Engineering).

Provided that in all cases the candidate must have held charge of important works for not less than five years and must produce a certificate from his immediate superior during such employment that his conduct was satisfactory. The candidate must also produce evidence that his knowledge of the native language is such as to qualify him for employment as a District Engineer.

2. All applications from intending candidates shall be submitted in sealed and registered covers, addressed to Chairman, District Board, Muzaffarpur, and superscribed "Application of appointment of District Engineer." Each application must be accompanied by all the necessary certificates and testimonials required by the preceding rules, together with a suitable envelope addressed and sufficiently stamped for registration in which they can be returned in the event of the application being unsuccessful.

3. Applications will be received by the undersigned up to the evening of the 4th April 1908.

H. C. WOODMAN,
Chairman, District Board, Muzaffarpur.

Muzaffarpur, the 10th March 1908. (308—3)

WANTED for one year and-a-half to two years the following hands:—

Surveyor and Leveller	...	„	80 ditto.
Ditto ditto	..	„	40 ditto.
Estimator ...	...	„	50 ditto.
Draftsman ...	...	„	50 ditto.

Applications will be received by the District Engineer, Muzaffarpur, up to 1st April 1908.

(311—2)

Notice.

WANTED a District Engineer for the District Board of Backergunge. The salary of the appointment will ordinarily be Rs. 600 rising to Rs. 800 by annual increments of Rs. 25, but the District Board is prepared to take into consideration the amount of salary drawn by the successful applicant in his present employment if higher than the minimum.

A candidate must be qualified in one of the manners following:—

(*a*) be now or have previously been a member of the permanent establishment of the Public Works Department in the grade of Executive or Assistant Engineer or Sub-Engineer or Supervisor; or

(*b*) hold the degree of B.E. or L.E. of the Calcutta University, or have passed the final examination of the Engineering Department of the Sibpur, Roorkee, Madras or Poona Engineering College; or

(*c*) have served an apprenticeship of not less than three years in the United Kingdom with some recognised firm of Engineers of high standing; or

(*d*) have passed satisfactorily through the whole course of instruction at a recognised School of Engineering in the said Kingdom. In all cases he must in addition have held charge of important works for not less than five years and must produce a certificate from his immediate superior during such employment that his conduct was satisfactory.

The applications, which will be received up to the 30th proximo, must be accompanied by original testimonials, including certificates of physical fitness for outdoor duties and ability to ride, signed by a Civil Surgeon and a District Magistrate, respectively, and evidence of such knowledge of the vernacular language as to qualify him for employment as District Engineer. Applicants should state their age. Preference will be given to candidates having a knowledge of the utilization and improvement of canals or navigable waterways.

The applications should be submitted in sealed and registered covers addressed to the Chairman and superscribed "Application for appointment of District Engineer," and should be accompanied by a suitable envelope addressed and sufficiently stamped for registration for return of the testimonials.

R. B. HUGHES-BULLER,
Chairman, District Board, Backergunge.

NOTICE.

THE next annual stock-taking of the Indian Law Reports kept at the Bengal Secretariat Book Depôt will commence on the 1st April, 1908. The public are hereby informed that all issues of the said Reports from the said Depôt to subscribers and officials will be suspended during that month.

F. G. WIGLEY,

Secy. to the Bengal Council, and Asst. Secy. to the Govt. of Bengal, Legislative Dept.

LEGISLATIVE DEPT.;
BOOK DEPÔT BRANCH,
The 18th December, 1907.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge, Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

PRICES.

THE terms of subscription, and the terms on which current issues and back numbers are sold, are as follows:—

	Without postage.	With Indian postage.	With Foreign postage.
	Rs. A. P.	Rs. A. P.	Rs. A. P.

PART IVA.

Proceedings of the Bengal Legislative Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met in the Council Chamber on Saturday, the 21st March, 1908, at 11 A.M.

Present:

The Hon'ble SIR ANDREW FRASER, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. F. A. SLACKE, C.S.I.
The Hon'ble MR. W. C. MACPHERSON, C.S.I.
The Hon'ble MR. P. O'KINEALY, Advocate-General of Bengal.
The Hon'ble MR. E. W. COLLIN.
The Hon'ble MR. E. A. GAIT, C.I.E.
The Hon'ble MR. W. A. INGLIS.
The Hon'ble MR. H. C. STREATFEILD.
The Hon'ble MR. C. E. A. W. OLDHAM.
The Hon'ble MR. G. GORDON.
The Hon'ble SIR CHARLES ALLEN, KT.
The Hon'ble BABU JOGENDRA CHANDRA GHOSE, M.A., B.L.
The Hon'ble IHTISHAM-UL-MULK RAIS-UD-DOWLA AMIR-UL-OMRAH NAWAB ASEF KUDR SYUD WASIF ALI MEERZA KHAN BAHADUR MAHABUT JUNG, NAWAB BAHADUR OF MURSHIDABAD.
The Hon'ble BABU KALI PADA GHOSH, M.A., B.L.
The Hon'ble MR. G. H. SUTHERLAND.
The Hon'ble RAI KISHORI LAL GOSWAMI BAHADUR, M.A., B.L.
The Hon'ble MAHARAJA-DHIRAJ BIJAY CHAND MAHTAB BAHADUR OF BURDWAN.
The Hon'ble BABU GAJADHAR PRASAD.
The Hon'ble BABU DEBA PRASAD SARBADHIKARI, M.A., B.L.
The Hon'ble MR. F. A. LAIMOUR.

QUESTIONS AND ANSWERS.

COMMENTS IN THE PRESS WITH REFERENCE TO CRITICISMS OF THE POLICE IN JUDGMENTS OF THE COURTS.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked :—

(*a*) Has the attention of the Government been called to comments in the Press, regarding its recent correspondence with the High Court about criticism on the conduct of the Police in judgments, to the following effect :—

"If the Police are entitled to complain of vague remarks about their conduct, the Sessions Judges have the right to resent vague imputations regarding their methods of administering justice; and, if wrong has been done by Judicial Officers, warranting a change of procedure, the facts and cases which in the opinion of the Government necessitated such a change should be published?"

(*b*) Will the Government be pleased to publish such facts and cases in this connection as may be in its possession, if it has no objection to do so?

The Hon'ble MR. STREATFEILD replied :—

"The comments in the Press regarding the recent correspondence between this Government and the High Court about criticisms of the Police in judgments of the Courts, which are abstracted by the Hon'ble Member, proceeded entirely on misapprehension. The Hon'ble Judges of the High Court have access to every decision of the Courts subordinate to them, and are well aware of the nature of the criticisms made by the Courts. The Lieutenant-Governor has placed before him for his perusal every criticism on the Police made by any Court in the Province. The correspondence therefore dealt with matters well known to the Government and to the Hon'ble Judges. Under these circumstances, there was nothing vague in the remarks contained in the correspondence.

"In the second place, it is an absolute misapprehension to suppose that the change of procedure proposed by this Government to the Hon'ble Judges was based on any 'wrong done by Judicial officers.' Although the whole subject of criticisms of the Police by Judicial Officers was considered in the letter from this Government, the proposals to change the procedure were based primarily, if not exclusively, on a desire to have the criticisms of the Courts more effectively dealt with. If the Hon'ble Member has himself perused the correspondence, he will have seen that the interpretation of it by that section of the Press to which he refers is entirely misleading.

"The Government does not propose to publish any 'facts or cases'; because it is manifestly undesirable and inexpedient for the Government to publish any particular case in which it may think a Judge has erred in his criticism. It is also entirely unnecessary; both because the Hon'ble Judges of the High Court know such cases as well as the Government, and also because such cases are not the basis of the proposed change in procedure."

DAMODAR RIVER DAM.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked :—

(*a*) Have not the inhabitants of villages on the east and west sides of the river Damodar, in the neighbourhood of what is known as the Begua Hana, submitted a memorial to His Honour the Lieutenant-Governor of Bengal, praying that an anicut spur dam or some similar contrivance may be constructed at Begua so as to distribute the waters of the Damodar, and that the obstructions at Harish Chak and other places mentioned in the memorial be removed so that the water may be at once carried off without the overflow which disastrously affects the whole of the district every year?

(*b*) Is any definite scheme for improvement of the tract in question under the consideration of the Government, and, if so, will the Government be pleased to publish it on an early date, so that the people affected may submit their representations in time ?

(*c*) Pending the undertaking of the scheme to be finally approved and decided on, will the Government be pleased to direct such tentative measure to be taken as may minimise the evils complained of during the ensuing rainy season ?

The Hon'ble MR. INGLIS replied :—

"A memorial was received and a reply was sent last November to the effect that a definite scheme for the improvement of the tract is under the consideration of Government.

"The scheme, to which the Lieutenant-Governor has accorded administrative approval, and which it is intended to carry out at the cost of the general revenue, is the following :—It is proposed to make an earthen embankment or dam across the head of the Begua Channel where it leaves the Damodar river and to provide for the escape of the flood-water by means of two long over-flows or weirs at the level of the natural bank, which will be paved with rubble stone or concrete blocks. The object aimed at is to retain the low water flow in the old channel of the Damodar while permitting the flood-water, which is far in excess of what the channel of the river can accommodate, to spill over the bank without cutting a deep channel.

"The only possible means of relieving the country between the Damodar and the Rupnarain of flood-water is the construction of reservoirs in the upper channels of the river. This problem has been investigated more than once and it has been ascertained that the cost would be prohibitive. Moreover, a large part of the country derives benefit from the inundation. The scheme which has been approved will be carried out as soon as funds can be made available. It is not practicable to make any temporary works which would be of service."

TESTING OF COUNTRY MANUFACTURES.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked :—

(*a*) Has any provision been made in any Government Institution in Bengal for undertaking and teaching the testing of country manufactures, such as steel, iron and cement ?

(*b*) If no such provision has been made, does not the Government consider that early provision should be made, having regard to the fact that attempts to develop such manufactures in this country can be undertaken only under the greatest handicap, they being in direct competition with similar articles imported from abroad, supported by test-certificates acceptable to Government and private Engineers ?

(*c*) Having regard to the recent development of the Tata Iron Works scheme and other similar works on a smaller scale, does not the Government consider that Government patronage of iron and steel produced in the country for bridge-building and other forms of constructional engineering is possible and desirable ; and, if so, does not the Government consider that arrangements for testing mentioned in (*a*) and (*b*) above should and might with advantage be provided ?

(*d*) Is it not a fact that the Government has already at its command the necessary machinery and appliances and all that is necessary to open a proper testing class is an appropriate staff ; and, if so, will the Government be pleased to consider the desirability of appointing such a staff ?

The Hon'ble MR. STREATFEILD replied :—

"(*a*) The importance of providing locally for the testing of country manufactures such as steel, iron and cement is recognized by the Government, and proposals in this direction have received and are receiving careful consideration, but no scheme has yet been sanctioned.

"(*b*) & (*c*) It is impossible to reply to these questions without entering on a discussion of complicated and contentious subjects, such as are beyond the scope of a reply to a question in Council.

"(*d*) It is a fact that certain machinery and appliances for testing are available at the Sibpur College. The opening of classes at the College has been postponed, pending the consideration by the Government of India of another scheme."

CLASSES IN INDUSTRIAL CHEMISTRY IN THE SIBPUR COLLEGE.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked :—

Will the Government be pleased to state when the proposed classes in Industrial Chemistry at the Sibpur College, mentioned in the last annual report of the Director of Public Instruction, are likely to be started ?

The Hon'ble MR. STREATFEILD replied :—

"The question of starting the proposed classes is still the subject of correspondence between this Government and the Government of India."

REMOVAL OF SIBPUR COLLEGE TO RANCHI.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked :—

(*a*) Will it please the Government to state whether it is intended to remove all the classes and departments of the Sibpur Engineering College to Ranchi, and how far the scheme of removal has advanced, and whether the Principal and the Professors of the College have been consulted as to such removal and as to the future site ?

(*b*) If they have been so consulted, will it please the Government to publish their opinions ?

(*c*) If they have not been consulted, will it please the Government to consider the desirability of consulting them ?

(*d*) Has the attention of the Government been drawn to the recent statements in the Press that the Government has been permitted to use public subscriptions in connection with the Ranchi schemes ; and, if so, will it please the Government to state for what schemes the use of public subscriptions has been permitted ?

The Hon'ble MR. STREATFEILD replied :—

"(*a*) It is intended to remove the Sibpur College to Ranchi as a whole, but it is impossible to say at the present stage how every class and department of the existing college will be treated. The removal has been finally sanctioned and a site at Ranchi selected. Plans and estimates are now under preparation. The proposals have throughout been worked out in consultation with the Principal.

"(*b*) & (*c*) It has not been thought necessary to consult individual Professors. The Government does not consider it desirable to call for further opinions on the scheme.

"(*d*) The attention of Government has been drawn to the statements in the Press. A sum exceeding 2½ lakhs of rupees is at present in the hands of Government, which has been contributed from private sources for the construction of hostels in connection with the Model College at Ranchi. It is proposed to expend this sum for the purpose for which it was subscribed. There is no other basis for the statements alluded to."

TECHNICAL INSTRUCTION.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked:—

Does not the Government consider that the development of the Technical Departments of the Sibpur Engineering College is a matter of great economic importance to the country, and will the Government please consider the desirability of maintaining and developing the departments, as near as possible to the trading and industrial centres of the province, in connection with the proposal for the removal of the college proper to Ranchi?

The Hon'ble MR. STREATFEILD replied:—

"The Government is fully alive to the importance of Technical Instruction, whether in connection with the Engineering College or otherwise. The Hon'ble Member may rest assured that the effect which any proposals, with regard to the College, are likely to have on the development of the technical departments is receiving and will receive the most careful consideration."

INDUSTRIAL AND TECHNICAL EDUCATION.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked:—

Will the Government please consider the desirability and possibility of having a separate branch of the Educational Department to deal with the fast-increasing demands and problems of Technical and Industrial Education, which are foreign to the general Educationist, in order to have such education regulated and controlled by qualified experts in the same way as Medical and Agricultural educations are controlled?

The Hon'ble MR. STREATFEILD replied:—

"The importance of Industrial and Technical Education is fully recognized by the Government, and the question, how the development of such education can be assisted, is receiving careful consideration. No decision has, however, yet been arrived at, as to whether the desired objects can best be attained by the creation of a separate branch of the Educational Service or otherwise."

DIVISION OF PATNA COMMISSIONERSHIP.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked:—

Has any representation been received by the Government for the transfer of the office of the Commissioner of Patna to Gaya, on account of its central position, and does the Government propose to take any action on such representation?

The Hon'ble MR. GAIT replied:—

"When public criticism was invited on the proposal to divide the Commissionership of Patna into two, it was suggested by the Bar Association of Gaya and by the Chairman of the Gaya Municipal Board that the capital of the

proposed South Gangetic Division should be transferred from Patna to Gaya. The Government is of opinion that there would be no justification for such a change, which would involve unnecessary expenditure and an unnecessary interference with vested interests."

ENCOURAGEMENT OF INDIAN INDUSTRIES.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI asked :—

(*a*) Has the attention of the Government been called to the speech of Colonel Alexander Jerome Filgate, R. E., Chairman of the Bengal Iron and Steel Company, at its recent ordinary general meeting of the Company, to the following effect :—

"More support from the Government would be acceptable, and this, we think, can and ought to be given, not only without loss to Government but in the interest of both Government and the public. For years past it has been time after time proclaimed that it is the policy of the Government to encourage Indian industries, yet in regard to our industry we find large contracts still placed in Europe which could have been suitably and more cheaply fulfilled at our works."

(*b*) So far as lies in the power of the Government of Bengal, will it please the Government to give directions for the encouragement of industries of the kind mentioned in the above speech ?

The Hon'ble MR. INGLIS replied :—

"The Company has discontinued the manufacture of steel. So long as the Company manufactured steel-joists, a number of joists were taken in Bengal, also in other Provinces throughout India and Burma. Now the chief article purchased from the Company is water-pipes. These are usually purchased from the Company when such pipes are required. A number were purchased for water-mains for the Calcutta Maidan recently."

LEAVE RULES OF SUBORDINATE JUDICIAL SERVICE.

The Hon'ble RAI KISHORI LAL GOSWAMI BAHADUR said :—

Under the present Civil Leave and Pension Code, Subordinate Judicial Officers do not get any privilege leave on full pay and they cannot affix or prefix the same to an annual vacation, whereas Executive Officers and District Judges get one month's privilege leave on full pay after eleven months' active service and they can prefix or affix the same to an annual vacation. Having regard to the fact that the Executive Officers and District Judges enjoy the last Saturday of every month as a holiday, which fully compensates for the shorter Dusserah vacation for such officers, will the Government be pleased to consider the advisability of modifying the leave rules applicable to the Subordinate Judicial Officers so as to place them and the Executive Officers and District Judges on the same footing as regards the rules relating to privilege leave ?

The Hon'ble MR. STREATFEILD replied :—

"This matter was considered in 1906, when it was decided by the Government of India that the existing rules should not be altered. The Lieutenant-Governor is not prepared to re-open the question at present."

PENSIONABLE SERVICE IN SUBORDINATE JUDICIAL SERVICE.

The Hon'ble RAI KISHORI LAL GOSWAMI BAHADUR said :—

In reply to a question of the Hon'ble Babu Jogendra Chandra Ghose asked last year, the then Judicial Secretary of the Bengal Government was pleased to say: "that the proposal that Munsiffs should be permitted to count the broken periods spent by them in officiating appointments before confirmation as pensionable service is still under consideration with reference to the rules which regulate admission to the Subordinate Judicial Service." Will the Government be pleased to say what decision has been arrived at in regard to that matter?

The Hon'ble MR. STREATFEILD replied:—

"The question referred to is still under the consideration of the Government of India."

COMPULSORY RETIREMENT IN SUBORDINATE JUDICIAL SERVICE.

The Hon'ble RAI KISHORI LAL GOSWAMI BAHADUR said :—

Having regard to the fact that the age for compulsory retirement applicable to the Hon'ble Judges of the High Court is 60 years, will the Government be pleased to consider the desirability of extending the age of compulsory retirement in the cases of Subordinate Judicial Officers who will be deemed upon medical examination and otherwise to be fit for good and active Judicial work on completion of the age of 55?

The Hon'ble MR. STREATFEILD replied :—

"The Government is unable to accept the proposal that the members of the Subordinate Judicial Service should be exempted from the ordinary rules regarding superannuation; since judicial work is as hard as any other and officers who have served their time in the judicial line are not physically younger than those of other departments. It need hardly be added that in accordance with the ordinary rules no Munsif is compulsorily retired before 60, if he is still found up to his work."

CREATION OF A SEPARATE JUDGESHIP AT KHULNA.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked :—

Will the Government be pleased to say whether it has come to any decision in the matter of the appointment of a District Judge for Khulna in the near future?

The Hon'ble MR. STREATFEILD replied :—

"The question of creating a separate Judgeship for the district of Khulna has been referred to the Government of India."

SILTING OF THE ALAIPUR KHAL.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked :—

Will the Government be pleased to say whether any and, if so, what steps are being taken to prevent the silting up of the Alaipur Khal and to keep it navigable throughout the year?

The Hon'ble MR. INGLIS replied :—

"The only measure which would prevent the deposit of silt in this *khal* would be to convert it into a still-water canal by the construction of locks and weirs. The traffic which makes use of the *khal* is not sufficient to warrant the expense of this measure. An inquiry is now being held to ascertain if the local traffic can afford to pay a toll which will suffice to meet the cost of dredging plant by the use of which the silting could be kept in check."

JESSORE DRAINAGE SCHEME.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked :—

Will the Government be pleased to say in what stage is the Jessore drainage scheme, and when it is likely to be taken up ?

The Hon'ble MR. OLDHAM replied :—

"In this question the Hon'ble Member is understood to refer to the Jessore town drainage scheme. This scheme is being prepared by the Assistant Sanitary Engineer: it is reported to be about half finished. When completed, it will have to be formally considered by the Municipal Commissioners in meeting; and if they accept it, they will have to arrange the ways and means for carrying it out. Government is not in a position, therefore, to say when the scheme will be actually taken in hand."

IMPROVEMENT OF THE BHAIRUB RIVER.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked :—

Will the Government be pleased to state why the sum of Rs. 75,000, budgetted in 1906 for the Bhairub Valley Drainage scheme, was omitted from the budget of 1907 ? Will the Government be pleased to make some provision in the budget of this year for that scheme ?

The Hon'ble MR. OLDHAM replied :—

"The scheme for which Rs. 75,000 was provided in the Budget for 1906 07 was one for the improvement of the Bhairab River as a navigable channel. It would have had no effect on the stream as a drainage channel. When the navigation project was fully investigated, it was found that the cost would be out of proportion to the benefit, and it was decided that it should not be proceeded with.

"A scheme for draining a number of *bhils* in the neighbourhood of Jessore, by means of cuts which will discharge into the Bhairab, is at present under the consideration of the District Board and of the Drainage Commissioners. This scheme has not yet reached the stage at which it is desirable to provide in the Budget for any grant-in-aid from Provincial Revenues."

DRINKING WATER IN RURAL AREAS.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked :—

Will the Government be pleased to state what steps have been taken for supplying good drinking-water, and how many tanks have been excavated for the purpose, during the last five years, at the cost or with the help of the District Boards or the Government, in each of the districts of Jessore, Krishnagar, Khulna and Murshidabad ?

The Hon'ble MR. OLDHAM, replied:—

"From the Reports on the working of the District Boards it appears that the following sums have been spent on Water-supply (original works), during each of the past five years, in the four districts referred to by the Hon'ble Member:—

District.	1902-03.	1903-04.	1904-05.	1905-06.	1906-07.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Nadia	1,501	3,630	2,945	9,511	11,011	28,598
Murshidabad ...	868	648	504	567	1,198	3,785
Jessore ...	3,757	5,563	1,981	6,250	15,500	33,051
Khulna	69	1,389	5,198	9,410	16,977	33,043

Government is not in possession of information as to how many tanks for the supply of good drinking water have been excavated during each of these years.

"The Hon'ble Member's attention is also invited to Mr. Shirres' Circular No. 12T.-M., dated the 20th May, 1904, regarding the supply of drinking water in rural areas. In accordance with the terms of this Circular, the following grants were made by Government during the year 1904-05 to the four districts named:—

	Rs.
Nadia	10,000
Murshidabad	1,884
Jessore	10,000
Khulna	7,300

Since the year 1905-06, Government has been making an annual grant to the District Boards of an amount equal to one-fourth of their income from the Road Cess, in augmentation of their resources, in order to enable them to meet the growing demands on their funds. In view of this large contribution, which amounts to Rs. 9,00,000 *per annum*, separate grants under Mr. Shirres' Circular have been discontinued, with the exception of one or two special grants, including one of Rs. 5,000 given to the Nadia District Board in 1907-08 for the provision of pure water-supply."

GRANTS BY GOVERNMENT TO DISTRICT BOARDS FOR IMPROVEMENT OF WATER SUPPLY.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked:—

Is the Government aware that the funds at the disposal of the District Boards are quite insufficient to make adequate provision for supplying good drinking-water to the people, which is primarily responsible for the prevalence of diseases like cholera and malaria? Will the Government be pleased to make adequate grants for the purpose?

Will the Government be pleased to take steps for systematically having at least five good tanks every year in the districts of the Presidency Division in the first instance, in co-operation with the District Boards and the people, the inhabitants of the village in which the tank may be excavated being required to pay one-third of the cost and to give the land required free of charge?

The Hon'ble MR. OLDHAM replied:—

"From the answer to Question No. V asked by the Hon'ble Member it will be seen that Government has already recognized that the funds at the disposal of District Boards are not sufficient and that it has been making very large grants to augment those resources. It now rests with the District Boards to devote a portion of these grants to the supply of good drinking water for the people. The District Boards concerned should, therefore, take necessary action in the matter with the co-operation, if necessary, of the people. In the Bill to amend the Bengal Local Self-Government Act, it is proposed to insert provisions enabling Union Committees to incur expenditure on the improvement of water-supply, and to realize a portion of the cost of such measures by permissive local taxation."

AGRICULTURAL EXPERIMENTS.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked:—

Is the Government aware that, from the results of the agricultural farms established by it, an impression has been produced on the minds of the people that it is difficult to carry on cultivation in large farms on improved methods with profit, and that, in consequence, not one of the students trained by it here, in England or in America have taken to agriculture as a profession? Will the Government be pleased to publish a statement showing that some of its farms at least are profitable and not losing concerns? If there are no such farms, will the Government be pleased to direct the Agricultural Department to establish one or two farms on business lines, giving profitable returns for the outlay of money and labour necessary for them?

The Hon'ble MR. GAIT replied:—

"Agricultural experiment stations are established, not with the object of making a profit, but, in order to acquire knowledge regarding the best methods of cultivation and manuring of existing varieties of grain, etc., to improve the quality of these varieties by selection and otherwise, and to ascertain what crops grown elsewhere can be cultivated successfully in the locality where the station is situated. Such work necessitates the employment of highly paid officers and involves much larger expenditure than would be incurred by ordinary agriculturists.

"It can hardly be necessary for Government to prove that agriculture is a profitable profession; and it does not seem necessary for Government to establish farms with a view to working them at a profit. The interesting experiment which is being made by private individuals at Deoghur will, however, be watched by the Agricultural Department with interest."

RESOURCES OF DISTRICT BOARDS.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE said:—

The Government is aware that the District Boards have at present got practically no means at their disposal to fulfil in any useful measure the duties imposed on them, and His Honour the Lieutenant-Governor has expressed his sympathy with them and his desire to help them. Will the Government be pleased to say what measures are being taken for the purpose?

The Hon'ble MR. OLDHAM replied:—

"As will be seen from the answers to Questions V and VI, Government has recognized the inadequacy of the resources of District Boards. During each of the three years, 1901-02 to 1903-04, a grant of five lakhs was made, and since 1905-06 an annual grant of nine lakhs has been made with a view to increase their resources."

EDUCATIONAL SERVICE.

The Hon'ble BABU KALI PADA GHOSH asked:—

(*a*) Will the Government be pleased to state whether it is a fact that all appointments of Inspectors of Schools in the Province will henceforth be reserved for Europeans, and that no Indian officer will be eligible for such appointments?

(*b*) If the Government has such a scheme in contemplation, will it be pleased to state the grounds for excluding Indian officers from such appointments?

The Hon'ble MR. STREATFEILD replied :—

"When the sanctioned Inspecting staff is complete, there will be six Divisional Inspectors of Schools, and six additional Inspectors in this Province. The former will usually be Officers in the Indian Educational Service, the latter will always be Officers in the Provincial Educational Service. The Indian Educational Service is, no doubt at present, practically recruited as a European service; but otherwise there is no intention of reserving all or any of these posts for European officers."

HEAD MASTERS OF GOVERNMENT SCHOOLS.

The Hon'ble BABU KALI PADA GHOSE asked :—

Is it a fact that the appointments of Head Masters of all Government Schools in the Divisional head-quarters will henceforth be exclusively reserved for Europeans? If so, will the Government be pleased to state the grounds for excluding Indians from such appointments?

The Hon'ble MR. STREATFEILD replied :—

"The whole question of the improvement of Secondary Schools is at present receiving the consideration of Government. Among other proposals which have been made in this behalf is one for the appointment of officers of the Indian Educational Service to be Head Masters of a few selected High Schools. No final decision has yet been arrived at on this point. The object of the proposal, however, is not to replace Indian Head Masters by Europeans, but to secure for these High Schools the services of highly qualified officers of the Superior Service as their Head Masters."

DISPOSAL OF FEES AND FINES COLLECTED UNDER THE PURI LODGING-HOUSE ACT, 1871 (BEN. ACT IV OF 1871).

The Hon'ble BABU KALI PADA GHOSH said :—

The Municipality of Puri being primarily responsible for the sanitary improvement of the town, will the Government be pleased to take into consideration the desirability of making over to the Municipality the fees and fines collected under the Puri Lodging-house Act (Ben. Act IV of 1871) which are now placed at the disposal of the Magistrate?

The Hon'ble MR. OLDHAM replied :—

"The Act itself and the by-laws issued by Government thereunder provide for the proper disposal of the fees and fines in accordance with the objects of the law. The law does not contemplate that these monies should be made over to the Municipality. The Municipality, however, receives grants from the Lodging-house Fund."

GRIEVANCES OF THE SUBORDINATE MEDICAL SERVICE.

The Hon'ble BABU DEBA PROSAD SARBADHICARI, in the absence of the Hon'ble BABU RADHA CHARAN PAL asked :—

(*a*) Has the attention of the Government been drawn to the two articles in the "Empire" of the 15th February, 1908, on the subject of the grievances of the Subordinate Medical Service?

(*b*) Have the memorials of the Civil Assistant Surgeons been received by the Government? If not, will the Government call for them from the Inspector-General of Civil Hospitals, Bengal, to whom they were addressed, with the opinions of the forwarding officers by whom they were submitted?

(*c*) Is the Government aware that great discontent prevails among the Civil Assistant Surgeons, for reasons stated in their memorials, and that it is intensified by the non-receipt of any acknowledgment from that officer, and that some have already resigned their service on that ground?

(*d*) Will the Government be pleased to take these humble memorials into its favourable consideration and remove their just grievances, which stand in the way of getting efficient medical men, whose services are indispensably required for the improvement of the public health and the saving of individual lives in the muffassal?

The Hon'ble MR. OLDHAM replied :—

"(*a*) The attention of Government had not previously been drawn to the articles in question.

"(*b*) The memorials referred to have not yet been received by Government. The Inspector-General of Civil Hospitals reports that up to date he has received memorials from 59 Assistant Surgeons: he is now considering the representations of the memorialists and he will submit his recommendations to Government in due course.

"(*c*) The fact that so many memorials have been submitted shows *prima facie* that dissatisfaction exists. The Inspector-General of Civil Hospitals reports, however, that the allegation contained in the latter portion of this question is without foundation.

"(*d*) The memorials, with the Inspector-General of Civil Hospitals' remarks and recommendations, will certainly receive full consideration at the hands of Government."

BERAI CANAL PROJECT.

The Hon'ble BABU DEBA PRASAD SARBADHICARI in the absence of the Hon'ble BABU RADHA CHARAN PAL asked :—

(*a*) Is it a fact that a memorial, signed by the residents of fifty-five villages in the district of Bankura, was submitted to His Honour the Lieutenant-Governor, praying for the construction of a canal from the river Berai for agricultural purposes?

(*b*) Is it a fact that the memorialists offered to pay for the supply of water to their fields at a rate varying from annas 4 to annas 12 per bigha?

(*c*) Is it a fact that the Secretary to the Government of Bengal, Irrigation Department, has asked the petitioners to furnish him with particulars as to the river referred to and the sketch map showing where the canal is wanted, and to show that the levels of the land are such as to admit of the canal being constructed, and whether such information has been given so far as the petitioners, who are poor men, could give it?

(*d*) If the information as supplied is not deemed sufficient, will the Government be pleased to order a survey of the land to ascertain the level, etc., at the cost of the Government, for the benefit of the villages?

(*e*) Having regard to the frequent failure of crops in the villages referred to, due to the failure of rain and consequent distress of the people, will the Government be pleased to sanction the canal when the people are willing to pay for the benefit received?

The Hon'ble MR. INGLIS replied :—

"The facts recited in clauses (*a*), (*b*) and (*c*) of the question are correct.

"In the year 1901, the late Mr. Maconchy, Superintending Engineer, made a preliminary inquiry to ascertain if a Canal from the Berai River could be recommended as a protective work. The conclusions he came to, which were accepted by Government, were—1st, that the catchment of the stream is so small that in a season of drought the supply of water would either fail altogether or would be so small as to be of very little use; and 2nd, that there was no prospect whatever of the canal being remunerative to Government. The scheme was therefore regarded as impracticable.

"It was estimated that a detailed survey would cost Rs. 4,600. There is no justification for an expenditure of this amount from the General Revenues on work which would be of no practical use. It will, however, be arranged to have observations made of the flow of water in the stream to ascertain definitely what area could be irrigated at a time of drought. On the present information it would appear that a channel made by the land owners themselves, similar to the *pyns* of which there are so many in the Gaya district, would be more suitable than a Government Canal".

TOLLY'S NALA AND RICE TRADE.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI, in the absence of the Hon'ble BABU RADHA CHARAN PAL, asked:—

(*a*) Will the Government be pleased to state whether a portion of the Tolly's Nala below the Boat Canal and *Kumrapukur* khal has practically been silted up and the trade in rice has thereby been seriously affected? If so, will it kindly state what steps have been proposed to be taken to render it navigable, and when they are likely to be taken?

(*b*) Has the attention of the Government been drawn to the great inconvenience of the inhabitants and traders of Chetla and Shahanagore from the absence of a cart bridge over the Tolly's Nala between the Kalighat and Tollyganj bridges, which are situated at a distance of $1\frac{3}{4}$ mile from each other? Is it not a fact that the proposal for the erection of the said bridge has been unanimously approved of by the Calcutta Corporation, and that the said Corporation has expressed its willingness to contribute Rs. 20,000 towards the cost of construction of the said bridge? If so, will the Government be pleased to state whether it will kindly sanction the construction of the said bridge?

The Hon'ble MR. INGLIS replied:—

"(*a*) The present state of Tolly's Nala is much the same as that which must have always prevailed. Owing to the meeting of the tidal streams, silting is inevitable. The only possible remedy is to convert the channel into a canal with locks and sluices. This question has been investigated more than once, but so far with a negative result, as the expense of the works required would be out of proportion to the benefit.

"(*b*) In November, 1906, a Member of the Calcutta Corporation solicited the construction of an additional bridge over Tolly's Nala in the vicinity of the Chetla rice market. The Commissioner of Police, who was consulted, was of opinion that the bridge, if made, would benefit comparatively few people. The inquiries of the Public Works Officers also indicated that there was no general demand or need for the bridge. The Chairman of the Corporation, however, intimated in June, 1907, that the Corporation were of opinion that the bridge would be useful, and that they would contribute Rs. 20,000 towards the cost. The Chairman was informed, in a letter dated 20th June, 1907, that the offer could not be accepted, and that a contribution of at least Rs. 50,000 would be necessary, as the bridge with approaches would cost not less than Rs. 80,000 and probably as much as Rs. 1,00,000 or more, as on the east side of the Nala a new approach road would be necessary. A reply to this letter is awaited."

COURT INSPECTORS IN THE CALCUTTA POLICE COURT.

The Hon'ble BABU DEBA PRASAD SARBADHIKARI, in the absence of the Hon'ble BABU RADHA CHARAN PAL, asked:—

Will the Government be pleased to state:—

(*a*) On what terms the present Court Inspectors are empowered to conduct the prosecution of Police cases?

(*b*) What is the nature of the cases that they have been empowered to conduct?

(*c*) Have the general or special powers of the Criminal Procedure Code, contemplated in section 495, sub-section (*1*), been conferred upon them? Has the fact been gazetted; and, if so, when and where? If not, is their appointment legally tenable?

(*d*) Whether the opinion of the Advocate-General was taken as to the applicability of section 495, sub-section (*1*), in this behalf in the Presidency Town of Calcutta? If not, will the Government be pleased to take it now?

(*e*) Whether, in view of the separate function of the Judicial and Executive in the Presidency Town of Calcutta, the Government will be pleased to abolish the said post of Court Inspector in the Calcutta Police Court, and consider the advisability of appointing an Assistant Government Prosecutor from among the practising pleaders of the Court, for the purpose of conducting the prosecution of Police cases which the Government Prosecutor could not attend to?

The Hon'ble MR. STREATFEILD replied:—

"(*a*) The present Court Inspectors are appointed to be Public Prosecutors under section 492 (*1*) of the Code of Criminal Procedure.

"(*b*) Their duty is to conduct the prosecution of cases in which professional advice and assistance are not required.

"(*c*) and (*d*) The provisions of section 495 (*i*) of the Code of Criminal Procedure do not apply to these officers.

"(*e*) The Government does not propose to make the change suggested in clause (*e*) of the question. There is no reason to suppose that it would tend either to efficiency or to economy."

CRIMINAL COURTS SITTING AT NIGHT.

The Hon'ble BABU GAJADHAR PRASAD asked:—

Whether, in view of the great inconvenience felt by the litigants and the lawyers owing to the fact that some Criminal Courts hold their sittings even at night, the Government will be pleased to consider the desirability of fixing the hours during which such Courts should be held?

The Hon'ble MR. STREATFEILD replied:—

"There is no doubt that late sittings are held in certain Courts and on certain occasions owing to press of work or other causes, but the Government has no reason to believe that such late sittings are more frequent than is necessary for the punctual despatch of business, or that they cause serious inconvenience. The Government deprecates late sittings, but it is not practicable to limit the discretion of judicial officers to prolong their sittings if this is required by the work on hand."

THE SAMBALPUR (EVIDENCE) BILL, 1908.

The Hon'ble MR. STREATFEILD presented the Report of the Select Committee on the Bill to repeal the Central Provinces Laws Act, 1879, so far as it applies to the district of Sambalpur.

THE BENGAL FINANCIAL STATEMENT FOR 1908-09.

The Hon'ble MR. OLDHAM laid on the table the Bengal Financial Statement for 1908-09, with explanatory notes. He said:—

"SIR, I beg to lay on the table the Financial Statement with the usual appendices and accounts; and in doing so to make a few remarks of a general

nature in explanation of our position. The Statement has been prepared on the same lines as previous statements. There are only two innovations to which attention may be drawn. The first is that, in accordance with the decision of the Government of India, local finance will in future be wholly separated from the general accounts. The head 'Contributions from Provincial to Local,' therefore, disappears, and the grants to Local will, with effect from next year, be shown under the several service heads concerned. The second is that, under the instructions of the Government of India, a statement showing the receipts and expenditure of District Boards and District Road Committees has been added as an Appendix to the Financial Statement.

"It has been the good fortune of some of my predecessors in office to lay prosperity budgets before this Council: it has fallen to my lot on this occasion to present the budget when there is, unfortunately, no surplus to distribute among the several Departments eager to press schemes of administrative reform.

"There are two principal causes for the present financial position—(1) the gradual depletion of the previous large balances, which has been due chiefly to largely increased expenditure on Public Works, and (2) the unprecedentedly high prices of food-grains that have ranged all over the country during the past two years, which do not show any present signs of falling.

"Excluding the special grant of 50 lakhs for the Calcutta Improvement Scheme, made in the year 1903-04, which is of the nature of a trust and cannot be utilized for any other purpose, the closing balances during the past six years have been—

	Rs.
in 1901-02	49,05,782
„ 1902-03	55,29,421
„ 1903-04	92,52,919
„ 1904-05	80,00,101
„ 1905-06	62,61,898
„ 1906-07	43,84,443

Taking the revised estimate, the closing balance at the end of the current year will be Rs. 21,32,000, and according to the budget now placed on the table the balance at the close of 1908-09 will be reduced to Rs. 13,90,000, or about fifteen and-a-half lakhs if we add Rs. 1,56,000, being the Provincial expenditure on distress next year, as we are allowed to do under the existing arrangement with the Government of India. The large increase in the year 1903-04 was due to a particular cause, *viz.*, the grant from Imperial Revenues of a special allotment of 50 lakhs to start the new Provincial Settlement then under consideration. These large surplus balances were chiefly absorbed in Public Works expenditure. The charges on account of Civil Works in charge of the Public Works Department amounted in 1901-02 to Rs. 43,71,000, in 1902-03 to Rs. 55,69,000, in 1903-04 to Rs. 74,39,000, in 1904-05 to Rs. 58,38,000, in 1905-06 to Rs. 62,79,000, in 1906-07 to Rs. 66,93,000 and in 1907-08, according to the revised estimate, they will amount to Rs. 71,04,000. The Public Works expenditure during the last five years has, therefore, been enormously in excess of that of previous years. For the purposes of the present Provincial Settlement, the charges on this account were taken at about 40 lakhs only. The result of the increased activity in this direction, moreover, has been that there are many large projects still in hand and uncompleted, and for which provision has had to be made during the current, and will still have to be made during the ensuing, year; and though we have been compelled to restrict such expenditure next year, we have not been able, looking to the many necessary schemes already in hand to place the estimated outlay below Rs. 55,71,000. As an example of the development of Public Works operations, I may mention that during the past five years the expenditure on Jails, Police and Medical buildings in Calcutta alone has been Rs. 50,90,000.

"During the same period, the ordinary demands of the Administration have been steadily increasing from year to year in all Departments, in some in

accordance with normal expansion, and in others to an abnormal extent, as, for instance, in the case of the Departments of Police and Education. The charges on account of the Police Department have increased from Rs. 48,80,000 in 1902 03 to Rs. 74,37,000 in 1907-08, and the budget for next year stands at Rs. 77,63,000. The larger part, no doubt, of this increased expenditure has been borne by liberal grants from the Imperial Government; still a considerable portion of it has fallen, and must continue to fall in the future, upon Provincial Revenues.

"In the case of the Education Department the outlay from Provincial Funds has steadily risen from 26 lakhs in 1902-03 to 42½ lakhs in the revised estimate for the current year. Part of this increase also has been borne by the Imperial Government. The numerous schemes of reform and improvement that have been undertaken or are in contemplation in connexion with this Department will, moreover, call for a continually increasing expenditure. The demands during recent years for the development of Technical Education have also led to an increase under this head. In the budget for next year, Technical Education in all its branches accounts for an aggregate provision of more than six lakhs.

"Under Medical, the charges have increased from Rs. 17,15,000 in 1902-03 to Rs. 22,64,000 in the revised estimate for the current year. The estimate for next year is very much higher, for a special reason which I shall explain presently.

"Though Bengal, we are thankful to say, has not suffered so severely from the effects of deficient harvests as other parts of India, or as it has suffered on previous occasions, some provision has had to be made for direct expenditure on Relief Measures. The charges on this account during the current year have been estimated at Rs. 6,12,0 0, which will, under the existing arrangement with the Government of India, be borne by Imperial Revenues. Next year, however, it is estimated that besides the sum chargeable to Imperial (Rs. 8,44,000), Rs. 1,56,000 will have to be spent on this account from Provincial Funds. Besides this direct expenditure on relief, a sum of Rs. 20,00,000 has been given out in loans under the Agriculturists' Loans Act during the current year, and it is estimated that about the same amount will be advanced during 1908-09.

"While, however, the high prices do not affect so adversely the agricultural population, they cause much suffering among the people who are dependent on small fixed incomes and the low-salaried ministerial officers and menial servants. It was with a view to alleviating the distress among these latter classes, that Government took upon itself to grant compensation for dearness of provisions to all menials and ministerial officers drawing pay of Rs. 30 and less *per mensem*. The charges on this account during the current year are estimated at more than 9½ lakhs; and 8½ lakhs have been provided on this account for 1908 09. The effect of high prices has also been felt in other directions, as, for instance, in raising the cost of feeding the prisoners in our jails It is in consequence of this unforeseen expenditure that the closing balance of the current year has fallen so low, and the closing balance for next year has been reduced below the minimum.

"Under the terms of our settlement with the Government of India, we must keep a minimum working balance of 20 lakhs; and although the estimates for next year have been passed by the Imperial Government, we shall have to take steps as soon as may be possible to make up the deficit. This means that we shall not only be precluded from taking into consideration any new projects, but we must also exercise rigid economy till the financial position has much improved.

"In almost every Department there are important projects either ready or under consideration that will involve an increase of expenditure, and numerous requests for additional allotments have had to be reluctantly refused. We have, as far as was practicable in the circumstances explained above, made provision either wholly or partially for the most pressing schemes of reform.

"We have made provision for additional recurring expenditure to the extent of Rs. 2,31,000 under Education, besides special grants of a non-recurring nature amounting to Rs. 77,000.

"Under Agriculture, we have provided for additional recurring expenditure of Rs. 45,000 for Agricultural Experiment Stations and for the improvement of the Silk Industry. We have allotted a sum of one lakh towards the construction of the new Agricultural College at Sabaur, and Rs. 50,000 towards the fittings and furniture thereof.

"A provision of Rs. 1,00,000 has been made for the continuance of the special inquiries into the Fisheries of the Province, with a view to the future development of this important industry.

"Under Ports and Pilotage, a heavy provision of Rs. 5,87,000 has had to be made to meet the balance of the cost of the new steam cruiser for the Sandheads and of the stores required for it.

"Large allotments have been made for the extension and improvement of Medical Institutions in Calcutta, to bring them up to date and make them more worthy of the Metropolis of India, *viz.*, Rs. 2,35,000 for the new Surgical Block, Rs. 90,000 for the new 4th Block and Rs. 24,000 for a Cholera Ward at the Medical College; Rs. 97,600 for the double-storied Ward, Campbell Hospital; and Rs. 49,000 for the new Paying Patients' Ward, Presidency General Hospital.

"We have provided for liberal grants-in-aid towards Local Drainage and Water-supply. The principal items under this head are an allotment of Rs. 1,00,000 for sanitary improvement and pure water-supply at Puri; a contribution of Rs. 77,000 towards the cost of the Monghyr Water-works scheme; a contribution of Rs. 75,000 in aid of the scheme for water-supply at Gaya; a grant of Rs. 50,000 to the Patna Municipality towards the cost of installing a third pumping station for flushing the drains; and a provision of Rs. 20,000, as a portion of the grant which Government expects to make towards the Serampore Water-supply scheme.

"As will be seen from the details under Civil Works in charge of the Public Works Department, a considerable sum has been allotted for the improvement of District Civil Courts and Munsifis.

"We have made increased provision under Land Revenue, Excise, Registration, General Administration, Courts of Law, Police and Medical for strengthening and re-organizing, as well as improving the pay and prospects of establishments.

"A provision of Rs. 90,000 has been made under 'Medical' for measures in connexion with Plague. Besides this, however, it will be observed that the Government of India have just made a special large assignment of Rs. 4,50,000 under the same head, for sanitary improvements with special reference to the prevention of plague. We have also provided, under this head, Rs. 30,000 for special measures recommended by the Drainage Committee in connexion with the prevention of fever.

"It will also be noticed that a special assignment of Rs. 4,00,000 has been made by the Government of India, under Police, for additional reforms in accordance with the recommendations of the Police Commission. Sums of two lakhs and one lakh-and-a-quarter, respectively, have been allotted for the purchase of much-needed house accommodation for the Calcutta and Howrah Police.

"It has been decided, with a view to giving the Members of this Council ample time to consider the details of the Financial Statement, that it will not come up for discussion till the 4th April. My colleagues and I hope that the Hon'ble Members will extend to us the same courtesy that has been shown on previous occasions, and give notice within the next six or seven days of any points which they propose to bring forward, that information may be collected, where necessary, to enable us to reply."

THE BENGAL FINANCIAL STATEMENT FOR 1908-1909.

PART I.—General Review.

(1) ACCOUNTS FOR 1906-1907.

IN the revised estimate for 1906-1907, which was laid before the Council on the 23rd March 1907, the receipts of the year were taken at Rs. 5,03,37,000, and the expenditure at Rs. 5,22,71,000. These anticipations have been borne out in a remarkable manner by the actual results. The accounts of the year which have now been closed show that, as compared with the estimates, the receipts were better by Rs. 20,000, and the charges were less by Rs. 36,000 only. There was, however, an increase of Rs. 2,14,000 in the opening balance of the year, caused by the inclusion of the credit and debit balances of the District Post Funds and the Patwari Cess, on their abolition at the close of the year 1905-1906, so that the net result was an improvement of Rs. (2,14,000 + 20,000 + 36,000 =) 2,70,000 in the closing balance, which amounted to Rs. 93,84,000, against Rs. 91,14,000 anticipated when the last Financial Statement was presented.

(2) REVISED ESTIMATE FOR 1907-1908.

2. The budget for 1907-1908, as passed by the Government of India, provided for receipts aggregating Rs. 5,20,28,000 and an expenditure of Rs. 5,36,86,000. The revised estimate now passed provides for a revenue of Rs. 5,21,40,000 and an expenditure of Rs. 5,43,92,000. The net result is a deficit of Rs. 22,52,000, as against Rs. 16,58,000 anticipated last year.

3. On the receipt side the revenue is expected to show an increase of Rs. 1,12,000 which is the net result of improvements under some heads and of decreases under others. Improvements aggregating Rs. 12,02,000 are expected chiefly under the following heads:—Stamps (Rs. 2,25,000) under General Stamps; Excise (Rs. 1,00,000) owing to increase in duty on country liquors; Registration (Rs. 1,50,000) owing chiefly to a larger number of documents being registered in consequence of the high prices of food-grains; Superannuation (Rs. 3,51,000) on account of the sale proceeds of the investments of the Police Superannuation Fund now abolished; Irrigation Major Works (Rs. 1,51,000) owing to the expansion of *rabi* irrigation; Irrigation Minor Works in charge of the Public Works Department (Rs. 1,19,000) chiefly in navigation receipts of the Calcutta and Eastern Canals; and Civil Works in charge of the Public Works Department (Rs. 85,000), chiefly under rent of buildings, &c. On the other hand, the decreases aggregate Rs. 10,90,000. They occurred principally under the following heads:—Land Revenue (Rs. 3,45,000) owing chiefly to suspensions and remissions of revenue due to scarcity; Adjustments between Imperial and Provincial (Rs. 1,01,000) as shown in Appendix A; Jails (Rs. 71,000) due to smaller proceeds from Jail manufactures; Ports and Pilotage (Rs. 90,000); Miscellaneous (Rs. 81,000), chiefly due to the discontinuance of banking fees and fees for audit of accounts of Municipal and other Local Funds; and Contributions (Rs. 2,54,000). The decrease under the last head was due partly to the stoppage of banking fees hitherto charged to District Funds, and partly to the fact that no advance was made for the Magrahat Drainage scheme in the preceding year, so that no refund was recoverable in the present year, as originally estimated.

4. On the expenditure side, the revised estimate shows a net increase of Rs. 7,06,000, which is more than accounted for by the heavy charges incurred in the payment of grain compensation allowance to officers on small pay and on account of the diet of prisoners in Jails and of the sick in hospitals owing to the high prices of food-grains. There are, however, other increases, viz., under Stationery and Printing (Rs. 2,00,000) owing to larger expenditure in the presses; under Miscellaneous (Rs. 1,27,000) for special refunds due to the reduction in the rate of interest on the Howrah and Rajapur Drainage advances from 5 to 4

per cent., with retrospective effect, under Act II of 1902, and to the actual maintenance charges of those works having proved much less than the amount estimated at the time of their capitalization; under Irrigation Major Works (Rs 2,45,000) for larger grants for maintenance and repairs to flood damages; and under Civil Works by the Public Works Department (Rs. 1,04,000) for additional grants made for works urgently required. Against these increases there are decreases of Rs. 53,000 under Forests owing to smaller expenditure under Conservancy and Works; of Rs. 3,20,000 under Interest on Debt—Irrigation Major Works—due to the reduction of the rate of interest under the revised system of calculation and distribution of interest in reference to the average incidence of the charges actually paid in each year; of Rs. 3,93,000 under Civil Works in charge of Civil Officers on account of the appropriation of the reserve under this head to other heads and the failure to utilize certain specific grants for which schemes were not sufficiently matured to admit of expenditure; and of Rs. 1,40,000 under Contributions from Provincial to Local for transfer to other heads.

5. The closing balance of the current year was estimated in March last at Rs. 74,56,000. To this should be added Rs. 2,70,000, the excess of the opening balance over the estimate, and Rs. 1,12,000, by which the receipts of the current year have improved; while Rs. 7,06,000, being the increase of expenditure, must be deducted. In the revised estimate, therefore, the closing balance of the current year is Rs. (74,56,000 + 2,70,000 + 1,12,000— 7,06,000 =) 71,32,000.

(3) BUDGET ESTIMATE, 1908-09.

6. The opening balance for 1908-09 corresponds with the closing balance of the current year, and is, therefore, taken at Rs. 71,32,000.

7. The estimate shows receipts aggregating Rs. 5,42,56,000, an expenditure of Rs. 5,49,98,000 and a closing balance of Rs. 63,90,000.

8. The ordinary Provincial minimum closing balance is Rs. 20,00,000 but in addition to that amount the Government of Bengal must keep the special grant for the improvement of Calcutta untouched, so that under present conditions the minimum closing balance is 20+50=70 lakhs. A provision of Rs. 1,56,000 has been made under the head Famine Relief, and under the orders of the Government of India the prescribed balance may be reduced by that amount. The closing balance now estimated is therefore less than the minimum balance by Rs. 6,10,000—1,56,000=Rs. 4,54,000. This deficit is more than accounted for by the provision for the payment of grain compensation allowance to officers on pay of Rs. 30 and less. The total provision on this account in the budget is about eight and-a-half lakhs. This allowance was not taken into account in the standard of expenditure accepted for the purpose of the Financial Settlement made with this Province.

9. The budget estimate for next year, as passed by the Government of India, provides for receipts aggregating Rs. 5,42,56,000, as stated above. This includes the following special assignments from Imperial Revenues:—

	Rs.
For Police reorganization	12,00,000
On account of Madaripur Bhil route (maintenance) ...	50,000
Ditto (capital) ...	1,69,000
In connection with the Famine Relief scheme	2,60,000
For Technical education	35,000
„ European and Eurasian education	65,000
„ University and Collegiate education	1,60,000
„ Abolition of the Patwari cess in Sambalpur ...	26,000
„ Continuous maintenance of record-of-rights in Orissa ...	59,000
„ Temporary occupation of 2, Bankshall Street by Commerce and Industry Department	16,000
„ Contribution from Eastern Bengal and Assam Government to the Belgachhia Veterinary College	28,000
„ Provincialisation of Dhaka Canal	12,000
„ Net charges of Inland Labour Transport in Bengal payable from the Provincial Revenues of Eastern Bengal and Assam	10,000
„ Increased remuneration to the Solicitor to Government ...	36,000
„ Stoppage of free supply of materials by the Central Press, Calcutta, to the Provincial Presses	2,000
„ Transfer of the control of Government House and Hastings House Gardens to the Superintendent, Royal Botanic Garden	11,000

	Rs.
For Grant to the Bibliotheca Indica Fund of the Asiatic Society	3,000
,, Relieving the Municipalities of Police charges ...	21,000
,, Sanitary improvements	4,50,000
	26,13,000
Less contribution to Imperial for pensions of Calcutta Police constables paid in the United Provinces of Agra and Oudh	21,000
Reduction of interest on capital outlay on Irrigation Major Works	3,45,000
	3,66,000
Net additional grant ...	22,47,000

10. The expenditure of the year is estimated at Rs. 5,49,98,000, exceeding the income by Rs. 7,42,000. This estimated excess of expenditure over income has had to be met at present by reduction of the balance, and is more than covered by (*a*) the grants on account of grain compensation allowance which are estimated at 8½ lakhs, and (*b*) the provision of Rs. 1,56,000 for Famine Relief charges. The estimate also includes provision for special non-recurring charges, the more important of which are shown below :—

II.—Statement of non-recurring charges.

	Rs.	Rs.
Land Revenue—		
Sundarbans reclamation	50,000	
Initial outlay in keeping up records-of-rights, Orissa	1,50,000	
Grant for improvements in record-rooms ...	20,000	
Reproduction and correction of maps	21,000	
		2,41,000
Registration—		
Purchase of new furniture for Sub-Registrars' Offices	3,000	
		3,000
Forests—		
Survey of Sundarbans forests	20,000	
Completion of steam-launch *Harrier* for Sundarbans forests	14,000	
		34,000*
General Administration—		
Pay and establishment of Controller of Office System	19,000	
		19,000
Jails—		
Acquisition of land for the extension of jails ...	10,000	
		10,000
Ports and Pilotage—		
Second cruiser for the Sandheads ...	5,47,000	
Purchase of marine stores for ditto ...	40,000	
		5,87,000
Education—		
For improvements in the Presidency College ...	20,000

Establishment for strengthening the Patna and the Cuttack Medical Schools	5,000	
Lump provision for Sanitary improvements ...	4,50,000	
		4,76,000

	Rs.	Rs.
Scientific and other Minor Departments—		
Recurring cost of experimental farms	25,000	
Annual grant for Fraserganj farm	3,000	
Ditto Kalimpong farm	5,000	
Maintenance of Government gardens in and near Calcutta and Sambalpur	45,000	
Provincialization of Inland Labour Transport Fund	19,000	
Improvement of Silk Industry	12,000	
		1,09,000
Total		14,26,000

12. The only change of any importance, which has been made in the classification of accounts, is the abolition, under the orders of the Imperial Government, of the adjusting head of Contributions between Provincial and Local. Hitherto all grants to the District Boards and the District Road Committees have been adjusted under Contributions: now these will be shown under the various service heads: thus grants for education will be shown under Education, those for roads under Civil Works, &c. The details of these grants are shown below :—

	Rs.
Education—(net grants, i.e., in addition to receipts from ferries, pounds, &c., which were localized on the introduction of the Local Self-Government Act)	5,51,000
Medical	14,000
Land Revenue	31,000
Provincial Rates	1,000
Police	1,000
Scientific and other Minor Departments	9,000
Miscellaneous	17,000
Civil Works	12,76,000
Total ...	19,00,000

13. Appendix C shows the transactions of the District Boards and District Road Committees, the figures in the column of estimates representing those passed by the Commissioners of Divisions.

PART II.—Detailed remarks on the Budget for 1908-09.

RECEIPTS.

14. *Land Revenue.*—The total collections under this head in 1906-07 amounted to Rs. 2,89,04,871; and the estimate for 1908-09, as passed by the Government of India, is Rs. 2,99,50,000, against Rs. 2,94,50,000, the revised estimate for 1907-08. The estimate includes Rs. 9,42,000 for recoveries of survey and settlement charges, against Rs. 8,00,000 provided in the revised estimates for 1907-08.

15. The estimated Provincial share of Land Revenue is arrived at as follows:—

	Estimate, 1908-09. Rs.
Gross Land Revenue	2,99,50,000
Deduct estimated collections from Government Estates (wholly Provincial)	33,70,000
Deduct recoveries of Survey and Settlement charges (wholly Imperial)	9,42,000
Total Deduction ...	43,12,000

	Estimate, 1908-09.
	Rs.
Net amount divisible between Imperial and Provincial funds	2,56,38,000
Provincial share of above (one-half)	1,28,19,000
Add collections from Government Estates as above ...	33,70,000
Total Provincial ...	1,61,89,000
Add adjustments as in Appendix A	31,21,000
Total Provincial share ...	1,93,10,000

16. *Stamps*.—The actual receipts in 1906-07 were Rs. 1,47,06,698. The actuals in the first eleven months of the current year, exclusive of those from unified stamps used as receipt stamps, show an increase of Rs. 9,14,000 over those in the corresponding period of last year. The share of those stamps creditable under this head is Rs. 4,70,000, and the total revised estimate for the current year has been passed for Rs. 1,56,50,000. Allowing for a progressive increase of 6 lakhs, the estimate for 1908-09 has been placed at Rs. 1,62,50,000. The Provincial share is one-half, and amounts to Rs. 78,25,000 in 1907-08, and Rs. 81,25,000 in 1908-09.

17. *Excise*.—The revenue from Excise for 1907-08 was estimated at Rs. 1,68,00,000. The actuals of 1906-07 amounted to Rs. 1,60,81,392, while the figures for the first ten months of 1907-08 show an increase of Rs. 8,59,000 over the actuals of the corresponding period of the preceding year. The revised estimate for the current year has therefore been passed for Rs. 1,70,00,000; and allowing for a progressive increase of 5 lakhs, the estimate for next year has been placed at Rs. 1,75,00,000. The Provincial share (one-half) amounts to Rs. 85,00,000 and Rs. 87,50,000, respectively.

18. *Provincial Rates*.—The actual collections of Public Works cess in 1906-07 amounted to Rs. 34,91,170, and the estimate for the current year was Rs. 35,75,000. The receipts in the first ten months of the current year, however, show an increase of Rs. 81,000 over those of the corresponding period of last year, owing mostly to the collection of arrears due for the year 1906-07, and the revised estimate for 1907-08 has accordingly been placed at Rs 35,50,000. The estimate for next year is Rs. 36,15,000. Under "General Rates for the management of private estates" the estimate is Rs. 1,57,000 against Rs. 1,50,000, the revised estimate for 1907-08. The increase is due partly to the inclusion of certain new estates which have now come under management. The total estimate for next year is therefore Rs. (36,15,000+1,57,000=) 37,72,000.

19. *Assessed Taxes*.—The budget estimate of receipts from Income-tax for 1907-08 was Rs. 50,80,000. The actual collections in the first ten months of the year amounted to Rs. 42,87,000. For the remaining two months of the year the receipts have been taken at Rs. 7,88,000, and the revised estimate has been placed at Rs. 50,75,000. The estimate for next year allows for an increase of Rs. 1,50,000, and stands at Rs. 52,25,000. The Provincial share (one-half) amounts to Rs. 26,13,000.

20. *Forests*.—The total receipts under this head for 1908-09 are estimated at Rs 12,20,000 against Rs. 11,80,000, the budget estimate for 1907-08, and Rs. 10,65,859, the actuals of 1906-07. It is expected that there will be an increase in the sale of timber in Singhbhum and the Sundarbans. The Provincial share is one-half, and amounts to Rs. 6,10,000.

21. *Registration*.—The budget estimate under this head for 1907-08 was Rs. 11,90,000. The collections during the first ten months of the current year show an increase of Rs. 84,000 over those of the corresponding period of the preceding year; and as the actuals of 1906-07 were Rs. 12,25,432, the revised estimate has been placed at Rs. 13,40,000, while the estimate for 1908-09 has been passed for Rs. 14,20,000, after providing for a normal increase of Rs. 80,000 over the revised estimate for the current year. The increase in the current year is attributed to the increased number of registrations on account of high prices of food-grains. The receipts of this Department are wholly Provincial.

22. *Interest.*—The estimate of loans as passed by the Government of India provides for a return of Rs. 5,67,000, thus:—

	Rs.
Interest on advances to cultivators	2,77,000
„ on drainage and embankment advances	33,000
„ on loans to land-holders	17,000
„ „ to Municipalities and District Boards, etc. ...	1,89,000
Miscellaneous accounts	51,000
Total ...	5,67,000

23. *Law and Justice.—Courts of Law.*—The actuals of last year amounted to Rs. 5,73,507, and the revised estimate for the current year has been taken at Rs. 5,80,000, with reference to the actuals of the first ten months of the year. During the current year there has been a falling off under "General Fees, Fines and Forfeitures," but this is not expected to continue, and the receipts for next year have been estimated at Rs. 5,97,000.

24. *Jails.*—The estimate under this head is Rs. 12,70,000 against Rs. 11,80,000, the revised estimate for 1907-08, and Rs. 12,07,552, the actuals of 1906-07.

25. *Police.*—The estimate under this head amounts to Rs. 1,40,000 against Rs. 1,49,000, the revised estimate for 1907-08, and Rs. 1,38,965, the actuals of 1906-07. The revised estimate includes the sale-proceeds of Government promissory notes held in deposit on account of a building for the use of the Superintendent of Police, Chitpur.

26. *Ports and Pilotage.*—This is a new head adopted to show separately the transactions in the Civil Department connected with the administration of ports, coast lights and other cognate matters, as distinguished from those of the Navy, which have hitherto been grouped together in the public accounts under "Marine." The transactions of the Navy alone which are under the administrative control of the Army and Military Supply Departments, will continue to be shown under "Marine." The actual receipts in the Civil Department under this head in 1906-07 amounted to Rs. 15,39,308, and the budget estimate for 1907-08 was Rs. 15,90,000. This has been reduced to Rs. 15,00,000 in the revised estimate, with reference to the actuals of the first ten months of the current year. The estimate for next year has been passed for Rs. 16,00,000, as larger receipts are expected in view of the steady increase of trade and from the sale-proceeds of two pilot vessels *Alice* and *Fame* which it is intended to sell on the arrival of a second pilot steamer.

27. *Education.*—The estimate under this head is Rs. 5,73,000 against Rs. 5,60,000, the revised estimate for 1907-08, and Rs. 5,60,354, the actuals of 1906-07. The increase is expected from the sale-proceeds of manufactured articles at Reformatory Schools and at the Civil Engineering College workshops, and under "Miscellaneous."

28. *Medical.*—The estimate under this head is Rs. 2,54,000 against Rs. 2,50,000, the revised estimate for 1907-08, and Rs. 2,43,355, the actuals of 1906-07. The increase is chiefly from paying patents in Lunatic Asylums and Hospitals.

29. *Scientific and other Minor Departments.*—The total receipts for 1908-09 are estimated at Rs. 3,12,000 against Rs. 2,64,000, the revised estimate for 1907-08, and Rs. 2,82,319, the actuals of 1906-07. The budget includes larger provision for the sale of sulphate of quinine, larger receipts under Agriculture owing to the opening of new experimental stations at Sabaur and Bankipore, and Rs 10,000 on account of Inland Labour Transport, which was hitherto shown under "Local," but will be provincialized from the 1st April 1908.

30. *Receipts in aid of Superannuation.*—The budget estimate for 1908-09 has been passed for Rs. 54,000 against Rs. 4,07,000, the revised estimate for 1907-08, and Rs. 62,729, the actuals of 1906-07. The revised estimate includes Rs. 3,53,000, being the sale-proceeds of the investment of the Calcutta Police Superannuation Fund now abolished.

31. *Miscellaneous.*—The actuals in 1906-07 amounted to Rs. 6,50,180. The estimate for 1907-08, amounting to Rs. 5,85,000, has been reduced to Rs. 5,04,000 in the revised estimate, owing to smaller receipts from unclaimed deposits and to the abolition of banking fees and fees for audit of accounts of Municipal and Excluded Local Funds with effect from the 1st April 1907. The

estimate for 1908-09 has been passed for Rs. 5,40,000, as larger deposits are expected to lapse to Government in that year.

32. *Irrigation, Major Works (Direct Receipts).*—The estimate under this head amounts to Rs. 24,18,000 against Rs. 23,50,000, the revised estimate for the current year. The actuals of last year were Rs 22,97,528. The increase during 1907-08 is due chiefly to a large demand for water from the Orissa Canals in the past *kharif* season, to the expansion of *rabi* irrigation from the Sone Canals and to the realization of arrear demand for 1906-07 in the case of the Dhaka Canal. The increase during 1908-09 is due principally to extension of *rabi* irrigation anticipated from the Sone Canals during 1907-08.

33. *Irrigation, Minor Works and Navigation in charge of the Public Works Department.*—The budget estimate for 1907-08 is Rs. 5,81,000 which has been raised to Rs. 7,00,000 in the revised estimate, chiefly owing to larger navigation receipts from the Calcutta and Eastern Canals. The estimate for next year is Rs. 6,22 000.

34. *Civil Works in charge of the Public Works Department.*—The receipts for 1908-09 are estimated at Rs. 3,00,000 against Rs. 2,75,000 and Rs. 3,60,000 being, respectively, the sanctioned and revised estimates for 1907-08. The revised estimate includes larger receipts from rent of buildings and the Calcutta strand bank and maidan.

EXPENDITURE.

35. *Refunds and Drawbacks.*—The estimate for 1908-09 is Rs. 1,27,000, against Rs. 1,30,000 and Rs. 1,44,000, the budget and revised estimates, respectively, for 1907-08. The estimate for 1908-09 is based generally on the average actuals of the last three years, excluding special payments. The increase in the revised estimate for 1907-08 is due to a special refund of advance fees for country spirit shops and to the adjustment of a write-back of Rs. 7,000 credited as Land Revenue in 1906-07 on account of Government land acquired for the Public Works Department.

36. *Assignments and Compensations.*—The estimate for 1908-09 is Rs. 70,000, against Rs. 62,000, the sanctioned estimate for 1907-08 and Rs. 69,324, the actuals of 1906-07. The estimate is based on the actuals of the past three years.

37. *Land Revenue.*—The total Provincial expenditure for next year is estimated at Rs. 37,85,000, against Rs. 37,75,000, the budget estimate for the current year, as shown below :—

	Actuals.			Estimate.	
	1904-05. Rs.	1905-06. Rs.	1906-07. Rs.	1907-08. Rs.	1908-09. Rs.
(1) Charges of District Administration ...	22,41,000	23,76,000	25,80,000	27,99,000	29,67,000
(2) Charges on account of Land Revenue collections	1,000	1,000	1,000	1,000	1,500
(3) Management of Government estates ...	4,07,000	4,76,000	4,58,000	4,68,000	3,68,000
(4) Survey and Settlement ...	3,41,000	2,92,000	4,03,000	2,71,000	2,40,500
(5) Land Records and Agriculture	81,000	83,000	85,000	2,36,000	2,80,000
Lump deduction ...	...	...	..	...	—72,000
Total ...	30,71,000	32,28,000	35,27,000	37,75,000	37,85,000

The increase under (1) is due to provision having been made for (*a*) the full sanctioned strength of Deputy Magistrates ; (*b*) an increase in the number of probationary Deputy Collectors and Sub-Deputy Collectors ; (*c*) an increase under travelling allowances of officers ; (*d*) provision for the payment of grain compensation allowances for the whole year; and (*e*) an increased grant for the management of private estates, owing to certain new estates having come under Government management. The increase under (5) is due to the reorganization of the office of the Director of Land Records and to the special provisions of Rs. 15,000 for the reproduction of maps (Balasore and Puri) and Rs. 33,000 for the maintenance of record-of-rights in Balasore.

The decrease under (3) is due to a smaller grant having been made for reclamation work in the Sundarbans.

38. *Stamps.*—The estimate for 1908-09 is Rs. 4,83,000, against Rs. 4,41,000, the budget grant for 1907-08. The increase is chiefly under "Stamp paper supplied from Central Stores," the estimate under this head being Rs. 2,56,000, against Rs. 2,35,000, the budget estimate for 1907-08, and partly also under discount on sale of stamps. The provincial share (one-half) is Rs. 2,41,000.

39. *Excise.*—The total expenditure for 1908-09 is estimated at Rs. 8,00,000, against Rs. 7,70,000, the budget grant for 1907-08. The increase is due to the provision for (*a*) grain compensation allowance for the whole year; (*b*) rent of a new ganja gola at Kinderdine's Lane; (*c*) giving partial effect to the proposed reorganization of the department, and (*d*) two additional Deputy Inspectors at the Presidency. The Provincial share (one-half) is Rs. 4,00,000.

40. *Provincial Rates.*—The estimate for 1908-09 is Rs. 52,000, against Rs. 62,000, the revised estimate for 1907-08, and Rs. 55,784, the actuals of 1906-07. The decrease in the estimate is under Valuation and Revaluation charges, and is in accordance with actual requirements. The details are shown in Appendix B.

41. *Assessed Taxes.*—The estimate for 1908-09 is Rs. 1,57,000, against Rs. 1,52,000, the budget grant for 1907-08, and Rs. 1,50,230, the actuals of 1906-07. The increase is most largely due to the provision made for grain compensation allowance. The Provincial share (one-half) is Rs. 79,000.

42. *Forests.*—The total expenditure for 1908-09 is estimated at Rs. 6,20,000, against Rs. 7,30,000, the budget estimate for 1907-08. The decrease is chiefly due to smaller provision for survey of the Sundarbans Reserved Forests and for continued reduction in departmental works in timber and other produce removed from forests by Government agency. The Provincial share (one-half) is Rs. 3,10,000.

43 *Registration.*—The estimate for 1908-09 is Rs. 7,70,000, against Rs. 7,00,000, the budget grant for 1907-08 as shown below:—

	Actuals.			Budget.	
	1904-05.	1905-06.	1906-07.	1907-08	1908-09.
	Rs.	Rs.	Rs.	Rs.	Rs.
Superintendance ...	55,000	51,000	49,000	47,000	47,000
District charges ...	5,33,000	5,57,000	5,94,000	6,53,000	7,53,000
Lump deduction ...	...	...	...	...	(—)30,000
Total ...	5,88,000	6,08,000	6,43,000	7,00,000	7,70,000

The increase under this head is due to the reorganization of the department, which has been gradually given effect to. The budget for 1908-09 includes larger grants for (*a*) grain compensation allowance, (*b*) temporary establishment and (*c*) rent of offices and purchase of furniture, and (*d*) a lump provision of Rs. 20,000 for increase of pay of establishment.

44. *General Administration.*—The total expenditure for the current year was originally estimated at Rs. 18,59,000, but in the revised estimate the figure has been raised to Rs. 18,96,000. The estimate for 1908-09 has been passed for Rs. 18,76,000. The budget includes provision for (*a*) renewal of furniture at the Lieutenant-Governor's residences on account of change of incumbent; (*b*) pay of an Assistant Secretary and larger establishment in the Legislative Department; (*c*) establishment for the extension of the Port Trust Audit; and (*d*) charges for the payment of grain compensation allowance for the whole year.

45. *Law and Justice—Courts of Law.*—The budget estimate under this head for 1907-08 was Rs. 74,19,000, but in the revised estimate this has been raised to Rs. 76,10,000, with reference to the actuals of the first ten months of the year. The estimate for 1908-09 has been passed for Rs. 76,75,000, which includes provision for (*a*) the re-organization of the English office of the Appellate Side of the High Court; (*b*) increase in the rate of contract allowance of the Government Solicitor on account of the special Solicitor to be stationed at Simla; (*c*) a Public Prosecutor and his establishment; (*d*) a larger grant for fees to Pleaders; (*e*) cost of typing Session Records required by Magistrates

and Public Prosecutors; and (*f*) payment of grain compensation allowance for the whole year.

46. *Jails.*—The estimate for 1907-08 was Rs. 24,09,000 against Rs 26,63,438 the actuals of 1906-07. The actuals of the first ten months of the current year show an increase of Rs. 21,000 as compared with the figures of last year, and the revised estimate for the year has accordingly been raised to Rs. 27,25,000. The increase is chiefly under Dietary charges on account of the unusually high prices of food-grains, and also, to a smaller extent, under allowances for the payment of grain compensation, and under Jail Manufactures owing to the higher prices paid for raw materials. The estimate for 1908-09 is Rs. 26,50,000, and includes the pay of a Forms and Jail Press Manager, and larger grants for Dietary charges, Miscellaneous Services and Supplies, owing to local requirements, and for the payment of grain allowances. It also contains a lump provision of Rs. 32,000 for the improvement of the warder service.

47. *Police.*—The following table compares the figures under this head:—

Heads.	Actuals.			1907-08.		1908-09.
	1904-05.	1905-06.	1906-07.	Budget.	Revised.	Budget.

Total ...	51,57,000	58,93,000	69,05,000	71,00,000	74,37,000	77,63,000

The actuals of the first ten months of the current year indicate that there will be a considerable excess under this head, and the revised estimate has been raised to Rs. 74,37,000. The estimate for next year has been placed at Rs. 77,63,000, which includes a lump provision of 4 lakhs for further reorganization of the Police Department, of which Rs. 40,000 has been provisionally allotted for Presidency Police and the balance Rs. 3,60,000 for District Police. Further details are shown in Appendix B.

48. *Ports and Pilotage.*—The budget provides for a total expenditure of Rs. 17,77,000, against Rs. 15,71,000, the sanctioned estimate for 1907-08. The budget for the current year includes Rs. 4,00,000 to meet part of the cost of a second steam cruiser for the Sandheads, while the estimate for next year includes Rs. 5,47,000, being the balance of the cost of the vessel, and Rs 40,000 for the purchase of marine stores, etc., for the same. A provision of Rs. 37,000 has also been made for establishment, mess and victualling allowances as the vessel is expected to arrive in the port of Calcutta in May next.

49 *Education.*—In order to give a correct idea of the growth of expenditure under Education it is necessary to show the disbursements both in the Provincial and District Fund Accounts, since most of the expenditure

under the latter is met from grants from the Provincial Revenues. The following table shows the charges since the year 1902-03 :—

(The figures are in thousands.)

	Accounts.					1907-08,		Budget, 1908-09.

The above table shows how rapidly the expenditure under this head has been increasing from year to year. The Provincial budget for 1908-09 includes the following items of expenditure:—

	Rs.
Auditor of Accounts of European Schools	7,000
Second Inspectress of Schools	6,000
Additional Deputy Inspectors	25,000
Additional Assistant Inspectors	10,000
Additional Sub-Inspectors	61,000
Assistant Sub Inspectors	23,000
Establishment for Inspectors, etc.	12,000
Lump provision for strengthening the staff of Government Colleges	25,000
Additional Demonstrators for the Physical and Chemical Laboratory, Civil Engineering College	3,000
New School at Karaya	4,000
For improvements in the Presidency College	20,000
Additional grants for furniture and apparatus in Government Colleges	16,000
Additional grants for workshop, equipment and electrical apparatus for the laboratories of several departments of the Civil Engineering College	36,000
Cost of proposed removal of the boys of Alipore Reformatory School to Hazaribagh	5,000

50. *Medical.*—The budget grant for next year is Rs. 27,80,000, against Rs. 22,64,000, the revised estimate for 1907-08 and Rs. 21,96,753, the actuals of 1906-07. The estimate includes a lump provision of Rs. 4,50,000 allotted by the Government of India for sanitary improvements with special reference to the prevention of plague, Rs. 21,000 for an additional Deputy Sanitary Commissioner and a new vaccine depôt at Ranchi, and Rs. 30,000 for a special Engineering Division and additional Medical Officers for making enquiries of a systematic and organized character as recommended by the Drainage Committee. It also includes a provision of Rs. 10,000 for the improvement of the pay and position of Civil Hospital Assistants, larger grants for diet of patients in hospitals, for the appointment of a whole-time Professor of Biology, and for a probationary Chemical Examiner and an Assistant Chemical Examiner.

51. *Political.*—The estimate for 1908-09 is Rs. 50,000, against Rs. 48,000, the revised estimate for 1907-08 and Rs. 41,248, the actuals of 1906-07.

52. *Scientific and other Minor Departments.*—The expenditure under this head is estimated at Rs. 12,78,000, against Rs. 10,50,000, the budget estimate for 1907-08 and Rs. 9,73,964, the actuals of 1906-07. Provision has been made in the budget for the following charges:—

	Rs.
Recurring cost of experimental farms	25,000
Annual grant for Fraserganj farm	3,000
Ditto Kalimpong farm	5,000
Maintenance of Government gardens in and near Calcutta ...	48,000
Provincialisation of Inland Labour Transport Fund ...	19,000
Lump provision for fittings and furniture of Agricultural College	50,000
Improvement of Silk industry	22,000
Purchase of cinchona bark	50,000
Rebuilding the office in the Darjeeling Botanic Garden ...	5,000
Additional Establishment for the revision of the District Gazetteers	14,000

53. *Superannuation.*—The charges under this head rise year after year, owing to the increase in the number of claims to pension. The estimate for 1908-09 is Rs. 26,81,000, against Rs. 25,97,000, the revised estimate for 1907-08 and Rs. 24,86,467, the actuals of 1906-07.

54. *Stationery and Printing.*—The estimate for 1908-09 is Rs. 12,92,000, against Rs. 13,66,000, the revised estimate for 1907-08 and Rs. 12,85,202, the actuals of 1906-07. The following table compares the figures:—

Heads.	Actuals.	Revised Estimate.	Budget Estimate.
	1906-07.	1907-08.	1908-09.
	Rs.	Rs.	Rs.
Stationery Office at the Presidency ...	63,563	65,000	69,000
Stationery purchased in the country ...	33,584	34,000	37,000
Government Presses	4,83,453	5,75,000	5,14,200
Printing at Private Presses ...	2,715	2,000	3,000
Stationery supplied from Central Stores ...	7,01,191	6,89,000	6,68,000
Refunds	696	1,000	800
Total ...	12,85,202	13,66,000	12,92,000

55. *Miscellaneous.*—The budget estimate under this head for 1907-08 was Rs. 3,70,000, but in the revised estimate this has been raised to Rs. 4,97,000. The increase is due to the purchase of a trawler in England in connection with the Fisheries enquiry, and to special refunds owing to the reduction in the rate of interest on the Howrah and Rajapur Drainage advances from 5 to 4 per cent., with retrospective effect, under Act II of 1902, and to the actual maintenance charges being found much less than the amount estimated at the time of their capitalization. The estimate for 1908-09 is Rs. 3,93,000, and includes Rs. 1,00,000 for the Fisheries enquiry and Rs. 17,000 for grants to District Boards for general purposes.

56. *Irrigation—Major Works (Working Expenses).*—The actual expenditure during 1906-07 was Rs. 11,88,907 and Rs. 11,04,000 was passed as the budget grant for 1907-08. During the year there were floods which necessitated larger expenditure on repairs. The maintenance charges were also high, and the revised estimate has now been placed at Rs. 13,49,000. The grant for 1908-09 has been passed for Rs. 12,75,000, which includes Rs. 50,000 for clearance of silt in the Midnapore Canal and Rs. 25,000 for the renewal of plant in the Dehri workshop, Sone Canals.

57. *Irrigation—Major Works—Interest on debt.*—The budget estimate for 1907-08 was Rs. 24,52,000, but owing to the reduction in the rate of interest on the productive portion of the debt in reference to the average incidence of interest actually paid in each year, the revised estimate for 1907-08 has been reduced to Rs. 21,23,000, and the budget estimate for 1908-09 has been placed at Rs. 21,24,000.

58. *Irrigation—Minor Works and Navigation in charge of the Public Works Department.*—The actual charges in 1906-07 were Rs. 19,06,731, while the budget grant for 1907-08 was Rs. 19,00,000. This included Rs. 27,000 on account of the balance of the cost of the suction dredger brought out from England, Rs. 3,00,000 for a canal to connect the Bhangore Canal with the Calcutta Canal and Rs. 1,28,000 as a reserve for unforseen requirements. The revised estimate for 1907-08 has been passed for Rs. 18,33,000, while the estimate for 1908-09 has been placed at Rs. 20,26,000. The budget includes Rs. 25,000 for raising the Pattamundi Canal flood bank, Rs. 2,01,000 for the Dhappa-Bamanghatta Canal, Rs. 2,30,000 for the Madaripur Bhil project, Rs. 45,000 for a new bridge in place of the existing one over the Circular Canal on the Barrackpore Road, and Rs. 1,60,000 for repairs to the breaches caused by floods in the embankments in the Midnapore district.

59. *Civil Works in charge of the Civil Department.*—The estimate for 1908-09 is Rs. 21,35,000. This includes provision for grants to Excluded Local Funds and Municipalities (Rs. 7,49,000), and to District Funds and District Road Funds (Rs. 12,76,000), which were hitherto adjusted under Contributions from Provincial to Local.

60. *Civil Works.*—The estimate of expenditure in charge of the Public Works Department for 1908-09 has been placed at Rs. 55,71,000, which is distributed thus:—

	Rs.
Original Works	29,37,400
Repairs	15,58,600
Establishment	10,00,829
Tools and Plant	74,171
Total ...	55,71,000

The allotment for Original Works includes the following grants:—

	Rs.
Surgical Block, Medical College, Calcutta	2,30,500
New Presidency Jail, Alipore	1,50,000
Purchase of Ross Distillery, Howrah	1,25,000
Agricultural College, Sabour	1,00,000
Double-storied Ward, Campbell Hospital	97,600
Paying Patients' Ward, General Hospital	49,000
Civil Court Buildings, Darbhanga	60,000
Double-storied Judge's Court, Arrah	50,000
Improvements in Sleeping Ward, Midnapore Jail ...	60,000
Leadsmen's Quarters, Kidderpore	99,000
Deputy Commissioner's Court, Angul	20,000
Treble Munsifi, Kushtia	30,000
Subdivisional Courts, Sassaram	30,000
New Zilla School, Chaibassa	30,000
Cholera Ward, Medical College	24,000
New Hospital in Purnea Jail	22,000
High Level Tista Valley Road	61,000
Cuttack-Sambalpur Road	35,000
Purchase of Duff's College for Calcutta Police	2,00,000
Subdivisional buildings, including Assistant Surgeon's quarters, Dhanbaid	40,000
Civil Courts, Cuttack	25,000
4th Block, Medical College	90,000
Patna College Scheme	40,000
Khulna Jail	30,000
Jessore Civil Courts	20,000
Total ...	17,18,100

Budget includes Rs. 20,700 for Primary Education and Rs. 63,748 for girls' schools besides Bethune School.

22.—Education—concld.

Heads.	1906-07.	1907-08.		1908-09.	Remarks.
	Actuals.	Sanctioned estimate.	Revised estimate.	Budget estimate.	
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
Government Schools, Special ...	3,97,670	5,95,000	3,86,000	7,15,000	Increase is due to larger grants for salaries owing to the reorganisation of the Educational Service; for larger grant for grain allowances and under dieting charges of the Reformatory Schools owing to high prices of food-grains. Budget includes Rs. 4,52,228 for primary education and Rs. 31,580 for female education. The decrease in the revised is due to non-utilization of the large portion of the grant for the construction of guru-training school buildings, which has been reproduced in the budget for next year.
Grants-in-aid	10,60,973	8,55,000	12,00,000	15,51,000	Budget includes Rs. 5,51,000 for grants to District Boards hitherto provided for under the adjusting head of Contributions from Provincial to Local. The balance is for ordinary grants by the Education Department including *viz.*, Rs. 1,89,708 for grants to primary schools, Rs. 1,56,000 for grants to girls' schools and Rs. 16,000 for hostels and mess-houses.
Scholarships	1,55,210	1,60,000	1,64,000	1,70,000	Budget includes provision for normal increase. It includes Rs. 17,200 for scholarships in primary schools and Rs. 2,000 for girls' schools.
Miscellaneous	1,06,547	1,09,000	78,000	75,000	The decrease is due to the transfer of the charges on account of rent of boarding-houses from this subhead to that of grants-in-aid. This has been necessitated by the transfer of the control over these hostels to the University.

Closing Balance	19,53,877	15,66,377	19,81,725	
GRAND TOTAL ...	96,35,311	86,13,377	83,71,709	

The Council was then adjourned to the 4th April, 1908.

CALCUTTA;
The 23rd March, 1908.

F. G. WIGLEY,
Secretary to the Bengal Council.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 25, 1908.

NOTICES TO MARINERS.

THE following Notices are published for general information.

R. E. CARTER,
Offg. Secy. to the Govt. of Bengal.

CALCUTTA, *the 24th March 1908.*

CHINA, SOUTH COAST.

Hongkong harbour—Position of Time-ball altered.

No. 112 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 255 of 1908), are republished:—

Particulars.—The time-ball is now dropped from a mast at the signal station on the summit of the hill, situated about one cable north-westward of Chinsalchui point, instead of as formerly from near the police-station on Kaulung point.

Position.—Lat. 22° 18′ N., long. 114° 10¼′ E.

Charts affected.—No. 1459, Hongkong harbour.
„ 3279, Hongkong waters, east.
„ 3280, Hongkong waters, west.
„ 1466, Hongkong.

Publications.—China Sea Directory, vol. III, 1904, page 74; and Supplement, 1907. List of Time Signals, 1908, page 18.

Authority.—Hydrographic Note, H. M. Surveying Vessel *Waterwitch*, 8th January 1908.

EASTERN ARCHIPELAGO—BORNEO, NORTH COAST.

South Banguey and Mallawallé Channels—Character of certain buoys altered.

No. 113 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 266 of 1908), are republished:—

Particulars.—The characters of the buoys marking Outer shoal, South Banguey channel and the shoals extending north-eastward from Billoan island, Mallawallé channel, have been altered, and they are now as follows:—

1. *Name.*—Outer shoal.

Position.—From the buoy, the north-west point of 60-feet islet bears S. 43° E., distant 5 miles, and the summit of Molleangan island N. 48° E.

Lat. 7° 2½′ N., long. 117° 0¼′ E.

Description.—Can-buoy, painted in red and white vertical stripes.

2. *Name.*—Billean dangers.

Position.—From the buoy, Billean island ▲ bears S. 40° W., distant 3¾ miles.
Lat. 6° 39½′ N., long. 117° 48¾′ E.

Description.—Can-buoy, painted in red and white vertical stripes.

Variation.—2° E.

Charts affected.—No. 948, Balábac strait.
„ 287, Gaya bay to Sandakan.
„ 1650, Mallawallé island to Lankayan.
„ 2576, Sulu archipelago, &c.

Publications.—China Sea Directory, vol. II, 1906, page 200.
Eastern archipelago, part I, 1902, pages 156, 164, 163.

Authority.—H. M. Surveying Vessel *Merlin*, Hydrographic Note, No. 2 of 1908.

PACIFIC OCEAN, NORTH—Sandwich islands, Hawaii.

Hilo bay—Buoys established.

No. 114 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 269 of 1908), are republished :—

Particulars.—The undermentioned buoys have been established in Hilo bay, Hawaii :—

a. A can buoy, marked "No. 5," in a depth of 7 fathoms, moored off the southern edge of Blonde reef, in a position from which the tower of the Roman Catholic church, Hilo, bears S. 44° W., distant 11½ cables, and the north point of Cocoa Nut island S. 34° E.

b. A conical buoy, marked "No. 2," in a depth of 6½ fathoms, moored off the northern end of the reef extending from Cocoa Nut island, in a position from which the tower of the Roman Catholic church bears S. 58° W., distant 11$\frac{1}{10}$ cables, and the north point of Cocoa Nut island S. 17° E.

Position.—Roman Catholic church, lat. 19° 43¾′ N., long. 155° 5½′ W.

Variation.—10° E.

Remarks.—The colour of these buoys is not stated.

Chart affected.—No. 1377, Harbours, &c,. in the Sandwich islands (Hilo bay.)

Publication.—Pacific islands, vol. III, 1900, page 199.

Authority.—Honolulu Notice, 21st November 1907 ; and H. B. M. Consul, Honolulu, 9th January 1908.

EASTERN ARCHIPELAGO—Java—Surabaya strait.

Ujung Panka—Buoy to be replaced by light-buoy.

No. 115 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 276 of 1908), are republished :—

Particulars.—The red conical buoy with staff and ball, marking the northern edge of the bank off Ujung Panka, north coast of Java, at the northern entrance to Surabaya strait, will be replaced by a light-buoy, painted white, and exhibiting a *white occulting* light *every twenty seconds*, thus :—

Light	...	...	... *Ten seconds.*
Eclipse	...	...	... *Ten seconds.*

Position.—Lat. 6° 51′ 30″ S., long. 112° 33′ 50″ E.

Remarks.—Further Notice will be given.

Charts affected.—No. 934, Surabaya, Bali, and Sapudi straits, &c.
„ 1654, Island of Java.

Publications.—Eastern Archipelago, part II, 1904, page 119 ; and Supplement, 1906.

Authority.—Hague Notice, No. 270, 1908.

JAPAN—KIUSIU—NAGASAKI APPROACH.

Kageno shima light—Colour altered—Red sectors.

No. 117 (first publication).—The following particulars relative to the above, issued by the British Admiralty (No. 288 of 1908), are republished :—

Particulars.—The colour of the light shown from Kageno shima lighthouse, Nagasaki approach, has been altered from red fixed to a *white fixed* light with two *red* sectors, showing as undermentioned :—

Position—Lat. 32° 42½′ N., long. 129° 49½′ E.
Sectors.—*White* from S. 77° E., through south, to S. 28° W.
Red from S. 28° W. to S. 55° W.
White from S. 55° W. to S. 67° W.
Red from S. 67° W. to S. 85° W.
White from S. 85° W., through west, to N. 5½° W.
From other directions, as formerly, the light is obscured.
Visibility.—10 miles.
Light Power—110 candles.
Remarks.—In other respects the light is unaltered.
Variation—4° W.
Charts affected.—No. 2815, Nagasaki harbour.
,, 2415, Approaches to Nagasaki harbour.
Publications.—List of Lights, part VI, 1907, No. 975.
Sailing Directions for Japan, &c., 1904, page 551.
Authority.—Tokyo, Department of Communications Notice, No. 18 of 1908.

BAY OF BENGAL—BURMA COAST.

Caution—Foul island—A newly discovered rock.

No. 118 (first publication).—A telegraphic communication, dated 21st March 1908, has been received from the officer in charge of the Marine Survey of India, intimating that a rock with 4 feet of water over it has been discovered in the following position :—

Lat. 18° 2′ N.
Long. 94° 15′ E.

Bearing from Foul island summit S. 81° E., distant 8½ miles.
Mariners are hereby warned.

NEW ZEALAND—SOUTH ISLAND.

Port Lyttelton—Leading lights established—East Pier light altered.

No. 107 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 245 of 1908) are republished :—

Particulars.—Lights have been placed on the leading beacons through the dredged channel, and the east pier light altered in port Lyttelton as follows :—

1. *Name.*—Rear light on Shag reef.
Position.—Lat. 43° 37½′ S., long. 172° 43½′ E.
Character.—*White fixed.*
2. *Name.*—Front light.
Position.—4$\frac{4}{10}$ cables N. 65° E. from rear light.
Character—Red fixed.
Remarks.—These two lights in line S. 65° W. lead through the dredged channel.
3. *Name.*—East pier head light (red).
Remarks.—This light is now obscured from N. 59° W., through west, to S. 59° W.

Variation.—17° E.
Chart affected.—No. 1999, Ports Lyttelton, &c.
Publications.—List of Lights, part VI, 1907, Nos. 1660, 1661, 1662. New Zealand Pilot, 1901, page 279; and Supplement, 1906.
Authority.—H.M.S. *Prometheus*, Hydrographic Note, No. 1, 1907.

CHINA SEA—TONG KING GULF.

Halong bay—Rock in approach.

No. 108 (second publication).—The following particulars relative to the above issued by the British Admiralty (No. 219 of 1908) are republished :—

Particulars.—A rock exists in the approach to Halong bay as follows:—

Position.—From the rock, Henriette point bears N. 11° W., distant 6 $\frac{1}{10}$ cables, and Orange island centre N. 58° E.
Lat. 20° 43½′ N., long. 107° 8½′ E.

Depth.—1½ fathoms.
Variation.—1° E.
Charts affected.—No. 1169, Approaches to port Courbet.
„ 1965, Kua Lacht to Kao Tao shan islands.
Publication.—China Sea Directory, vol. II, 1906, page 485.
Authority.—Paris Notice, No. 203, 1908.

BAY OF BENGAL—CHITTAGONG COAST.

Karnafuli river—Depth of water in the channels.

No. 109 (second publication).—The Port Officer, Chittagong, has given notice that the following depth of water was found in the channels by soundings taken on the 5th March 1908 :—

	Ft.
Track No. I—Outer bar—	
Disc on diamond	11
Track No. II—Inner bar—	
Disc on diamond	13
Batten beacon on pillar	13
Track No. III—	
Triangle on cross and ball	18
Track No. IV—Guptakhally crossing—	
Tripod on cross and ball and diamond	19

BAY OF BENGAL—BURMA COAST.

Kyaukpyu harbour approach—Sunken wreck, no danger.

No. 110 (second publication).—With reference to Notice to Mariners No. 278, dated 7th June 1907, issued by this office, regarding a wreck outside Kyaukpyu, the Bombay Government has given notice (No. 18 of 1908) that the Officer in charge of the Marine Survey of India closely sounded over the position of the reported wreck and found no danger.

The above Notice to Mariners may now be cancelled.

This Notice affects the following Admiralty Chart :—Elephant Point to Cheduba Strait, No. 821 : Also, Bay of Bengal Pilot, 1901, page 263.

BAY OF BENGAL—BURMA COAST.

Akyab—Non-existence of the reported shoal.

No. 111 (second publication).—With reference to Notice to Mariners No. 359, dated 29th July 1907, issued by this office, regarding a reported shoal outside Akyab, the Bombay Government has given notice (No. 19 of 1908) that the Officer in charge of the Marine Survey of India has closely sounded a ten-mile area over the position of the reported shoal of six fathoms, but found no less water than shown on the chart.

This Notice affects the following Admiralty Charts :—Coconada to Bassein River, No. 829; Elephant Point to Cheduba Strait, No. 821 : Also, Bay of Bengal Pilot, 1901, page 255, and Supplement 1903, page 10.

JAPAN—YEZO (HOKUSHU), WEST COAST—YESASHI ANCHORAGE.

Kamome jima light—Amended arc of visibility.

No. 98 (third publication).—The following particulars relative to the above issued by the British Admiralty (No. 197 of 1908) are republished:—

Particulars.—Kamome jima light, Yesashi anchorage, is visible over the arc given below, and not over the arc previously stated.
Position.—Lat. 41° 52′ 10″ N., long. 140° 6′ 25″ E.
Arc of Visibility.—From N. 13° E., through east and south, to N. 77° W.
Variation.—6° W.
Chart affected.—No. 2975, Yesashi anchorage on.
Publications.—List of Lights, Part VI, 1907, No. 1123.
Sailing Directions, Japan, etc., 1904, page 703.
Authority.—Tokyo Notice, No. 1114, 1907.

JAPAN—YEZO (HOKUSHU), WEST COAST.

Ishikari light—Character altered.

No. 99 (third publication).—The following particulars relative to the above issued by the British Admiralty, (No. 198 of 1908) are republished:—

Particulars.—On 1st January 1908, Ishikari lighthouse on the west coast of Yezo having been reconstructed, the light would be altered from white fixed to a light of the following character:—
Position.—On western side of Ishikari river entrance.
Lat. 43° 15′ 25″ N., long. 141° 21′ 10″ E.

35	Feudatory States, Orissa.*	.....	.....	.....	Rainfall nil. Outturn of paddy estimated to average 11 annas in Pal Lahera, Athmallik and Daspalla, mustard 8 annas in Hindol, *kalai* 8 annas and sugarcane 16 annas in Daspalla. Sugarcane, *biri* and sweet potatoes being harvested in Narsingpur, gram in Baramba, *mung* in Ranpur, wheat in Athmallik and castor in Bonai. Gram and *mung* in Daspalla and Narsingpur, castor in Athmallik, sweet potatoes in Narsingpur, wheat in Daspalla and *mung* in Athgarh in fair condition. Agricultural stock, fodder and water sufficient. Price of rice varying from 7 seers in Athgarh and 7½ seers in Athmallik to 12 seers in Nayagarh and 14 seers in Pal Lahera.

* The report is for the week ending the 14th March 1908.

General Summary.—The Jessore district in the Presidency Division received 3 inches of rain, and there was a slight fall in some parts of Orissa. Rain is wanted round Calcutta, but would damage the *rabi* in Bihar and destroy the prospects of the *mahua* crop in Chota Nagpur. The prospects of the *rabi* sown in the Patna and Bhagalpur Divisions are good: in the Burdwan Division fair, but in the Presidency Division bad. The *dalua* rice in Cuttack and Balasore is suffering from want of moisture. In Bihar and Bhagalpur the harvesting of *rabi* is in full swing and lancing of poppy and sowing of indigo is going on In Chota Nagpur the *mahua* is being gathered, and the crop is a good one. Stocks in Nadia, Murshidabad, Balasore and Palamau are reported insufficient. Except in one or two isolated instances the tendency is for prices to fall. Cattle-disease is reported from Nadia, Gaya, Bhagalpur, Purnea, Puri, Hazaribagh, Ranchi and Palamau. There is scarcity of fodder and water in parts of Burdwan, Balasore, Birbhum and Murshidabad. Scarcity is apprehended in Nadia, Jessore, Shahabad and Palamau, and test-works are open in Bankura, Ranchi, Hazaribagh and the Orissa districts. Sixteen thousand one hundred and eighty-four persons were in receipt of gratuitous relief, of whom 14,400 are in Orissa. The numbers on test-works are 4,167.

Dept. of Agriculture, Bengal,
Calcutta, the 24th March 1908.

W. R. GOURLAY,
Offg. Director of Agriculture, Bengal.

SUMMARY OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN BENGAL AND IN EASTERN BENGAL AND ASSAM FOR THE MONTH OF JANUARY 1908.

DURING the first week of the month skies were clear or only lightly clouded in North-East India and Orissa. Temperature was normal in Eastern Bengal and Assam, but in the Province of Bengal, while day temperature was normal, night temperature was in defect in parts, especially in the south-western districts. At the beginning of the second week a depression which began to develop over Baluchistan coalesced with another advancing from Persia and entered Sind on the 9th. It then moved eastwards into the Bay of Bengal on the 12th and disappeared about the 14th. This depression gave general and moderately heavy rain on the 12th, except in the Upper Brahmaputra Valley, general rain on the Bengal and Orissa coasts and local rain in Eastern Bengal and Assam on the 13th and light general rain on the Bengal and Orissa coasts on the 14th. Skies were almost clear on the 10th, 15th and 16th, but were lightly to heavily clouded on the remaining days of the second week. The rainfall was the cause of cooler weather than usual in the day time from the 12th to the 16th, while the presence of cloud gave unusually high night temperature on the 12th and 13th. The third week of the month presented no features of much meteorological interest. Skies were cloudy or foggy in the northern districts and generally clear elsewhere. At the beginning of the last week of the month a shallow area of low pressure began to move across Northern India from Sind on the 24th, reaching the area under report on the 26th. It gave a few light falls of rain, chiefly in Assam, on the 27th, 28th and 29th. During this week skies were almost clear except during the period of rainfall. Temperature was in defect in Bihar on the 24th; it then rose and an excess was shewn in parts on the 27th and 28th, which disappeared next day and was replaced by a defect on the 30th in the south-west of the division.

Summary of temperature.—Generally temperature was normal in Eastern Bengal and Assam, but unusually cool weather prevailed in the province of Bengal. The lowest temperature observed during the month was 35·3 at Darbhanga, and the highest was 87·9 at Cuttack.

The following table gives the summary of the temperature of each of the seven meteorological divisions of the Provinces of Bengal and of Eastern Bengal and Assam for the month of January 1908:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.					
	Highest observed during month.	Lowest observed during month.	*Average for month.*			Average mean of month above or below normal mean of month.
			Of highest of each day.	Of lowest of each day.	Of mean for each day.	
Bengal	85·3	43·0	75·7	52·2	63·9	— 2·4
Eastern Bengal, North	83·1	37·0	72·6	50·1	61·4	— 1·4
Eastern Bengal, South	82·3	43·4	75·6	53·1	64·4	— 1·0
Bihar	83·9	35·3	70·7	47·4	59·0	— 3·1
Orissa	87·0	44·6	77·7	55·7	66·7	— 3·3
Chota Nagpur*	86·3	36·0	73·7	47·8	60·7	— 2·5
Assam	82·0	43·1	73·3	50·4	61·9	— 0·8

* Purulia not included.

Summary of rainfall.—The rainfall work of the Province has been placed in the hands of the Director of Agriculture, Bengal, and the usual data regarding the actual and normal rainfall during the month are published by that officer. A short table, however, is attached to this report, giving the rainfall recorded during the month at the head-quarters of the various districts of the Province. Rather less rain than usual fell in Assam, but in all other parts of the division rainfall was in excess, especially in Orissa, where nearly six times the normal quantity was recorded.

Actual and average rainfall and departure from normal for the month of January 1908.

The total fall from 1st January to 21st March 1908		0·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·46

The mean pressure, temperature, etc., are deduced from the traces of the Kundsen's Barograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

⌓, dew; ≡, fog; t, thunder; ∨, lightning.
